

OVER 30 YEARS OF INNOVATION

PRESS RELEASE

From Diamond Grading to Jewelry Evaluation: GCAL by Sarine Expands in India

Hod Hasharon (Israel), 14 September 2026 – Singapore Exchange Mainboard and Tel Aviv Exchange listed Sarine Technologies Ltd (“**Sarine**” and along with its subsidiaries “**the Group**”) (**U77:SI; SARN.TA**), a worldwide leader in the development, marketing and sale of precision technology solutions for the evaluation, planning, processing, measurement, grading and trading of diamonds and gems, today announced the opening of a new GCAL by Sarine Jewelry Certification and Quality Assurance Lab in SEEPZ, Mumbai in India, further expanding the Group’s presence and capabilities in one of the world’s most important jewelry markets.

SEEPZ (Santacruz Electronics Export Processing Zone) is one of India’s leading export-oriented gems and jewellery manufacturing hubs. Establishing a presence within SEEPZ brings GCAL’s grading services closer to a significant concentration of jewellery manufacturers and exporters, providing customers with greater accessibility and more efficient logistics.

The new Mumbai facility complements GCAL by Sarine’s existing grading laboratories in Surat and New York. In India, the two locations provide complementary capabilities, with Surat positioned at the heart of the diamond manufacturing ecosystem and the new SEEPZ facility serving the jewelry manufacturing and export sector. Together with GCAL by Sarine’s New York presence, this infrastructure enables the Group to provide an efficient certification service connecting key manufacturing centers in India with the important U.S. jewelry market. GCAL by Sarine grading and certification services are backed by GCAL’s distinctive consumer guarantee, reinforcing the Group’s commitment to grading integrity, consistency and consumer confidence.

Angelo Palmieri, President of GCAL, stated: “The opening of our SEEPZ lab expands GCAL by Sarine’s capabilities in India into jewelry certification and brings our services closer to manufacturers and exporters. For our retail, wholesale and manufacturing customers, proximity and logistical efficiency are increasingly important, and this new facility enables us to serve them more effectively.”

Sarine's CEO, Tzafrir Engelhard, added: "Sarine Group is committed to leading the evolution of diamond and jewelry certification by combining the highest standards of grading with greater efficiency and accessibility. Our new SEEPZ lab enables us to serve customers closer to the point of jewelry production while leveraging the strength and reputation of the GCAL by Sarine brand. We are particularly pleased to have completed the establishment of the new lab ahead of this year's peak season, allowing us to support our customers at an important time for the industry."

About Sarine Technologies

Established in 1988, Sarine Technologies Ltd. is a global leader in developing advanced technologies for modeling, analysis, evaluation, planning, processing, finishing, grading and trading of diamonds. In recent years, Sarine's business has pivoted to deriving mostly recurring revenues from its proprietary Gal3D inclusion and tension mapping (which processes the Galaxy® platforms' output) and Advisor® rough diamond planning cloud-based software packages, along with its other various pay-per-use services. At the heart of Sarine's ecosystem is the Advisor® software, which integrates internal inclusion scanning data and geometrical 3D analyses, to provide rough diamond planning and processing. Sarine's Most Valuable Plan™ (MVP) software, launched in 2024, builds on Advisor® 8.0's capabilities and to provide not only the most advanced but also predominantly automated planning for natural rough diamonds, delivering greater value and enhanced production efficiencies in terms of both time and cost. Sarine's broad array of services, based on data derived from its cutting-edge technologies, also includes Lab-Grown Diamond (LGD) planning, Journey™ provenance and traceability reports, GCAL diamond grading certificates and other retail-focused solutions like visualisation and fingerprinting. Sarine continues to develop and sell its world-renowned products, including the Galaxy® family of inclusion and tension mapping systems, rough diamond modelling platforms, laser-marking, inscription and fingerprinting equipment, automated (AI-derived) Clarity, Color, Cut and light performance grading systems and the AutoScan™ Plus for natural rough diamond source registration.
