Outlook

**Shaping
the Future**

Outlook (1 of 2)

The global rebound in passenger travel has been evident and the positive trend is expected to continue through the winter travel season into 2023, underpinning earnings growth across SATS' network of operations. Ahead of the expected full recovery in travel, SATS has been ramping up capacity and capabilities, which are essential to maintaining Changi's leading air hub status and providing customers with excellent service quality during this critical period.

This includes:

- Reopening Inflight Catering Centre 1 in Singapore;
- Replicating cold chain capabilities in Hong Kong through its subsidiary AAT; and
- Setting a new international benchmark for safer aviation travel and supply chain, SATS has attained the world's first accreditation by IATA for the Group's competency in handling lithium batteries, which are becoming the preferred energy source for consumer products.

Air cargo demand remains broadly positive despite macro headwinds, the conflict in Ukraine and pandemic controls in China. To meet global customer demand, and tap into longer-term industry trends, SATS on 28 September 2022 announced the proposed acquisition of Worldwide Flight Services (WFS), to become the leading global air cargo handler.

Outlook (2 of 2)

Kerry Mok, President and Chief Executive Officer of SATS, said, “The continuing rebound in travel demand is a huge positive for our business and our customers. In Singapore, our Food Solutions and Gateway Services teams have been busy ramping up operations to ensure we are ready to meet the higher passenger numbers and deliver best-in-class services. Changi Airport being our home market will remain our core focus as well as the launch pad for our growing global network, strategy and capabilities. Investing intensively in our Changi operations, we have accelerated hiring, training and development programmes, as well as upgraded systems and facilities to be more efficient and digital-led.”

Proposed Acquisition of WFS
