

NEWS RELEASE**AiR DIGITAL ACHIEVES ISO CERTIFICATION FOR ITS
AI-POWERED PLATFORM AS GLOBAL EXPANSION ACCELERATES**

- **Globally recognized standard provides assurance of enhanced cybersecurity, operational resilience and business continuity**

SINGAPORE, 9 JUNE 2026 – AiR Digital Solutions, the technology subsidiary of Singapore-listed global concrete innovation leader Pan-United Corporation Ltd (泛联集团), has achieved **ISO/IEC 27001:2022 certification** for its AI-powered operations management platform.

ISO/IEC 27001:2022 is an internationally recognized standard for managing information security risks. The certification underscores AiR Digital’s robust approach to cybersecurity and data privacy, including safeguards against threats such as cyberattacks, unauthorized access and data leaks.

This certification marks an important milestone in AiR Digital’s continued growth as a trusted technology partner. It provides customers with added assurance that the company operates on a secure and scalable framework with robust governance, operational resilience and quality assurance standards. The certification also supports AiR Digital’s ability to scale its solutions across markets and industries while maintaining consistency, reliability and data security.

Ms Seng Mui Mui (孙美美), Senior Director of AiR Digital Solutions, said: “As businesses increasingly harness digital tools and solutions to manage operations, cybersecurity and data privacy must be embedded in the way technology is designed, delivered and supported. This certification reinforces the strong governance and security foundations behind the AiR Digital platform, giving our customers greater confidence as they digitalize and scale their operations across increasingly complex environments and supply chains.”

The ISO certification comes as AiR Digital continues to expand its regional and global footprint. Today, the company operates across seven markets in Asia and Australasia, helping businesses optimize logistics, manpower planning and operational workflows through AI-driven automation. AiR Digital is also exploring opportunities in new international markets.

AiR Digital Solutions specializes in AI-powered operations management system for ready-mix concrete (RMC) producers, logistics companies and industries with complex end-to-end operations. Built on deep domain expertise in RMC operations, its configurable, proprietary platform uses machine learning and AI to enable data-driven, automated decision-making, optimize processes and improve operational efficiency. Earlier this year, AiR Digital also showcased its solutions at World of Concrete 2026, one of the construction industry’s leading global trade events, as part of its efforts to deepen engagement with international customers and partners.

ABOUT AiR DIGITAL SOLUTIONS

airdigital-solutions.com

AiR Digital Solutions specializes in configurable AI-powered solutions for businesses in the concrete and logistics eco-system. It optimizes critical processes to automate the best decisions in real time. The benefits extend beyond maximizing efficiency, strengthening internal controls and better managing costs. AiR Digital is a proud subsidiary of global concrete innovation leader Pan-United Corporation.

ABOUT PAN-UNITED CORPORATION

panunited.com.sg

Singapore-listed Pan-United Corporation (SGX:P52) is a global leader in low-carbon concrete technologies catalyzing change in the concrete space. It is one of the world's biggest producers of carbon mineralized ready-mix concrete which leverages carbon capture & utilization (CCU) technology to sequester industrial waste CO₂ within concrete.

Focused on concrete innovation and digital transformation, Pan-United firmly believes in concrete as an engineered product that can play a significant role in decarbonizing the environment, so as to ensure a safer world for future generations. Its world-class inhouse R&D capabilities have produced an extensive range of over 300 concrete solutions, over half of which are low-carbon concrete. AiR Digital, its technology subsidiary, offers a suite of AI-powered operations management solutions designed for ready-mix concrete producers, logistics companies and operations with complex logistics needs.

Pan-United has pledged to offer only low-carbon concrete by 2030, offer carbon-neutral concrete by 2040, and to become a carbon-neutral company by 2050.
