News Release

ST Engineering's Electronics Arm Secures Contracts Worth about S$585m in 3Q2017

Singapore, 24 October 2017 – Singapore Technologies Engineering Ltd (ST Engineering) announced today that its electronics arm, Singapore Technologies Electronics Limited (ST Electronics), has clinched about S$585m worth of contracts in the third quarter (3Q) of 2017 for Rail Electronics & Intelligent Transportation, Satellite & Broadband Communications, as well as Advanced Electronics and Information Communications Technologies (ICT) solutions.

Rail Electronics and Intelligent Transportation

Rail Electronics and Intelligent Transportation contracts of about S$125m were secured from local and overseas customers. These included the supply of the Communications and Platform Screen Door Systems for Bangkok's MRT Blue Line and Blue Line Extension, Passenger Information Systems for Wuhan Metro Line 11 and Saudi Arabia's Mecca Metro Line, rail electronics for Taipei MRT and Taoyuan Airport MRT line, as well as the Integrated Supervisor Control System, Maintenance Management System, Communications and Automatic Fare Collection Systems for Singapore and the region. These projects will be completed progressively till 2024.

Satellite & Broadband Communications

Contracts amounting to S$101m were awarded by government, telecom and enterprise users worldwide for the supply of broadband network, satellite network equipment and earth stations. Some notable wins included the selection of VT iDirect's platform and its new iQ Series by IsoTropic Networks and Datagroup, Very Small Aperture Terminal (VSAT) industry providers, enabling the provision of High Throughput Satellite and next-generation services to their customer bases in Ukraine, North America, Europe and Asia. These projects will be completed progressively over the next three years.

Advanced Electronics and ICT Solutions

About S$359m worth of Advanced Electronics and ICT contracts were secured from customers in the public and private sectors. Some of these included Integrated Security Management Systems, Tactical Vehicles with Communications Systems, Operations as well as Maintenance and Engineering Services. These projects will be completed progressively till 2022.

Against the backdrop of a rapidly-evolving cyber environment, ST Electronics continues to build strong collaboration with key industry partners to develop industry-leading capabilities and products that strengthen the cyber security landscape of Singapore and other countries. In September, ST Electronics joined forces with IBM and Siemplify to develop the next generation Cyber Security Command and Control Centre, as well as partnered Cisco to deliver enhanced security capabilities and provide Managed Detection and Response Security Services.

It also launched the Black Computer L100, an industry-first hardware-based cyber security solution at GovernmentWare 2017. This is the result of its collaboration with Janus Technologies, Inc.; a US-based endpoint cyber security provider, which ST Engineering invested in through its Corporate Venture Capital unit.

These contracts are not expected to have any material impact on the consolidated net tangible assets per share and earnings per share of ST Engineering for the current financial year.

*****

ST Electronics (Singapore Technologies Electronics Limited), is the electronics arm of Singapore Technologies Engineering Ltd, one of the largest public-listed companies on the Singapore Exchange. ST Electronics is a global engineering company specialising in the design, development and integration of advanced electronics and communications systems. Our capabilities are in Rail & Intelligent Transportation; Satellite & Broadband Communications; Info Comm Technologies; Command & Control operations, Training & Simulation; Intelligent Building & Security Systems and Cybersecurity. We have a presence in over 20 countries spanning North America, Latin America, Europe, Africa, the Middle East, China, India and Southeast Asia. For more information, please visit www.stee.stengg.com.

ST Engineering (Singapore Technologies Engineering Ltd) is an integrated defence and engineering group specialising in the aerospace, electronics, land systems and marine sectors. It has global presence with offices in Asia, the Americas, Europe and the Middle East and employs about 22,000 employees. Across the globe, its employees bring innovation and technology together to create smart engineering solutions for its customers in the defence, government and commercial segments. Headquartered in Singapore, ST Engineering reported revenue of S$6.68b in FY2016 and ranks among the largest companies listed on the Singapore Exchange. It is a component stock of the FTSE Straits Times Index, MSCI Singapore and the SGX Sustainability Leaders Index. Please visit www.stengg.com for more information.
