(Expressed in Balboas)

(1) General Information

Banco General, S. A. was incorporated under the laws of the Republic of Panama in 1954 and started operations in 1955. The Bank operates under a general license granted by the Superintendence of Banks of Panama which allows it, to engage in the banking business both in Panama and abroad. Banco General, S. A. and its subsidiaries will be referred to collectively as “the Bank”.

The Bank provides a wide variety of financial services, mainly, corporate, mortgage and consumer banking, management of investments and pensions, retirement and severance funds.

The Bank has representation offices in Colombia, Mexico, El Salvador, Guatemala and Peru.

Grupo Financiero BG, S. A., a 60.04% (December 31, 2017: 60.12%) owned subsidiary of Empresa General de Inversiones, S. A., owns 100% of the common shares issued and outstanding of Banco General, S. A.

Banco General, S. A. owns 100% of the following subsidiaries which form part of its consolidation:

- Finanzas Generales, S. A. and subsidiaries: finance leases and loans in Panama. Finanzas Generales, S. A. owns the following subsidiaries:
 - BG Trust, Inc.: trust management in Panama.
 - Vale General, S. A.: administration and marketing of pretax food and health related contributions in Panama.
- BG Investment Co., Inc.: securities brokerage, asset management and brokerage company in Panama.
- General de Seguros, S. A.: insurance and reinsurance in Panama.
- Overseas Capital Markets, Inc. and subsidiaries: holding company in the Cayman Islands. Overseas Capital Markets, Inc. owns the following subsidiaries:
 - Banco General (Overseas), Inc.: international banking business in the Cayman Islands.
 - Commercial Re. Overseas, Ltd.: international reinsurance in the British Virgin Islands.
- BG Valores, S. A.: securities brokerage, asset management and brokerage company in Panama.
- Banco General (Costa Rica), S. A.: Banking business in Costa Rica.
- ProFuturo Administradora de Fondos de Pensiones y Cesantía, S. A.: management of pension and retirement, severance and investment funds in Panama.

The Bank's main office is located at Banco General Tower, Urbanization Marbella, Aquilino de la Guardia Avenue, Panama City, Republic of Panama.

BANCO GENERAL, S. A. AND SUBSIDIARIES

(Panama, Republic of Panama)

Notes to the Condensed Consolidated Interim Financial Information

(2) Basis of Preparation

(a) Statement of Compliance

The condensed consolidated interim financial information have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standard Board (IASB).

These condensed consolidated interim financial information were authorized by management for issue on July 26, 2018.

(b) Basis of Measurement

The condensed consolidated interim financial information have been prepared on a historical cost basis except for the assets and liabilities at fair value, available for sale securities and derivative financial instruments, which are measured at fair value; and foreclosed assets, which are measured at the lower of their carrying value or fair value less costs to sell.

The Bank initially recognizes loans, account receivables and deposits on the date on which they originated. All other financial instruments (including assets designated at fair value through profit or loss) are recognized on the trade date, which is the date on which the Bank becomes a party to the contractual provisions of the instrument.

(c) Functional and Presentation Currency

The condensed consolidated interim financial information are expressed in balboas (B/.), the monetary unit of the Republic of Panama, which is at par and freely exchangeable with the United States dollar (US\$). The Republic of Panama does not issue its own paper currency and, in lieu, the dollar (\$) of the United States of America is used as legal tender and functional currency.

(3) Summary of Significant Accounting Policies

The accounting policies used by the Bank in this condensed consolidated interim financial information are the same as those applied by the Bank in its consolidated financial statements as of December 31, 2017; except, where the policies of financial instruments were modified by the adoption of IFRS 9. The modified policies are detailed as follows:

(a) Investment Securities and Other Financial Assets *Accounting policies used as of January 1, 2018:*

Classification and measurement - Financial assets under IFRS 9

Investment securities and other financial assets are classified at their trade date, and are initially measured at fair value plus, in the case of investment securities not recorded at fair value through profit or loss, direct transaction costs attributable to their acquisition.

BANCO GENERAL, S. A. AND SUBSIDIARIES

(Panama, Republic of Panama)

Notes to the Condensed Consolidated Interim Financial Information

(3) Summary of Significant Accounting Policies, continued

The model includes three classification categories for financial assets, namely:

- *Amortized Cost (AC)*
A financial asset is measured at amortized cost if it complies with both of the following conditions:
 - The asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
 - The contractual terms of the financial asset establish specific dates for the receipt of cash flows derived solely from payments of principal and interest on the principal amount outstanding.
- *Fair value with changes in other comprehensive income (FVOCI)*
A debt instrument is measured at FVOCI only if it meets with the following conditions, and has not been designated at Fair value through profit or loss (FVTPL):
 - The asset is held within a business model whose objective is to collect the contractual cash flows and sell the financial assets; and
 - The contractual terms of the financial asset establish specific dates for the receipt of cash flows derived solely from payments of principal and interest on the principal amount outstanding.

During the initial recognition of investments in equity instruments not held for trading, the Bank may irrevocably elect to record the subsequent changes in fair value as part of other comprehensive income. This choice must be made on an instrument-by-instrument basis.

- *Fair value through profit or loss (FVTPL)*
All other financial assets are measured at fair value through profit or loss.

Evaluation of the business model

The evaluation at the level of the portfolios and the objective of the business model that applies to financial instruments of said portfolios documenting how they are managed, includes the following:

- The policies and objectives identified for the loan portfolio and the operation of these policies including management's strategy to define:
 - (i) the collection of contractual interest income
 - (ii) maintain a defined performance profile of interest
 - (iii) maintain a specific duration period
 - (iv) be able to sell at any time due to liquidity needs or in order to optimize the risk / return profile of a portfolio based on interest rates, risk margins, current duration and defined objective

BANCO GENERAL, S. A. AND SUBSIDIARIES

(Panama, Republic of Panama)

Notes to the Condensed Consolidated Interim Financial Information

(3) Summary of Significant Accounting Policies, continued

- The way in which the behavior of different portfolios is reported to the senior management;
- The risks that affect the performance of the business model (and the financial assets held in the business model) and the way in which those risks are managed;
- The frequency and value of sales in previous periods, the reasons for those sales and expectations regarding future sales activities.

Financial assets that are held for trading purposes and whose performance is evaluated solely based on changes in their fair value are measured at fair value through profit or loss as they are neither held to collect contractual cash flows nor both to collect contractual cash flows and to sell the financial assets.

Assessment of whether the contractual cash flows are solely payments of principal and interest (SPPI)

For the purpose of this evaluation, "principal" is defined as the fair value of the financial asset at the time of initial recognition. "Interest" is defined as the consideration of the time value of money and the credit risk associated with the amount of principal outstanding for a particular period of time and other basic risks of a loan agreement and other associated costs, as well as the profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Bank focused on the instrument's contractual terms.

This assessment considered the following characteristics, among others:

- Contingent events that could change the amount and / or timing of cash flows
- Leverage conditions
- Prepayment and extension terms
- Terms that limit the Bank's ability to collect cash flows from specific assets
- Features that modify considerations for the time value of money

(b) *Derivative Financial Instruments*

As of January 1, 2018, hedging relationships that meet the requirements of hedge accounting were incorporated in accordance with IAS 39, which also meet the requirements of hedge accounting in accordance with the criteria of IFRS 9, after taking into account any new rebalancing of the coverage relationship at the time of transition, they are considered as a continuation of the coverage relationships.

At the initial application of hedge accounting under IFRS 9, the coverage ratio in accordance with IAS 39 was considered as the starting point to rebalance the coverage ratio of a continuing hedging relationship. Any gain or loss on this rebalancing will be recognized in profit or loss of the period.

BANCO GENERAL, S. A. AND SUBSIDIARIES

(Panama, Republic of Panama)

Notes to the Condensed Consolidated Interim Financial Information

(3) Summary of Significant Accounting Policies, continued

Hedge accounting is discontinued prospectively only when the relationship or part of the coverage no longer satisfies the rating criteria after any rebalancing. This includes cases when the hedging instrument expires or is sold, terminated or exercised. Discontinuing hedge accounting can either affect the coverage ratio in its entirety or in part, maintaining the coverage ratio for the remainder.

The Bank may choose to designate one or more hedging relationship(s) between a hedging instrument and a hedged item with one or more external entities, as well as opting for hedges between its subsidiaries.

(c) *Impairment of Financial Assets*

Accounting policies used as of January 1, 2018:

IFRS 9 replaces the "incurred loss" model in IAS 39 with an "expected credit loss" (ECL) model.

The new impairment model is applicable to the following financial assets that are not measured at FVTPL:

- Debt instruments;
- Leases receivable;
- Financial guarantee contracts issued; and
- Loan commitments issued

Impairment losses on investments in equity instruments are not recognized.

The assessment of whether the credit risk of a financial asset has increased significantly is one of the critical judgments implemented in the impairment model.

Loss allowances are recognized for the amount equivalent to the 12-month ECL in the following cases:

- Investments in debt instruments that are determined to reflect low credit risk at the reporting date; and
- Other financial instruments over which the credit risk has not increased significantly since its initial recognition.

For all other cases, allowances are recognized at an amount equal to the assets' lifetime ECL.

The 12-month ECL is the portion of the ECL that results from default events on a financial instrument that are possible within a 12-month period after the reporting date.

BANCO GENERAL, S. A. AND SUBSIDIARIES

(Panama, Republic of Panama)

Notes to the Condensed Consolidated Interim Financial Information

(3) Summary of Significant Accounting Policies, continued

The standard introduces three stages of impairment for financial assets that are applied from the date of origin or acquisition. These stages are summarized below:

- Stage 1: The Bank recognizes a credit loss allowance at an amount equal to the 12-month ECL. This represents the portion of lifetime expected credit losses from default events that are expected within 12 months of the reporting date, assuming that credit risk has not increased significantly after initial recognition.
- Stage 2: The Bank recognizes a credit loss allowance at an amount equal to the lifetime expected credit losses (LTECL) for those Financial Assets which are considered to have experienced a significant increase in credit risk since initial recognition. This requires the computation of ECL based on lifetime probability of default (LTPD) which represents the probability of default occurring over the remaining lifetime of the Financial Asset. The allowance for credit losses are higher in this stage because of an increase in credit risk and the impact of a longer time horizon being considered as compared to 12-months in Stage 1.
- Stage 3: The Bank recognizes a credit loss allowance at an amount equal to the lifetime expected credit losses, based on a Probability of Default (PD) of 100% of the recoverable cash flows of the asset.

Significant Increase in Credit Risk

The determination of whether the credit risk of a financial asset has increased significantly since its initial recognition, considers as main indicators, variations in days of delinquency, collection score and risk rating, analysis of quantitative and qualitative characteristics in the historical experience and the evaluation of the credibility of future information.

Credit Risk Rating

The Bank assigns a credit risk rating to each financial asset based on a model that incorporates a series of predictive data on the incurrence of losses. The models were developed and applied over several periods to evaluate their reasonableness. Risk ratings are used to identify significant increases in credit risk.

Credit risk ratings are defined using qualitative and quantitative factors that are indicative of risk of loss. These factors may vary depending on the nature of the exposure and the type of borrower. Regarding foreign investments and bank deposits, the international risk ratings of Fitch, Standard and Poor's or Moody's and associated changes to the ratings were used to establish whether there was a significant increase in risk and in the calculation of the Probability of Default (PD).

Credit risk ratings are defined and calibrated such that the risk of loss increases exponentially as the credit risk deteriorates.

BANCO GENERAL, S. A. AND SUBSIDIARIES

(Panama, Republic of Panama)

Notes to the Condensed Consolidated Interim Financial Information

(3) Summary of Significant Accounting Policies, continued

Each exposure will be assigned a credit risk rating at the time of initial recognition based on available information about the debtor. Exposures will be subject to continuous monitoring, which may result in an exposure being moved to a different credit risk rating.

Determine if the credit risk has increased significantly

The Bank determines a significant increase in an exposure to credit risk has occurred since its initial recognition if, based on credit risk classification models and / or days of delinquency, a significant deterioration has occurred.

In certain instances, based on expert judgment and where possible, relevant historical experience, the Bank determines an exposure has undergone a significant increase in credit risk based on particular qualitative indicators that it considers relevant and whose effect would not be fully reflected otherwise.

As a rule, and as required by IFRS 9, a significant increase in credit risk occurs when an asset shows delinquency of more than 30 days, except for residential mortgages and personal loans, which are measured at more than 60 days. The Bank determines the delinquency period by counting the number of days since the last payment.

The effectiveness of the criteria used to identify significant increases in credit risk is monitored through regular reviews.

Definition of loss

The Bank considers a financial asset to be in default when:

- It is likely that a debtor will not fully pay its credit obligations to the Bank without taking actions to repossess collateral (if available); or
- The debtor has more than 90 days delinquency in all credit obligations, except for overdrafts that are measured at more than 30 days and residential mortgages at more than 120 days.

In assessing whether a debtor is in default, the Bank considers the following indicators:

- Quantitative – past due status and non-payment of other obligations of the same issuer; and
- Qualitative – breach of contract or legal situation

The inputs used in the assessment of whether financial instruments are in default are specific to the type of portfolio, and their importance may vary over time to reflect changes in circumstances and trends.

BANCO GENERAL, S. A. AND SUBSIDIARIES

(Panama, Republic of Panama)

Notes to the Condensed Consolidated Interim Financial Information

(3) Summary of Significant Accounting Policies, continued

Measurement of the ECL

The ECL is a probability-weighted estimate of credit loss which is measured according to the following items:

- Financial assets that are not credit-impaired at the reporting date
- Financial assets that are impaired at the reporting date
- Undrawn loan commitments: the present value of the difference between the contractual cash flows that are due to the Bank in the event that the commitment is drawn down and the cash flows the Bank expects to receive; and
- Financial guarantee contracts: the expected payments to reimburse the holder less any amount the Bank expects to recover.

Generating the term structure of the PD

The days of delinquency is the main input to determine the term structure of the PD for exposures in the consumer loan portfolio. For the corporate loan portfolio, the following factors are taken as primary inputs: risk classification, days of delinquency, restructurings, indicators of non-compliance and materiality thresholds. The Bank seeks to obtain performance and loss information on exposures to credit risk in order to complete the analysis on days of delinquency, segment, type of product and debtor as well as credit risk rating.

The Bank designed and evaluated statistical models to analyze the data collected and generate estimates of the remaining lifetime PD of credit exposures, and how they are expected to change over time.

The PD of foreign investments and placed deposits was estimated using liquid market proxies (Credit Default Swaps "CDS") based on international risk ratings and the industry relating to the investment or deposit.

Inputs in the measurement of the ECL

The key inputs in the measurement of ECL are the following variables:

- Probability of default (PD)
- Loss given default (LGD)
- Exposure at default (EAD)

PD estimates are calculated at a specific date, using statistical rating models and tools adapted to the different categories of counterparties and exposure. Statistical models were acquired from internationally recognized firms or developed internally based on historical data. These models incorporate quantitative factors, and can also consider qualitative factors. If an exposure migrates between rating categories, then this may lead to a change in the estimate of the associated PD. The PD is estimated considering contractual maturities and estimated prepayment rates. In the case of foreign investments and placed deposits, the ECL is obtained from the probability of default implicit in the CDS used as proxies for each bond or deposit based on its international credit rating and industry.

BANCO GENERAL, S. A. AND SUBSIDIARIES

(Panama, Republic of Panama)

Notes to the Condensed Consolidated Interim Financial Information

(3) Summary of Significant Accounting Policies, continued

The levels of LGD are estimated based on historical recovery rates:

- Observed: corresponding to the portion of EAD in default that is effectively recovered
- Estimated: corresponding to the portion of EAD in default estimated to be recoverable.

The LGD model considers the financial asset, related collateral and recovery costs of any collateral. The Bank can calibrate the LGD estimate for different economic scenarios. The Bank used the LGD implicit in the CDS for foreign investments and placed deposits.

In most cases, the EAD is equivalent to the outstanding balance of the contract; with the exception of credit cards and contingencies, which consider variables such as the current balance, available balance and the CCF (credit conversion factor), in order to estimate the exposure at the time of default on existing operations. The EAD is determined on current exposures to the counterparty and potential changes to the current amount permitted under the contract, including any amortization.

Overdrafts and credit card facilities are products that include both the loan and undrawn commitment component. These facilities do not have a fixed term or repayment structure and are managed on a collective basis; the Bank can cancel them unilaterally at any time.

Forward-looking information

The Bank could incorporate forward-looking information in its assessment of whether the credit risk of an instrument has increased significantly since its initial recognition and ECL measurement.

External information may include economic data and projections published by government entities and monetary authorities in the countries in which the Bank operates, supranational organizations such as the OECD and the International Monetary Fund, as well as academic and private sector projections.

(d) Financial Liabilities

IFRS 9 largely preserves the existing requirements of IAS 39 for the classification of financial liabilities.

However, under IAS 39 all changes in the fair value of liabilities designated as FVTPL are recognized in income, whereas under IFRS 9 these changes in fair value are presented as follows:

- The amount of the change in fair value that is attributable to changes in the credit risk of the liability is presented in other comprehensive income; and
- The remaining amount of the change in fair value is presented in profit or loss.

BANCO GENERAL, S. A. AND SUBSIDIARIES

(Panama, Republic of Panama)

Notes to the Condensed Consolidated Interim Financial Information**(12) Segment Information**

The Bank maintains three business segments for its financial analysis, which offer different products and services and are managed separately, consistent with the way in which management receives data, budgets and assesses their performance.

Segments**Operations****Banking and Financial Activities**

Various financial services, mainly corporate, mortgage and consumer banking, financial leases, administration of trusts, administration and marketing of pretax food and health related contributions and securities brokerage

Insurance and Reinsurance

Insurance and reinsurance of policies of general lines, collective life and various risks

Pension and Retirement Fund Management

Administration of pension and retirement, severance and investment funds

The Bank's management prepared the following segment information based on the bank's businesses for its financial analysis:

	<u>Banking and financial activities</u>	<u>Insurance and reinsurance</u>	<u>June 30, 2018 Pension and retirement fund management</u>	<u>Eliminations</u>	<u>Total</u>

BANCO GENERAL, S. A. AND SUBSIDIARIES

(Panama, Republic of Panama)

Notes to the Condensed Consolidated Interim Financial Information

(13) Equity, continued

The Bank, through its subsidiary General de Seguros, S. A., maintains legal reserves and reserves for statistical deviations and catastrophic risks as established by the Superintendence of Insurance and Reinsurance of Panama. The use and restitution of these reserves shall be regulated by the Superintendence of Insurance and Reinsurance of the Republic of Panama.

The complementary tax corresponds to the advance of the dividend tax that is applied to net income of the previous year and that the taxpayer must retain and pay to the tax authorities within the stipulated periods. The tax is attributable to the shareholder and is applied as a tax credit at the time dividends are distributed.

(14) Personnel Benefits

Contributions made by the Bank corresponding to personnel benefits are recognized as salaries and other employee expenses in the condensed consolidated statement of income.

Share-Based Compensation Plan

The total expense relating to options granted to the participants for the purchase of shares of the controlling company, Grupo Financiero BG, S. A., based on their fair value, amounted to B/.6,721 (2017: B/.6,746). This plan will be in effect up to the year 2021.

The total expense relating to options granted to the participants for the purchase of shares of Grupo Financiero BG, S. A., based on their fair value, amounted to B/.698,803 (2017: B/.746,106). This plan will be in effect up to the year 2022.

Restricted Share Plan

The Bank did not grant restricted shares in the period ended June 30, 2018 and 2017.

Retirement Plan

The Bank maintains a closed retirement plan, which was amended and approved by the Board of Directors in 1998; this plan is under independent administration by a fiduciary agent.

The contributions to the retirement plan were B/.67,284 (2017: B/.67,284) and the disbursements to former employees who are covered under the retirement plan amounted to B/.89,011 (2017: B/.89,011).

(15) Income Tax

Income tax returns of companies incorporated in the Republic of Panama, are subject to examination by local tax authorities for the last three years.

In accordance with current tax regulations, companies incorporated in Panama are exempt from income taxes on the following: profits derived from foreign operations, interest earned on deposits with local banks, securities issued by the Government of Panama, securities listed with the Superintendence of the Securities Markets and the Panama stock exchange and, lastly, securities and loans to the Panamanian government and its autonomous and semi-autonomous institutions.

BANCO GENERAL, S. A. AND SUBSIDIARIES

(Panama, Republic of Panama)

Notes to the Condensed Consolidated Interim Financial Information**(15) Income Tax, continued**

Companies incorporated in the following jurisdictions are subject to income tax rates imposed by the respective local tax authorities:

<u>Country</u>	<u>Tax rate</u>
Panama	25%
Costa Rica	30%

The companies incorporated in the Cayman Islands and the British Virgin Islands are not subject to the payment of income tax, due to the nature of their foreign operations.

The estimated income tax for the period is calculated based on the effective rate of the previous fiscal year. Based on Management's assessment, historically, this rate has not differed significantly from the current period's effective rate.

Income tax, net is detailed as follows:

	<u>2nd Quarter</u> <u>June 30</u>		<u>Accumulated</u> <u>June 30</u>	
	<u>2018</u>	<u>2017</u>	<u>2018</u>	<u>2017</u>
Estimated income tax	15,145,940	15,120,176	29,377,009	28,778,856
Prior year income tax adjustments	104,985	107,417	140,460	143,223
Deferred income tax	<u>(929,507)</u>	<u>(880,069)</u>	<u>(2,044,154)</u>	<u>(1,866,146)</u>
	<u>14,321,418</u>	<u>14,347,524</u>	<u>27,473,315</u>	<u>27,055,933</u>

(16) Derivative Financial Instruments

Summary of derivative contracts is as follow:

	<u>Total</u>		<u>Exchange-Traded</u>		<u>Over the Counter (OTC)</u>			
	<u>Notional Value</u>	<u>Book Value</u>	<u>Notional Value</u>	<u>Book Value</u>	<u>Liquidated in a securities exchange</u>		<u>Other bilateral counterparts</u>

(17) Fair Value of Financial Instruments

The Bank has in place a documented procedure to determine fair value and the responsibilities of the areas involved in this process. This process has been approved by the Assets and Liabilities Committee, the Risk Committee of the Board of Directors, and the Bank's Board of Directors.

The Bank uses price vendors for most of the prices of assets and liabilities at fair value which are processed by the department of Operations and validated by the area of Management and Control of the Treasury and Risk department.

The Bank uses internal valuation methodologies for certain assets and liabilities at fair value classified in Level 3 of the fair value hierarchy. The calculation of fair values using internal methodologies is performed by the area of Management and Control of the Treasury department and validated by the Risk department.

The Bank measures fair value using the fair value hierarchy, which categorizes the variables used in valuation techniques to measure fair value into three levels. The hierarchy is based on the transparency of the inputs used in measuring the fair value of financial assets and financial liabilities at their valuation date. The three levels are defined as follows:

Level 1: Inputs that are quoted market prices (unadjusted) in active markets accessible to the Bank, for identical instruments.

Level 2: Inputs other than quoted prices included within Level 1 that are observable either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques in which all significant inputs are directly or indirectly observable from market data.

BANCO GENERAL, S. A. AND SUBSIDIARIES

(Panama, Republic of Panama)

Notes to the Condensed Consolidated Interim Financial Information**(17) Fair Value of Financial Instruments, continued**

Level 3: Unobservable inputs for assets or liabilities. This category includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments for which significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

The classification of the valuation of fair value is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. The relevance of a variable should be evaluated with respect to the entire fair value measurement.

Notes to the Condensed Consolidated Interim Financial Information**(17) Fair Value of Financial Instruments, continued**

The main valuation techniques, assumptions and inputs used to measure the fair value of financial instruments are as follows:

<u>Instrument</u>	<u>Valuation technique</u>	<u>Inputs</u>	<u>Level</u>
Local Fixed Income	Quoted prices in active markets	Observable quoted prices	2-3
	Discounted cash flows model	Benchmark interest rate Liquidity risk premiums Credit spreads	
Local Corporate Shares	Quoted prices in active markets	Quoted prices in active markets	1-3
	Dividend discount model Discount free cash flows model, which are compared with the stock prices	Benchmark interest rate Equity risk premium Growth rate of assets, liabilities, equity, profits and dividends	
Foreign Fixed Income	Quoted prices in active markets	Quoted prices in active markets	1-2
	Quoted prices in active markets for similar instruments	Observable quoted prices	
	Bid and ask prices from market participants	Prices from a broker	
	Discounted cash flows model	Credit spreads Benchmark interest rate Liquidity risk premiums	
Agency MBS / CMOs	Discounted cash flows model	Features of collateral TBA's price Treasury yield Yield curves Prepayment speed Market analysis	2 - 3
Private MBS / CMOs and ABS	Discounted cash flows model	Features of collateral Treasury yield Yield curves Expected cash flow and losses Market assumptions related to discount rates, prepayments, losses and recoveries	2
Foreign Corporate Shares	Quoted prices in active markets	Quoted prices in active markets	3
Investment vehicles	Net asset value	Net asset value	2-3

BANCO GENERAL, S. A. AND SUBSIDIARIES

(Panama, Republic of Panama)

Notes to the Condensed Consolidated Interim Financial Information**(17) Fair Value of Financial Instruments, continued**

The Bank considers that its methodologies for valuation of investment securities classified as Level 3 are appropriate; however, the use of different estimates of the unobservable variable could lead to different measurements of fair value. For investment securities classified in Level 3, adjustments in the credit spread (in the case of fixed income) and to the equity risk premium (in the case of the corporate shares) of +50bp and -50bp would result in favorable and unfavorable impacts in the Bank's condensed consolidated statement of income and in the consolidated equity, as describe below:

	<u>June 30, 2018</u>			
	<u>Fair Value</u>		<u>FV OCI</u>	
	<u>Effect of profit or loss</u>		<u>Effect in equity</u>	
	<u>Favorable</u>	<u>(Unfavorable)</u>	<u>Favorable</u>	<u>(Unfavorable)</u>

Total	<u>2,479,167</u>	<u>(2,090,694)</u>	<u>8,589,198</u>	<u>(11,188,055)</u>

The following assumptions, where practical, have been made by Management to estimate the fair value of financial assets and liabilities not measured at fair value:

(a) Securities and other financial assets

For securities and other financial assets, the fair value measurement is determined using quoted prices in active markets, prices from third party pricing vendors, brokers, custodians, investment management companies and banks. In addition, in some cases the fair value measurement is determined using valuation techniques mainly by discounting cash flows at the appropriate discount rate for that instrument.

(b) Demand deposits from customers/savings deposits from customers/securities sold under agreements to repurchase

For these financial instruments, the carrying value approximates their fair value due to their short-term nature.

BANCO GENERAL, S. A. AND SUBSIDIARIES

(Panama, Republic of Panama)

Notes to the Condensed Consolidated Interim Financial Information**(17) Fair Value of Financial Instruments, continued****(c) Loans**

The fair value of the loan portfolio was determined by discounting the future cash flows at an interest rate that represents: (i) current market rates, and (ii) the future expected interest rates, for a term that takes into account the expected anticipated prepayments in the loan portfolio.

(d) Time deposits from customers and banks/borrowings and debt securities issued/perpetual bonds

The fair value of these financial instruments was determined by discounting the future cash flows at an interest rate that reflects: (i) current market rates, and (ii) the future expected interest rates, for a term that shows the remaining life of these instruments.

Fair value estimates are made at a specific date based on relevant market estimates and information about the financial instruments. These estimates do not reflect any premium or discount that could result from the offer to sell a specific financial instrument at a given date. These estimates are subjective in nature and involve uncertainties and significant judgment; therefore, these estimates cannot be determined with precision. Changes in the assumptions or criteria could significantly affect the estimates.

The following table summarizes the carrying value and fair value of those significant financial assets and liabilities not measured at fair value in the Bank's condensed consolidated statement of financial position:

	June 30, 2018		December 31, 2017		June 30, 2017

Notes to the Condensed Consolidated Interim Financial Information

(18) Financial Instruments Risk Management

A financial instrument is any contract that originates a financial asset in one enterprise and a financial liability or equity instrument in another enterprise. The Bank's condensed consolidated statement of financial position is primarily composed of financial instruments.

Financial instruments expose the Bank to various types of risk. The Bank's Board of Directors has approved a Risk Management Policy to identify each significant risk the Bank is exposed to. In order to manage and monitor the several risks faced by the Bank, the Board of Directors has created the Credit Risk Committee of the Board of Directors, to oversee the liquidity, market, interest rate, exchange rate and counterparty risks. Likewise, the Board of Directors has established executive Committees, which are composed of key executives that monitor several risks faced by the Bank. These committees have established policies and limits in order to monitor, control and manage these risks. There is also an Audit Committee, composed of members of the Bank's Board of Directors that oversees the establishment of appropriate internal controls for reporting the Bank's financial information.

The main risks identified by the Bank are credit, counter-party, market, liquidity and financing, operational and capital management risks which are described as follows:

(a) Credit Risk

Is the risk that the debtor or issuer of a financial asset owned by the Bank does not fully and timely comply with any required payment, in conformity with terms and conditions agreed upon when the respective financial asset was acquired or originated by the Bank.

To mitigate credit risk, risk management policies establish limits by country, industry, and debtor. The Credit Committee appointed by the Board of Directors, periodically watches over the financial condition of debtors and issuers of financial instruments in the condensed consolidated statement of financial position of the Bank.

Allowance for Loan Losses

At the condensed consolidated statement of financial position date, it is assessed whether there is objective evidence that a loan or portfolio of loans is impaired. The allowance method is used to account for impairment. The amount of loan losses determined during the period is recognized as a provision expense in the results of operations and is credited to the allowance for loan losses.

The allowance is presented as a deduction from gross loans receivable in the condensed consolidated statement of financial position. The Bank periodically reviews its impaired portfolio to identify those loans that require to be charged-off against the allowance for loan losses. Recoveries of loans previously charged-off as non-recoverable, are credited to the allowance.

(19) Adoption of IFRS 9 Financial Instruments

The adoption of IFRS 9 requires the reclassification and remeasurement of the Bank's financial assets based on established business models, and on the characteristics of the contractual cash flow of the financial asset.

The main objective of the Bank's business model for investment securities is to receive contractual capital and interest flows and be able to sell at any time due to liquidity needs or in order to optimize the risk/return profile of a portfolio based on the interest rate, the risk margins, the current duration and the defined purpose.

As of January 1, 2018, the classification and measurement of financial instruments held as of December 31, 2017, are as follows:

- Investments in securities held to maturity, measured at amortized cost under IAS 39, were classified as FVOCI under IFRS 9.
- Loans and bank deposits that are classified as loans and deposits and measured at amortized cost under IAS 39 maintain this measurement under IFRS 9.
- Debt instruments classified as available for sale under IAS 39 were classified as FVOCI under IFRS 9, unless their contractual flows are not only principal and interest payments in which case they are classified as FVTPL.
- Instruments in securities measured at FVTPL under IAS 39 were mostly classified to FVOCI under IFRS 9 unless their flows are not only principal and interest payments or are part of the portfolios of BG Valores, S. A.
- Derivatives held to manage risks that are classified as FVTPL under IAS 39 maintain this measurement under IFRS 9.

Impact on capital planning

The main impact on the Bank's regulatory capital arises from the new impairment requirements under IFRS 9.

The following table summarizes the changes in equity items that were modified as a result of the adoption of IFRS 9 as of January 1, 2018:

	Impact of adoption of IFRS 9 in the opening balance
Reserve for valuation of investment securities and other financial assets:	
Balance at December 31, 2017	35,796,615
Recognition of expected credit losses for investment securities Fair Value OCI	7,789,587
Reclassification of investment securities available for sale to Fair Value through Profit or Loss	(2,688,416)
Reclassification of investment securities to Fair Value through Profit or Loss to Fair Value OCI	461,265
Reclassification of investment securities held to maturity to Fair Value OCI	11,398,840
Changes due to adoption of IFRS 9	<u>16,961,276</u>
Balance at January 1, 2018	<u>52,757,891</u>
Retained earnings:	
Balance at December 31, 2017	1,329,584,948
Adjustment for reclassification of investments	8,030,933
Recognition of expected credit losses for investment securities Fair Value OCI	(7,789,587)
Recognition of expected credit losses for loans	(412,548)
Deferred tax	671,993
Changes due to adoption of IFRS 9	<u>500,791</u>
Balance at January 1, 2018	<u>1,330,085,739</u>

Investment securities held to maturity	<u>91,361</u>	<u>0</u>	<u>(91,361)</u>	<u>0</u>
Total allowance of financial assets under IAS 39 and IFRS 9 to amortized cost	<u>144,923,666</u>	<u>0</u>	<u>321,187</u>	<u>145,244,853</u>
Investment securities to FVPTL transferred to FVOCI	0	0	2,369,188	2,369,188
Investment securities available for sale transferred to FVOCI	0	0	3,424,823	3,424,823
Investment securities held to maturity transferred to FVOCI	<u>0</u>	<u>0</u>	<u>1,995,576</u>	<u>1,995,576</u>
	<u>0</u>	<u>0</u>	<u>7,789,587</u>	<u>7,789,587</u>

(20) Main Applicable Laws and Regulations

As of June 30, 2018, there were no significant changes with respect to the applicable regulatory framework disclosed in the audited consolidated financial statements as of December 31, 2017.

The following are the main regulations affecting the bank:

Regulatory Allowances

The accounting treatment for the recognition of losses on loans, investment securities and other real estate owned in conformity with prudential standards enacted by the Superintendence of Banks of Panama, differs in some aspects from the accounting treatment established by International Financial Reporting Standards, specifically IFRS 9 (until December 31, 2017 IAS 39) and IFRS 5. The Superintendence of Banks of Panama mandates that general license banks apply these prudential standards.

Dynamic Provision

Agreement No.4-2013 indicates that the dynamic provision is a reserve provided to face possible future needs for specific provisions. They are governed by prudential criteria in the banking regulation. Dynamic reserves are established on a quarterly basis, on loans classified as Standard.

BANCO GENERAL, S. A. AND SUBSIDIARIES

(Panama, Republic of Panama)

Notes to the Condensed Consolidated Interim Financial Information

(20) Main Applicable Laws and Regulations, continued

The dynamic reserve is an equity account presented as a legal reserve in the condensed consolidated statement of changes in equity and appropriated from retained earnings. The balance of the dynamic reserve is part of regulatory capital, but cannot be used in satisfying current or future capital adequacy requirements established by this Superintendence. The balance of the Bank's dynamic reserve is detailed as follows:

	June 30 <u>2018</u>	December 31 <u>2017</u>	June 30 <u>2017</u>
Banco General, S. A.	133,877,476	133,877,476	133,877,476
Finanzas Generales, S. A.	2,810,061	2,810,061	2,810,061
Banco General (Overseas), Inc.	9,480,047	9,480,047	9,480,047
Banco General (Costa Rica), S. A.	<u>4,580,865</u>	<u>4,580,865</u>	<u>4,580,865</u>
Total	<u>150,748,449</u>	<u>150,748,449</u>	<u>150,748,449</u>

The current Agreement establishes that the dynamic reserve will not be lower than 1.25%, nor greater than 2.50% of risk-weighted assets applied to loan facilities classified as standard.
