Outlook

Outlook

The world economy faces challenges, but demand for aviation services and high quality food in Asia-Pacific continues to grow. Passenger traffic in the region is projected to grow 5%¹ and out-of-home food consumption is forecasted to grow 6%² from 2017 to 2023. SATS has been expanding its network of operations across Asia-Pacific and investing in new capabilities to benefit from this growth.

Starting in Singapore, we have secured a long-term contract with SIA to support them in their transformation plans, by investing in strengthening hub operations with dedicated teams and fully integrated digital ground handling systems. We also continue to invest in new opportunities in Asia-Pacific's major hubs and cities. SATS' recent investments in India and Malaysia are immediately accretive and showing steady growth.

To strengthen our position as Asia-Pacific's leading gateway services and food solutions provider, we are investing in business sustainability initiatives such as solar panels, electric vehicles and new food technologies that will help us to reduce our carbon footprint, manage waste and scale our business efficiently.
