SINO CONSTRUCTION COMPLETES ADDITIONAL FIRE ISOLATION CONSTRUCTION AT MICRO POWER PLANT ONE - POHANG

Singapore, 18 May 2015 - Mainboard-listed, Sino Construction Limited (the "Company" and together with its subsidiaries, the "Group") wishes to announce that its subsidiary, Magnum Modular Power Generation Pte Ltd ("MMPGPL") which is a joint venture with Primeforth Renewable Energy Limited ("PREL"), has completed additional fire isolation construction at Micro Power Plant One ("MPP ONE") in Pohang, South Korea.

MMPGPL is now only waiting State and Korean Power Exchange ("KPX") approval, having received approval from the City of Pohang and Fire Department for the new facility and fire isolation upgrades. The MMPGPL operational team had decided to exceed local and national fire regulations in South Korea by constructing concrete and brick isolation boxes for each generator, heavily limiting the chance of fire spreading to other generators and causing a potential catastrophic failure. Further consultation lead to the construction of an isolation unit, although at a higher cost. The isolation unit will allow better access in case of fire, whilst protecting all other workspaces.

The Company has previously announced that the targeted execution date of MPP ONE will be towards the end of May, and remain on schedule.

By Order of the Board
