2. Review of the performance of the Group (cont'd)

The increase in total revenue in HY2022 is mainly attributable to the increase in revenue from the mechanical engineering and electrical engineering segments. Revenue from the mechanical engineering segment increased mainly due to most of the projects are at ongoing phases. Revenue from the electrical engineering segment increased slightly as projects are on-going.

Revenue contribution from the facilities management segment decreased as two projects were completed in February/March 2022.

Gross profit decreased mainly attributable to an increase in gross loss from electrical engineering segment and loss on the fair value of investment securities, despite of the gross profit generated from the mechanical engineering and facilities management segments.

Gross profit margin decreased from 25.3% in HY2021 to 16.2% in HY2022 mainly due to lower gross profit margin derived from the mechanical engineering segment and a gross loss margin derived from electrical engineering segment. The gross profit margin for mechanical engineering is lower mainly due to subcontractors' costs transferred from down payment upon their completion of the related works. The gross loss margin from the electrical engineering segment was mainly due to higher cost for subcontractors' services and higher cost of employing foreign workers due to the Covid-19 pandemic where the government has implemented measures to restrict the inflow of foreign workers from overseas. In addition, the implementation of safe management measures on sites also increased the worksite operating costs.

The gross profit margin for facilities management segment improved from 28.2% in HY2021 to 57.0% in HY2022 mainly attributable to variation orders carried out before the contracts ended.

iv) Other Income

Other income decreased mainly due to a decrease in the provision of government support grants such as job support scheme and levy rebates.

v) Selling and distribution expenses

Selling and distribution expenses increased mainly due to the increased in freight and handling charges in HY2022.

vi) Administrative Expenses

Administrative expenses increased mainly due to an increase in staff cost, recruitment costs, rental of workers quarter and an increased hiring of personnel for increased operation of projects.

3. Review of condensed interim statements of financial position

Total assets as at 30 June 2022 have decreased as compared to 31 December 2021, and are mainly attributable to the following :-

- **b.** Trade and other receivables decreased due to improvements in trade receivables turnover days from 46 days to 31 days as at end of HY2022.
- c. Contract assets increased due to work completed but not yet billed as at 30 June 2022.
- d. Cash and bank balances decreased due to reasons as described in the cash flows analysis below.

Total liabilities as at 30 June 2022 have increased as compared to 31 December 2021, and are mainly attributable to the following :-

The increase in trade and other receivables and contract assets of \$ 2.5 million, as well as an increase in trade and other payables of \$ 0.4 million, resulted in net cash used in operating activities of \$ 2.6 million.

The net cash used in investing activities amounting to S\$105,000 was mainly due to investment in securities and additions of property, plant and equipment.

The net cash used in financing activities amounting to S\$148,000 was mainly due to the repayment of lease liabilities.

As at 30 June 2022, the Group had cash and cash equivalents of S\$9.3 million after excluding fixed deposits of S\$1.1 million pledged to banks for banking facilities.
