BOUSTEAD SUBSIDIARY AWARDED S\$137M IN DESIGN-AND-BUILD CONTRACTS

- *Five contracts secured by division to date in FY2015 started April 2014*
- *Contracts strengthen division's leading status as builder of choice in high-value added and specialised industrial facilities*
- *Boustead Group's order book backlog raised to over S\$452 million*

Singapore, 10 October 2014

Boustead Singapore Limited ("Boustead") is pleased to announce that its wholly-owned subsidiary, Boustead Projects Pte Ltd ("Boustead Projects") – a leading specialist in industrial real estate solutions – has been awarded three design-and-build contracts in Singapore recently. The total value of the contracts could potentially reach S\$137 million, with the final value to be determined based on provisional design and engineering options.

The latest contracts have been awarded by clients in the food, logistics and renewable energy industries. These contracts have strengthened Boustead Projects' leading status as the builder of choice in high-value added and specialised industrial facilities. All three contracts are expected to be completed within calendar year 2015.

The first contract involves the delivery of an integrated food production, logistics and office facility for a client specialising in the food logistics and supply chain management services industry. Earmarked to attain Green Mark Gold, the facility will incorporate spaces for food production, offices, as well as an advanced automatic storage and retrieval system within its cold, chilled and ambient warehouse. The integration of a cold storage warehouse with an automatic storage and retrieval system is a first for Boustead Projects.

The second contract is for the delivery of an advanced integrated logistics and office facility for a global logistics provider. The logistics facility is the 28th logistics facility undertaken by Boustead Projects, building on its outstanding track record in serving the logistics industry with more than 840,000 square metres of gross floor area in industry-specific experience.

Boustead Projects will also be undertaking the design and building of a warehouse for one of the world's largest corporations in the renewable energy sector.

Managing Director of Boustead Projects, Thomas Chu said, "Naturally, we are absolutely delighted to capture three more contracts, following in quick succession after securing the Airbus Asia Training Centre from repeat client, Airbus, earlier this week. The latest contracts were awarded by global leaders in their respective industries."

Senior Deputy Managing Director of Boustead Projects, Wong Yu Wei added, "In recent times, we have significantly strengthened our core with a bolstered pipeline of design-and-build projects, as well as our new strategic development platform, the Boustead

Development Partnership, launched in partnership with sovereign wealth fund, the Abu Dhabi Investment Council.”

In August 2014, Boustead Projects entered into a co-investment partnership, the Boustead Development Partnership (the “BDP”) with the Abu Dhabi Investment Council. The BDP has a strategy to develop and redevelop modern logistics and high quality industrial facilities in Singapore and will also be the proposed investor for future design-build-and-lease projects, development projects and redevelopment projects, with a potential investment pipeline of over S\$600 million.

Mr Wong concluded by saying, “Tomorrow, we will cap off this fruitful week with the official sales launch of the iBP @ Nusajaya, our 35%-owned joint venture development in Iskandar Malaysia. Phase 1 offers 50 units of flexibly-designed detached and semi-detached modern factories in a premier freehold business park development that is logistically well connected and within a designated clean and green zone.”

Details on iBP @ Nusajaya can be found at www.ibpnusajaya.com.my.

The latest contracts will raise the Boustead Group’s order book backlog (as at the end of June plus new orders since) to over S\$452 million.

These contracts are expected to have a positive material impact on the profitability and earnings per share of the Boustead Group in the current financial year ending 31 March 2015. However, these contracts are not expected to have a material impact on the net tangible asset value per share in the current financial year.

None of the Directors or controlling shareholders of Boustead has any interest, direct or indirect, in the above contracts.

By Order of the Board

Alvin Kok
Company Secretary
