Financial Highlights

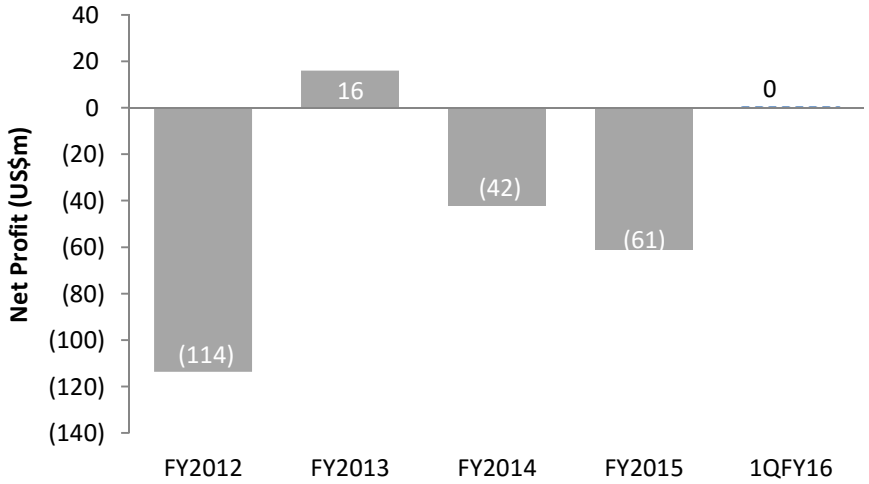

Financial performance

Historical financials

Revenue

Net profit

Commentary

- Decrease in FY15 compared to FY14 despite increased utilization of vessels in FY15 mainly due to lower shipyard activities, smaller fleet and challenged charter rates in weakened market.
- 1QFY16 overall external revenue decreased by US$53.1m as compared to 1QFY15 mainly from sale of smaller vessel in 1QFY16 vis-à-vis 1QFY15 despite increased utilisation rates.

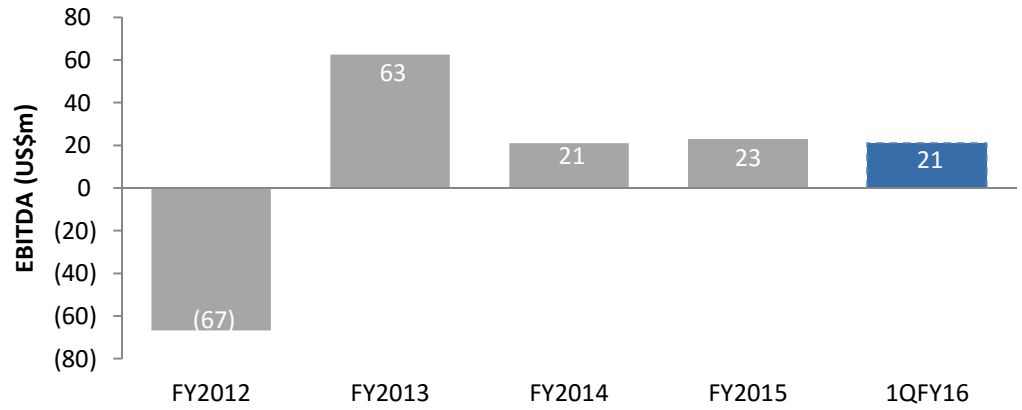

- Marginal profit in 1QFY16 despite the persistent challenging market conditions which puts continuing pressure on the Group's performance.

  Against such headwind, the Group continues to focus on improving fleet utilisation while concurrently rationalising its cost structure.
- Loss in FY15 due to higher depreciation from FY14 vessels docking and provision and impairment.
- Loss in FY14 as a result of cost overrun of a vessel and lower utilisation of vessels
- Company was profitable in FY13

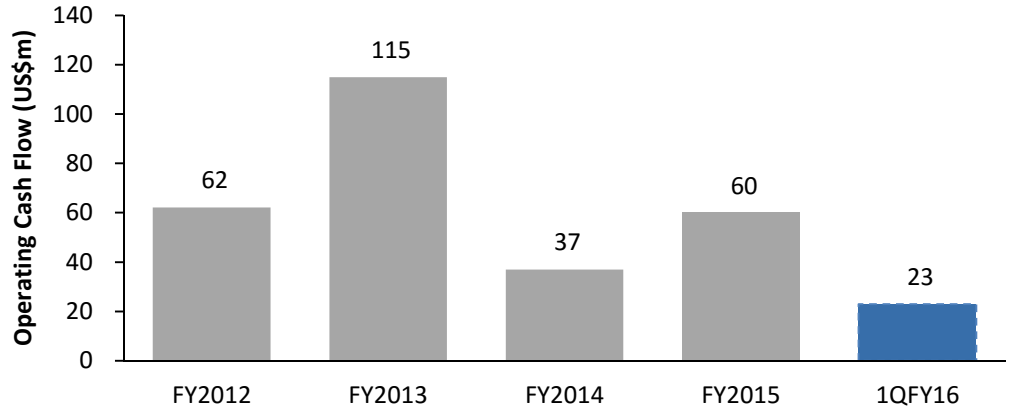

Cash flow generation

Historical financials

EBITDA

Operating Cash Flow

Commentary

- Higher EBITDA in FY15 compared to FY14 contributed by cost rationalisation measures undertaken.
- Lower EBITDA in FY14 as a result of lower profitability impacted by the cost overrun of a vessel
- Profitable in FY13 after exceptional losses in prior years due to one-off expenses/incidents

- Positive operating cash flow since FY2012

Note:

- EBITDA = Profit before tax + Finance cost + Depreciation expenses
