

Media statement attributed to Mr Yuen Kuan Moon, Chief Executive Officer, Consumer Singapore, Singtel

Singtel has successfully acquired the maximum allowable spectrum in the 700 MHz, 900 MHz and 2.5GHz bands for S\$ 563.7m at the General Spectrum Auction.

With this investment, we have secured the necessary spectrum to grow, evolve and expand our mobile business into the future and stay at the cutting edge of technology development.

As the 700Mhz spectrum band is the most efficient and versatile spectrum band for LTE networks, this investment puts us in a strong position to support the growth of IOT and 5G initiatives in the future.

As the leading operator in Singapore with more than 4 million mobile subscribers, we are committed to providing the best mobile experience to our customers by investing ahead.
