Auditor's report

AUDITOR'S REPORT ON THE ANNUAL ACCOUNTS Fiscal year closing on 31 October 2016

MULTI UNITS FRANCE Mutual Fund (SICAV)
UCITS ESTABLISHED IN THE FORM OF A VARIABLE
CAPITAL INVESTMENT COMPANY WITH COMPARTMENTS
Governed by the [French] Monetary and Financial Code

Management Company
LYXOR INTERNATIONAL ASSET MANAGEMENT
17, cours Valmy
92800 PUTEAUX

Ladies, Gentlemen,

As part of our assignment for your board of directors, we present to you our report for the fiscal year ending 31 October 2016, on:

- the verification of the annual financial statements of the UCITS established in the form of a variable capital investment company with compartments SICAV MULTI UNITS FRANCE, as appended to this report;
- the bases of our assessments;
- the specific verifications and information required by law.

The annual accounts have been closed under the responsibility of the management company. It is our duty to express an opinion on these accounts based on our audit.

1. OPINION ON THE ANNUAL ACCOUNTS

We have conducted our audit in accordance with the generally accepted auditing standards in France; these standards require that we apply the procedures necessary to obtain reasonable assurance that the annual financial statements do not include any significant misstatements. An audit involves verifying, by sampling and other selection methods, the elements underlying the amounts and information contained in the annual financial statements. It also involves assessing the implemented accounting principles, the significant estimates that have been used, and assessing the overall presentation of the financial statements. We feel that the collected evidence is sufficient and appropriate for the basis of our opinion.

We certify that, in accordance with French accounting rules and principles, the annual financial statements are truthful and in order, and present a fair picture of the operating profits and losses for the past fiscal year, as well as the financial situation and assets of the UCITS established in the form of a variable capital investment company with compartments at the end of said fiscal year.

2. JUSTIFICATION OF THE ASSESSMENTS

In application of the provisions of article L.823-9 of the Commercial Code relative to the justification of our assessments, we bring the following information to your attention:

1. Over-the-counter financial contracts:

The over-the-counter financial contracts comprising the portfolio are assessed using the methods described in the note of the appendix relative to the accounting rules and methods.

Société d'expertise comptable inscrite au tableau de l'ordre de Paris - Ile de France. Société de commissariat aux comptes membre de la compagnie régionale de Versailles. Société par Actions Simplifiée au capital de 2 510 460 €. Siège social : 63, rue de Villiers 92200 Neuilly-sur-Seine. RCS Nanterre 672 006 483. TVA n° FR 76 672 006 483. Siret 672 006 483 00362. Code APE 6920 Z. Bureaux : Bordeaux, Grenoble, Lille, Lyon, Marseille, Metz, Nantes, Nice, Paris, Poitiers, Rennes, Rouen, Strasbourg, Toulouse.

**MULTI UNITS FRANCE Mutual Fund (SICAV)**

The prices are calculated by the counterparties of the contracts and approved by the management company in application of financial models. The mathematical models used are based on external data and market assumptions. On the basis of the elements that led to the determination of the used assessments we assessed the approach implemented by the management company.

2. Other financial instruments of the portfolio:

The assessments we made concerned the appropriateness of the accounting principles and the reasonable nature of the significant estimates used.

The assessments so made are in line with our approach for the audit of the annual accounts taken as a whole and therefore contributed to the formation of our opinion as it is expressed in the first part of the report.

3. SPECIFIC INFORMATION AND AUDIT PROCEDURES

We have also conducted the auditing procedures required by law, in accordance with the applicable professional standards in France.

We have no observations to report regarding the truthfulness or consistency with the annual accounts of the information included in the annual report and in the documents sent to the shareholders concerning the company's situation and annual accounts.

LYXOR UCITS ETF MSCI INDONESIA

Compartments / feeder	LYXOR UCITS ETF MSCI INDONESIA is a compartment of the MULTI UNITS FRANCE mutual fund
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification: International equities.

At least 60% of the LYXOR UCITS ETF MSCI INDONESIA Compartment (“the Compartment”) is permanently exposed in a foreign equity market or in equity markets of several countries, possibly including the French market.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

For the equities classes C-EUR and C-USD: Capitalisation of all the amounts available for distribution.

For the equities classes D-EUR and D-USD: The management company reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The Compartment’s management objective is reproduce the evolution of the MSCI Indonesia Net Total Return index (the “Benchmark Indicator”) listed in USD, regardless of its evolution, while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the MSCI Indonesia Net Total Return index.

The anticipated level of the ex-post tracking error under normal market conditions is 0.1%.

Benchmark indicator:

The Benchmark Indicator is the MSCI Indonesia Net Total Return index (net dividends reinvested).

The Benchmark Indicator is an equities index that is calculated and published by the supplier of international indices, MSCI.

The Benchmark Indicator is comprised exclusively of Indonesian securities (Indonesia) and retains the fundamental characteristics of the MSCI indices, namely: adjustment of the market capitalisation of the securities included in the Benchmark Indicator on the basis of the free-float and sector-based classification according to the GICS (Global Industry Classification Standard) classification.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator’s components are available at the following Internet site: www.msci.com

The monitored performance is that of the Benchmark Indicator in USD.

Benchmark Indicator revision and composition

The objective of the Benchmark Indicator is to represent 85% of the capitalization adjusted on the basis of the float, of each group of industries of the Indonesian market.

By targeting 85% of the representativeness of each industry group, the Benchmark Indicator measures 85% of the market capitalization of the Indonesian market, while also reflecting the market’s economic diversity.

The MSCI indices are also reviewed quarterly in order to take into account the changes that impact the capitalisation of a value (number of securities and float) or its sectorial classification. The main changes in the capital structure of a company may be implemented in real time (merger and acquisition, large rights issues or initial public offerings, etc.).

The exact composition and the revision rules of the Benchmark Indicator are published by NYSE-Euronext and available on the Internet site: www.msci.com

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Benchmark Indicator publication

The Benchmark Indicator is available through Reuters and Bloomberg.

Reuters code: .MIID00000NUS

Bloomberg code: M0ID

The Benchmark Indicator's closing price is available on the Internet site: www.msibarra.com

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The equities held as assets by the Compartment will notably be equities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com.

The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment can use up to 20% of its assets to acquire equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets), including the small capitalisation markets.

The aforementioned equities will be chosen on the basis of criteria:

Of eligibility, in particular:

- Subordination to the main market indices or to the Benchmark Indicator,
- Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
- Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent),

Of diversification, notably:

- Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
- Geographical area,
- Sector.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

The investment in undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net assets.

The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

None. The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

The manager is prohibited from receiving cash guarantees.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Compartment may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

Received financial guarantees will not be sold, reinvested or pledged.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the management company. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Risk related to the exposure to Emerging markets

The Compartment's exposure to emerging markets results in a greater risk of loss than would exist in the event of investments carried out within traditional developed markets. In particular, the operating and supervision rules in an emerging market may differ from the standards applicable to developed markets. The exposure to emerging markets notably results in: increased volatility of the markets, lower transaction volumes, the risk of economic and/or political instability, an unstable or uncertain fiscal and/or regulatory regime, risks of closing of the markets, of government restrictions on foreign investments, and interruption or restriction of the convertibility or transferability of any of the currencies comprising the reference index.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of Future Financial Instrument ("FFI") traded over-the-counter with Société Générale or with any other counterparty.

In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for FFI) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Risk related to low diversification of the Benchmark Indicator

The Benchmark Indicator to which the investors are exposed covers a given region, area or strategy and therefore does not necessarily allow for as broad a diversification of the assets as would be the case of an index that is exposed to several regions, sectors or strategies. The exposure to a Benchmark Indicator with such low diversification can result in greater volatility than in more diversified markets. Nevertheless, the diversification rules resulting from the UCITS standards always apply to the Compartment's underlyings.

- Liquidity risk on a place of listing

The ETF's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Risk that the management objective may only be partially reached,

indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Risk linked to a transaction involving securities comprising the Benchmark Indicator

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Exchange risk linked to the Benchmark Indicator

The compartment is exposed to the exchange risk insofar as the underlying securities comprising the Benchmark Indicator may be listed in a currency other than the currency of the Benchmark Indicator or be derived from securities listed in a currency other than the currency of the Benchmark Indicator. The fluctuations of exchange rates could therefore negatively affect the Benchmark Indicator followed by the compartment.

- Exchange risk linked to the D EUR and C EUR equity classes

The aforesaid equity classes are exposed to an exchange risk given that they are listed in a currency other than that of the Benchmark Indicator. Consequently, the net asset value of the aforesaid equity classes can decline despite an increase of the value of the Benchmark Indicator, as a result of exchange rate fluctuations.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber.

An investor subscribing to this Compartment wishes to obtain an exposure to the Indonesian equity market.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.
- Creation date of the Multi Units France mutual fund: 4 March 2002.
- Compartment approval date by the AMF (Financial Markets Authority): 23 June 2011.
- Compartment creation date: 4 July 2011.

Activity report

The net asset value of the unit C-EUR of the LYXOR UCITS ETF MSCI INDONESIA Compartment shows an evolution of 32.70%* over the fiscal year and stands at EUR 121.4668 on 31/10/2016, resulting in the fund's performance being equal to 21.47% since inception.

The net asset value of the unit C-USD of the LYXOR UCITS ETF MSCI INDONESIA Compartment shows an evolution of 31.69%* over the fiscal year and stands at USD 91.7545 on 31/10/2016, resulting in the fund's performance being equal to -8.25% since inception.

The fund replicates the performance of the MSCI INDONESIA Net USD index, listed in US dollars (USD), representative of the performance of the market of large and mid-capitalisations, listed in Indonesia.

This index has shown an evolution of 31.84% over the fiscal year. As the C-EUR class is not valued in the index currency, the evolution of their net asset value is subject to an exchange risk. Over the fiscal year, the EUR decreased by 0.76% compared to the USD.

This gap between the annual performance of the UCITS and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,
- The costs for accessing the local markets of the securities of the replicated indexing,
- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the MSCI INDONESIA Net USD index, the compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the MSCI INDONESIA Net USD index.

The equities held as assets by the Compartment will notably be equities that make up the MSCI INDONESIA Net USD index, as well as other European equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The fund's risk and yield profile has been classed as category 7 given its exposure to the Benchmark Index.

On 31/10/2016, the tracking error reached the level of 0.0341% for the Compartment. The level of the tracking error for the period was of 0.1%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

The counterparty for the Index Linked Swap obtained by the fund is: Société Générale.

** The figures referring to past performance relate to past periods and are not a reliable indicator of future results.*

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's website or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

In accordance with Articles L.533-22-1 and D. 533-16-1 of the [French] Monetary and Financial Code, subscribers are informed of the fact that the CIU does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy.

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02.

Assessment rules

The MF's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of undertakings for collective investment in transferable securities.

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the day of calculation of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The management company nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the day of calculation of the net asset value. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the day of calculation of the net asset value. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of the holding of an EMTN, it will be valued on the basis of a market price given by the financial instrument's counterparty.

The management company independently carries out a verification of this valuation.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the management company's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities of UCITS operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of UCITS operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the management company's responsibility.

The exchange rates used for the assessment of financial instruments drafted in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM Reuters fixing the day of closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

Equities classes D-EUR, C-EUR, D-USD and C-USD

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the management company.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	maximum 0.55% per year including tax
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Accounting currency

The Compartment's accounting is carried out in euros.

Indication of accountancy changes declared to each of the bearers individually

- Occurred change: None.
- Future change: None.

Indication of other changes declared to each of the bearers individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

For the equities classes C-EUR and C-USD: Capitalisation of all the amounts available for distribution.

For the equities classes D-EUR and D-USD: The management company reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

appendix

LYXOR UCITS ETF MSCI Indonesia (the “fund”) is in no way sponsored, endorsed, sold or promoted by MSCI Inc. Distribution per unit on capital gains and losses (including advances)	-	-	-	-	-
Distribution per unit (including advances)*	-	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) ⁽¹⁾	-	-	-	-	-
Unit capitalisation *	30.29	-10.65	24.65	-32.13	-0.56

* The amounts of the distribution per unit, the unit capitalisation and the tax credits are indicated in the accounting currency of the UCITS. The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

⁽¹⁾ In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.

LYXOR UCITS ETF THAILAND (SET50 NET TR)

rapport
annuel
COMPARTIMENT DE LA SICAV MULTI UNITS FRANCE

FISCAL YEAR ENDING ON: 31.10.2016

Compartments / feeder	LYXOR UCITS ETF THAILAND (SET50 NET TR) is a compartment of the MULTI UNITS FRANCE mutual fund
Financial manager by delegation	LYXOR INTERNATIONAL ASSET MANAGEMENT 17, cours Valmy - 92987 Paris La Défense Cedex.
Depository	SOCIÉTÉ GÉNÉRALE 75886 Paris Cedex 18.
Statutory auditors	PRICEWATERHOUSE COOPERS AUDIT 63, rue de Villiers - 92208 Neuilly-sur-Seine Cedex.

INFORMATION ON THE INVESTMENTS AND MANAGEMENT

Classification:

International equities.

At least 60% of the LYXOR UCITS ETF THAILAND (SET50 NET TR) Compartment (hereafter the “Compartment”) is permanently exposed in a foreign equity market or in equity markets of several countries, possibly including the French market.

The Compartment is an UCITS ETF type index fund.

Terms of determination and allocation of amounts available for distribution:

For the equities classes C-EUR and C-USD: Capitalisation of all the amounts available for distribution.

For the equities classes D-EUR and D-USD: The management company reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

Management objective:

The Compartment’s management objective is an exposure to the Thai equities market by reproducing the evolution of the SET50 NET Total Return index (the “Benchmark Indicator “), listed in Thai Baht (THB), while insofar as possible minimizing the tracking error between the Compartment’s performances and those of the SET50 NET Total Return index.

The anticipated level of the ex-post tracking error under normal market conditions is 0.10%.

Benchmark indicator:

The Benchmark Indicator is the SET50 NET Total Return index, (net dividends reinvested).

The Benchmark Indicator is the benchmark index of the Stock Exchange of Thailand. It is comprised of the 50 main securities listed in the Stock Exchange of Thailand, in terms of market capitalisation adjusted on the basis of the free-float and the liquidity.

The SET50 NET Total Return index was initially created in 1950 to serve as an underlying asset for derivative instruments. It is maintained by the Stock Exchange of Thailand. The SET's Index Committee is responsible for specifying the index’s selection criteria, its components and methodology.

An exhaustive description and the complete methodology for the construction of the Benchmark Indicator as well as information on the composition and relative weights of the Benchmark Indicator’s components are available at the following Internet site: www.set.or.th

The monitored performance is that of the Benchmark Indicator.

Benchmark Indicator revision and composition

The Benchmark Indicator is reviewed twice a year in June and in December with effective date on the first business day of the following day.

The exact composition and the revision rules of the Benchmark Indicator are published by MSCI and available on the Internet site: www.set.or.th

The rebalancing frequency indicated above does not affect the cost of implementing the Investment Strategy.

Benchmark Indicator publication

SET50 NET Total Return index publication:

The SET50 Net Total Return index is calculated daily using the index’s closing price.

The SET50 NET Total Return index is available:

Reuters code: .SET50NETRI

Bloomberg code: SET50NTR

The Benchmark Indicator's closing price is available on the Internet site: www.set.or.th

Investment strategy:

1. Strategy employed

The Compartment will comply with the investment rules dictated by the European directive no. 2009/65/EC dated 13 July 2009.

In pursuit of the greatest possible correlation with the performance of the Benchmark Indicator, the Compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the Compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the Benchmark Indicator.

The equities held as assets by the Compartment will notably be equities that make up the Benchmark Indicator, as well as other international equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The basket of assets held may be adjusted daily such that its value will generally be at least 100% of the net assets. When necessary, this adjustment will be made to ensure that the counterparty risk arising from the aforementioned swap contract will be entirely neutralized.

Information relative to (i) the updated composition of the basket of the balance sheet assets held in the Compartment's portfolio and (ii) the market value of the future exchange operation entered into by the Compartment are available on the page dedicated to the Compartment on the Internet site www.lyxoretf.com.

The update frequency and/or the update date of the aforesaid information is also indicated on the same page of the aforesaid Internet site.

As part of the management of its exposure, the Compartment can use up to 20% of its assets to acquire equities from a single issuing entity. This 20% limit can be increased to 35% for a single issuing entity when this proves to be justified by exceptional conditions within the market, notably when certain securities are heavily dominant and/or in the event of high volatility of a financial instrument and of securities from an economic sector represented by the Benchmark Indicator, in particular in the event of a public offering affecting one of the securities making up the Benchmark Indicator or in the event of a significant restriction of liquidity affecting one or more financial instruments making up the Benchmark Indicator.

2. Balance sheet assets (excluding integrated derivatives)

The Compartment may hold, in compliance with the ratios contained in the regulation, international equities (from all economic sectors, listed on all markets), including the small capitalisation markets.

The aforementioned equities will be chosen on the basis of criteria:

- of eligibility, in particular:
- Subordination to the main market indices or to the Benchmark Indicator,
- Liquidity (minimal thresholds applied to mean daily volumes of transactions and to the equity market capitalisation),
- Rating of the country of the issuer's head office (requirement of a minimal threshold in S&P rating or equivalent),
- of diversification, notably:
- Issuer (application of ratios applicable to the eligible assets of a UCITS, as specified in Art. R214-21 of the [French] Monetary and Financial Code),
- Geographical area,
- Sector.

For more information on the abovementioned eligibility and diversification criteria, in particular the list of the eligible indices, investors can visit the following Internet site: www.lyxoretf.com.

The investment in undertakings for collective investment in transferable securities ("UCITS") that comply with Directive 2009/65/EC is limited to 10% of the net assets.

The manager will not invest in units or equities of AIF or other investment funds that were formed under a foreign law. As part of these investments, the Compartment can subscribe to units or equities of UCITS managed by the management company, or a company with which it is linked.

When the Compartment receives collateral in the form of securities, subject to the terms of section 8 below, it acquires full title to these securities and they are therefore included among the balance sheet assets to which it has full title.

As part of a future optimisation of the Compartment's management, the manager reserves the right to use other instruments within the limits of the regulations in order to achieve the management objective.

3. Off-balance sheet assets (derivative instruments)

The Compartment will have recourse to index-linked swaps negotiated over-the-counter, exchanging the value of the Compartment's assets (or of any other financial instrument or asset held by the Compartment, where appropriate) against the value of the Benchmark Indicator (as described in part 1 of this section).

As part of a future optimisation of the Compartment management, the manager reserves the right to use other instruments within the limits of the regulations, such as to reach the management objective, for example including forward financial instruments other than index-linked swaps.

In compliance with its best execution policy, the management company considers that the Société Générale is the counterparty that generally makes it possible to obtain the best possible result with these future financial instruments. These future financial instruments (including index-linked swaps) can therefore be negotiated with the Société Générale, without prior open competition involving several counterparties.

The counterparty of the aforesaid future financial instruments (the "Counterparty") will have no discretionary power regarding the composition of the Compartment's investment portfolio, nor regarding the underlying assets of the future financial instruments.

4. Securities with integrated derivatives

None.

5. Deposits

Up to a maximum of 20% of its net assets, the Compartment can have recourse to deposits with lending institutions belonging to the same group as the depositary in order to optimise its cash management.

6. Cash borrowing

Up to a maximum of 10% of its net assets, the Compartment may have temporarily recourse to loans.

7. Temporary securities acquisition and sale operations

None. The manager will not have recourse to temporary acquisition and/or sale operations involving securities.

8. Financial guarantees

In all cases in which the Compartment is subject to a counterparty risk as a result of the deployed investment strategy, notably in the event of the Compartment's use of forward swap contracts traded over the counter, the Compartment can receive securities that are considered as guarantees in order to reduce the counterparty risk related to these operations. The portfolio of received guarantees can be adjusted each day in order for its value to be greater than or equal to the level of the counterparty risk borne by the Compartment in most cases. The objective of this adjustment will be to ensure that the level of counterparty risk borne by the Compartment is totally neutralized.

The manager is prohibited from receiving cash guarantees.

Any financial guarantee received by the Compartment will be provided to the Compartment in full ownership and listed in the Compartment's account opened in the books of its depositary. As such, the received financial guarantees will be listed amongst the Compartment's assets.

Any financial guarantee received by the Compartment within this framework must comply with the criteria defined by the prevailing laws and regulations, notably in terms of liquidity, valuation, credit quality of the issuers, correlation, risks related to the management of securities, and applicability. The received guarantees must, in particular, comply with the following conditions:

- (a) Any received guarantee must be of high quality, very liquid and traded on a regulated market or in a multilateral trading system with transparent pricing, in order to be sold quickly at a price close to the prior valuation;
- (b) They must be valued at least on a daily basis and assets showing strong price volatility must not be accepted as guarantee except in case of the application of a sufficiently cautious discount;
- (c) They must be issued by an entity that is independent of the counterparty and must not be highly correlated with the counterparty's performances;
- (d) They must be sufficiently diversified in terms of countries, markets and issuers, with a maximum exposure per issuer of 20% of the Compartment's net asset value;
- (e) The Compartment's Management Company must be able to fully realise them at any time, without consultation with the counterparty nor approval of the latter.

Notwithstanding the condition specified in (d) above, the Compartment may receive a basket of financial guarantees with an exposure to a single issuer corresponding to more than 20% of its net asset value provided that:

such received financial guarantees are issued by (i) a Member State, (ii) one or more of a Member State's local authorities, (iii) a country that is not a Member State (iv) a public international organization to which one or more Member States belong; and such financial guarantees consists of at least six different issues of which none exceeds 30% of the Compartment's assets.

In compliance with the aforesaid conditions, the guarantees received by the Compartment can include:

- (i) Liquid assets or equivalents, notably including short-term bank assets and money market instruments;
- (ii) Bonds issued or guaranteed by an OECD Member State, by its local public authorities or by institutions and supranational bodies of a Community, regional or worldwide nature, or by any other country, provided that conditions (a) to (e) (above) have been fully met;
- (iii) Equities or units issued by money market funds that calculate a daily net asset value and that have a rating of AAA or equivalent;
- (iv) Equities or units issued by UCITS investing primarily in bonds/equities as indicated in points (v) and (vi) below;
- (v) Bonds issued or guaranteed by first-class issuers, offering suitable liquidity;
- (vi) Equities admitted to trading or traded on a regulated market of an EU Member State, on a stock market of an OECD Member State or on a stock market of another country provided that conditions (a) to (e) (above) have been fully met and that these equities are included within a first-class index.

Policy related to discounts:

The Compartment's management company will apply a margin to the financial guarantees received by the Compartment. The applied margins will notably depend on the following criteria:

- Nature of the asset received as guarantee;
- Maturity of the asset received as guarantee (if applicable);
- Rating of the issuer of the asset received as guarantee (if applicable).

Reinvestment of received guarantees:

Received financial guarantees will not be sold, reinvested or pledged.

Risk profile:

The shareholder's money will primarily be invested in financial instruments selected by the financial manager. These instruments will be subject to the vagaries of the markets.

Through the Compartment, the shareholder is primarily exposed to the following risks:

- Equity risk

An equity price can vary upward or downward, and it notably reflects the changing risks related to the issuing company or the economic situation of the corresponding market. The equity markets are more volatile than the rate markets, in which it is possible, over a given period and with equal macroeconomic conditions, to estimate the earnings.

- Risk related to the exposure to Emerging markets

The Compartment's exposure to emerging markets results in a greater risk of loss than would exist in the event of investments carried out within traditional developed markets. In particular, the operating and supervision rules in an emerging market may differ from the standards applicable to developed markets. The exposure to emerging markets notably results in: increased volatility of the markets, lower transaction volumes, the risk of economic and/or political instability, an unstable or uncertain fiscal and/or regulatory regime, risks of closing of the markets, of government restrictions on foreign investments, and interruption or restriction of the convertibility or transferability of any of the currencies comprising the reference index.

- Counterparty risk

The Compartment is exposed to the risk of bankruptcy, payment default or any other type of default of any counterparty with which it has entered into a contract or transaction. It is particularly exposed to the counterparty risk resulting from its use of Future Financial Instrument ("FFI") traded over-the-counter with Société Générale or with any other counterparty.

In compliance with the UCITS regulations, the counterparty risk (whether this counterparty is the Société Générale or any other entity) cannot exceed 10% of the total value of the Compartment's assets by counterparty.

In case of a Counterparty's default, the contract relating to FFIs can be terminated early. The Compartment will then make every effort to achieve its management objective by signing, if relevant, another contract relating to FFIs with a third party counterparty, under the market conditions prevailing at the time of the occurrence of this event.

The realisation of this risk can notably have impacts on the Compartment's ability to achieve its management objective, in particular the replication of the Benchmark Indicator.

When Société Générale is involved as a counterparty of the FFIs, conflicts of interest can arise between the Compartment's Management Company and the FFI's counterparty. The Management Company manages these conflict of interest risks by setting up procedures intended to identify and limit them, and to ensure their equitable resolution, if relevant.

- Capital loss risk

The invested capital is not guaranteed. The investor consequently runs the risk of loss of the capital. The entire or part of the invested amount may not be recovered, notably should the performance of the Benchmark Indicator be negative over the investment period.

- Liquidity risk (primary market)

Should the Compartment (or one of its counterparties for FFI) adjust its exposure and the markets related to this exposure are then limited, closed or subject to significant purchase / sale price discrepancies, the value and/or liquidity of the Compartment could be negatively affected. Should low volumes of exchanges result in an inability to carry out transactions linked to the replication of the Benchmark Indicator, this can also have consequences on the processes related to the subscription, conversion or redemption of equities.

- Risk related to low diversification of the Benchmark Indicator

The Benchmark Indicator to which the investors are exposed covers a given region, area or strategy and therefore does not necessarily allow for as broad a diversification of the assets as would be the case of an index that is exposed to several regions, sectors or strategies. The exposure to such index with low diversification can result in greater volatility than in more diversified markets. Nevertheless, the diversification rules resulting from the UCITS standards always apply to the Compartment's underlyings.

- Liquidity risk on a place of listing

The ETF's equity price can deviate from its indicative net asset value. The liquidity of the Compartment's equities on a place of listing can be affected by any suspension that could notably be due to:

- i) Suspension or stoppage of the calculation of the Benchmark Indicator, and/or
- ii) Suspension of the market(s) of the underlyings used by the Benchmark Indicator, and/or
- iii) The impossibility for a given place of listing to obtain or calculate the Compartment's indicative net asset value, and/or
- iv) A market maker's violation of the rules applicable to this marketplace, and/or
- v) A failure of this marketplace's IT or electronic systems.

- Risk that the management objective may only be partially reached, indeed, no asset or financial instrument will allow an automatic and continuous replication of the benchmark indicator, notably should one or more of the following risks arise:

- Risk related to the use of derivative instruments

In order to reach its investment objective, the Compartment uses FFI negotiated over-the-counter, that can notably take the form of swap contracts that will allow it to obtain the performance of the Benchmark Indicator. These FFIs can result in a series of risks on the level of the FFIs that notably include: counterparty risk, event affecting the hedging, event affecting the Benchmark Indicator, risk related to the tax regime, risk related to the regulations, operational risk and liquidity risk. These risks can directly affect a FFI and can result in the adjustment and/or early termination of the FFI transaction, which could affect the Compartment's net asset value.

- Risk related to a change of the tax regime

Any change to the tax legislation in any of the countries in which the Compartment is established, authorised for marketing or listed can affect the tax treatment of the investors. In this case, the Compartment's manager assumes no liability relative to investors with regard to the payments having to be made to any competent tax authority.

- Risk related to a change of the tax regime affecting the underlyings

Any change of the tax legislation applicable to the Compartment's underlyings can affect the Compartment's tax treatment. Consequently, in case of divergence between the anticipated tax treatment and the one actually applied to the Compartment (and/or to its counterparty in the FFI), the Compartment's net asset value may be affected.

- Risk related to regulations

In case of change of the regulations in any country in which the Compartment is established, authorised for marketing or listed, the processes for the subscription, conversion and redemption of the equities may be affected.

- Risk related to the regulations applicable to the underlyings

In case of change of the regulations applicable to the Compartment's underlyings, the Compartment's net asset value can be affected, as can the processes for the subscription, conversion and redemption of the equities.

- Risk related to events affecting the Benchmark Indicator

In case of events affecting the Benchmark Indicator, the manager may, under the conditions and limits of the applicable legislation, have to suspend the subscription and redemption of Compartment equities. The calculation of the Compartment's net asset value can also be affected.

If the event persists, the Compartment's manager will decide on measures having to be adopted, which can have an impact on the Compartment's net asset value.

"Events affecting the Benchmark Indicator" are understood to mean the following situations:

- i) The Benchmark Indicator is considered to be incorrect or not reflective of the market's actual evolution,
- ii) The Benchmark Indicator is definitively discontinued by its supplier,
- iii) The supplier of the index is incapable of providing the level or value of the said Benchmark Indicator,
- iv) The supplier of the index makes a significant change to formula or calculation method of the Benchmark Indicator (other than a minor modification such as the adjustment of the underlyings used with this Benchmark Indicator or of the respective weightings between its various components), that cannot be effectively replicated by the Compartment at a reasonable cost,
- v) One or more components of the Benchmark Indicator becomes non-liquid, with the listing being suspended on an organised market, or components negotiated over-the-counter (such as bonds, for example) become non-liquid,
- vi) The Benchmark Indicator's components are impacted by transaction costs relative to the execution, delivery versus payment or specific fiscal constraints, without these costs being reflected in the Benchmark Indicator's performance.

- Risk linked to a transaction involving securities comprising the Benchmark Indicator

Should the issuer of a security underlying the Benchmark Indicator undertake an unanticipated review of a securities transaction ("ST"), that contradicts a prior and official announcement that had resulted in a valuation of the ST by the Compartment (and/or in a valuation of the ST by the Compartment's counterparty in a future financial instrument), the Compartment's net asset value may be affected, notably should the actual treatment of the ST by the Compartment differ from the ST's treatment in the methodology used by the Benchmark Indicator.

- Exchange risk linked to the equity class

For C-USD and D-USD equity classes:

The aforesaid equity classes are exposed to an exchange risk given that they are listed in a currency other than that of the Benchmark Indicator.

Consequently, the net asset value of the aforesaid equity classes can decline despite an increase of the value of the Benchmark Indicator, as a result of exchange rate fluctuations.

The exchange rate use for the valuation of the equity classes is the USD/THO (Baht onshore) exchange rate applicable to local investors, which can vary from the USD/THB (Baht offshore) exchange rate applicable to foreign investors.

For C-EUR and D-EUR equity classes:

The aforesaid equity classes are exposed to an exchange risk given that they are listed in a currency other than that of the Benchmark Indicator.

Consequently, the net asset value of the aforesaid equity classes can decline despite an increase of the value of the Benchmark Indicator, as a result of exchange rate fluctuations.

The exchange rate use for the valuation of the equity classes is the EUR/THO (Baht onshore) exchange rate applicable to local investors, which can vary from the EUR/THB (Baht offshore) exchange rate applicable to foreign investors.

Eligible subscribers and typical investor profile:

The Compartment is open to any subscriber wishing to be exposed to the Thai equities market.

The amount that it is reasonable to invest in this Compartment depends on each investor's personal situation. To determine this amount, the investor must take into account his/her personal wealth and/or estate, cash requirements at the present and for five years, but also his/her desire to take risks or, on the contrary, to prefer a cautious investment. It is also highly recommended to sufficiently diversify one's investments so as to avoid an exposure only to this Compartment's risks.

Investors are therefore recommended to study their individual situations with their usual estate management advisers.

The minimum recommended investment duration is greater than 5 years.

For more details, the complete prospectus can be obtained by requesting it from the management company.

- The net asset value is available from the head office of LYXOR INTERNATIONAL ASSET MANAGEMENT. The Compartment's complete prospectus and the latest annual and periodic documents are sent within one week of the bearer's written request, submitted to LYXOR INTERNATIONAL ASSET MANAGEMENT, 17, cours Valmy - 92800 Puteaux - France.
- Creation date of the Multi Units France mutual fund: 4 March 2002.
- Compartment approval date by the AMF (Financial Markets Authority): 23 June 2011.
- Compartment creation date: 4 July 2011.

Activity report

The net asset value of the unit C-EUR of the LYXOR UCITS ETF THAILAND (SET50 NET TR) Compartment shows an evolution of 9.47%* over the fiscal year and stands at EUR 162.0406 on 31/10/2016, resulting in the fund's performance being equal to 62.04% since inception.

The net asset value of the unit C-USD of the LYXOR UCITS ETF THAILAND (SET50 NET TR) Compartment shows an evolution of 8.63%* over the fiscal year and stands at USD 122.4014 on 31/10/2016, resulting in the fund's performance being equal to 22.40% since inception.

The fund replicates the performance of the SET50 net TRI index, listed in Thai Baht (THB), representative of equities of the 50 more important companies, listed on the Thai stock exchange.

This index has shown an evolution of 7.33% over the fiscal year. As the C-EUR and C-USD classes are not valued in the index currency, the evolution of their net asset value is subject to an exchange risk. Over the fiscal year, the EUR decreased by 2.36% compared to the THB, the USD decreased by 1.60% compared to the THB.

This gap between the annual performance of the UCITS and that of its Benchmark Index can be explained by the result of the various parameters listed below:

- The operating and management fees as well as the external management fees payable to the management company,
- The costs for accessing the local markets of the securities of the replicated indexing,
- The costs or gains related to the instruments used as part of the replication of the indexing.

In pursuit of the greatest possible correlation with the performance of the SET50 Net TRI index, the compartment will employ an indirect replication method, which means that it will enter into one or more OTC swap contracts enabling it to achieve its investment objective. These swap contracts will serve to exchange (i) the value of the compartment's assets, which will consist of cash and/or balance sheet assets (excluding any securities received as collateral), for (ii) the value of the securities that underlie the SET50 Net TRI index.

The equities held as assets by the Compartment will notably be equities that make up the SET50 Net TRI index, as well as other European equities, from all economic sectors, listed on all markets, including the small capitalisation markets.

The fund's risk and yield profile has been classed as category 6 given its exposure to the Benchmark Index.

On 31/10/2016, the tracking error reached the level of 0.0325% for the Compartment. The level of the tracking error for the period was of 0.1%.

The discrepancy between the target tracking error and the actual tracking error was not significant which shows a compliance with the TE objective set at the beginning of the fiscal year.

The counterparty for the Index Linked Swap obtained by the fund is: Société Générale.

** The figures referring to past performance relate to past periods and are not a reliable indicator of future results.*

Regulatory information

Transfer commission (not audited by the auditor)

None.

Provisions for providing the investors with the various documents and reports relative to the management company's voting policy and its implementation.

The "voting policy" document, the report from the management company on the conditions whereby it exercised the voting rights of the CIU that it manages and the information relative to the vote on each resolution can, pursuant to article 322-75, 322-76 and 322-77 of the AMF [Financial Markets Authority] General Regulations, be consulted either on the management company's website or at its head office (upon request).

Overall risk of the Compartment

The management company's method for measuring the overall risk of the Compartment: the method chosen is the commitment method.

ESG criteria

In accordance with Articles L.533-22-1 and D. 533-16-1 of the [French] Monetary and Financial Code, subscribers are informed of the fact that the CIU does not simultaneously take into account the social, environmental and governance quality criteria in its investment policy.

1. Accounting rules and methods

The annual accounts are presented in the form required by Regulation ANC 2014-01 that repealed the amended CRC Regulation 2003-02.

Assessment rules

The MF's assets are assessed in compliance with the applicable laws and regulations, and more particularly with the rules defined in regulation no. 2014-01 of the Accounting Regulatory Committee dated 14 January 2014 relative to the chart of accounts of undertakings for collective investment in transferable securities.

The financial instruments negotiated on a regulated market are assessed at the closing price on the day before the calculation date of the net asset value. When these financial instruments are negotiated on several regulated markets at the same time, the chosen closing price is the one of the regulated market in which they are primarily negotiated.

However, in the absence of significant transactions on a regulated market, the following financial instruments are assessed using the following specific methods:

- Negotiable debt securities ("NDS") having a residual life upon acquisition that is less than or equal to 3 months are assessed with a straight-line extension over the residual lifespan of the difference between the acquisition value and the redemption value. The financial manager nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan at acquisition is greater than 3 months but of which the residual lifespan on the net asset value closing date is equal to or less than 3 months, are assessed by means of a linear distribution, over the residual lifespan, of the difference between the last adopted current value and the reimbursement value. The financial manager nevertheless reserves the possibility of assessing these securities at the actual value in case of particular sensitivity to market risks (rates, etc.). The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer;
- NDS, of which the residual lifespan on the net asset value closing date is greater than 3 months, are assessed at their current value. The chosen rate is that of the equivalent security issues allocated to the risk margin related to the issuer.
- Firm future financial instruments negotiated on organised markets are assessed at the clearing price on the day before the net asset value calculation date. Conditional future financial instruments negotiated on organised markets are assessed at the market value on the day before the net asset value calculation date. Over-the-counter firm or conditional future financial instruments are assessed at the price given by the financial instrument's counterparty. They are presented in the off-balance sheet on the basis of the nominal value defined in the contract.

In the event of the holding of an EMTN, it will be valued on the basis of a market price given by the financial instrument's counterparty.

The financial manager independently carries out a verification of this valuation.

- Deposits are assessed at their nominal value, plus any related interest that has accrued.
- Subscription warrants, cash certificates, promissory notes and mortgage notes are assessed at their probable negotiation value, under the financial manager's responsibility.
- Temporary acquisitions and sales of securities are assessed at the market price.
- Units and equities in Undertakings for Collective Investment in Transferable Securities operating under French law are assessed at the last net asset value known on the calculation date of the Compartment's net asset value.
- Units and equities of AIF operating under foreign law are assessed at the last unit net asset value known on the calculation date of the Compartment's net asset value.

Financial instruments negotiated on a regulated market for which the price has not been determined or for which the price has been corrected are assessed at their probable negotiation value, under the financial manager's responsibility.

The exchange rates used for the assessment of financial instruments denominated in a currency other than the Compartment's reference currency are the exchange rates disseminated by WM/Reuters fixing the day of the closing of the Compartment's net asset value.

Posting method for the trading fees

The chosen method is that of included fees.

Posting method of incomes from fixed income securities

The chosen method is that of the collected coupon.

Valuation methods for off-balance sheet commitments

Off-balance sheet operations are valued at the commitment value.

The commitment value for firm futures contracts is equal to the price (in the currency of the Compartment) multiplied by the number of contracts multiplied by the face value.

The commitment value for conditional operations is equal to the price of the underlying security (in the currency of the Compartment) multiplied by the number of contracts multiplied by the delta multiplied by the underlying face value.

The commitment value for the swap contracts is equal to the contract's nominal amount (in the currency of the Compartment).

Operation and management fees

Equities classes D-EUR, C-EUR, D-USD and C-USD

These fees include all of the fees invoiced directly to the Compartment, except for the transaction fees. The transaction fees include intermediation fees (brokerage, stock market tax, etc.) and the transaction commission which, if relevant, may notably be collected by the custodian and the financial manager.

For this Compartment, the following fees can be added to the operation and management fees (see summary Table hereinafter):

- Outperformance commissions: these commissions reward the management company when the Compartment has exceeded its objectives and are therefore invoiced to the Compartment;
- Transaction commissions invoiced to the Compartment.

For more details on the fees actually invoiced to the Compartment, refer to the Statistical Part of the Key Investor Information Document "KIID".

Fees invoiced to the Compartment	Basis	Schedule, rate
Management fees and external management fees payable to the portfolio management company (CAC, Depository, distribution, lawyers) including tax ⁽¹⁾	Net assets	maximum 0.45% per year including tax
Outperformance commissions	Net assets	None
Transactions commissions	Collection on each transaction	None

(1) including all fees excluding transaction fees, outperformance commissions and fees related to investments in UCITS.

Accounting currency

The Compartment's accounting is carried out in euros.

Indication of accountancy changes declared to each of the bearers individually

- Occurred change: None.
- Future change: None.

appendix

Indication of other changes declared to each of the bearers individually *(Not certified by the auditor)*

- Occurred change: None.
- Future change: None.

Indication and justification of the changes to estimates and application provisions

None.

Indication of the nature of the errors corrected during the fiscal year

None.

Indication of the rights and conditions attached to each category of equities

For the equities classes C-EUR and C-USD: Capitalisation of all the amounts available for distribution.

For the equities classes D-EUR and D-USD: The management company reserves the right to capitalise and/or distribute all or part of the result, one or more times each year. The realised net capital gain will be capitalised.

appendix

The Compartment LYXOR UCITS ETF THAILAND (SET50 Net TR) is in no way sponsored, endorsed, sold or recommended by the Stock Exchange of Thailand ("SET") and SET in no way guarantees (whether explicitly or implicitly) neither the results expected to be obtained through the use of the SET50 Net Total Return index (hereafter the "Index") nor the level reached by the Index at any given moment or day. The Index is compiled and calculated by SET. However, SET does not assume any liability with regard to any error that could arise in the Index whether on the basis of negligence or any other basis. Moreover, SET has no obligation to inform anyone of any such error.

	31.10.2016	30.10.2015	31.10.2014	31.10.2013	31.10.2012
Number of circulating equities	65,190	56,580	105,800	114,900	76,500
Net asset value	162.0406	148.0234	162.7313	143.3398	132.8525
Distribution per unit on capital gains and losses (including advances)	-	-	-	-	-
Distribution per unit (including advances)*	-	-	-	-	-
Unit tax credit transferred to unit holders (natural persons) ⁽¹⁾	-	-	-	-	-
Unit capitalisation *	25.34	13.58	22.04	9.23	-0.53

* The amounts of the distribution per unit, the unit capitalisation and the tax credits are indicated in the accounting currency of the UCITS. The unit capitalisation corresponds to the operating result and the capital gains or losses on the number of outstanding units. This calculation method is applied from 1 January 2013.

⁽¹⁾ In pursuant to the Fiscal Instruction of 4 March 1993 from the General Tax Department, the unit tax credit will be determined on the day of the dividend's detachment by distribution of the total amount of the fiscal tax credits between the outstanding equities on that date.
