10. A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months.

The major oil price decline presents new challenge for the global oil and gas industry. Oil and gas companies have since resorted to cutting back exploration and development spending, and this industry trend is likely to be more wide spread even as the industry look to recalibrate their business in response to the much lower oil price environment. The group may be in comparatively better position to ride the downturn, given its conscious business focus on the less vulnerable shallow water oilfields and production. Still, the group is intensifying efforts to engage and support customers in coping with the new challenging environment.

Subsea business continues to be generally short-term and remain subject to changes in client requirement on short notice basis. The Group will continue its product and geographical expansion plans with focus on the South East Asian and Middle East markets which are comparatively more stable. Several of the group's subsea vessels are scheduled to undergo the periodic maintenance in the medium term, to coincide with the off-peak season. With still active tendering activities and solid contract backlog, the group expects to deploy these vessels to work post the maintenance.

In drilling, the Group is intensifying efforts to seek contracts for its existing tender rigs, 'MTR-1' and 'MTR-2' as well as two tender rigs under construction, 'MTR-3' and 'MTR-4'. This includes entering new markets in the region, which prospects remains relatively stronger notwithstanding the fallout in oil price. The Group's drilling business associates under Asia Offshore Drilling, with three high specification jack-up drilling rigs, continues to perform steadily in the Middle East contract to FY2016.

The Group will continue to supervise its ongoing three new-build assets in China, with delivery still on-track for 2016. The Group expects these to add further growth when contracted.

Notwithstanding the Group solid fundamentals staying intact, there would be scope to further optimize performance and improve cost efficiencies in business but at same time, continue to maintain the high quality service that the group offers. The group's solid balance sheet will not only put the group in stronger position to compete, but there could be opportunistic expansion with potential distressed asset up for sale. The group will remain focus on creating shareholder value.
