Supplementary Explanation Concerning the Subject Matter

Basic Policy as to How the Persons Who Control Decision-making of the Financial and Business Policies of the Company Should Be

(1) Contents of the basic policy

The Company believes it is necessary for the persons who control decision-making regarding the Company's financial and business policies to have a sufficient understanding of the financial and business affairs of the Company and the source of its corporate value, and to be capable of continuously and sustainably ensuring and enhancing the Company's corporate value and, in turn, the common interests of its shareholders.

The Company also believes that decisions regarding takeover propositions involving a change of control of the Company should ultimately be made based on the will of the shareholders of the Company as a whole. Furthermore, the Company will not reject a large-scale acquisition offer of the shares of the Company if it will contribute to the corporate value of the Company and, in turn, the common interests of its shareholders.

Nevertheless, among them are not a few forms of large-scale acquisition of shares that benefit neither the corporate value of the target company nor the common interests of its shareholders. Such acquisitions include those with a purpose that would apparently harm the corporate value of the target company and the common interests of its shareholders, those with the potential to practically coerce shareholders into selling their shares, those that do not provide sufficient time or information for the target company's board of directors and shareholders to consider the details of the large-scale acquisition offer, or for the target company's board of directors to make an alternative proposal, and those that require the target company to discuss or negotiate with the acquirer in order to procure more favorable terms than those originally presented by the acquirer.

It is particularly necessary and essential for the persons who make decisions on the Company's financial and business policies to (i) maintain the system under which the Company group covers with its comprehensive capability the five business fields and peripheral fields that allow the "integration of real estate and finance," which leads to maximization of the potential of the Company group, (ii) maintain employees who support those businesses with knowledge and experience specializing in real estate and finance, etc., (iii) maintain the Company's trust in the real estate

industry that has been built up over a long period of time based on the establishment of the ability and information networks supporting various value creation technologies, and (iv) master knowhow that enables comprehensive business. Unless the acquirer of a proposed large-scale acquisition of the shares in the Company understands the source of the corporate value of the Company as well as the details of financial and business affairs of the Company and would ensure and enhance these elements over the medium-to-long term, the corporate value of the Company and, in turn, the common interests of its shareholders would be harmed.

The Company believes that a person who undertakes a large-scale acquisition of the shares in the Company in a manner that does not contribute to the corporate value of the Company or the common interests of its shareholders will not be the right person to control decisions on the Company's financial and business policies. The Company believes that it needs to secure the corporate value of the Company and, in turn, the common interests of its shareholders, by taking necessary and appropriate countermeasures against such large-scale acquisition offers,

(2) Overview of the special measures to realize the basic policy

The Company group established its three-year medium-term management plan aiming to further increase the Company group's corporate value and is pushing ahead with business under the plan.

Under the previous medium-term management plan called "Seamless Growth 2020" (the targeted period of the plan is three years from December 2017 to November 2020), the major policy of the plan is "to continue growth as a Group to build a firm position as an original comprehensive real estate company," under which we aim to establish new income-generating business, while targeting further growth of the five existing businesses and increases in their operating profit. In addition, we will endeavor to increase profits from the Rental, Fund and Consulting and Property Management Businesses, which are positioned as the stable businesses, to enable a structural balance between profits from the Revitalization and Development Businesses so as to reinforce our resilience to changes in the business environment. On the financial front, we will enhance funding capabilities, through methods such as the extension of borrowing periods to maintain a sound financial structure as the infrastructure that supports the expansion of business scale, while aiming at effective investments. In addition, as the composition of the Company group's trade diversifies in line with the expanding business scale, we will further enhance the quality of internal control, namely, compliance, risk management, and disclosure, to establish an optimum corporate governance structure.

Furthermore, we recognize that human resources that are the most important assets of the Company, and to leverage these assets, we will drive ahead with the development of next-generation executives, all officers and employees and the fostering of human resources for the improvement of productivity, while increasing the satisfaction of employees of the entire Group. At the same time, we will strive

to establish a corporate brand befitting the firm position as a group of original comprehensive real estate companies and reinforce the attractiveness of our product brand that will be trusted by the market.

- (3) Overview of the measures to prevent persons deemed as inappropriate, in view of the basic policy, from controlling the decisions on the Company's financial and business policies

This plan is a measure to prevent persons deemed as inappropriate, in view of the aforementioned basic policy, from controlling the decisions on the Company's financial and business policies, and its objective is to ensure and enhance the Company's corporate value and, in turn, the common interests of its shareholders.

The plan stipulates procedures to be followed in an acquisition, etc. of shares, etc. of the Company ((A) a purchase and/or other acquisition of the shares and the like issued by the Company that would result in the holding ratio of share certificates, etc. (*kabuken tou hoyuu wariiai*) of a holder (*hoyuusha*) of 20% or more; or (B) a tender offer (*koukai kaitsuke*) with respect to the shares, etc. issued by the Company that would result in the sum of the offeror's ownership ratio, and that of the persons having a special relationship with the offeror, of 20% or more; or any actions similar to (A) or (B) above) by those trying to acquire (hereinafter, the "Acquirer").

Specifically, the Acquirer must provide the Company a statement of undertaking and an acquisition document that includes necessary information, prior to making an acquisition.

Upon receiving these documents, an independent committee will conduct the review of the acquisition terms, collection of information on materials such as the management plans and business plans of the Acquirer and the Company's board of directors and comparison thereof, the review of alternative plans, etc. presented by the Company's board of directors, and discussions and negotiations with the Acquirer, while obtaining advice from independent experts. In the meantime, the Company will disclose information in a timely manner.
