Risk Factors

In respect of the Warrants, investors should note that they are subject to an exchange rate risk as the Cash Settlement Amount is converted from Hong Kong dollars into Singapore dollars. The value of

the Warrants may therefore be affected by, amongst other factors, the relative exchange rates of the Singapore dollar and the Hong Kong dollar. Exchange rates between currencies are determined by forces of supply and demand in the foreign exchange markets. These forces are, in turn, affected by factors such as international balances of payments and other economic and financial conditions, government intervention in currency markets and currency trading speculation. Fluctuations in foreign exchange rates, foreign political and economic developments, and the imposition of exchange controls or other foreign governmental laws or restrictions applicable to such investments may affect the foreign currency market price and the exchange rate-adjusted equivalent price of the Warrants. Fluctuations in the exchange rate of any one currency may be offset by fluctuations in the exchange rate of other relevant currencies.
