### **Notes to Unaudited Interim Condensed Combined Financial Statements**

(INR amount in millions, unless otherwise stated)

---

As per the Guidance Note on Combined and Carve Out Financial Statements, the procedure for preparing combined financial statements of the combining entities is the same as that for consolidated financial statements as per the applicable Accounting Standards. Accordingly, when combined financial statements are prepared, intra-group transactions and profits or losses are eliminated. All the inter group transactions are undertaken on Arms Lengths basis. There is no allocation of expenses within the Restricted Group. The information presented in the Ind AS unaudited interim condensed combined financial statements of the Restricted group may not be representative of the position which may prevail after the transaction. The resulting financial position may not be that which might have existed if the combining businesses had been a stand-alone business.

The non-controlling interest held by outsiders amounts to INR 3 million and INR 3 million as of September 2020 and March 2020 respectively. Share capital and reserves disclosed in the Ind AS unaudited interim condensed combined financial statements is not the legal capital and reserves of the Restricted Group and is the aggregation of the share capital and reserves of the individual combining entities. Income taxes are arrived at by aggregation of the tax expenses actually incurred by the combining businesses, after considering the tax effects of any adjustments which is in accordance with the Guidance Note on Combined and Carve-Out Financial Statements issued by the ICAI.

Accordingly, the procedures followed for the preparation of the Ind AS unaudited interim condensed combined financial statements:

- (a) Combined like items of assets, liabilities, equity, income, expenses and cash flows of the combining entities.
- (b) Eliminated in full intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between entities of the Restricted Group (profits or losses resulting from intragroup transactions that are recognised in assets, such as fixed assets, are eliminated in full).

These Ind AS unaudited interim condensed combined financial statements may not necessarily be indicative of the financial performance, financial position and cash flows of the Restricted Group that would have occurred if it had operated as a separate stand-alone Group of entities during the period presented or the Restricted Group's future performance.

The Ind AS unaudited interim condensed combined financial statements include the operation of entities in the Restricted Group, as if they had been managed together for the period presented.

5. During August 2017, APEL has issued 5.5% US\$ denominated Senior Notes ("5.5% Senior Notes" or "Green Bonds") and raised INR 31,260 million net off of discount on issue of INR 9 million at 0.03% and issuance expense of INR 586 million. The discount on issuance of Green Bonds and the issuance expenses have been recorded as Finance cost based on effective interest rate method and the unamortized balance is netted with the carrying value of Senior Notes. These Notes are listed on Singapore Exchange Securities Trading Limited (SGX-ST). In accordance with the terms of the issue, APEL invested the proceeds in INR denominated Non-Convertible Debentures (NCDs) and External Commercial Borrowings (ECBs) within the Restricted Group. The interest on the Senior Notes are payable on a semi-annual basis and the principal amount is payable in November 2022. The Parent had guaranteed the principal and interest repayments to the investors; however, the guarantee was cancelled upon satisfying certain financial covenants, on the basis of the financial statements for the year ended March 31, 2019.

6. The Company designates the derivative contracts for mitigating the foreign exchange fluctuation risk as a cash flow hedge. The changes in fair value of the derivatives are included in other comprehensive income to the extent the hedge continues to be effective. The related other comprehensive income amounts are allocated to the Combined Statements of Profit and Loss in the same period in which the hedged item affects net earnings. To the extent the change in fair value of the derivative financial instruments is not completely offset by the change in the fair value of the hedged item, the ineffective portion of the hedging relationship is recorded in the Combined Statements of Profit and Loss.

**7. Contracts designated as Cash flow hedges:** The Company hedged the foreign currency exposure risk related to certain investments in Restricted Group entities denominated in foreign currency through call spread option with full swap for coupon payments. The foreign currency forward contracts and options were not entered for trading or speculative purposes.

The Company documented each hedging relationship and assessed its initial effectiveness on inception date and the subsequent effectiveness was tested on a quarterly basis using dollar offset method. When the relationship between the hedged items and hedging instrument is highly effective at achieving offsetting changes in cashflows attributable to the hedged risk, the Company records in other comprehensive income the entire change in fair value of the designated hedging instrument that is included in the assessment of hedge effectiveness. The gain or loss on the hedge contracts shall be reclassified to interest expense when the coupon payments and principal repayments are made on the related investments. The hedge contracts were effective as of September 30, 2020.

Ind AS 109, Financial Instruments, permits recording the cost of hedge over the period of contract based on the effective interest rate method. The Restricted Group determined the cost of hedge at the time of inception of the contract was INR 4,931 million and recorded an expense of INR 1,585 million and INR 1,477 million during the period ended September 30, 2020 and September 30, 2019 respectively.

The management assessed that cash and cash equivalents, term deposits, interest accrued on term deposits, other bank balances, trade receivables, unbilled revenue, viability gap funding receivable (VGF), receivable from related parties, security deposits received, current borrowings, interest accrued, payable for capital goods, trade payables and security deposits paid approximate their carrying amounts largely due to the short-term maturities of these instruments.

The fair value of the financial assets and liabilities is included at the price that would be received on selling of assets or paid to transfer a liability in an orderly transactions between market participants at measurement date.

The following methods and assumptions were used to estimate the fair values :

**Measured at fair value:**

\* The respective companies under the Respective Group enter into derivative financial instruments with various counterparties, principally financial institutions with investment grade credit ratings. Foreign currency option derivatives are valued using valuation techniques, which employs the use of market observable inputs. The most frequently applied valuation techniques include forward pricing and swap models, using present value calculations. The models incorporate various inputs including the credit quality of counterparties, foreign exchange spot and forward rates, yield curves of the respective currencies, currency basis spreads between the respective currencies, interest rate curves and forward rate curves of the underlying instruments. The Restricted Group used the derivatives option pricing model based on the principles of the Black-Scholes model to determine the fair value of the foreign exchange derivative contracts. The inputs considered in this model include the theoretical value of a call option, the underlying spot exchange rate as of the balance sheet date, the contracted price of the respective option contract, the term of the option contract, the implied volatility of the underlying foreign exchange rates and the risk-free interest rate as of the balance sheet date.

**At amortised cost:**

\*\*Fair value of long-term loan having floating rate of interest approximate the carrying amount of those loans as there was no significant change in the Restricted Group's own credit risk during the period.

\*\*\*The fair values of the interest-bearing borrowings and loans of Restricted Group are determined by using DCF method using discount rate that reflects the issuer's borrowing rate as at the end of the reporting period. The own non-performance risk as at September 30, 2020 was assessed to be insignificant.
