In the **Mobile Natural Gas Sector**, through the development of mobile gas infrastructure and supply chains, IEV produces compressed natural gas ("**CNG**") from natural gas sources and then transports and delivers it to customers in the industrial sector where gas pipelines are not available or, where construction of gas pipelines is technically or economically unviable. This "virtual pipeline" enables consumers without access to pipeline gas to consume clean and low cost energy and reduce their dependence on liquid fuel. IEV currently operates a full scale supply chain in Indonesia and as of today holds a 4.34% interest in CNG Vietnam as a co-founder of CNG Vietnam. IEV not only provides technical expertise for customers to commercialise their flare gas and stranded gas by providing mobile natural gas solutions, but also sources for flare gas and stranded gas reserves owned by energy companies in Indonesia and offer them commercialisation solutions.
