

JOINT PRESS RELEASE • FOR IMMEDIATE RELEASE

International Gas Detectors Deepens Singapore Footprint with Appointment of Scientific & Industrial Instrumentation as Authorised Distributor

Appointment supports IGD's Asia-Pacific expansion and brings its UK-engineered fixed gas detection technology to Singapore's pharmaceutical, life sciences, industrial and built-environment sectors

SINGAPORE, 30 September 2026 – Scientific & Industrial Instrumentation Pte. Ltd. (“SII”), a wholly-owned indirect subsidiary of SGX Mainboard-listed USP Group Limited (“USP Group”), and International Gas Detectors (“IGD”), the UK-based fixed gas detection manufacturer within Sweden-headquartered Safe Monitoring Group (“SMG”), are pleased to announce that SII has been appointed IGD’s authorised distributor and channel partner in Singapore.

The appointment, formalised through a Distributor and Channel Partner Agreement signed on 29 September 2026 for an initial term of thirty-six (36) months, covers the promotion, sale, installation, servicing and calibration support of IGD’s gas detection products and services across Singapore. It marks a further step in SMG’s Asia-Pacific growth strategy following its entry into the region earlier this year, and pairs IGD’s UK-engineered detection technology with SII’s five decades of instrumentation, calibration and gas detection expertise in Singapore.

From left: Mr Toh Hai Joo, Independent Non-Executive Director, USP Group Limited; Mr Chan Chung Khang, Independent Non-Executive Chairman, USP Group Limited; Mr Melvin Tan Wei Yang, Chief Executive Officer, Scientific & Industrial Instrumentation Pte. Ltd. and Executive Director & CEO, USP Group Limited; Mr Uu Su Haw, President, Asia Pacific, Safe Monitoring Group; Mr Leow Yong Kin, Chief Financial Officer, USP Group Limited; and Ms Maio Dangi, Non-Independent Non-Executive Deputy Chairperson, USP Group Limited, at the signing of the Distributor and Channel Partner Agreement on 29 September 2026.

Leadership Comments

"This partnership brings together two organisations with a shared conviction: that protecting people, equipment and the environment demands both world-class technology and deep local capability. By pairing IGD's British gas detection engineering with SII's instrumentation and calibration heritage in Singapore, we can give customers a complete solution — from system design and installation to calibration, servicing and lifetime support. For USP Group, this appointment reflects our strategy of building recurring, high-value technical service revenue across the region."

— Melvin Tan Wei Yang, Chief Executive Officer, Scientific & Industrial Instrumentation Pte. Ltd., and Executive Director & CEO, USP Group Limited

"The appointment of SII is an important step in strengthening IGD's presence and customer support in Singapore. Effective gas detection requires more than proven technology; it depends on strong application knowledge, responsive local service and dependable support throughout the life of a system. SII's technical capability, calibration expertise and established presence in Singapore make it a strong partner for IGD. By combining our engineering and gas detection experience with SII's local expertise, we will help customers protect their people, facilities and operations. We look forward to building a long-term partnership founded on safety, quality and shared commitment to our customers."

— Adam Pilkington, Commercial Manager, International Gas Detectors Ltd.

"Singapore is a cornerstone of Safe Monitoring Group's Asia-Pacific strategy, and partnering with SII accelerates our mission of protecting people, equipment and the environment across the region. SII's technical depth, its SIICAL calibration laboratory and its long-standing relationships in regulated industries make it the ideal partner to bring IGD's technology to the Singapore market. This appointment builds on our recent expansion into APAC and signals our long-term commitment to the region."

— Uu Su Haw, President, Asia Pacific, Safe Monitoring Group

Highlights of the Partnership

- SII appointed authorised distributor and channel partner for IGD products and services in Singapore, for an initial term of 36 months.
- Full-spectrum coverage: promotion, sales, system design support, installation, commissioning, servicing, calibration and after-sales support.
- IGD to provide technical and engineering support, tender and proposal assistance, product training and approved marketing assets.
- Combines IGD's UK-manufactured fixed gas detection systems with SII's SIICAL calibration laboratory and validation services.
- Strengthens SMG's Asia-Pacific presence and USP Group's instrumentation and safety solutions portfolio.

About Scientific & Industrial Instrumentation Pte. Ltd. (SII)

Established in Singapore in 1975, SII provides measurement, instrumentation and calibration solutions to the pharmaceutical, medical, food and industrial sectors. SII designs and installs gas detection systems for personnel safety and fire hazard detection, and operates SIICAL, its SAC-SINGLAS accredited calibration laboratory (LA-2017-0658-C), serving customers across Singapore and the region. SII is ISO 9001 certified and bizSAFE Level 3, and is a wholly-owned indirect subsidiary of USP Group Limited.

About USP Group Limited

USP Group Limited (SGX: BRS) is a Singapore-incorporated company listed on the Mainboard of the SGX-ST. Through its operating subsidiaries under the Supratechnic, SII and SupraYi brands, the Group distributes clean air, healthcare, instrumentation and marine solutions across Singapore, Malaysia and Indonesia. Following its discharge from judicial management with effect from 18 July 2026, the Group is focused on strengthening its core operating businesses, pursuing technology- and AI-enabled growth initiatives, and working towards the resumption of trading of its shares on the SGX-ST.

About International Gas Detectors (IGD)

International Gas Detectors (Oliver IGD Limited) is a UK-based manufacturer of fixed gas detection systems and a supplier of portable gas monitors, headquartered in Stockport, England, drawing on over 100 years of pioneering gas detection technology. IGD's solutions protect people, equipment and the environment across industries including life sciences, pharmaceuticals, HVAC, renewables, water and wastewater, tunnelling, petrochemical and fire and rescue. IGD has been part of Safe Monitoring Group since May 2023.

About Safe Monitoring Group (SMG)

Safe Monitoring Group, headquartered in Vellinge, Sweden, unites specialist safety monitoring companies under one mission: protecting people, equipment and the environment. SMG's portfolio spans fixed and portable gas detection, monitoring services, digital solutions and training, serving industries worldwide. SMG entered the Asia-Pacific region in 2026 and continues to expand its regional presence through partnerships and acquisitions.
