

MEDIA RELEASE

CNA Group to deliver first Integrated Fuel Management System in Laos

**First project in fuel management that will generate recurring income
—approximately US\$3 million per year for 20 years**

Singapore, 23 July 2014: Singapore Mainboard-listed Master System Integrator (“MSI”), CNA Group Ltd. (“CNA” or “the Group”), has signed a Memorandum of Agreement (“MOA”) with Buathip Lao Co., Ltd (“Buathip”) to jointly deliver a national¹ Integrated Fuel Management System (“IFMS”) in Laos, where Buathip will be the local partner.

Using an integrated approach, the IFMS will effectively measure and manage fuel imports into the country. This IFMS allows a central control centre to collect and collate fuel data through a networked infrastructure of data gathering points, enabling better management, cost analysis and accounting for fuel inventory movement.

Buathip has received a 10+10 year contract from the Government of Laos to deliver an IFMS whereby the Laos Government will pay a service charge on a per litre basis to Buathip. Under the MOA, Buathip will give CNA a minimum guarantee of 1 billion litres per year, which will translate into approximately US\$2.73 million per year. Currently Laos has an annual import fuel volume of approximately 1.2 to 1.5 billion litres.

CNA will be the technology partner, and with Buathip’s assistance, CNA will conduct the site survey, perform the design, installation of equipment, conduct the testing & commissioning, conduct training, and perform operations & maintenance.

This project with Buathip will be the third project for CNA in Laos. The Group was previously awarded projects in Laos to implement Common Use Terminal Equipment (“CUTE”) solutions in Wattay International Airport (announced on 16 October 2013) and Luang Prabang International Airport (announced on 6 June 2013).

¹ The delivery of IFMS includes design, installation, test & commission, training and operating & maintenance

Mr Michael Ong, CNA's Group CEO and President commented: ***"I am excited about the potential of the Laos market and this project with Buathip that will generate recurring income for us. To date, all our three projects in Laos will be generating recurring income for us, which is in line with our strategy to grow our recurring income pool to smoothen our project-based revenue."***

The Group will make relevant announcements as and when the terms and conditions of the partnership are finalised accordingly.

About CNA Group Ltd.

Incorporated in 1990, CNA Group Ltd. ("CNA") is an award-winning specialist in the provision, design, implementation and maintenance of open, integrated building and facility management solutions that can integrate and control a diverse range of mechanical, electrical, security and climate control systems within a building or facility.

CNA's service and products portfolio focuses on both information communication technology ("ICT") and Mechanical, Electrical and Plumbing ("MEP") solutions intended to address newly emerging demands of sustainability, energy management, renewable energy and low carbon emission technologies. The Group also provides system maintenance and value-enhancement services and the sale of environmental control and engineering products.

Additionally, CNA is in the fast-growing industrial wastewater treatment sector in China through its Dongying wastewater plant and concession agreement with the Dongying Economic and Technological Development Zone of Dongying City, Shandong Province, China.

Headquartered in Singapore, CNA has direct presence in many countries in Asia and the Middle East. The Group serves an impressive list of customers in Singapore, Malaysia, Myanmar, Philippines, Thailand, India, China, Vietnam, Dubai having implemented a broad range of projects for commercial and government buildings, educational institutes, residential developments, semiconductor wafer fabs, pharmaceutical plants, other industrial manufacturing facilities, wastewater treatment facilities, and aviation and transportation infrastructure.
