

**BUMITAMA AGRI LTD.**  
(Incorporated in Singapore)  
(Co. Reg. No: 200516741R)  
(the “Company”)

---

**RESPONSE TO THE SUBSTANTIAL AND RELEVANT QUESTION SUBMITTED BY  
SHAREHOLDER IN ADVANCE OF THE ANNUAL GENERAL MEETING TO BE HELD ON 22  
APRIL 2024**

---

Bumitama Agri Ltd (the “**Company**”) has received a substantial and relevant question from a shareholder in advance of the Annual General Meeting (“**AGM**”) to be held on 22 April 2024 and the Board of Directors of the Company wishes to announce the Company’s response to the question as follow:-

**Question**

1. Does Bumitama intend to sell its palm oil mill effluent to established players in the sustainable aviation fuel value chain similar to what Malaysia’s counterparts have done?

The Company’s response is:

Almost all available Palm Oil Mill Effluent (“**POME**”) that the Company and its Group of Companies (the “**Group**”) produced is utilised as organic fertilisers in the field. Aside from reducing costs while enhancing field productivity, it also serves as mitigation to ensure good corporate governance in minimising oil loss at the mill operations. Additionally, the Group is also utilising some POME as feedstock for the methane capture facility, which is then converted into energy. Thus, the Company would not venture into selling its POME for the time being.

By Order of the Board

Lim Gunawan Hariyanto
