Earnings per ordinary share Basic Diluted

The basic and diluted earnings per share are calculated based on the weighted average number of shares in issue of 6,658,068,582 (comparative: 5,359,182,443).

The basic and diluted earnings per share for the financial year ended 31 December 2017 were the same as there were no potentially dilutive ordinary shares in issue as at the end of the current financial year. The potential ordinary shares to be converted under the convertible bonds are anti-dilutive as the conversion would result in a higher diluted earnings per share than the basic earnings per share.

7. Net asset value (for the issuer and Group) per ordinary share based on the total number of issued shares excluding treasury shares of the issuer at the end of the (a) current financial period reported on and (b) immediately preceding financial year.
