

TELEFONICA DEL PERU S.A.A. AND SUBSIDIARIES

CONSOLIDATED FINANCIAL STATEMENTS
AS OF MARCH 31, 2021 AND DECEMBER 31, 2020

Consolidated balance sheet

This section includes the sub-items that make up the balance of codes 1D0103, 1D0201, 1D0317, 1D0403, 1D0205, 1D0309 and 1D0401 of the consolidated statement of financial position and their respective reference to the notes to the consolidated financial statements.

- Code 1D0103 short-term "Trade accounts receivable", includes:

	As of March 31, 2021	As of December 31, 2020
	S/000	S/000
Trade accounts receivable, net (Note 7)	1,058,066	1,168,348
Contractual assets (Note 9)	33,039	39,016
	<u>1,091,105</u>	<u>1,207,364</u>

- Code 1D0201, long-term "Trade accounts receivable", includes:

	As of March 31, 2021	As of December 31, 2020
	S/000	S/000
Trade accounts receivable, net (Note 7)	1,604	503
Contractual assets (Note 9)	3,527	4,461
	<u>5,131</u>	<u>4,964</u>

- Code 1D0317 short-term "deferred income" includes:

	As of March 31, 2021	As of December 31, 2020
	S/000	S/000
Deferred income (Note 22)	30,543	29,277
Contractual liabilities (Note 9)	149,813	149,664
	<u>180,356</u>	<u>178,941</u>

- Code 1D0403 long-term "deferred income" includes:

	As of March 31, 2021	As of December 31, 2020
	S/000	S/000
Deferred income (Note 22)	77,520	81,359
Contractual liabilities (Note 9)	68,901	59,669
	<u>146,421</u>	<u>141,028</u>

- Code 1D0205, "Properties, plant and equipment", includes:

	As of March 31, 2021	As of December 31, 2020
	S/000	S/000
Property, plant and equipment (Note 13)	5,425,037	5,567,517
Right of use assets (Note 15)	945,761	953,798
	<u>6,370,798</u>	<u>6,521,315</u>

- Code 1D0309, "Other financial liabilities", in the short term includes:

	As of March 31, 2021	As of December 31, 2020
	<u>S/000</u>	<u>S/000</u>
Financial obligations (Note 17)	243,296	153,762
Financial liabilities for lease (Note 18)	354,922	336,268
	<u>598,218</u>	<u>490,030</u>

- Code 1D0401, "Other financial liabilities", in the long term includes:

	As of March 31, 2021	As of December 31, 2020
	<u>S/000</u>	<u>S/000</u>
Financial obligations (Note 17)	2,946,207	2,943,715
Financial liabilities for leasing (Note 18)	786,953	790,481
	<u>3,733,160</u>	<u>3,734,196</u>

Consolidated income statement

This section includes the sub-items that make up the balance of codes 2D01ST, 2D0301 and 2D0302 of the consolidated income statement and their respective reference to the notes to the consolidated financial statements.

- Code 2D01ST, "Income from ordinary activities", includes:

	As of March 31, 2021	As of March 31, 2020
	S/000	S/000
Fixed business income (Note 26)	841,022	973,124
Mobile business revenue (Note 27)	799,048	800,600
Total	<u>1,640,070</u>	<u>1,773,724</u>

- Codes 2D0301 and 2D0302, "Administration expenses" and "Sales and distribution expenses", include:

	As of March 31, 2021	As of March 31, 2020
	S/000	S/000
General and administrative expenses (Note 28)	971,011	1,065,989
Equipment sales cost (Note 10 (b))	274,414	238,399
Depreciation (Note 13)	227,764	247,295

Selling and distribution expenses (2D0302)	22,671	16,341
Total	<u>1,741,997</u>	<u>1,863,274</u>

TELEFONICA DEL PERU S.A.A. AND SUBSIDIARIES

NOTES ON CONSOLIDATED FINANCIAL STATEMENTS
AS OF MARCH 31, 2021 AND DECEMBER 31, 2020

1 OVERVIEW

1.1 Constitution and economic activity -

Telefónica del Perú S.A.A. (hereinafter "the Company"), incorporated in Peru, is a telecommunications company subsidiary of Telefónica Hispanoamérica Holding S.A. (a company incorporated in Spain and formerly known as Latin America Cellular Holding B.V.) and belongs to the Telefónica de España Group (Telefónica S.A. is an entity registered with the Security and Exchange Commission of the United States of America), which provides services of mobile telephony, internet, fixed telephony, data transmission and information technology, national and international long distance carrier services, mobile satellite services and paid television services, among others throughout Peru. The Company is one of the main telecommunications operators in Peru and its activities are supervised by the Supervisory Agency of Private Investment in Telecommunications - OSIPTEL and by the Ministry of Transport and Communications - MTC. The registered fiscal address of the Company is Calle Dean Valdivia No. 148, San Isidro, Lima, Peru.

The subsidiaries included in the consolidated financial statements as of March 31, 2021 are the following:

- Servicios Globales de Telecomunicaciones S.A.C. that is dedicated to the commercialization of services of public telephony to stores, convenience stores and similar establishments and, of which, the Company maintains a 99.90 percent market share.
- PangeaCo Perú S.A.C. (in pre-operational stage), a company that is dedicated to operating and providing all kinds of telecommunications services, dedicating itself to the acquisition, possession, and operating of telecommunications infrastructure.

As of December 31, 2020, it merged with Servicios Globales de Telecomunicaciones S.A.C., PangeaCo S.A.C. and Telefónica Cloud Tech Perú S.A.C. See note 1.3(a).

The consolidated financial statements of Telefónica del Perú S.A.A. and its subsidiaries (hereinafter "the Group") include the following balances:

	As of March 31, 2021	As of December 31, 2020
	S/000	S/000
Servicios Globales de Telecomunicaciones S.A.C.		
Assets	17,582	17,159
Liabilities	14,905	14,856
Net equity	2,677	2,303
Net Profit / (Loss)	374	(3,353)

	As of March 31, <u>2021</u> S/000	As of December 31, <u>2020</u> S/000
PangeaCo S.A.C.		
Assets	45	45
Net equity	45	45
Telefónica Cloud Tech Perú S.A.C., note 1.3(a)		
Assets	-	50
Net equity	-	50

1.2 Approval of consolidated financial statements -

The consolidated financial statements as of December 31, 2020 were approved by the General Shareholders Meeting held on March 26, 2021. The consolidated financial statements as of March 31, 2021 were approved by the Board of Directors on April 27, 2021.

1.3 Corporate reorganization -

a) Assignment of equity block in favor of Telefónica Cloud Tech Perú S.A.C. (TCTP) and sale -

In 2020, the Company incorporated Telefónica Cloud Tech Perú S.A.C. (TCTP) with a cash contribution of S/ 50,000 for 99.99% of the shares.

Subsequently, on December 23, 2020, the Company's General Shareholders Meeting approved the simple reorganization in favor of TCTP of an equity block made up of assets and liabilities related to the cloud technology services business. The equity block was transferred on January 1, 2021 and was composed as follows:

	January 1, <u>2021</u> S/000
Assets	
Accounts receivable from staff	20
Other non-financial assets	221
Property, plant and equipment, net	25,350
Intangible assets other than capital gains, net	3,646
Deferred tax asset	935
Total assets	<u>30,172</u>
Liabilities	
Accounts payable to staff	234
Total liabilities	<u>234</u>
Equity block contributed	<u><u>29,938</u></u>

On January 1, 2021, the Company sold its total stake in TCTP to Telefónica Cybersecurity & Cloud Tech Perú S.A.C. for S/ 41,941,000, thereby obtaining a profit of S/ 11,953,000. See Note 30(e).

b) Assignment of equity block in favor of Telefónica Cybersecurity & Cloud Tech Perú S.A.C. (TCCTP) and sale -

On July 3, 2020, the Company completed the TCCTP constitution process with a cash contribution of S/ 50,000 for 99.99% of the shares.

Subsequently, on September 30, 2020, the General Shareholders Meeting of the Company approved the simple reorganization in favor of TCCTP of an equity block equivalent to S/ 30,292,000 made up of assets and liabilities related to the cybersecurity business. The equity block was transferred on October 1, 2020 and was composed as follows:

	October 1, 2020 S/000
Assets	
Accounts receivable from staff	10
Other non-financial assets	203
Property, plant and equipment, net	25,324
Intangible assets other than capital gains, net	5,424
Assets for rights of use	15,360
Deferred tax assets	943
Total assets	47,264
Liabilities	
Accounts payable to staff	360
Financial lease liabilities	16,612
Total liabilities	16,972
Equity block contributed	30,292

On October 1, 2020, Telefónica Ingeniería de Seguridad S.A.C. contributed a capital block of S/ 4,483,000 to TCCTP. After these contributions, the Company's share in TCCTP was diluted to 75%.

On the same date, the Company sold its total stake in TCCTP to Telefónica Cybersecurity Tech, S.L. (a non-domiciled company) for S/ 47,565,000, thereby obtaining a profit of S/ 17,223,000. See Note 30(e).

1.4 Concession contracts and fees -

a) Concession contracts

The Group, together with the Peruvian Government represented by the Ministry of Transportation and Communications (MTC), has entered into Concession Contracts for the provision of the following services: (i) Local carrier and telephone services in the department of Lima and the Constitutional Province of Callao and (ii) national and international local and long distance carrier and telephone services in the Republic of Peru. These legally binding contracts were approved by Supreme Decree No. 11-94-TCC on May 13, 1994, and subsequently amended by Supreme Decree No. 21-98-MTC on August 4, 1998, and by Ministerial Resolutions No. 272-99-MTC/15.03, No. 157-2001-MTC/15.03, No.140-2009-MTC/03, and No.527-2009-MTC/03. The latter was modified by Ministerial Resolution No. 724-2009-MTC/03.

As of March 31, 2021 and December 31, 2020, the current main concession contracts are as follows:

<u>Services</u>	<u>Location</u>	<u>Ministerial Resolution</u>	<u>Term</u>	<u>Start</u>	<u>Expiration</u>
Fixed & LD	Lima, Callao and Provinces	272-99-MTC / 15.03	20 years + renewed term	1994	2027
Mobiles	Lima and Callao	373-91-TC/15.17	20 years + renewed term	1991	2030
Mobile	Provinces	055-92-TC/15.17	20 years + renewed term	1992	2030
Mobiles	Lima and Callao	440-91-TC/15.17	20 years + renewed term	1991	2030
Mobile	Provinces	250-98-MTC/15.03	20 years	1998	2018 (*)
4G LTE	Lima and Provinces	616-2013-MTC/03	20 years	2013	2033
700 Band	Lima and Provinces	529-2016-MTC/01.03	20 years	2016	2036

(*) In the process of renewal with the MTC.

As a guarantee of faithful compliance with the obligations established in some of the concession agreements, the Company has extended guarantees for US \$ 65,470,000 up to a term of approximately 10 years by means of current guarantee letters with various banking entities.

As at the date of the consolidated financial statements, the Group Management estimates that the investment projects undertaken to meet the commitments assumed are being executed as scheduled.

b) Rates -

The rates for the local and long distance fixed telephony service are adjusted quarterly on the basis of service baskets according to a formula of price caps, established on the basis of the combination of inflation and a factor of productivity.

According to the Concession Contracts, the value of the productivity factor should be reviewed every three years.

OSIPTEL sets the productivity factor to be applied in three-year periods, specifying that it would be implemented in four rate adjustment procedures each year. For three of these procedures it was determined that the Productivity Factor will be inflation (no rate adjustments will be made). For the remaining procedure, it is being determined that a verification procedure should be carried out, taking as reference an annual Productivity Factor. For the period September 2019 to August 2022, the annual Productivity Factor was set at -2.43 percent. If inflation is in the range of between -1.43 percent to -3.43 percent, the Group will not make tariff adjustments.

The application of the Virtual Mobile Area (a single national cell area) in 2010 to all domestic long-distance to cell phone call, including those originating from public telephones, have been eliminated and for which only local rates apply.

Furthermore, Resolution No. 021-2015-CD/OSIPTEL approved the value of the ceiling rate applicable to calls from public telephones of the Group to personal communications and trunked mobile telephony networks. It was established that said rate is to be reviewed after four years; thereby annulling adjustments, periodic (annual adjustment mechanism) and non-periodic (when there are changes in the values of any of the interconnection charges that comprise said rate), which until now are applicable to this rate.

The rate in force since March 2015 is S/ 0.20 for 29 seconds, including the General Sales Tax in accordance with the provisions of Resolution No. 021-2015-CD/OSIPTEL, issued on March 12, 2015.

Furthermore, by means of Resolution No. 044-2011-CD/OSIPTEL, OSIPTEL approved a new tariff system: the establishment of the rates for local landline-mobile calls corresponding to the concessionary companies of the Landline Telephony Service. By means of Resolution No. 160-2011-CD/OSIPTEL, an adjustment to the fixed-mobile rate is made each time adjustments are made to any of the charges that make up said rate. The rate excluding the general sales tax is S/ 0.0006 per second, as of February 9,

2019.

2 SUMMARY OF MAIN ACCOUNTING POLICIES

The main accounting principles and practices that have been applied in the recording of operations and the preparation of the accompanying consolidated financial statements are the following:

2.1 Basis for preparation -

The accompanying consolidated financial statements have been prepared in accordance with the International Financial Reporting Standards (IFRS), issued by the International Accounting Standards Board (hereinafter "IASB") and respectively effective as of March 31, 2021, and of December 31, 2020.

The information contained in these consolidated financial statements is the responsibility of the Group Management, which expressly states that the principles and criteria included in the International Financial Reporting Standards (IFRS) issued by the IASB have been fully applied and that the same were in force on the dates of the consolidated financial statements.

These consolidated financial statements have been prepared on the basis of historical cost, based on the accounting records maintained by the Group, except for derivative financial instruments measured at fair value. The accompanying consolidated financial statements are presented in Soles [PEN] (functional and presentation currency) and all values have been rounded to thousands, except where otherwise indicated.

The preparation of the consolidated financial statements, in accordance with IFRS, requires the use of certain critical accounting estimates. It also requires that Management exercises its critical judgment in the process of applying Group accounting policies. The areas that involve a greater degree of critical judgment or complexity, or those in which the assumptions and estimates are significant for the separate financial statements, are described in Note 4.

2.2 Consolidation -

The consolidated financial statements are comprised of the Group's financial statements as of March 31, 2021 and December 31, 2020.

a) Subsidiaries

Subsidiaries are the entities over which the Group has control. Control is achieved when the Group is exposed, or has the rights, to the variable returns from its involvement in the investee company and has the ability to influence those returns through its power over it. The subsidiaries are consolidated from the date on which their control is transferred to the Group, and they cease to consolidate from the date on which the control ceases.

Unrealized transactions, balances, and profits with their subsidiaries are eliminated. Profits or losses resulting from transactions between related parties that are recognized in any asset item are also eliminated. Where required, the accounting policies of the subsidiary have been modified to ensure uniformity with the policies adopted by the Group.

As of March 31, 2021, the Company maintains two subsidiaries, Servicios Globales de Telecomunicaciones S.A.C. and PangeaCo S.A.C., as of December 31, 2020, it maintained three subsidiaries, Servicios Globales de Telecomunicaciones S.A.C., PangeaCo S.A.C. and Telefónica Cloud Tech Perú S.A.C.

2.3 New standards, modifications and interpretations -

a) New standards and amendments to standards and interpretations adopted by the Group in 2021 -

The following accounting standards (IFRS), amendments to standards and interpretations are effective as of January 1, 2020, and have not had an impact on the consolidated financial statements of the Group, for the period 2020 or for the period 2021:

- **Amendments to IAS 1 and IAS 8 - Definition of materiality -**

The amendments provide a new definition of “materiality”, which is information whose omission by mistake or obstruction is reasonably expected to influence the decision-making of the primary users of the financial statements. The amendments clarify that the materiality will depend on the nature or magnitude of the information, individually or aggregated with other information, in the context of the financial statements.

- **Modifications to IFRS 3 - Definition of Business -**

The amendments provide a new definition of business that requires an acquisition to include at least one input and one substantive process that together significantly contribute to the ability to create outputs. The definition of the term “products” is modified to focus on goods and services provided to customers, producing investment and other incomes, and excludes returns in the form of lower costs, savings, and other economic benefits.

- **Amendments to IFRS 7, IFRS 9 and IAS 39 - Reform of the benchmark interest rate -**

The amendments made to IFRS 7 Financial Instruments: Disclosures, IFRS 9 Financial Instruments and IAS 39 Financial Instruments: Recognition and Measurement provide certain exemptions in relation to the benchmark interest rate reforms. The exemptions relate to hedge accounting and have the effect that amendments should not generally cause the termination of hedge accounting. However, any ineffectiveness of the hedge will continue to be recorded in the income statement.

- **Modifications to the Financial Reporting Conceptual Framework -**

The revised conceptual framework includes some new concepts and definitions, as well as criteria for the recognition of assets and liabilities, and clarifies some concepts. In particular, the IASB has issued a revised Conceptual Framework to be used for standard setting decisions with immediate effect. The key changes include:

- (i) Increase the importance of administration in financial information.
- (ii) Restore prudence as a component of neutrality.
- (iii) Define a reporting entity, which can be a legal entity, or a part of an entity.
- (iv) Review the definitions of an asset and a liability.
- (v) Eliminate the probability threshold for recognition and add guidance on derecognition.
- (vi) Add guides on different measurement bases, and

(vii) establish that profit or loss is the main indicator of performance and that, in principle, income and expenses in other comprehensive income should be recycled when this improves the relevance or faithful representation of the financial statements.

These modifications had no impact on the consolidated financial statements and are not expected to have future impacts on the Group.

- Amendment to IFRS 16 “Leases” - Covid-19 related to rentals -

This amendment was issued on May 28, 2020, is applicable for annual periods commencing on June 1, 2020, and provides an exemption in relation to the accounting process of modifying lease contracts under IFRS16, to lessees who obtain modifications to lease contracts due to Covid-19 (grace periods (“payment holidays”), and extension of lease payments).

The application of this amendment did not have a significant impact on the Group's consolidated financial statements as of March 31, 2021.

- b) New rules and interpretations that have not been adopted in advance -

The following standards, amendments to standards, and interpretations have been published to apply to periods beginning after the reporting date of these financial statements, and have not been adopted in advance:

- Amendment to IAS 1: Classification of Liabilities as current or non-current -

The amendments to IAS 1 Presentation of Financial Statements clarify that liabilities are classified as current or non-current, depending on the rights that exist at the end of the reporting period. The classification is not affected by the entity's expectations or events after the reporting date (for example, the receipt of a waiver or the breach of a covenant).

The amendments also clarify what IAS 1 means when it refers to the 'settlement' of a liability.

The amendments could affect the classification of liabilities, particularly for entities that previously considered management's intentions to determine the classification, and also for some liabilities that may be converted to equity.

The amendments should be applied retrospectively in accordance with the standard requirements of IAS 8 Accounting Policies, Changes in Accounting Estimates, and Errors.

In May 2020, the IASB issued a Proposal to postpone the effective date of the amendments to January 1, 2023. The modifications are effective for the annual periods reported on or after January 1, 2023 and must be applied retrospectively.

- Amendment to IAS 16 - Property, Plant and Equipment: Product before use -

In May 2020, the International Accounting Standards Board issued the amendment Property, Plant and Equipment: Product before intended use, which prohibited entities from deducting from the cost of an item of Property, Plant and Equipment, any proceeds from the sale of articles produced while taking such assets to the location, and the conditions required for the item to operate in the manner intended by management. Instead, an entity should recognize the proceeds from the sale of those items, and the costs of production associated with those items, in profit or loss.

The amendments are effective for the annual periods reported on or after January 1, 2023 and must be applied retrospectively to items of property, plant and equipment made available for use on or after the beginning of the first period presented when the entity applied the amendment for the first time.

- Amendments to IFRS 3 - reference to the Conceptual Framework -

Minor amendments were made to IFRS 3 Business Combinations to update the references to the Conceptual Framework for Financial Reporting and add an exception for the recognition of contingent liabilities and liabilities within the scope of IAS 37 Provisions, Contingent Liabilities and Contingent Assets and Interpretation of IFRIC 21 Levies.

The amendments also confirm that contingent assets should not be recognized on the acquisition date.

The modification will be effective for the annual periods reported on or after January 1, 2022.

- Onerous Contracts - Cost of fulfilling a contract - Amendments to IAS 37 -

In May 2020, the International Accounting Standards Board issued amendments to IAS 37 to specify what cost an entity needs to include when evaluating whether a contract is onerous or loss-making.

The amendment to IAS 37 clarifies that the direct costs of fulfilling a contract include both the incremental costs of fulfilling the contract and an allocation of other costs directly related to the fulfillment of the contracts. Before recognizing a separate provision for an onerous contract, the entity recognizes any impairment loss that has occurred to the assets used to fulfill the contract.

The modification is applicable to the annual periods reported on or after January 1, 2022.

- Annual improvements to IFRS Cycle 2018-2020 -

As part of its 2018-2020 annual enhancements to the IFRS standard process in May 2020 the International Accounting Standards Board issued the following amendments:

- (i) IFRS 9 Financial Instruments - clarifies which fees should be included in the 10% test for derecognition of financial liabilities.
- (ii) IFRS 16 Leases - amendment of illustrative example 13 to remove the illustration of lessor payments related to lease improvements in order to eliminate any confusion about the processing of lease incentives.
- (iii) IFRS 1 First-time adoption of international financial reporting standards - allows entities that have measured their assets and liabilities at the book values and recorded the same in the books of their parent company to also measure any accumulated conversion differences using the amounts reported by the parent company. This modification will also apply to associates and joint ventures that have taken the same exception from IFRS 1.

The modifications will be effective for the annual periods reported commencing on or after January 1, 2022, with early adoption permitted.

- • Amendment to IFRS 10 and IAS 28 - Sale or contribution of assets between an investor and its associate or joint venture

The IASB has made modifications of limited scope to IFRS 10 "Consolidated Financial Statements" and IAS 28 "Investments in associates and joint ventures".

The amendments clarify the accounting process for asset sales or contributions between an investor and its associates or joint ventures. They further confirm that the accounting process will depend on whether the non-monetary assets sold or contributed to an associate or joint venture constitute a "business" (as defined in IFRS 3 "Business Combinations").

When non-monetary assets constitute a business, the investor will recognize the total gain or loss from the sale or contribution of the assets. If the assets do not meet the definition of a business, the gain or loss is recognized by the investor only per the proportion of the investment of the other

investors of the joint venture associate. These modifications will be applied prospectively.

In December 2015 the IASB decided to postpone the application date of this amendment until the research project on the equity method has been completed.

The amendments are effective for the annual periods reported on or after January 1, 2023 and must be applied retrospectively to items of property, plant and equipment made available for use on or after the beginning of the first period reported when the entity applied the amendment for the first time.

The Group is currently evaluating the impact that these modifications or amendments may have on current practice.

2.4 Operating Segments -

An operating segment is a group of assets and operations that provide goods or services, and that is subject to significant risks and returns other than the risks and returns of other business segments. A geographical segment is characterized by providing goods or services within a particular economic environment that is subject to risks and returns different to those segments that operate in other economic environments. The Group is organized into a single operational segment for the provision of telecommunications services located in a single geographic segment (Peru), as the Group makes strategic commercial, financial, purchasing, and investment decisions oriented towards the customer, and that are furthermore focused on a convergent offer (several aggregated telecommunications services). Thus, it is not applicable to present information on a segment basis.

2.5 Translation of foreign currency -

The Group has determined that its functional and presentation currency is the Sol (PEN). Transactions in foreign currency are considered to be those made in a currency other than the functional currency. Transactions in foreign currency are initially recorded in the functional currency using the exchange rates in effect on the transaction dates. Monetary assets and liabilities denominated in foreign currency are subsequently adjusted to the functional currency using the exchange rate in effect on the date of the consolidated statement of financial position.

Profit or losses from exchange differences resulting from the settlement of said transactions and from the conversion of monetary assets and liabilities in foreign currency at the exchange rates on the date of the consolidated statement of financial position are recognized in the caption "Net profit/(loss) due to exchange difference" in the consolidated income statement, with the exception of exchange differences of operations in foreign currency with hedges for

cash flows. These are directly recorded in equity until their disposal, at which time they are recognized in the consolidated income statement. Non-monetary assets and liabilities determined in foreign currency are converted to the functional currency at the prevailing exchange rate on the date of the transaction.

2.6 Business combinations between entities under common control -

Business combinations between entities under common control are recorded by the method of interest unification.

In accordance with the interest unification method, the items in the financial statements of the merging companies, both for the period in which the merger occurs and for the other periods presented in comparative form, are included in the Group's consolidated financial statements as if they had been merged since the beginning of the oldest period that is presented.

As a unification of interests produces a single merged entity, it must adopt uniform accounting policies. Therefore, the merged entity recognizes the assets, liabilities and assets of the merging companies at their book values, adjusted to the concepts required to standardize the accounting policies and apply them to all the periods presented. No surplus value is recognized in this process. Likewise, the effects of all transactions between merging companies are eliminated when preparing the consolidated financial statements of the merged entity.

2.7 Cash and cash equivalents -

For purposes of the consolidated statement of cash flows, cash and cash equivalents correspond to cash, current accounts, and deposits with less than three months from the date of opening, all of which are recorded in the consolidated statement of financial position. These accounts are not subject to a significant risk of changes in their value.

For purposes of the consolidated statement of cash flows, cash and cash equivalents include the items described in the previous paragraph, net of bank overdrafts.

2.8 Financial assets -

(i) Classification -

The Group classifies its financial assets in the following categories:

- Measured at fair value (whether through results or other comprehensive income), and
- Measured at amortized cost.

The classification depends on the business model that the entity uses to manage its financial assets and the contractual terms that impact the cash flows. For assets measured at fair value, gains and losses will be recorded in the consolidated statement of income or in the consolidated statement of comprehensive income. For investments in equity instruments that are not held for trading, their measurement will depend on whether the Group irrevocably chooses, at the time of initial recognition, to recognize these equity instruments at fair value through other comprehensive income. The Group makes re-classifications of its debt instruments if its business model for the management of these assets changes.

(ii) Recognition and derecognition -

Acquisitions and sales of financial assets are recognized on the trade date, the date on which the Group commits to purchase or sell the asset. Financial assets are derecognized when the rights to receive cash flows from the investments expire or are transferred and the Group has materially transferred all the risks and benefits derived from their ownership.

(iii) Measurement -

Upon initial recognition, the Group measures a financial asset at its fair value plus, in the case of financial assets that are not carried at fair value through profit or loss, the transaction costs that are directly attributable to the acquisition of the financial asset. The transaction costs of financial assets carried at fair value through results are recognized in results.

Financial assets that incorporate embedded derivatives are evaluated comprehensively for purposes of determining if their cash flows only represent payment of principal and interest.

Debt instruments -

The subsequent measurement of debt instruments depends on the business model that the Group has established for asset management, as well as the characteristics of asset flows derived from the asset. The three possible categories in which to classify debt instruments are:

- Amortized cost: Applicable to assets whose business model is to collect contractual cash flows, provided that these cash flows only represent capital and interest payments. The interest generated by these financial assets is recognized as financial income using the effective interest method. Any profit or loss arising from the derecognition of this type of financial asset is recognized in profit or loss. Impairment losses are presented in a separate line item in the consolidated income statement.
- Fair value through other comprehensive income (FVOCI): Applicable to assets whose business model is mixed; that is, they are maintained both to collect their contractual flows and to obtain cash flows from their sale, provided that the asset cash flows only represent capital and interest payments. Changes in the book value of these financial assets are recognized in other comprehensive income (OCI), except for losses (or reversal of losses) due to impairment, interest and profits or losses due to exchange differences, which are recognized in profit or loss. When the financial asset is derecognized, the accumulated profit or loss recognized in the consolidated comprehensive income statement is reclassified from equity to income and presented under the item "other income (expenses)". The interest generated by these financial assets is recognized as financial income using the effective interest method. Profits or losses on exchange differences are recognized in the consolidated statement of income under the heading 'Net income/(loss) due to exchange differences, while the impairment losses are also recognized in the consolidated income statement and presented as a separate line item.
- Fair value through profit and loss (FVTPL): Assets that do not meet the conditions to use amortized cost or FVOCI are measured at fair value through profit or loss. Changes in the fair value of debt instruments in this category are recognized as profit or loss in the consolidated income statement and presented net in the item "Other expenses (income)" in the period in which the change occurs.

Equity instruments -

After initial recognition, the Group measures the equity instruments at their fair value. Changes (profits or losses) in the fair value of equity instruments held for the purpose of trading are recognized in FVTPL. For other equity instruments, the Group has an irrevocable option to designate them on initial recognition in the FVTPL category or present changes in fair value as part of the OCI.

If the Group opts for the designation of FVTPL, when the asset is derecognized, it is not possible to reclassify any profits or losses accumulated in OCI to profit or loss. Dividends generated by these investments are recognized in the consolidated income statement since the Group has the contractual right to receive them, and they are presented under "Other income (expenses)". Losses (or reversals of losses) due to impairment of equity instruments measured at FVTPL are not presented separately from the other changes at fair value.

(iv) Impairment -

Looking to the future, the Group evaluates the expected credit losses associated with debt instruments measured at amortized cost and at FVTPL. The methodology applied to determine the impairment depends on whether the credit risk of an asset has experienced a significant increase.

For commercial accounts receivable, the Group applies the simplified approach permitted by IFRS 9, which requires estimating the credit loss of the account for the total duration of the instrument and recognizing it from its initial recording.

2.9 Derivative financial instruments and hedge accounting -

Derivatives are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at their fair value at the end of each period of the consolidated financial statements. The accounting for subsequent changes at fair value depends on whether the derivative is designated as a hedging instrument and, if so, the nature of the item being hedged. The Group designates certain derivatives such as:

- hedges of the fair value of recognized assets or liabilities, or a firm commitment (fair value hedges),
- hedges of a particular risk associated with the cash flows of recognized assets and liabilities, and highly probable forecasted transactions (cash flow hedges).

At the beginning of the hedge relationship, the Group documents the economic relationship between the hedging instruments and the hedged items, even if it is expected that the changes in the cash flows of the hedging instruments will offset the changes in the cash flows of the hedged items. The Group documents its objective and risk management strategy to carry out its hedging operations.

The total fair value of a hedging derivative is classified as non-current assets or liabilities if the time remaining to maturity of the hedged item is more than 12 months, and as current assets or liabilities if the time remaining to maturity of the hedged item is less than 12 months. Trading derivatives are classified as a current asset or liability.

The Group uses derivative financial instruments (exchange rate forwards and currency swaps) to manage its exposure to the risk associated with fluctuations in the foreign currency. In order to manage the aforementioned particular risk, the Group applies hedge accounting for transactions that meet the requirements for this. Derivative financial instruments are recognized at fair market value on the date on which they are signed and subsequently adjusted, and are recorded as assets when their value is positive, and as a liability when the value is negative.

(i) Cash flow hedges that qualify for hedge accounting:

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges are recognized in the other equity reserve account. The profit or loss relating to the ineffective portion is recognized immediately in the consolidated income statement.

In the event that forward contracts are used to hedge expected future transactions, the Group only generally designates the changes in the fair value of the contract related to the spot component as the hedging instrument. Profits and losses related to the effective portion of changes in the spot component of forward contracts are recognized in the other equity reserve account. The changes in the element of the forward contract that relates to the hedged item ("aligned forward element") is recognized as part of other comprehensive income as reserve costs for hedges in equity. In certain cases, the Group may designate the entire change in the fair value of the forward contract (including forward points) as a hedging instrument. In such cases, the profits or losses related to the effective portion of the change in the fair value of the entire forward contract are recognized in the other equity reserve account.

The amounts accumulated in the equity are reclassified to results in the periods in which the hedged items affect results, as follows:

- If the hedged item subsequently results in the recognition of a non-financial asset (for example, inventories), both the deferred hedged profits and losses, and the deferred time value of option contracts or forward contracts, if any, are included as part of the initial cost of assets. Deferred amounts are ultimately recognized in income, as the hedged item also affects the results (for example, with the sale of inventories).
- Profits or losses related to the effective portion of interest rate swap contracts that cover variable rate loans are recognized in income under "Financial expenses" at the same time as the interest on hedged loan is recognized.

However, if a projected hedged transaction results in the recognition of a non-financial asset (for example, inventories or property, plant and equipment), any previously deferred equity profits or losses are transferred from equity and included in the initial measurement of the cost of the non-financial asset. Deferred amounts are ultimately recognized in profit or loss through the cost of sale in the case of inventories, or depreciation in the case of property, plant and equipment.

When a hedging instrument expires, is sold, terminated or when a hedge fails to meet the criteria for applying hedge accounting, any accumulated equity profit or loss or any deferred hedge cost on equity until that time shall remain in equity until the expected transaction occurs, which will result in the recognition of a non-financial asset, such as inventories. When a forecasted transaction is not expected to occur, the accumulated profit or loss and any deferred hedging costs that were reported in equity are immediately transferred to the consolidated income statement.

(ii) Derivatives that do not qualify for hedge accounting:

Certain derivative instruments do not qualify for hedge accounting. Changes in the fair value of any derivative instrument that does not qualify for hedge accounting are recognized immediately in the consolidated income statement.

As of March 31, 2021 and December 31, 2020, the Group had forwards operations contracted to cover the exchange rate risk in the purchase of assets associated with the disbursement of projects.

2.10 Inventories -

Inventories are presented at cost or net realizable value, whichever is lowest, and are presented net of the impairment estimate.

Inventories correspond mainly to terminal equipment and are valued at average cost. The cost includes the reclassification of the equity of any profit or loss in the hedges of qualified cash flows related to the purchases of raw material, but excludes the costs of loans. In case there is a subsidy on the sale price of the terminals, it will not be included in the cost of the inventories given that it pertains to cost of commercialization, because it is always associated with the customer registration or with the renewal of the client contract period. As such, terminal equipment is recorded in the profit or loss when they are delivered for sale to the final customers (signal activation). See note 2.24. Inventories in transit are presented at the specific cost of acquisition.

The estimate for impairment is determined based on an analysis of the conditions and rotation of terminal equipment, materials, and supplies. In the case of damaged equipment and those which had no movement in the last year, the estimate is equivalent to their book balance, and recorded in the fiscal year results in which its requirement is determined.

2.11 Properties, plant and equipment -

Property, plant and equipment are presented at cost, net of accumulated depreciation and accumulated loss due to impairment of the value of these assets. See Note 2.14. The initial cost of the property, plant and equipment includes its acquisition price, including non-refundable import duties and taxes, and any directly attributable cost to locate and leave the asset in working condition.

The cost of the asset also includes the present value of the disbursements that are expected to be required to pay any cost of decommissioning and removal of equipment or rehabilitation of the physical site where it is established, when they constitute obligations incurred under certain conditions. See note 2.20. The cost may also include equity transfers of any profit or loss in the hedges of cash flows qualified for purchases of property, plant and equipment in foreign currency. Note 2.20 includes additional information on the recorded decommissioning provision. For significant components of property, plant and equipment that must be periodically replaced, the Group recognizes such components as separate individual assets, with their specific useful lives and respective depreciations.

Similarly, when a large inspection or repair is carried out, its cost is recognized as a replacement in the carrying amount for property, plant, and equipment, if the criteria for recognition are met.

Depreciation is calculated using the straight line method, using the following estimated useful lives:

<u>Description</u>	<u>Years</u>
Buildings and other constructions	13, 15, 33 and 40
Plant (Platform and telecommunications networks)	3 to 20
Equipment and others	3 to 10
Furniture and fixtures	5 and 10

Land does not depreciate. The residual values, the useful life and the depreciation method are reviewed every year to ensure that they are consistent with the expected pattern of economic benefits of the items of property, plant and equipment. The telecommunications sector in which the Group operates is very dynamic. Likewise, the constant overall progress of the same for the development of new technology, forces the Group to continually update and renovate its plant

in order to be competitive in the market. Based on the historical information and considering the technological advances, it has been determined that the value of the properties, plant and equipment at the end of its useful life is not significant and therefore the Group estimates that they do not have residual values, depreciating the total cost in the useful life of the same.

A component of property, plant and equipment or any significant part of it initially recognized is written off at the time of its sale or when it is not expected to obtain future economic benefits by means of its use or sale. Any profit or loss at the time of asset derecognition (calculated as the difference between the net income from the sale of the asset and its carrying amount) is included in the consolidated income statement when the asset is derecognized.

Disbursements incurred after property, plant and equipment have been put into use are capitalized as an additional cost of this asset when it is probable that such disbursements will result in future economic benefits higher than the normal yield originally evaluated for said asset. Disbursements for maintenance and repairs are recognized as an expense for the year in which they are incurred.

Employee benefit costs that are directly related to the construction of the plant are capitalized as part of the cost of the assets, through the recording of a lower expense in the consolidated statement of income, in the item "Personnel expenses."

Works in progress is recorded at cost, which includes the cost of construction, plant, and equipment and other direct costs; as well as the cost of important materials directly identifiable with specific assets. Works in progress do not depreciate until the respective assets are finished and are ready for use.

2.12 Intangible assets and administrative concessions -

Intangible assets are initially recorded at cost. An asset is recognized as intangible if the attributable future economic benefits that it generates are likely to flow to the Group, and its cost can be measured reliably. After initial recognition, intangible assets are measured at cost less accumulated amortization and any accumulated impairment loss. See note 2.14.

Intangible assets generated internally, which are directly attributable to the design and testing of identifiable and unique software that the Group controls, are recognized as intangible assets when they meet the following criteria:

- It is Technically possible to complete the software so that it can be used,
- Management intends to finish the software and use or sell it,
- There is the opportunity to use or sell the software,
- It can be shown that the program will generate future economic benefits,
- The required technical, financial and other resources are available to complete the development of the software, thus permitting its use or sale.

During the initial recognition the Group evaluates whether the useful life of the intangible assets is defined or undefined.

Intangible assets are amortized as per the straight-line method, based on the following estimated useful lives, when they are ready for use:

<u>Description</u>	<u>Years</u>
Administrative concessions	According to concession term (Note 1.4 (a))
Software	3 to 5

The period and the amortization method are reviewed periodically. Depreciation begins when the asset is available for use. Changes in the expected useful life or in the expected consumption pattern of the future economic benefits materializing in the asset are taken into consideration in order to change the amortization period or method, if applicable, and are treated as a change in accounting estimation.

The loss or derecognition of an intangible asset is determined as the difference between the net amount obtained from its disposal and the book value of the asset, and is recognized in the consolidated income statement when the asset is derecognized.

2.13 Capital Gains -

Represents the excess of the cost of acquisition of companies over the Group's share in the fair value of the respective net assets acquired. Capital gain is presented at cost less accumulated permanent impairment losses on its value. See Note 2.14. The losses are determined on the basis of impairment tests carried out by the Group during the last quarter of each year in order to determine whether the book value is fully recoverable.

2.14 Impairment of long-term assets -

The net book value of the property, plant, and equipment and intangible assets of finite life are reviewed to determine if there is no impairment. Each year, the Group assesses the existence of signs of possible impairment of non-current assets. If there are such indications, the Group estimates the recoverable value of the asset, which is the higher of fair value, less costs to sell, and the value in use. Said value in use is determined by discounting the estimated future cash flows. When the recoverable value of an asset is below its net book value, it is considered that there is a deterioration in value.

The assessment on capital gain impairment is made during the last quarter of the year. The Cash Generating Unit (CGU) is aligned with the definition of the business segment. See Note 2.4. Impairment is determined by the evaluation of the recoverable value; considering that when said value is less than its book value, an impairment loss is recognized. Impairment losses related to capital gains can not be reversed in future periods.

The recoverable value of an asset is defined as the highest amount between the net sale price and its value in use. The net sale price is the amount that can be obtained selling an asset in a free market, while the value in use is the present value of the net future cash flows. Value in use is estimated from the continuous use of an asset and its disposal at the end of its useful life. In determining the value in use, future net cash flows are discounted to their present value using a pre-tax discount rate that reflects the assessment of current market conditions, the value of money over time, and the specific risks of the asset. The discount rates are adjusted for the country risk and corresponding business risk.

As of March 31, 2021 and December 31, 2020, the pre-tax discount rate used was 12.64% (equivalent to an after-tax rate of 8.91%).

When new events or changes in existing circumstances take place and that demonstrate an impairment loss recorded in an earlier period may have disappeared or been reduced, the Group undertakes a new estimate of the profitability of the corresponding asset. This evaluation is done in each financial year. Previously recognized impairment losses are reversed only if there has been a change in the estimates used to determine the recoverable amount of the asset from the date on which the impairment loss was last recognized. If this is the case, the book value of the asset is increased to its recoverable amount. This increased amount may not exceed the carrying amount that would have been determined, net of depreciation, if an impairment loss had not been recognized for the asset

in previous years. This reversal is recognized in the consolidated income statement for the fiscal year. After the reversal, the depreciation charge is adjusted in future periods by distributing the book value of the asset over its remaining useful life. See note 16 for further information.

2.15 Investments in associated companies -

An associate is an entity over which the Group has significant influence. An entity is presumed to exercise significant influence if it directly or indirectly owns 20 percent or more of the voting power of the investee, unless it can be clearly demonstrated that such influence does not exist. Conversely, it is presumed that the entity does not exercise significant influence if it directly or indirectly holds less than 20 percent of the voting power of the investee, unless it can be clearly demonstrated that such influence exists. Substantial or majority ownership by another investor does not necessarily preclude an entity from having significant influence.

Significant influence occurs through one or more of the following manners:

- i) Representation on the board of directors or equivalent governing body of the investee;
- ii) participation in policy-setting processes, including participation in decisions on dividends and other distributions;
- iii) relatively significant transactions between the entity and its investee;
- iv) exchange of managerial personnel; or
- v) provision of essential technical information.

The investment in associates is presented using the equity method (equity share). According to this method, the investment is initially recognized at cost.

The carrying amount of the investment is adjusted to recognize changes in the Group's share in the net assets of its associates from the date of acquisition.

2.16 Trade accounts payable and other accounts payable -

These amounts represent liabilities for unpaid goods and services provided to the Group at the close of the consolidated statement of financial position. The amounts are not guaranteed and are generally paid within 60 days after recognition. Commercial accounts and other accounts payable are presented as current and non-current liabilities. They are initially recognized at fair value and subsequently measured at amortized cost using the effective interest method.

2.17 Financial Obligations -

Financial obligations are initially recognized at their fair value, net of transaction costs incurred. Financial obligations are subsequently measured at amortized cost. Any difference between income (net of transaction costs) and the amount of reimbursement is recognized in the consolidated income statement during the period of financial obligations using the effective interest method. Paid fees are recognized as transaction costs of financial obligations insofar as it is probable that part or all of the facility will be withdrawn. In this case, the rate is postponed until the withdrawal occurs. To the extent that there is no evidence that part or all of the facility is likely to be withdrawn, the rate is capitalized as a prepayment for liquidity services and amortized over the period of the facility to which it corresponds.

Financial obligations are eliminated from the consolidated statement of financial position when the obligation specified in the contract is derecognised, canceled or expires. The difference between the carrying amount of a financial liability that has been extinguished or transferred to another party and the consideration paid, including the non-transferred assets or assumed liabilities, is recognized in the consolidated income statement as other financial income or expenses.

Financial obligations are classified as current and non-current liabilities.

2.18 Financing costs -

The financing costs directly attributable to the acquisition, construction, or production of an eligible asset that necessarily presents a considerable period of preparation to be available for use or sale are capitalized as part of the cost of the respective asset.

All additional financing costs are recognized as an expense in the period in which they occur. The financing costs are constituted by interest and other costs that the entity incurs in connection with the financed funds.

According to the Group's policy, the qualified assets considered for the purpose of capitalizing financing costs are those whose preparation period exceeds eighteen months.

As of March 31, 2021 and December 31, 2020, the Group does not have assets in progress qualified for the purpose of capitalizing financing costs.

2.19 Employee benefits -

The Group has short-term obligations for employee benefits that include salaries, social contributions, gratuities, performance bonuses, and profit sharing (corresponding to 10 percent of taxable income). These obligations are recorded monthly, and charged to the consolidated income statement as they accrue.

Gratuities

The Group recognizes a liability and an expense for gratuities paid to workers as per the legal provisions in force in Peru. The gratuities correspond to two (2) annual remunerations paid in July and December of each year.

Compensation for length of service

The compensation for time of service of the Group's personnel corresponds to their compensation rights calculated in accordance with the legislation in force, which must be deposited in the bank accounts designated by the workers in the months of May and November of each year.

The compensation for staff service time is equivalent to half the monthly remuneration in force on the date of deposit. The Group has no additional payment obligations once it makes the annual deposits of the funds to which the worker is entitled.

Vacations

Staff annual leave and other paid absences are recognized on an accrual basis. The provision for the estimated obligation for annual leave of the personnel, which is calculated on the basis of a monthly salary for every twelve (12) months of services rendered by the employees, is recognized on the date of the consolidated statement of financial position.

The Group does not provide benefits after the employment relationship.

2.20 Provisions -

General -

A provision is recognized only when the Group has a current obligation (legal or implicit) as a result of a past event, it is probable that resources will be required to meet the obligation and, its amount can be reasonably estimated. Provisions are reviewed during each period and adjusted to reflect the best estimate on the date of the statement of financial position. When the effect of the money value over time is significant, the amount of the provision is discounted using a pre-tax interest rate that reflects, when appropriate, the specific risks of the liability. When discounted, the increase in the provision due to the passage of time is recorded in the consolidated income statement as a financial cost.

The amount recorded as a provision is the best estimate, at the closing date, of the disbursement necessary to meet the present obligation. This best estimate will be the amount, valued in a rational manner, that the Group will have to pay to meet the obligation on the date of the consolidated statement of financial position, or to transfer it to a third party on the same date.

The estimates for every single outcome and financial effect are determined by the Group's judgement, and supplemented by experience gained in similar transactions and, in some cases, reports from experts. The evidence to be considered includes any additional data provided by events after the closing of the consolidated statement of financial position.

When the Group expects a part of or the total provision to be recovered, said recoveries are recognized as assets, provided that the recovery is certain. The provisioned amount is presented in the consolidated income statement, net of the recoveries.

Decommissioning -

The Group records the present value of the estimated costs of the legal and implicit obligations required to pay the costs of decommissioning and removal of equipment or the rehabilitation of the physical site where it is established in the period in which the obligation is incurred.

Decommissioning costs are presented at the present value of the expected costs to settle the obligation, using estimated cash flows, and are recognized as an integral part of asset costs (see Note 2.11). Cash flows are discounted at the pre-tax risk-free market rate that reflects the specific risks of the decommissioning liability.

The accrual of the discount is recorded as an expense as it is incurred and is recognized in the consolidated income statement as a financial cost. The estimated future decommissioning costs are reviewed annually and adjusted, as appropriate, on an annual basis. Changes in estimated future costs or in the applied discount rate are added to or deducted from the cost of the related asset, as appropriate.

Contingencies -

Possible contingencies are not recognized in the consolidated financial statements. These are disclosed in notes on the consolidated financial statements, except if the possibility of disbursing an economic flow is remote.

Restructuring -

An implicit obligation is recognized as a consequence of restructuring, only when a formal and detailed plan exists to proceed with it. This plan must at a minimum identify the business activities, or the part of them involved; the main locations affected; the location, function and approximate number of employees that will be compensated; the disbursements that will be carried out; and, the dates on which the plan will be implemented.

In addition to what is detailed in the plan, there must be a valid prospect among those affected, either by having begun to implement the plan or by announcing its main features to them.

2.21 Income tax -

Current Income tax -

Current assets and liabilities, short and long term, for the income tax for the period are measured using the amounts expected to be recovered from or paid to the tax authority, and includes the effect of tax disputes pending resolution for periods prior to the time of settling the current tax expenses. The tax rates and tax regulations used to compute these amounts are those that are approved, at the closing date of the period in Peru, where the Group operates and generates taxable income.

The current income tax that is related to items that are directly recognized in net equity is also recognized in net equity and not in the consolidated income statement. Management periodically evaluates the positions taken in the tax returns regarding situations in which the applicable tax regulations are subject to interpretation, and constitutes provisions when deemed appropriate.

Deferred income tax -

Deferred income tax is recognized using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts at the closing date of the reporting period.

Deferred income tax liabilities are recognized for all taxable temporary differences, except:

- When the deferred tax liability stems from the initial recognition of capital gains or of an asset or liability in a transaction other than a business combination and, at the time of the transaction, it affects neither the accounting result nor the tax result.
- Regarding taxable temporary differences related to investments in subsidiaries, associates and joint ventures, when the time of reversal of the temporary difference can be controlled and it is likely that this difference will not be reversed in the foreseeable future.

The deferred tax asset is recognized for deductible temporary differences, unused tax losses, and unused tax credits, to the extent that it is probable that profit subject to taxation will be available against which deductible temporary differences can be used, with the following exceptions: (a) the deferred tax asset that emanates from the initial recognition of a different asset / liability in a business combination, which, at the time of the transaction, affects neither the accounting profit nor the taxable profit; and (b) deferred tax assets that emanate from temporary differences associated with investments in subsidiaries, branches and associates, and interests in joint ventures are recognized only to the extent that it is probable that the temporary difference will be reversed in the foreseeable future and taxable utility will be available against which the difference can be used.

The Group evaluates a deferred tax asset in combination with other deferred tax assets and liabilities. When tax legislation restricts the use of tax losses, the Group will value a deferred tax asset in combination with other deferred tax assets and liabilities of the same type.

The carrying amount of deferred income tax assets is reviewed on each closing date of the reporting period and reduced to the extent that the existence of future taxable profits is no longer probable to allow the deferred income tax assets

to be used either in whole or in part. Unrecognized deferred tax assets are revalued at each closing date of the reporting period and are recognized to the extent that the existence of future available taxable income that make it possible to recover the same deferred tax assets that were previously unrecognized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to be applicable in the year in which the asset is realized or the liability is paid, based on the tax rates and tax rules that were approved on the date of the close of the reporting period.

Deferred income tax related to items outside the profit or loss is also recognized outside of this. These items are recognized in correlation with the underlying transactions with which they are related, either in other comprehensive income or directly in net equity.

Deferred income tax assets and liabilities are offset if there is a legally enforceable right to offset current income tax assets and liabilities, and if the deferred taxes relate to the same tax authority and the same tax jurisdiction.

2.22 Government Grants -

Government grants are non-reimbursable financing from the public sector in the form of transfers of resources, in exchange for future or past compliance with certain conditions related to operating activities with social impact.

Government grants are recognized when there is reasonable assurance that the Group will meet the conditions for their use and will receive the grants. These grants are recorded as income from the periods required to systematically relate them to the costs to which they are allocated. The amount to be charged to results is maintained as a liability in the item "Deferred income" until it is charged to income. In the case of assets acquired as part of the respective project, these are part of the Group's fixed assets and depreciated in a manner consistent with the policy established for other similar assets. The income related to the grant is recognized in the consolidated income statement, as per the depreciation of the assets.

2.23 Issued capital -

Common shares are classified in equity.

2.24 Recognition of income, costs and expenses -

The Group's revenues come mainly from the provision of the following telecommunication services: traffic, connection and installation fees, periodic fees for the use of the network, interconnection and rental of networks and equipment, as well as for the provision of internet and cable television services. The products and services can be sold separately or jointly in commercial packages.

Traffic -

Traffic revenues are based on the initial call set-up fee, plus per-call rates, which vary according to the time consumed by the user, the distance of the call and the type of service. Traffic is recorded as income as it is consumed. In the case of prepaid, the amount corresponding to the traffic paid pending consumption generates a contractual liability.

Prepaid traffic usually has expiration periods of up to twelve months. Based on historical consumption, the Group estimates the traffic that will not be consumed and is imputed to the consolidated income statement based on traffic consumed.

Connection and installation fees -

Revenue from connection and installation fees originated when customers connect to the Group's network is deferred and imputed to the income statement over the estimated average period of duration of the relationship with the customer or the term of the contract, whether or not a material right is granted, respectively, which varies depending on the type of service in question. The related costs, except those related to the network expansion, are recognized in the consolidated income statement in the estimated average life of the relationship with the customer.

Periodic fees for network use -

In the case of traffic sales, as well as other services, via a fixed rate for a certain period of time (flat rate), the income is recognized on a straight line basis in the period of time covered by the rate paid by the customer.

Interconnection -

Interconnection revenues derived from customer calls from other operators, as well as from other services used by customers, are recognized in the period in which they make such calls.

Sale of equipment -

Revenue from the sale of goods (mobile terminal equipment) is recognized when the signal from the sets is activated and transferred to the end customer.

Bundled services -

In the case of revenues from the sale of multi-elements, sets plus telephony services, internet, and paid television, the revenues are allocated based on the fair value of the components delivered. The offers of bundled services, which combine various elements, are analyzed periodically to determine the necessity to separate the various identified elements. The appropriate criterion of income recognition is then applied to each case.

Revenues from the sale of modems and decoders, as they are essential elements for the provision of the service, are respectively recognized as internet and television services throughout the average life of the client, and accrue the cost of the equipment delivered in the same period. While revenues from the sale of landlines, being elements that can be used independently of contracting the service, are recognized when the set is transferred to the final customer and the signal is activated. Fixed telephony, internet, and television services are recognized on a straight-line basis for the duration of the contract.

To the extent that bundles are sold at a discount on equipment (mainly in mobile telephony) and that there is a contract that generates explicit or implicit permanence, the criteria defined in IFRS 15 will apply. The application of the criteria defined in IFRS 15 represents an increase in revenue recognized for sales of equipment, which will generally be recognized coinciding with the moment of delivery to the customer, to the detriment of the periodic income for the provision of services in subsequent periods. The income is assigned proportionally to each element according to the independent sale prices of each individual component, always maintaining the total income value. The difference between the revenue from sales of sets and terminals and the amount received from the customer at the start of the contract is shown as a contractual asset in the consolidated statement of financial position, which will be recovered over the term of the contract with the customer.

The costs that are ultimately activated will be amortized in a systematic and consistent manner with the transfer to the client of the goods or services with which the associated asset is related. Said asset may be amortized over the duration of the contract, or average life of the client.

Other income, costs, and expenses -

Other income, costs and expenses are recognized as they accrue, regardless of when they are effected, and are recorded in the periods with which they are related.

2.25 Leases -

At the commencement of a contract, the Group evaluates whether the contract is, or contains, a lease. A contract is, or contains, a lease if it conveys the right to control the use of an identified asset for a period of time in exchange for a consideration.

The determination of whether a contract is or contains a lease is based on the substance of the contract; that is, whether the fulfillment of the contract depends on the use of a specific asset or whether the contract grants a right to use the asset, even if that right is not explicitly stated in the contract.

The Group maintains a significant volume of lease agreements as the lessee of various assets, mainly: towers, office and store buildings, and land where own towers are located. These leases accrue at an interest rate as described in Note 18(c).

The Group as lessee -

The standard requires the landlord to recognize all leases in a separate statement of financial position, thus reflecting the right to use the asset for a period of time, as well as the liabilities associated with contractual payments.

At the commencement of a contract, the Group will evaluate whether the contract is, or contains, a lease. A contract is, or contains, a lease if it conveys the right to control the use of an identified asset for a period of time in exchange for a consideration.

The Group as lessor -

Leases in which the Group substantially retains all the risks and benefits inherent to the ownership of the leased assets are classified as operating leases. The initial direct costs incurred in negotiating and contracting the operating lease are added to the book value of the leased asset and are recorded throughout the lease period whilst applying the same criteria as for rental income. Contingent income is recorded as income in the period in which it was obtained in the consolidated income statement.

2.26 Share-based payment transactions -

Group employees receive part of their compensation as per share-based payment plans, and according to which said employees provide services and receive equity instruments as consideration. In situations in which equity instruments are issued and some or all of the goods or services received by the entity as consideration can not be specifically identified, the unidentified goods or services received (or that will be received) are measured as the difference between the fair value of the share-based payment transaction and the fair value of any identifiable good or service received on the concession date. This amount is then capitalized or charged to expenses, as appropriate.

2.27 Distribution of dividends -

The distribution of dividends to the Group's shareholders is recognized as a liability in the consolidated financial position statement in the period in which the dividends are approved by the Group's shareholders.

2.28 Fair value measurements -

The Group measures some of its financial instruments, such as accounts receivable from related entities, investments, and other financial liabilities, at fair value on each date of the consolidated financial position statement. Likewise, the fair value of financial instruments measured at amortized cost is disclosed in note 3.3.

Fair value is the price that would be received for selling an asset or that would be paid when transferring a liability in an orderly transaction between participants in a market at the measurement date. The measurement at fair value is based on the assumption that the transaction to sell the asset or transfer the liability takes place, either:

- In the main market for the asset or liability, or
- In the absence of a main market, in the most advantageous market for the asset or liability.

The Group must be able to access the main or the most advantageous market. Also, the fair value of a liability reflects its risk of default.

When available, the Group measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is considered active if the transactions for the asset or liability are carried out frequently and sufficient volume to provide price information on an ongoing basis.

All assets and liabilities for which fair values are determined or disclosed in the consolidated financial statements are classified within the fair value hierarchy described below, based on the lowest level of the data used that are significant for the measurement at fair value as a whole:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Valuation techniques via which the lowest level of information that is significant for fair value measurement is directly or indirectly observable.

Level 3: Valuation techniques via which the lowest level of information that is significant for fair value measurement is not observable.

For assets and liabilities that are recognized at fair value in the consolidated financial statements on a recurring basis, the Group determines whether there have been transfers between the different levels within the hierarchy by reviewing the categorization at the end of each reporting period.

Group Management determines policies and procedures for recurring and non-recurring fair value measurements. On each reporting date, Management analyzes the movements in the values of the assets and liabilities that must be valued in accordance with the Group's accounting policies.

For purposes of fair value disclosures, the Group has determined the classes of assets and liabilities based on their nature, characteristics and risks, and the hierarchy level of fair value, as explained above.

3 FINANCIAL RISK MANAGEMENT

3.1 Financial risk factors -

The Group's main financial liabilities, other than derivatives, include commercial and miscellaneous accounts payable, lease liabilities, accounts payable to related parties, and financial obligations. The main purpose of these financial obligations is to finance the Group's operations. The Group has cash and short-term deposits, commercial and miscellaneous receivables, and accounts receivable from related entities that arise directly from its operations. The Group also has cash flow hedging instruments.

Due to the nature of its activities, the Group is exposed to credit, exchange rate, interest rate and liquidity risks, which are managed through a process of identification, measurement and continuous monitoring, subject to risk limits and other controls.

This process of risk management is critical for the Group's ongoing profitability, and each person within the Group is responsible for the risk exposures related to their responsibilities.

The independent process of risk control does not include business risks such as changes in the environment, technology, and industry. These are monitored through the Group's strategic planning process.

(a) Risk management structure -

The risk management structure is based on the Board of Directors and the Group Management, which are responsible for identifying and controlling risks in coordination with other areas as explained below:

i) Directory -

The Board is responsible for the general approach to risk management. The Board of Directors provides the principles for risk management, as well as the policies prepared for specific areas, such as exchange rate risk, interest rate risk, credit risk and the use of derivative financial instruments.

ii) Finance -

The Finance area is responsible for managing the flow of Group funds, taking into account the policies, procedures, and limits established by both the Board of Directors and Group Management, including the follow-up of said procedures to improve the Group's risk management.

iii) Internal Audit -

The Internal Audit area of the Group is responsible for supervising the operation and reliability of the internal control systems, and the administrative and accounting information. Likewise, it is responsible for supervising the financial information and significant events presented by the Group.

The risk management processes in the Group are monitored by Internal Audit, which analyzes both the adequacy of the procedures and compliance with them. Internal Audit discusses the results of its evaluations with General Management, and reports its findings and recommendations to the Group's Board of Directors.

(b) Risk mitigation -

As part of the total risk management, the Group constantly evaluates the different scenarios and identifies different strategies to manage exposures resulting from changes in interest rates, foreign currency, capital risk, and credit risks.

The Group's risk management is controlled by Corporate Finance per the policies approved by Management. The Group's Finance area identifies, evaluates, and hedges financial risks in close cooperation with the Group's operating units. The Board of Directors provides the principles for general risk management, as well as policies that hedge specific areas, such as foreign exchange risk, interest rate risk, credit risk, use of derivative and non-derivative financial instruments, financial instruments, and the investment of excess liquidity.

Credit risk -

Credit risk is the risk that a counterparty does not comply with its obligations stipulated in a financial instrument or contract, thus causing a loss. The Group is exposed to credit risk due to its operating activities, mainly in terms of its accounts receivable and financial activities, including its deposits in banks and transactions with derivatives, and other financial instruments.

Credit risk arises from cash and cash equivalents; contractual cash flows from equity investments accounted for at amortized cost; at fair value through other comprehensive income and at fair value through profit or loss; favorable derivative financial instruments and deposits in banks and financial institutions; as well as credit exposures to wholesale and retail customers, including any outstanding accounts receivable.

The Group maintains exposure limits of its placements in the different banks and financial institutions, according to the institutions' individual risk category. Credit risk is managed as a group. For banks and financial institutions, we only accept entities independently qualified with a minimum grade of "A".

Credit risk is controlled through the evaluation and analysis of individual transactions, for which an evaluation is made based on the aging of accounts receivable. If wholesale and residential customers have an independent rating, these ratings are used. Otherwise, if there is no independent rating, the monitoring of the credit risk assesses the credit quality of the client, with its financial position, past experience and other factors being taken into account. Individual risk limits are established based on internal or external ratings in accordance with the limits established by Management. Compliance with credit limits by wholesale customers is regularly supervised by line management, which is used to determine the estimate required for uncollectibility. Additionally, partial and total service suspensions are effected to users who have accounts receivable due in accordance with the policy described in Note 2.8 (iv); and Management defines the delinquency objectives.

According to the analysis made by the Group's Management, an account receivable is considered as impaired when it has been classified as an uncollectible account (see note 2.8). In addition, Management estimates a provision for expected losses on non-impaired accounts. As at the date of the consolidated financial position statement, the aging and qualification of the commercial accounts receivable balance is as follows:

	<u>Not impaired</u> <u>S/000</u>	<u>Impaired</u> <u>S/000</u>	<u>Total</u> <u>S/000</u>
As of March 31, 2021			
Unexpired	623,191	26,543	649,734
Expired			
Up to 1 month	142,098	53,315	195,413
From 1 to 3 months	172,003	94,544	266,547
From 3 to 6 months	88,242	135,353	223,595
From 6 to 12 months	23,262	302,613	325,875
More than 12 months	10,874	4,553,100	4,563,974
Total	<u>1,059,670</u>	<u>5,165,468</u>	<u>6,225,138</u>
As of December 31, 2020			
Not expired	648,729	28,058	676,787
Expired			
Up to 1 month	169,700	49,841	219,541
From 1 to 3 months	167,963	88,003	255,966
From 3 to 6 months	109,784	165,396	275,180
From 6 to 12 months	72,675	313,353	386,028
More than 12 months	-	4,415,531	4,415,531
Total	<u>1,168,851</u>	<u>5,060,182</u>	<u>6,229,033</u>

Consequently, in Management's opinion there are no significant concentrations of credit risk as of March 31, 2021 and December 31, 2020.

As at March 31, 2021, the Group's Management estimated that the maximum net amount of credit risk to which the Group is exposed amounts to approximately S/ 1,295,479,000 (S/ 1,430,422,000 as at December 31, 2020), which represents the net book value of accounts receivable and other financial assets.

Market risk -

Market risk is the risk of losses in balance sheet positions, mainly derived from movements in the exchange rate and interest rates.

The sensitivity analyzes in the following sections refer to positions for the three-month periods ended March 31, 2021 and 2020. Furthermore, they are based on the net amount of debt, the ratio of fixed interest rates, and the position of instruments in foreign currency remaining constant. The sensitivity in the consolidated profit or loss statement is the effect of the changes assumed in the respective market risk. This is based on financial assets and liabilities held as at March 31, 2021 and December 31, 2020, including the effect of hedge derivatives.

i) Exchange rate risk -

The exchange rate risk is the risk that the fair value of the future cash flows of a financial instrument fluctuates due to exchange rate variations. The Finance Management is responsible for identifying, measuring, controlling, and reporting the exposure to the Group's global exchange risk. The exchange risk arises when the Group presents mismatches between its active and passive positions in the different currencies in which it operates, which are mainly soles (functional currency) and US dollars. Management monitors this risk through the analysis of the country's macro-economic variables.

Transactions in foreign currency are carried out at the free market exchange rates published by the Superintendency of Banking, Insurance and Private Pension Fund Administrators. As at March 31, 2021, the weighted average free market exchange rates for transactions in US dollars were S/ 3.754 per US \$1 purchasing and S/ 3.758 for US \$1 selling (S/ 3.618 per US \$1 purchasing and S/ 3,624 for US \$1 selling at December 31, 2020) and for transactions in Euros, the rates were S/ 4.297 for

€1 purchasing and S/ 4.675 for €1 selling (S/ 4.446 for €1 purchasing and S/ 4.906 for €1 selling as at December 31, 2020), respectively.

The result of maintaining balances in foreign currency for the Group for the three-month periods ended March 31, 2021 and 2020, was a net profit/(loss) of approximately S/ 9,500,000 and S/ 3,969,000, respectively, which they are presented in the heading "Net exchange differences" of the consolidated income statement. See Note 31.

As of March 31, 2021 and December 31, 2020, the Group had the following assets and liabilities in foreign currency:

	As of March 31, 2021		As of December 31, 2020	
	US\$000	Euros000	US\$000	Euros000
Assets -				
Cash and cash equivalents	3,662	-	2,996	-
Trade accounts receivable, net	82,204	5,603	76,088	5,412

Other accounts payable	<u>(29,880)</u>	<u>-</u>	<u>(36,938)</u>	<u>-</u>
	<u>(330,625)</u>	<u>(14,751)</u>	<u>(322,747)</u>	<u>(13,906)</u>
Purchase position of derivatives (reference value)	<u>225,964</u>	<u>10,039</u>	<u>212,845</u>	<u>8,503</u>
Monetary position, net	<u>9,006</u>	<u>891</u>	<u>1,669</u>	<u>9</u>

The Group hedges its exposure to the conversion to Soles of financial obligations and OPEX operations (denominated in US dollars and euros), through the use of hedge cash flow swaps and forwards contracts.

The following table shows the sensitivity analysis of US dollars (the main currency other than the functional currency in which the Group has a significant exposure), in its monetary assets and liabilities, and its estimated cash flows and in euros. The analysis determines the effect of a reasonably possible change in the exchange rate of the US dollar and the euro, while keeping the other variables constant in the consolidated income statement, before income tax. A negative amount shows a potential net loss, while a positive amount reflects a potential net gain in the consolidated statement of income.

Sensitivity analysis	Change in exchange rates %	Effect on results before Consolidated taxes	
		As of March 31, 2021	As of March 31, 2020
Devaluation -			
Dollars	5	1,690	882
Dollars	10	3,381	1,764
Re-valuation -			
Dollars	5	(1,690)	(882)
Dollars	10	(3,381)	(1,764)

<u>Sensitivity analysis</u>	<u>Change in Exchange rates %</u>	<u>Effect on results before Consolidated taxes</u>	
		<u>As of March 31, 2021</u>	<u>As of March 31, 2020</u>
Devaluation -			
Euros	5	191	191
Euros	10	383	383
Re-valuation -			
Euros	5 (	191)	(191)
Euros	10 (	383)	(383)

The exchange rate sensitivities shown in the previous table are illustrative only and are based on simplified scenarios. However, this effect does not include the actions that would be taken by Management to mitigate the impact of this risk.

ii) Interest rate risk -

The interest rate risk is the risk that the fair value or future cash flows of a financial instrument fluctuate due to changes in market interest rates. The Group manages its interest rate risk based on the experience of Management, balancing the asset and liability interest rates.

Management believes that future fluctuations in interest rates will not significantly affect the results of the Group's future operations.

The information related to financial instruments with fixed and variable interest rates are shown as follows:

	<u>Rate variable (*) S/000</u>	<u>Fixed rate S/000</u>	<u>No interest S/000</u>	<u>Total S/000</u>	<u>Interest rate average %</u>
As of March 31, 2021					
Financial assets					
Cash and cash equivalents	961,476	-	-	961,476	0.10
Trade accounts receivable, net	-	436,479	623,191	1,059,670	0.89

Other accounts receivable, net	-	-	237,909	237,909	-
Financial liabilities					
Other financial liabilities	462,976	2,626,575	7,926	3,097,477	6.42
Financial liability for lease	336,268	790,481	-	1,126,749	3.52
Trade accounts payable	-	-	1,706,080	1,706,080	-
Other accounts payable to related Entities	-	-	7,873	7,873	-
Other accounts payable	-	-	55,456	55,456	-

(*) Variables are considered as assets and obligations at a variable-based rate, as well as fixed-rate assets and obligations for terms of less than 12 months.

Shown below is the consolidated income statement's sensitivity, which is due to the possible effect of interest rate changes on pre-tax financial expenses for the period, assuming that the financial liabilities on March 31, 2021 and 2020 will be renewed upon expiration, and will be maintained for the remainder of the following year:

Changes in basic points	Effect on the consolidated results before tax	
	As of	As of
	March 31,	March 31,
	2021	2020
	S/000	S/000
+(-) 50	+(-) 65	+(-) 609
+(-) 100	+(-) 130	+(-)1,219
+(-) 200	+(-) 260	+(-)2,438

The exchange rate sensitivities shown in the previous table are illustrative only and are based on simplified scenarios. The figures represent the effect of the pro forma movements in the net financial expense based on the projected scenarios of the yield curve and the interest rate risk profile that the Group currently has. However, this effect does not include the actions that would be taken by Management to mitigate the impact of this risk.

iii) Liquidity risk -

The liquidity risk is the risk that the Group cannot meet its payment obligations related to financial liabilities at maturity and replace the funds when they are withdrawn. The consequence would be the failure to pay the company's obligations to third parties.

Liquidity is controlled by matching the maturities of its assets and liabilities, obtaining lines of credit and/or maintaining surplus liquidity as investments, which allows the Group to carry out its activities normally.

The management of liquidity risk involves maintaining sufficient cash and finance availability, through an adequate amount of assigned credit sources and the ability to settle transactions, mainly of indebtedness. In this regard, the Group's Management focuses its efforts on maintaining sources of financing through the availability of lines of credit and the registration of corporate bond programs and commercial papers.

The Group maintains negative working capital generated mainly by provisions for contingencies classified as short term, whose execution depends on the resolution of various instances. See Note 32(b). Additionally, as of March 31, 2021, the Group maintains available credit lines for US \$ 257,339,000. In addition, the Group recorded a net loss in 2020 and 2019 due to the high competition in the sector. Nonetheless, the Group is considering reversing this position through the launch of new business models and strengthening services such as the convergent offer of fixed and mobile services, as it has a solid share in fixed services.

The following table shows the expiration of the Group's obligations as at the date of the consolidated statement of financial position and the amounts to be disbursed upon expiry, based on non-discounted payments that will be made:

	<u>Less than 3 months S/000</u>	<u>3 to 12 months S/000</u>	<u>1 to 5 years S/000</u>	<u>More than 5 years S/000</u>	<u>Total S/000</u>
As of March 31, 2021					
Other financial liabilities					
Amortization of capital	84,389	71,588	1,426,730	1,606,866	3,189,573
Flow from interest payments	87,310	107,124	641,931	121,037	957,402
Financial lease liability	90,801	264,120	575,925	211,029	1,141,875
Trade accounts payable	1,744,571	-	-	-	1,744,571
Other accounts payable to related entities	5,848	-	2,777	-	8,625
Other accounts payable	<u>38,422</u>	<u>-</u>	<u>-</u>	<u>-</u>	<u>-</u>
	<u>38,422</u>				
Total flows from liabilities	<u>2,051,341</u>	<u>442,832</u>	<u>2,647,363</u>	<u>1,938,932</u>	<u>7,080,468</u>
As of December 31, 2020					
Other financial liabilities

The table above does not include any contingency provisions as their execution is subject to the resolution of various instances as per that described in Note 32(b). Likewise, the table does not include hedging financial derivatives because Management considers that such contracts are effectively settled on a net basis. Consequently, the flow of the hedge derivatives and the reconciliation of the amounts equivalent to the accounting values of the discounted net flow generated by these instruments are presented below:

	<u>Less than 3 months S/000</u>	<u>3 to 12 months S/000</u>	<u>1 to 5 years S/000</u>	<u>More than 5 years S/000</u>	<u>Total S/000</u>
As of March 31, 2021					
Income	917,042	5,370	-	-	922,412
Expenses	(894,777)	(5,337)	-	-	(900,114)
Net cash flow	<u>22,265</u>	<u>33</u>	<u>-</u>	<u>-</u>	<u>22,298</u>
Discounted net cash flow	<u>22,935</u>	<u>45</u>	<u>-</u>	<u>-</u>	<u>22,980</u>
As of December 31, 2020					
Income	1,055,243	2,979	-	-	1,058,222
Expenses	(1,041,490)	(2,959)	-	-	(1,044,449)
Net cash flow	<u>13,753</u>	<u>20</u>	<u>-</u>	<u>-</u>	<u>13,773</u>
Discounted net cash flow	<u>13,970</u>	<u>25</u>	<u>-</u>	<u>-</u>	<u>13,995</u>

3.2 Capital risk management -

The Group actively manages a capital base to hedge the risks inherent in its activities. The capital adequacy of the Group is monitored using, among other measures, the indicators established by the Management.

The Group's objectives when managing its capital correspond to a broader concept than the "Equity" that is shown in the consolidated statement of financial position and is mainly constituted by: (i) safeguarding the Group's ability to continue operating in a manner that continues to provide returns to the shareholders and benefits to the other participants; and (ii) maintaining a strong capital base to support the development of its activities.

The Group monitors its capital based on the leverage ratio, which is calculated by dividing the net debt by total capital. Net debt corresponds to total indebtedness (including commercial accounts payable, accounts payable to related entities, lease liabilities, and other accounts payable) minus cash and cash equivalents. The total capital corresponds to the equity as it is shown in the consolidated statement of financial position plus the net debt.

As of March 31, 2021 and December 31, 2020, the consolidated leverage indicator was as follows:

	As of March 31, 2021 S/000	As of December 31, 2020 S/000
Total debt	6,382,450	6,341,356
Less: Cash and cash equivalents	(961,476)	(876,784)
Net Debt (A)	5,420,974	5,464,572
Total equity (B)	4,380,651	4,061,063
Leverage ratio (A / B)	1.24	1.35

As at March 31, 2021 and December 31, 2020, there have been no changes in the activities and policies of capital management in the Group.

3.3 Estimation of fair value -

(a) Instruments recorded at fair value according to their hierarchy -

The following table shows an analysis of financial instruments that are carried at fair value according to level of the fair value hierarchy:

	Value of price in active markets <u>Level 1</u> S/000	Observable significant variables <u>Level 2</u> S/000	Unobservable significant variables <u>Level 3</u> S/000	Total <u>S/000</u>
As of March 31, 2021				
Financial assets -				
Derivative financial instruments:				
Foreign currency forward	-	22,980	-	22,980
Total financial assets	-	22,980	-	22,980
As of December 31, 2020				
Financial assets -				
Derivative financial instruments:				
Foreign currency forward	-	13,995	-	13,995
Total financial assets	-	13,995	-	13,995

Level 1 -

The financial assets included in the Level 1 category are those that are measured based on quotes obtained from an active market. A financial instrument is considered as being quoted in an active market if prices are easily and regularly available from a centralized trading mechanism, agent, broker, industry group, price providers or regulatory entities; and said prices come regularly from transactions in the market.

Level 2 -

The financial instruments included in the Level 2 category are measured based on market factors. This category includes instruments valued using market prices of similar instruments, whether active or not, and other valuation techniques (models) in which all significant data are directly or indirectly observable in the market. The following is a description of how the fair value of the Group's main financial instruments included in this category is determined:

- Derivative financial instruments -

Derivatives designated as hedging instruments reflect the variation in the fair value of foreign currency futures contracts, designated as cash flow hedges to cover highly probable future purchases.

The fair values of swaps and forwards are measured using valuation techniques based on market data. Applied valuation techniques include swap valuation models, using present value calculations. These models take into account various factors, including the credit quality of the counterparties, currencies, forward rates and interest rate curves.

The adjustment for credit valuation is applied to "over-the-counter" derivative exposures to take into account the risk of default of the counterparty when measuring the derivative's fair value.

A credit valuation adjustment is the cost of protection at the market price required to hedge the credit risk of the counterparty in this type of derivatives portfolio. The credit valuation adjustment is calculated by multiplying the probability of default, the default value of loss and the exposure expected at the time of default.

- Debt instruments available for sale -

The valuation of corporate bonds, lease bonds and public treasury bonds are measured by calculating the Net Present Value ("NPV") through discounted cash flows, zero coupon curves and considering current and observable market transactions. Other debt instruments are measured using valuation techniques based on assumptions supported by observable prices in current market transactions, obtained through price suppliers. However, when prices have not been determined in an active market, fair value is based on quotes from brokers and on assets that are valued using models where most of the assumptions are observable in the market.

Level 3 -

The financial assets included in level 3 are measured using a valuation technique (internal model), based on assumptions that are not supported by prices of observable transactions in the current market for the same instrument, or based on available market data. The Group does not have Level 3 instruments as of March 31, 2021 and December 31, 2020.

- Instruments recorded at amortized cost -

In addition to the instruments recorded at fair value, the following is the disclosure of the comparison between the book values and the fair values of the Group's financial instruments that are recorded at amortized cost in the consolidated statement of financial position. The table does not include the fair values of non-financial assets and liabilities:

	Value of price in active markets (Level 1) S/000	Observable significant variables (Level 2) S/000	Unobservable significant variables (Level 3) S/000	Fair value S/000	Book value S/000
As of March 31, 2021					
Financial assets -					
Asset as per financial derivative instruments	-	22,980	-	22,980	22,980
Total financial assets	-	22,980	-	22,980	22,980
Financial liabilities -					
Bonds issued and debts and loans that accrue interest	-	3,189,503	-	3,189,503	3,189,503
Financial lease liabilities	-	1,141,875	-	1,141,875	1,141,875
Other accounts payable to related entities	-	8,625	-	8,625	8,625
Total financial liabilities	-	4,340,003	-	4,340,003	4,340,003
As of December 31, 2020					
Financial assets -					
Asset as per derivative financial instruments	-	13,995	-	13,995	13,995
Total financial assets	-	13,995	-	13,995	13,995
Financial liabilities -					
Bonds issued and debts and loans that accrue interest	-	3,097,477	-	3,097,477	3,097,477
Financial lease liability	-	1,126,749	-	1,126,749	1,126,749
Other accounts payable to related entities	-	7,873	-	7,873	7,873
Total financial liabilities	-	4,232,099	-	4,232,099	4,232,099

The methodologies and assumptions used by the Group to determine the estimated market values depend on the terms and risk characteristics of the various financial instruments that are recorded at amortized cost and include the following:

- i) Assets whose fair value is similar to their book value -

For financial assets and liabilities that are liquid or have short-term maturities (less than three months), the carrying amount is considered to be similar to its fair value. This assumption also applies to term deposits, savings accounts without a specific maturity and floating rate financial instruments.

- ii) Fixed rate financial instruments -

The fair value of financial assets and liabilities that are at a fixed rate and amortized cost is determined by comparing the market interest rates at the time of initial recognition with the current market rates related to similar financial instruments.

The estimated fair value of interest accruing deposits is determined by discounted cash flows using market interest rates for financial instruments with similar maturities and credit risks. For the issued quoted debt, fair value is determined based on quoted market prices. When market prices are not available, the discounted cash flow model based on the yield curve of the interest rate is used for the remaining term.

4 CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of the consolidated financial statements in accordance with IFRS requires Management to make significant judgments, estimates, and assumptions to determine the reported figures of assets and liabilities, the exposure of contingent assets and liabilities on the date of the consolidated financial statements, as well as the reported figures of income and expenses for the three-month periods ended March 31, 2021 and 2020.

In Management's opinion, these estimates were made on the basis of their best knowledge of the relevant facts and circumstances at the date of preparation of the consolidated financial statements. However, the final results may differ from the estimates included in the consolidated financial statements. The Group Management does not expect that the variations, if any, will have a significant effect on the consolidated financial statements.

The most significant estimates considered by Management in relation to the consolidated financial statements basically refer to:

- Estimation for doubtful accounts. See Notes 2.8, 3.1 (b) 7, and 8.
- Estimate for contractual assets and liabilities. See Notes 2.24 and 9.
- Estimate for devaluation of inventories. See Notes 2.10 and 10.
- The residual value, useful life and depreciation of property, plant and equipment. See Notes 2.11 and 13.
- Estimate for impairment of long-term assets. See Notes 2.14, 13, 14, and 16.
- Assets and liabilities for deferred taxes. See Notes 2.21 and 24.
- Estimated accrued income. See Note 2.24.
- Provision for decommissioning. See Notes 2.11, 2.20, and 21.
- Provision for contingencies. See notes 2.20, 21, and 32(b).
- Cash flow hedge. See Note 2.9.
- Provision for restructuring. See notes 2.20, 20, and 29.
- Estimation of uncertainties and judgments made in relation to lease accounting. See Notes 2.25, 15, and 18.

Any difference in the estimates in the subsequent real results is recorded in the results of the year in which it occurs.

Estimate of the effects of the global pandemic of Covid-19 on the consolidated financial statements

As a consequence of the spread of the Covid-19 virus throughout the world, the Peruvian State declared a national state of emergency as of March 16, 2020, and which was extended until April 30, 2021. The emergency has included measures such as compulsory social immobility (between March 16 and June 30, 2020), the restriction of production and commercial activities, except those considered as basic needs. At the beginning of the state of emergency, the Group's offers were suspended. However, as the telecommunications sector is considered to be of basic necessity, the Group provided internet, payment, mobile telephony, fixed telephony, interconnection and connectivity services consistently and without significant interruptions.

The main impact that the Company has had is in the collection for the services provided. Moreover, the Government prohibited the cutting of telecommunications services for non-payment during the period of social immobilization between March and June. In supporting the national recovery, the Company has since April 13, 2020 granted interest-free payments in 6 or 12 installments for the invoices expiring during

this period. The Company has also offered discounts. While these benefits have been welcomed by customers, the expected loss due to bad debts has been readjusted based on the projections on the decline in GDP. The Group experienced an increase in credit risk during the second quarter of 2020, mainly associated with providing installment plans for receipts that expired during said period. As of December 31, 2020, the estimate for doubtful collections includes possible variations in credit risk.

The Group's initial estimates of revenue growth were diminished. However, this has been partially offset by lower expenses, making better use of installed capacity, and by significant growth in the use of internet and TV. We have determined that the Group has no problems in the recovery of its investments and therefore there is no deterioration of assets. The Management has been constantly monitoring this situation.

5 FINANCIAL INSTRUMENTS

(a) Financial instruments by category

The classification of financial instruments by category is as follows:

	As of March 31, 2021 <u>S/000</u>	As of December 31, 2020 <u>S/000</u>
Assets according to consolidated balance sheet -		
Financial assets at amortized cost:		
- Cash and cash equivalents	961,476	876,784
- Trade accounts receivable and Other accounts receivable (*)	1,265,451	1,406,760
- Financial derivative instruments used for hedging	<u>22,980</u>	<u>13,995</u>
	<u><u>2,249,907</u></u>	<u><u>2,297,539</u></u>
Liabilities according to consolidated balance sheet -		
Financial liabilities at amortized cost:		
- Financial obligations	3,189,503	3,097,477
- Financial leasing liability	1,141,875	1,126,749
- Trade accounts payable and Other accounts payable (*)	1,782,993	1,761,536
- Other accounts payable to related entities	<u>8,625</u>	<u>7,873</u>
	<u><u>6,122,996</u></u>	<u><u>5,993,635</u></u>

(*) Does not include advances or taxes.

The maximum exposure to credit risk as of March 31, 2021 and December 31, 2020, is the book value of each class of financial asset mentioned above.

6 CASH AND CASH EQUIVALENTS

(a) The breakdown of the item is presented below:

	As of March 31, 2021 S/000	As of December 31, 2020 S/000
Fixed funds	308	307
Current and savings accounts (b)	178,179	118,945
Time deposits (c)	581,000	526,700
Trust fund (d)	<u>201,989</u>	<u>230,832</u>
	<u><u>961,476</u></u>	<u><u>876,784</u></u>

(b) Current and savings accounts are held in local and foreign banks and are denominated in soles, US dollars and euros. This balance includes current accounts held in the financial institution of Telfisa Global B.V. Group. See Note 23(h). Savings accounts are remunerated at current rates in the respective market.

(c) Term deposits have original maturities of less than 90 days and may be renewed upon maturity. As of March 31, 2021 and December 31, 2020, these were in the form of deposits in national currency in various national banks. These term deposits are remunerated at current market rates.

(d) Includes the funds of the trust fund administered by La Fiduciaria S.A. (with the involvement of the Banco de Credito del Peru and Banco Santander), which consolidates the collection rights and the cash flows in such a way that the Group can better manage and give greater attention to direct payments that are required for the normal operation of their businesses. As of March 31, 2021 and December 31, 2020, the trust includes only cash.

(e) There were no restrictions on the balances of cash and cash equivalents as at March 31, 2021 and December 31, 2020.

7 COMMERCIAL ACCOUNTS RECEIVABLE, NET

(a) The breakdown of the item is presented below:

	As of March 31, 2021 S/000	As of December 31, 2020 S/000
Fixed business subscribers	2,915,111	2,897,256
Mobile business subscribers	2,229,270	2,128,191
Data and information technology	618,035	645,230
Distributors, agencies and department stores	123,173	144,548
Wholesale - Interconnection and Correspondents	162,271	190,327
Related. Note 23 (d)	137,515	123,075
Others	<u>39,763</u>	<u>100,406</u>
	6,225,138	6,229,033
Less - Allowance for doubtful accounts (c)	(5,165,468)	(5,060,182)
	1,059,670	1,168,851
Less - Non-current portion (d)	(1,604)	(503)
Current portion	<u><u>1,058,066</u></u>	<u><u>1,168,348</u></u>

(b) Commercial accounts receivable (net) generate interest after maturity. The items of internet, fixed and public telephony, paid television, mobile phone subscribers, distributors, agencies and large

stores are mainly billed in soles, while accounts receivable for data and information technology, interconnection and foreign correspondents are mainly are billed in US dollars. Likewise, as of March 31, 2021, as a result of the State of Emergency, the Group has financed its fixed and mobile business customers for the invoices expiring mainly between January and June 2020 for S/ 183,200,000, granting customers interest-free payment terms of 6 or 12 months, and have thus far received S/ 115,074,000.

As of March 31, 2021, trade accounts receivable include estimates for unbilled services rendered for approximately S/ 60,016,000 (S/ 56,073,000 as at December 31, 2020). The Group Management estimates that these items will be invoiced in full in 2021.

As of March 31, 2021, the Group had approximately 1,761,000 fixed and public telephony lines in service, 4,253,000 postpaid mobile telephony lines 1,952,000 connections in broadband service, and approximately 1,382,000 paid television accesses (1,828,000, 4,169,000, 1,912,000 and 1,384,000, respectively as at December 31, 2020).

- (c) The estimation movement for doubtful accounts as of March 31, 2021 and December 31, 2020, is as follows:

	As of March 31, 2021 <u>S/000</u>	As of December 31, 2020 <u>S/000</u>
Opening balance	5,060,182	4,565,517
Endowment for the period, Note 28(a)	90,488	504,411
Punishments	(5,537)	(55,934)
Net exchange differences	<u>20,335</u>	<u>46,188</u>
Ending balance	<u><u>5,165,468</u></u>	<u><u>5,060,182</u></u>

In Management's opinion, the estimation for doubtful accounts is sufficient to cover the credit risk of these accounts at the date of the consolidated statement of financial position, in accordance with the Group's accounting practice, described in Note 3.1(b).

- (d) As at March 31, 2021 and as at December 31, 2020. These include accounts receivable from financed sales of mobile terminals and equipment related to internet, exchange, and paid television services, which have expirations of up to 24 months. Contractually these accounts do not generate interest, but for accounting purposes an implicit interest is estimated, which is deferred at the time of the sale and is recognized as revenue depending on the duration of the contract.

The amount recognized for implicit interest for the three months ended March 31, 2021, amounts to S / 1,183,000 (S/ 1,028,000 for the three-month period ended March 31, 2020) and is presented in the item of "Financial income" of the consolidated income statement. See Note 31.

- (e) In June and August 2020, the Group made the irrevocable assignment of collection rights related to sales of mobile terminals financed to Inter-american Investment Corporation for S/ 34,166,000, thereby producing a loss of S/ 542,000, and the Group was also entrusted the collection of the rights assigned.

In 2020, the assignment of collection rights to customers of the Group with the Continental Bank Trust (BBVA) was made for the amount of S/ 122,712,000, thus retaining risks for S/ 7,926,000 as at March 31, 2021. These figures are reported as "Other financial liabilities" (see Note 17.3) and produced a loss on sale (discount) of S/ 2,314,000. The latter also charged the Group with the collection of the assigned rights.

8 OTHER ACCOUNTS RECEIVABLE, NET

(a) The table below presents the breakdown of the item:

	As of March 31, 2021 S/000	As of December 31, 2020 S/000
Collection rights for enforcement actions (b)	141,468)	141,531)
Collection rights (c)	110,062)	110,062)
Grants receivable (d)	98,621	112,002
Sale of properties	11,716	45,746
Loans to personnel, Note 23(f)	15,715	16,620
Loans to third parties	13,883	13,645
Derivative financial instruments (g)	22,980	13,995
Others	<u>58,581</u>	<u>52,521</u>
	473,026	506,122
Less - Estimation for doubtful accounts (f)	(<u>159,447</u>)	(<u>159,406</u>)
	313,579	346,716
Less - Non-current portion	(<u>61,765</u>)	(<u>65,158</u>)
Current portion	<u><u>251,814</u></u>	<u><u>281,558</u></u>
Financial assets classified as Other accounts receivable	205,781	237,909
Non-financial assets classified as Other accounts receivable	<u>107,798</u>	<u>108,807</u>
	<u><u>313,579</u></u>	<u><u>346,716</u></u>

(c) The collection rights for coercive executions mainly correspond to seizures of Group assets without a court ruling made by several municipalities at the national level. The Municipalities demand the payment of licenses and fines for the installation of an external plant without municipal authorization. Management continues with the filing of the legal actions and estimates that the seizures undertaken will be declared illegal. Likewise, based on a collectability study carried out, the respective doubtful collection estimates have been established.

(c) As of March 31, 2021 and December 31, 2020, these correspond mainly to collection rights to the Tax Administration, for payment of tax assessments (see Note 32(b)) that in the opinion of Management and of the legal advisors will be recovered when certain appeals filed in relation to the assessments received for income tax from previous years are resolved, as permitted by IAS 12 - "Income Tax."

The Group Management expects to recover this item in the short term.

(d) Corresponds mainly to the Lambayeque Project, a contract signed on May 27, 2015, between the Group and the Peruvian State (represented by the Telecommunications Investment Fund - FITEL) for the non-reimbursable financing of the Project "Broad Band for Comprehensive Connectivity and the social development of the country's northern area", which has been collected according to the established schedule.

In accordance with the Group's accounting practice, described in Note 2.22, both the disbursement received and receivables are presented under "Deferred income" in the consolidated statement of financial position. See Note 22.

- (e) The other accounts receivable are denominated in national and foreign currency and do not generate interest.
- (f) The other accounts receivable were collectively evaluated to determine if there was objective evidence of impairment. However, the Group determined that the estimate for doubtful collection at the end of the period is sufficient, in accordance with the Group's accounting practice. Described in Note 2.8 (iv).
- (g) As at March 31, 2021, the Group had forwards cash flow hedging contracts to reduce the exchange rate risk for disbursements of certain Opex and Capex operations, for a nominal value of US\$ 7,000,000 that has maturity dates during 2021. As of December 31, 2020, the hedging contracts were for US \$ 33,422,000. The cash flow hedge of the future expected payments was evaluated as being highly effective. It is expected that the amounts retained in the separate statement of other comprehensive income will affect the separate profit or loss statement in each of the future periods until their maturity dates.

9 ASSETS AND LIABILITIES RELATED TO CONTRACTS WITH CUSTOMERS

The Company has recognized the following assets and liabilities related to contracts with customers.

- (a) Contractual assets:

	As of March 31, 2021	As of December 31, 2020
	S/000	S/000
Sale of terminals, Note 2.24	36,566	43,477
Less - non-current portion	(3,527)	(4,461)
Current portion	<u>33,039</u>	<u>39,016</u>

- (b) Contract liabilities:

	As of March 31, 2021	As of December 31, 2020
	S/000	S/000
Fixed and mobile telephony services, Note 2.24	79,531	73,454
Deferred installation fee, Note 2.24	64,871	61,767
Access rights IRU (c)	47,934	47,168
Business project	23,700	23,938
Others	<u>2,678</u>	<u>3,006</u>
	218,714	209,333
Less - non-current portion	(68,901)	(59,669)
Current portion	<u>149,813</u>	<u>149,664</u>

- (c) Correspond to the irrevocable rights of unrestricted use of certain Group assets granted to third parties for a period of up to 20 years.

10 INVENTORIES

(a) The breakdown of the item is presented below:

	As of March 31, 2021 S/000	As of December 31, 2020 S/000
Goods and supplies	143,679	152,914
Inventories receivable	<u>82,469</u>	<u>41,432</u>
	226,148	194,346
Less - Allowance for impairment of inventories (c)	<u>(18,728)</u>	<u>(26,058)</u>
	<u><u>207,420</u></u>	<u><u>168,288</u></u>

The cost of inventories sold for the three-month period ended March 31, 2021, was approximately S/ 274,414,000 (S/ 238,399,000 for the three-month period ended March 31, 2020) and is presented in the item "Cost of equipment sales" in the consolidated income statement.

(c) The movement for the inventory impairment estimate as of March 31, 2021 and December 31, 2020, is as follows:

	As of March 31, 2021 S/000	As of December 31, 2020 S/000
Opening balance	26,058	18,548
Provision (recovery) for impairment of inventories, net, Note 28	<u>(7,330)</u>	<u>7,510</u>
Final balance	<u><u>18,728</u></u>	<u><u>26,058</u></u>

In Management's opinion, the estimate for inventory devaluation adequately hedges the estimated risk of loss on the dates of the consolidated statement of financial position.

11 OTHER NON-FINANCIAL ASSETS

(a) The breakdown of the item is presented below:

	As of March 31, 2021 S/000	As of December 31, 2020 S/000
Deferred compliance obligation costs (b)	416,275	413,066
Customer acquisition expense (c)	148,887	116,979
Annual fee (e)	46,482	-
Maintenance of licenses and computer equipment	25,721	14,909
Advances granted to suppliers	8,741	7,470
Prepaid advertising	2,258	2,018
Advance payments for right of access (d)	3,482	3,581
Prepaid insurance	888	4,769
Others	<u>79,895</u>	<u>67,750</u>
	732,629	630,542
Less - Non-current portion	<u>(280,819)</u>	<u>(263,207)</u>
Current portion	<u><u>451,810</u></u>	<u><u>367,335</u></u>

- (b) Includes the costs of modem equipment and Pay TV decoders. This equipment is provided to the customer as part of the service, which is deferred as it is an obligation in order to comply with customer contracts.
- (c) Corresponds to expenses directly related to obtaining commercial contracts (sales commissions, expenses with third parties, among others), which are amortized for contracts with an undetermined term in the average life of the customer, and for contracts with onerous permanence within that period.
- (d) As of March 31, 2021 and December 31, 2020, includes access rights not classified as a lease under IFRS 16.
- (e) Corresponds to the unaccrued balance from the use of the radioelectric spectrum, which is accrued during the year. During 2021, the Group has accessed a benefit of S/ 21,176,000, granted by the mobile royalty law for infrastructure expansion and/or the technological improvement of the structure. The foregoing reduced the royalty for the period by committing to cover 39 new locations with 4G technology in 12 months. This coverage will be carried out through a provider as legally permitted. Furthermore, the Company requested to pay monthly installments for the 2021 canon, which was approved by the Ministry of Transportation and Communications for 12 months. The payment plan will expire on February 28, 2022. See Note 17.2(b).

12 INVESTMENTS IN ASSOCIATES

- (a) The table below presents the breakdown of the item:

	As of March 31, 2021 S/000	As of December 31, 2020 S/000
Associated companies		
Red Digital del Perú S.A.C. (b)	9,682	8,431
Internet Para Todos S.A.C. (c)	<u>246,802</u>	<u>256,506</u>
	<u>256,484</u>	<u>264,937</u>
Other share investments		
Wayra Perú Aceleradora de Proyectos S.A.C.	<u>219</u>	<u>219</u>
	<u>219</u>	<u>219</u>
	<u>256,703</u>	<u>265,156</u>

- (b) Company incorporated in November 2014, which is dedicated to developing, managing and supporting diverse products and services for small, medium and large companies. The Group's stake in Red Digital Perú S.A.C. is 40.00 percent.
- (c) Internet para Todos S.A.C.

In 2019, the Company reached agreements with other investors, JML International Limited, which is a subsidiary of Facebook, Inc. (Facebook), Andean Development Corporation (CAF) and Inter-American Investment Corporation (IDB) to regulate their joint investment and common share in the equity of Internet para Todos S.A.C. (IPT) in the following manner:

Business	%
Facebook	24.67
CAF	10.33
IDB	10.33

As a result of the agreement with the partners, Telefónica del Perú diluted its share to 54.67% of the IPT shares, and the Company also lost control of the subsidiary, thereby becoming an associate.

The following table shows the summary of the main items of the associate financial statements as at March 31, 2021 and at December 31, 2020.

	As of March 31, <u>2021</u> S/000	As of December 31, <u>2020</u> S/000
Assets	505,477	521,952

- (b) The concessions include:

- (i) The difference between the share acquisition cost and the fair value of the respective net assets of the Compañía Peruana de Teléfonos S.A. (CPT), acquired by the Group in 1994, was allocated to the cost of the concession, which amortizes over a period of 33 years, maturing in December 2027.
- (ii) Band A 1710-1730 Mhz and 2110-2130 Mhz (4G LTE) in Lima and Provinces, awarded by the MTC in July 2013 for US \$152,229,000, which is amortized over a period of 20 years until the

year 2033. It also includes the use of the B band of provinces, the use of the band in Lima and Callao, and the use of the 25 Mhz band corresponding to the 1,900 Mhz band.

- (iii) Block C, of the 700 Mhz band, in Lima and Provinces, signed with the MTC in July 2016, for US \$315,007,700, which is amortized over a period of 20 years until the year 2036.
- (c) The software includes the financial and accounting applications based on the SAP system, as well as the network licenses corresponding to software for platforms that support the commercial systems. The software activated during 2021 and 2020, corresponds mainly to corporate systems for the commercial area, office applications, control equipment software, and network management, among others.
- (d) As of March 31, 2020, it includes the transfer of the equity Block to Telefónica Cloud Tech Peru S.A.C., and the sale of the Group's stake in it for S/ 3,646,000. See Note 1.3(a). As of December 31, 2020, it includes the transfer of the equity Block to Telefónica Cybersecurity & Cloud Tech Peru S.A.C., and the sale of the Group's stake in it for S/ 5,424,000. See Note 1.3(b).
- (e) As of March 31, 2021 and December 31, 2020, Management has carried out an analysis of impairment indicators and determined that there is no impairment in the value of the assets. In Management's opinion, no estimate is required at the date of the consolidated statement of financial position.

15 RIGHTS-OF-USE ASSETS

(a) The movement and composition of the item as at the date of the consolidated statement of financial position are detailed below:

	Rights of use of land & natural assets S/000	Rights of use of constructions S/000	Rights of Use technical facilities & machinery S/000	Other rights of use S/000	Total S/000

As of March 31, 2021	<u>149,121</u>	<u>174,114</u>	<u>45,752</u>	<u>26,962</u>	<u>395,949</u>
Net Value					
As of March 31, 2021	<u>391,204</u>	<u>438,449</u>	<u>109,934</u>	<u>6,174</u>	<u>945,761</u>
As of December 31, 2020	<u>392,414</u>	<u>444,661</u>	<u>107,858</u>	<u>8,865</u>	<u>953,798</u>

- (b) During 2020, the lease contracts of sites owned by third parties were assigned to Telxius Torres Perú S.A.C., a related company. The periods for tower space rental were increased based on the lease end dates. An increase in the rights of use was recognized with the amount of S/72,095,000 and a reduction of S/ 15,572,000 that corresponds to the initial term signed with the third party.
- (c) Corresponds to the transfer of lease contracts of sites for spaces used by Internet para Todos S.A.C., which meant a reduction of rights of use for S/ 46,274,000.

It includes the transfer of the equity Block to Telefónica Cybersecurity & Cloud Tech Peru S.A.C., and the sale of the Group's stake in it for S/ 15,360,000. See Note 1.3(a).

16 CAPITAL GAINS

- (a) Corresponds to the highest value paid for the acquisition of 17.44 percent of shares of Telefónica Móviles Perú Holding S.A.A. and of the entire share in Telefónica Empresas Perú S.A.A., as well as of the absorbed subsidiaries Star Global Com S.A.C. and Telefónica Multimedia S.A.C., based on the share of the Group in the fair value of the respective net assets acquired.
- (b) The movement for the item are as follows:

	As of March 31, 2021 S/000	As of December 31, 2020 S/000
Opening balance	1,215,145	1,215,145
Final balance	<u>1,215,145</u>	<u>1,215,145</u>

The recoverable amount has been determined using projections of cash flows derived from the financial budgets approved by Senior Management. The aforementioned cover three years (3) and perpetuity. The corresponding discount rate has been determined and is applicable to cash flow projections. Cash flows that go beyond the period indicated in the projections are extrapolated using a specific growth rate that is similar to the long-term average growth rate for the industry in which the Group operates.

As at March 31, 2021 and December 31, 2020, the amount of the capital gain has been compared with the recoverable value. Management has thus determined that it is not necessary to establish an impairment estimate for these assets at the date of the consolidated statement of financial position. See Note 2.14.

Key assumptions used in calculations of value in use

The calculation of the value in use for the units evaluated is mostly sensitive to the following assumptions:

- Gross margin
- Discount rate
- Market share during the budgeted period; and
- Long-term growth rate used to extrapolate cash flows that go beyond the budget period.

Gross margin -

Is based on the average values recorded in the three years prior to the commencement of the budget period and future projects of each company. It increases during the budget period with the expected efficiency improvements. In the long term, the Group's gross margin (OIBDA) remains constant at 32.3%.

Discount rate -

It represents the current market assessment of the Group's specific risks, considering the time value of money and the particular risks of the underlying assets that were not included in the cash flow estimates. The calculation of the discount rate is based on the specific circumstances of the Group, and represents the average cost of capital. This average considers both debt and equity. The cost of equity is based on the return on investment that the Group's shareholders expect to obtain. The cost of the debt is based on the loans that accrue interest that the Group must pay. The specific segment risk is incorporated through the application of individual beta factors. Beta factors are evaluated annually on the basis of market information available to the public.

The after-tax discount rate used as of March 31, 2021 and December 31, 2020 was 8.91%.

Market Share -

Using industry information to forecast growth rates is important because Management evaluates how the position of the unit could change in relation to its competitors during the budgeted period. Management expects the Group's market share to remain stable during the budgeted period.

Long-term growth rate -

This rate is based on published market research and trends in the telecommunications sector. The growth rate as of March 31, 2021 and December 31, 2020, which has been considered for the following years is 2.70%.

Sensitivity to changes in assumptions -

Management considers that the most sensitive assumptions for the model are the growth rate and the discount rate. Therefore, Management carried out a sensitivity analysis where it concluded that the recoverable value of the Group is above its book value, considering a simultaneous variation of 10% in both variables (increase in the discount rate of 0.9% and reduction in the rate of growth of 0.3%), and concluded that the Group would continue to be above the book value and would not have to recognize any impairment in capital gains as of March 31, 2021.

17 OTHER FINANCIAL LIABILITIES

(a) The breakdown of the item is presented below:

	<u>As of March 31, 2021</u>			<u>As of December 31, 2020</u>

2024	-	254,850	254,850	-	255,000	255,000
2025 onwards	-	2,191,356	2,191,356	-	2,188,715	2,188,715
Total	79,886	3,048,933	3,128,819	43,325	3,046,226	3,089,551

- (d) The resources raised in the bond issue were used to finance working capital, restructuring liabilities, making investments, among others. These bonds are guaranteed with the equity of Telefónica del Perú S.A.A.
- (e) The amount authorized for the issuance of bonds is up to US \$1,650,000,000, outstanding or their equivalent in national currency, as approved by the General Shareholders' Meeting on March 24, 2017, of Telefónica del Perú S.A.A., within a term that was extended until December 31, 2022.

Furthermore, within the same term, it may issue short-term instruments up to an amount of US \$550,000,000 outstanding with a maximum limit of US \$2,000,000,000 as a whole.

- (f) In June 2016, the issue of Corporate Bonds expiring in June 2023, and for an amount of S/ 260,000,000 at an issue price at par and a fixed nominal annual interest rate of 6.66 percent, was finalized. The foregoing was undertaken in order to assume the expenses associated with the Group's share in the public tender for Block C of the 700 Band (See Note 14(b)(iii)).
- (g) In April 2019, the issuance of an International Bond with maturity in April 2027 was finalized, and for an amount of S/ 1,700,000,000, at a nominal fixed annual interest rate of 7.38%. The resources raised in the placement will be used for the execution of investment projects in capital goods, the re-profiling of some debt operations and other corporate uses. Furthermore, this bond has an agreement not to carry out asset sales operations with subsequent leasing greater than 20% of the consolidated net assets, which are calculated as total consolidated assets excluding goodwill, trademarks, patents and rights, and licenses (without administrative concessions), net of current liabilities. The Group has been complying with this agreement.

17.2 Short-term debt -

(a) The breakdown of the item is presented below:

	<u>Currency of origin</u>	<u>As of March 31, 2021 S/000</u>	<u>As of December 31, 2020 S/000</u>
Ministry of Transport & Communications (b)	S/	52,758	-
BBVA Banco Continental Trust (c)	S/	7,926	7,926
		<u>60,684</u>	<u>7,926</u>
Debt composition			
Principal		60,684	7,926
Interest		-	-
		<u>60,684</u>	<u>7,926</u>

(b) Installments for the mobile royalty for the 2021 period, matures in February 2022. See Note 11(e).

(c) Risk not transferred in the assignment of collection rights with the BBVA Banco Continental Trust. See Note 7(e).

18 FINANCIAL LEASES LIABILITIES

(a) The breakdown of the item is presented below:

	<u>As of March 31, 2021</u>		<u>As of December 31, 2020</u>	
	<u>Foreign currency US\$000</u>	<u>Equivalent in national currency S/000</u>	<u>Foreign Currency US\$000</u>	<u>Equivalent in national currency S/000</u>
Financial lease liability	75,907	285,259	77,267	280,016
Financial lease liability	-	856,616	-	846,668
Finance lease	-	-	18	65
		<u>1,141,875</u>		<u>1,126,749</u>
Less - Non-current portion		(786,953)		(790,481)
Current portion		<u>354,922</u>		<u>336,268</u>

(b) Future payments per the leases as of March 31, 2021 and December 31, 2020, are as follows:

	<u>As of March 31, 2021 S/000</u>	<u>As of December 31, 2019 S/000</u>
2021	295,768	336,268
2022	178,461	164,818
2023	156,715	145,147
2024	148,125	138,141
2025 onwards	362,806	342,375
	<u>1,141,875</u>	<u>1,126,749</u>

- (c) The current average annual rate of lease liabilities in soles as of March 31, 2021 is 3.69% and in dollars it is 2.22% (3.56% in soles and 3.39% in dollars as of December 31, 2020).
- (d) As of March 31, 2021 and December 31, 2020, it contains lease liabilities with Telxius Torres Perú S.A.C., a related company, for S/ 560,043,000 and S/ 568,184,000, respectively.

19 COMMERCIAL ACCOUNTS PAYABLE

- (a) The table below presents the breakdown of the item:

	As of March 31, 2021 S/000	As of December 31, 2020 S/000
National suppliers (c)	741,843	773,483
Accrual of obligations to be invoiced	595,983	593,172
Related, Note 23(d)	312,484	201,083
Foreign suppliers	91,758	135,901
Contractor security deposits	<u>2,503</u>	<u>2,441</u>
	<u>1,744,571</u>	<u>1,706,080</u>

- (b) Commercial accounts payable are denominated in soles, US dollars and euros, do not accrue interest, have current maturities, are normally paid in an average period of 60 days, and no guarantees have been granted.
- (c) Domestic suppliers, as of March 31, 2021 and December 31, 2020, respectively represent S/ 380,810,000 and S/ 414,223,000 in accounts payable that are under assignment of collection rights with Investment Funds, in which TFP S.A.C. (an affiliate of the Group) provides management services required for suppliers to access such transactions. The aforementioned collection rights transfer transactions have not involved a change in the commercial terms agreed with the suppliers and the Group. As such, their classification as commercial accounts payable is maintained.
- (d) The carrying amounts of the commercial accounts are considered equal to their fair values due to their short-term nature.

20 OTHER ACCOUNTS PAYABLE

(a) The breakdown of the item is presented below:

	As of March 31, 2021 S/000	As of December 31, 2020 S/000
Salaries and vacations (b)	208,744	303,528
Collection commissioned to third parties (c)	3,530	8,695
Taxes payable, Note 24(h)	49,291	28,392
Dividends and returns payable to shareholders	4,507	16,683
Guarantee deposits	11,293	11,258
Employee shares, Note 24(e)	1,419	15,801
Others	<u>19,092</u>	<u>18,820</u>
	297,876	403,177
Less - Non-current portion (b)	(50,295)	(135,412)
Current portion	<u>247,581</u>	<u>267,765</u>
Financial liabilities classified as other accounts payable	38,422	55,456
Non-financial liabilities classified as other accounts payable	<u>259,454</u>	<u>347,721</u>
	<u>297,876</u>	<u>403,177</u>

(b) In August 2020, the Management started a retirement program identifying positions that did not fit the business model. This meant the termination of 130 employees for the amount of S/ 36,623,000. Likewise, in December 2020 the Group identified approximately 25 additional positions which will be released during the second quarter of 2021. Severance costs are estimated to be S/ 19,334,000.

(c) As of March 31, 2021 corresponds to collections made by the Company on behalf of Inter-american Investment Corporation, on rights assigned by the Company, see Note 7(e).

21 OTHER PROVISIONS

(a) The breakdown of the item is presented below:

	As of March 31, 2021 S/000	As of December 31, 2020 S/000
Litigation and risks, (c) and Note 32(b)	591,589	591,430
Tower decommissioning, Note 2.20	47,393	45,980
Others (d)	<u>18,444</u>	<u>17,143</u>
	657,426	654,553
Less - Non-current portion	(259,790)	(259,231)
Current portion	<u>397,636</u>	<u>395,322</u>

(b) Item movement is detailed below:

	Litigation & risks S/000	Decommissioning S/000	Others S/000	Total S/000
Balances as of January 1, 2020	579,029	49,906	10,989	639,924
Additions. See Note 32(b)	63,041	5,715	17,081	85,837
Disposals	-	(9,641)	(10,927)	(20,568)
Payments	(50,640)	-	-	(50,640)
As of December 31, 2020	591,430	45,980	17,143	654,553
Additions. See Note 32(b)	10,518	1,413	1,301	13,232
Payments	(10,359)	-	-	(10,359)
As of March 31, 2021	591,589	47,393	18,444	657,426

(c) Includes, mainly, various provisions made by the Group in accordance with the practice described in note 2.20, based on best estimates of the disbursement that would be required to settle obligations on the date of the consolidated statement of financial position.

Management and its internal and external legal advisors consider that the provisions recorded are sufficient to cover the risks that affect the Group's business as at March 31, 2021 and December 31, 2020, as described in Note 32(b).

(d) As of March 31, 2021 and December 31, 2020, "Others" includes a provision for the strengthening of towers as a result of the 962 towers sold. See Note 30(d).

22 DEFERRED INCOME

(a) The breakdown of the item is presented below:

	As of March 31, 2021 S/000	As of December 31, 2020 S/000
Grants, (b) and Notes 2.22 and 8(d)	91,561	95,317
Intégrame	2,196	2,533
Others	14,306	12,786
	108,063	110,636
Less - Non-current portion	(77,520)	(81,359)
Current portion	30,543	29,277

(b) Deferred revenue from grants mainly includes:

- Lambayeque Project: corresponds to the contract signed on May 27, 2015, between the Group and the Peruvian State (represented by the Telecommunications Investment Fund - FITEL), for the non-reimbursable financing of the Project "Integral Broadband Connectivity for development social activity in the northern part of the country".

The balance for this project as of March 31, 2021 and December 31, 2020, amounted to approximately S/ 87,994,000 and S/ 91,320,000, respectively. The Lambayeque project includes the construction of a transportation network for US \$11,613,000. The investment term was extended until 2027.

- BAS Project: corresponds to the contract signed on February 27, 2009, between the Group and the Peruvian State (represented by FITEI), for the non-reimbursable financing of the Broadband Project for Isolated Locations (BAS). The balance for this project ended accruing in January 2020, and as at December 31, 2019 amounted to approximately S / 579,000.
- Selva (Jungle) Project: corresponds to the contract signed on February 18, 2011, between the Group and the Peruvian State (represented by FITEI), for the non-reimbursable financing of the Project "Integration of rural areas and places of preferential social interest to the network of the mobile service - Selva". The balance for this project amounts to approximately S/ 3,567,000 and S/ 3,997,000 as of March 31, 2021 and December 31, 2020, respectively.

The Group has the obligation to use such financing at its own risk for the design, acquisition of equipment, installation, commissioning, operation and maintenance of a system that will allow the provision of public telecommunications services in beneficiary localities, complying with the conditions foreseen in the technical specifications presented in the financing contract.

<u>Project</u>	<u>Lambayeque</u>	<u>BAS</u>	<u>Selva</u>
Investment term	14 months	19 months	12 months
Operations period	120 months	48 months	50 months
End of the contract	Continue with the obligations	stipulated in the respective concession contracts	
Amount	US\$47,626,000	US\$48,849,000	US\$14,718,000

For the three-month period ended March 31, 2021 and 2020, the Group accrued income of S/ 5,800,000 and S/ 6,415,000 respectively. These are presented in the heading "Other income and operating expenses" of the consolidated income statement. See Note 30(a).

23 TRANSACTIONS WITH RELATED ENTITIES

- (a) During the three-month periods ended March 31, 2021 and 2020, the most significant transactions carried out by the Group with related entities were the following:

	<u>As of March 31, 2021 S/000</u>	<u>As of March 31, 2020 S/000</u>
Revenues with related companies for:		
Rural traffic services		
- Internet para Todos S.A.C.	16,919	6,043
Land leases		
- Telxius Torres Peru S.A.C.	160	173
Other non-recurring income related to:		
Sale of towers		
- Telxius Torres Perú S.A.C.	-	4,790

	As of March 31, <u>2021</u> S/000	As of March 31, <u>2020</u> S/000
Expenses with related companies for:		
Rural traffic services		
- Internet para Todos S.A.C.	(24,765)	(22,162)
Trademark use fee. Note 28(a)		
- Telefónica, S.A. (b)	(27,796)	(33,013)
Internet and fiber optic linking services		
- Telxius Cable Perú S.A.C.	(20,239)	(24,318)
Systems Service		
- Telefónica Global Technology S.A.U.	(12,649)	(13,723)
Leasing of towers and sites		
- Telxius Torres Perú S.A.C.	(11,158)	(11,699)
Transfer of management capacity. Note 28(a)		
- Telefónica Latinoamérica Holding S.L. (c)	(111)	(2,127)
Transfer of management capacity. Note 28(a)		
- Telefónica Hispanoamérica S.A. (c)	(2,903)	-

- (b) The Group has a contract with Telefónica, S.A., whereby it pays a trademark fee equivalent to 1.6% of monthly income, excluding local operations with related companies, unless the previous year had a negative balance when deducting depreciation, amortization, and CAPEX for that year from the operating income.
- (c) As of March 31, 2021, the Group has management capacity transfer contracts with Telefónica Hispanoamérica S.A. As of December 31, 2020 it was with Telefónica Latinoamérica Holding S.L.

(d) As of March 31, 2021 and December 31, 2020, the Group maintains the following trade balances with related entities:

	<u>As of March 31, 2021</u>		<u>As of December 31, 2020</u>	
	<u>Accounts receivable</u> S/000	<u>Accounts payable</u> S/000	<u>Accounts receivable</u> S/000	<u>Accounts payable</u> S/000

- (e) On September 30, 2020, the Group granted a loan to Telfisa Global B.V. for US \$ 135,000,000 equivalent to S/ 485,325,000, which was collected upon maturity on December 29, 2020. Said loan accrued interest of S/ 682,000 at the annual fixed rate of 0.56%, and is reported in the heading "Financial income and expenses" of the consolidated income statement. See Note 31(a).

As of March 31, 2021 and December 31, 2020, the Group had an account payable to Telefónica S.A. for an amount of approximately S/8,625,000 and S/7,873,000, corresponding to the fair value of the share options granted by the Parent company in Spain to certain executives of the Company, who may exercise their rights within a maximum term of until 2021. See Note 2.25.

The Group obtained a payable loan from Telefónica Hispanoamérica, S.A. for US \$ 180,000,000, equivalent to S/ 647,820,000, which was paid upon maturity on December 30, 2020 and accrued an interest expense of S/ 10,015,000 at a fixed annual rate of 2.36%. This is reported in the item "Financial income and expenses" of the consolidated income statement. See Note 31(a).

- (f) Loans to personnel -

The Group grants loans to its employees and officers for terms of up to 24 months. The interest rates applied are generally below existing market interest rates. However, the other terms of the loans are substantially the same as those of the market. The balance of the loans to employees was approximately S/ 15,715,000 and S/ 16,620,000 as at March 31, 2021 and December 31, 2020, respectively. The loans are reported in the item "Other accounts receivable, net" of the consolidated statement of financial position. See Note 8(a).

- (g) Remuneration to the Board of Directors and members of the Key Management -

Remuneration received by directors and key management personnel amounted to approximately S/ 6,838,000 for the three-month period ended March 31, 2021 (approximately S/ 8,344,000 for the three-month period ended March 31, 2020), which include short-term benefits, compensation for time of service, and others.

- (h) As at March 31, 2021, the Group had current accounts in the Group's finance company, Telfisa Global, B.V., for an amount of US \$5,763,000 equivalent to S/ 21,634,000, which are presented under "Cash and cash equivalents." (As at December 31, 2020, the Company held current accounts in Telfisa Global, B.V., for an amount of US \$4,987,000, equivalent to S/ 18,043,000, respectively).

Terms and conditions of transactions with related parties -

Sales and purchases with related parties are made under market conditions equivalent to those applied to transactions between independent parties. As at March 31, 2021 and December 31, 2020, the Group had not recorded any estimate for doubtful accounts in relation to the balances owed by the related parties. This evaluation is performed annually by examining the commercial position of the related party and the market in which it operates.

In the opinion of Management, accounts receivable and payable classified as current as at March 31, 2021 and December 31, 2020, will be collected and paid in the short term.

24 TAX SITUATION

(a) Deferred taxes -

The movement of the item is as follows:

- (e) The Group is subject to the Peruvian tax regime. The income tax rate as of March 31, 2021 and December 31, 2020, is 29.50%, on taxable income, after deducting the employee profit sharing that is calculated at a rate of 10% on the taxable profit.

Legal entities not domiciled in Peru are subject to withholding of an additional tax on dividends received.

In accordance with Legislative Decree No. 1261, the withholding of an additional tax on dividends received as of 2017 is 5%, and whose distribution is made as of said date (until 2014, 4.1% and for the periods 2015 and 2016, 6.8%).

- (f) For purposes of the determination of income tax and general sales tax, the transfer prices of transactions with related entities and with companies resident in territories with low or no taxation must be supported by documentation and information on the valuation methods used and the criteria considered for their determination. Based on the analysis of the Group's operations, Management and its legal advisors believe that, as a consequence of the application of these standards, no material contingencies will arise for the Group as at December 31, 2020 and 2019.

As at March 31, 2021, the Group recorded a provision for income tax of S/ 463,2974,000 that, net of the payments of tax installments and the other provisions recorded, resulted in a balance of S/ 142,183,000 (S/ 102,339,000 from income tax payable. The foregoing's net effect of tax installment payments and other recorded provisions resulted in a positive balance of S/ 136,886,000 as at December 31, 2020). The balance is thus presented as an asset. Likewise, the Group generated a tax loss in 2018, amounting to S/ 188,263,000; for which deferred income tax of S/ 55,538,000 was recorded. The Group substantially compensated the 2018 tax loss through the generation of taxable income in 2019 by means of the management plans described in note 3.1(iii).

Additionally, the Group maintains provisions for uncertainties in the processing of income tax, as required by IFRIC 23 for S/ 1,755,905,000 in current Income Tax, and S/ 78,462,000 in current long-term Income Tax as of March 31, 2021. These numbers were reduced by S/ 477,577,000 as a result of the ruling of the Constitutional Court published February 22, 2021. The ruling relates to the amparo action requested by the Company on the calculation of default interest as the Tax Administration and the Tax Court exceeded the legal terms to issue their pronouncements. See Note 32(b) (S/ 2,217,840,000 current Income Tax, and S/ 78,380,000 in current long-term Income Tax as of 31 December, 2020).

- (g) The sworn declarations on the income tax and the general sales tax for the years 2016 to 2020 are pending inspection by the Tax Authority in Peru. During the 2017 and 2016 periods, the 2009 and 2010 tax periods for income tax were audited.

The tax authorities have the power to review and, if applicable, correct the taxes calculated by the Company and its Subsidiary. The sworn declarations of the income tax and of the general sales tax of the Group for the years 2016 to 2020 are subject to inspection by the Tax Administration.

The sworn declarations of the income tax and the general sales tax of its Subsidiaries are subject to verification by the Tax Administration.

These subsidiaries are:

Period

Servicios Globales de Telecomunicaciones S.A.C.	2017 to 2021
Telefónica Multimedia S.A.C.	2017 to January 2018 (*)
Star Global Com S.A.C.	2017 to January 2018 (*)

(*) Date on which these companies were absorbed by the Company.

Due to the possible interpretations that the tax authorities may hand down on the current legal norms and under the application of IFRIC 23, the Group has determined that no additional liabilities will result. Any eventual higher tax or additional payment that could result from the fiscal reviews will be applied to the results of the fiscal year in which it is determined. However, in the opinion of the Group's Management and its legal advisors, any possible additional tax settlement will not be significant for the consolidated financial statements as at March 31, 2021 and December 31, 2020.

- (h) As of March 31, 2021 and December 31, 2020, the item "Other accounts payable" includes other taxes for approximately S/ 49,291,000 and S/ 28,392,000 respectively.

In accordance with Supreme Decree No. 013-93-TCC, which approves the Single Ordered Text of the Telecommunications Law, and its Regulations, approved by Supreme Decree No. 020-2007-MTC, the Company and its Subsidiary, in their quality of telecommunications service concessionaires, must pay the following rights and fees:

<u>Item</u>	<u>Beneficiary</u>	<u>%</u>	<u>Calculation basis</u>
Special right for the National Telecommunications (PRONATEL)	MTC	1.0	Program Income invoiced and received for services carriers and finals telephony.
Contributions for supervision services	OSIPTEL	0.5	Revenue billed and received by different services of telecommunications.
Commercial exploitation rate of Service	MTC	0.5	Services subject to concession and/or authorization.

The amount recorded as an expense for these items amounts to approximately S / 23,999,000 and S/ 22,048,000 for the three-month periods ended March 31, 2021 and 2020, respectively, and are included in the item "General and administrative expenses" of the consolidated income statement. See Note 28(a).

Furthermore, the aforementioned instruments create an annual fee for the use of radioelectric spectrum.

- (i) Regulatory framework - Amendments to the Income Tax Law -

During 2018, Legislative Decrees 1422, 1423, 1424 and 1425 were issued, effective as of January 1, 2019, which include, among other modifications, the incorporation of concepts and/or definitions of "non-cooperating country or territory" and "preferential tax regime", "permanent establishment", "indirect disposal" of shares, as well as the following, which are most significant:

- *Transfer pricing:*

The scope of application of the Transfer Pricing regulations was extended to transactions carried out from, to or through non-cooperating countries or territories or subjects whose income or earnings receive preferential tax treatment.

- *Accrual:*

A legal definition of accrual was established for the recognition of income and expenses for Income Tax purposes, according to which third-category income is understood to be accrued when substantial events producing the income have occurred and the right to the same is not subject to a suspension.

- *Deductibility of financial expenses:*

New rules for the deductibility of interests were incorporated, and for the applicability of limits for loans granted by related parties, as well as to loans granted by parties not linked economically, indicating terms for debts constituted or renewed until September 13, 2018, from September 14, 2018 and as from January 1, 2019. For those constituted or renewed as at January 01, 2021, a new limit for the deduction of net interest (interest expense less taxable interest) that exceeds 30% of EBITDA (net income after compensating losses plus net interest, depreciation and amortization) from the previous year. The foregoing may be carried forward to the next immediate 4 years.

- *Derivative financial instruments:*

It was established that the Derivative Financial Instruments, considered as an exclusively underlying element, the exchange rate of a foreign currency, the profit and losses are imputed at the close of each taxable year even when the expiration date of the contract corresponds to a subsequent year.

- *General Anti-elusive Clause (Rule XVI):*

A special procedure has been established for the application of Rule XVI, according to which SUNAT may apply the provisions of the second to fifth paragraphs of Rule XVI within the framework of a final audit, provided that the favorable opinion is previously available from a Review Committee composed of three (3) SUNAT officials. Likewise, the Board's obligation to approve, ratify or modify the acts, situations and economic relations to be carried out (or already carried out) within the framework of a "fiscal planning" has been established.

Finally, a new assumption of joint and several liability is established for the legal representatives of the tax debtor when it is subject to the application of Standard XVI, provided that such representatives have collaborated with the design or approval or execution of acts or situations or economic relations foreseen in the mentioned norm.

Additionally, on August 2, 2018, Legislative Decree No. 1369 was issued, effective as of January 1, 2019, and which amended the Single Ordered Text of the Income Tax Law, approved by Supreme Decree No. 179- 2004-EF, regarding the following topics:

- *Transfer pricing:*

It states that the benefit test is applicable in determining the market value of the services to the taxpayer by its related parties.

- *Withholdings in operations with non-domiciled subjects:*

The obligation to pay the Tax Administration the amount equivalent to the withholding in the case of taxpayers who account royalties, remuneration for services, technical assistance, assignment in use or others of a similar nature as expenses or costs, in favor of non domiciled subjects.

- *Deduction of expenses for operations with non-domiciled subjects:*

It was established that royalties, remuneration for services, technical assistance, assignment in use or others of a similar nature in favor of non-domiciled beneficiaries, may be deducted as cost or expense in the taxable year to which they correspond when they have been paid or credited within the period established by the Regulation for the presentation of the affidavit corresponding to said fiscal year.

25 EQUITY

(a) Issued capital -

As at March 31, 2021 and December 31, 2020, the capital issued by Telefónica del Perú S.A.A. is represented by 3,344,363,158 common shares, fully subscribed and paid, at a nominal value of S/ 0.86 each.

The capital structure issued as at March 31, 2021 and December 31, 2020, is composed of the following share classes:

	As of March 31, 2021 %	As of December 31, 2020 %
Class B		
Telefónica Hispanoamérica, S.A.	98.939	98.939
Other minor shareholders	1,055	1,055
Class C	0.006	0.006
	<u>100.000</u>	<u>100.000</u>

The class "B" shares, choose as many directors as required to complete the number of members set by the General Shareholders' Meeting for each term, considering the director that, where appropriate, has the task of designating the shareholders for class "C".

Furthermore, class "C" shares, which correspond to Telefónica del Perú S.A.A. employees, elect one (1) director, provided that they have reached an equity ratio of not less than 3 percent of the subscribed capital. If they do not reach this percentage by the time of the election, one more director of class "B" will be elected, thus completing the required number of members of the Board.

(b) Issue premiums -

These correspond to the incorporation resulting from the merger by the absorption of Telefónica Móviles Perú Holding S.A.A. undertaken on December 31, 2008, as well as the higher value paid over the nominal value in the acquisition of the own shares.

(c) Other capital reserves -

This is composed of the legal reserve, as provided by the General Corporation Law, for which a minimum of 10 percent of the distributable annual post-tax profit is required to be transferred to a legal reserve until it is equal to 20 percent of the capital. The legal reserve can offset losses or it can be capitalized. In both cases there is an obligation to replenish it, whilst it also includes the prescribed dividends declared by the Company. It also includes freely available reserves.

The legal reserve as of March 31, 2021 and December 31, 2020, amounts to S/ 575,230,000.

d) Other equity reserves -

These correspond mainly to the net of the profits and losses due to changes in the estimated market value of the derivative financial instruments of cash flow hedges. The change in value is initially reflected in equity, and subsequently affects the profit and loss statement as per how it is influenced by the underlying hedge. During the three-month period ended March 31, 2021 and 2020, the unrealized (loss)/profit produced by the valuation of hedging derivatives amounts to S/ 1,394,000 and S/ 218,000, respectively. The net (loss) / profit of the tax effect amounts to S/ 983,000 (S/ 154,000 for the three-month period ended March 31, 2020). See Note 17.2(d).

26 FIXED BUSINESS INCOME

The table below presents the breakdown of the item:

	As of March 31, 2021	As of March 31, 2020
	<u>S/000</u>	<u>S/000</u>
Services	682,346	734,860
Data + IT	90,695	157,614
Wholesale	40,418	39,676
Equipment	17,447	21,051
Others	10,116	19,923
	<u>841,022</u>	<u>973,124</u>

27 MOBILE BUSINESS INCOME

The table below presents the breakdown of the item:

	As of March 31, 2021	As of March 31, 2020
	<u>S/000</u>	<u>S/000</u>
Postpaid	401,518	426,989
Terminals	220,594	199,396
Prepaid	143,598	134,353
Wholesale	36,111	32,697
Others	(2,773)	7,165
	<u>799,048</u>	<u>800,600</u>

28 GENERAL AND ADMINISTRATIVE EXPENSES

(a) The breakdown of the item is presented below:

	As of March 31, 2021 S/000	As of March 31, 2020 S/000
Services provided by third parties (c)	810,931	821,509
Taxes and royalties (b)	40,308	47,417
Provision for doubtful accounts and for impairment of inventories, Notes 7(d), 8(f) and 10(c), net of recoveries	82,217	156,173
Fee for brand use and transfer of management capacity. Note 23(a)	30,810	35,140
Miscellaneous management charges	6,745	5,750
	<u>971,011</u>	<u>1,065,989</u>

(b) The item "Taxes and royalties" corresponds mainly to payments to OSIPTEL and MTC. Note 24(h).

(c) Third party services include:

	As of March 31, 2021 S/000	As of March 31, 2020 S/000
Fees, commissions, and services	352,113	378,992
Television signals and circuits	152,413	151,545
Maintenance and repair	91,892	87,355
Interconnection and correspondent expenses	59,076	55,422
Capacity Services	42,349	38,045
Basic services	32,102	31,673
Advertising	22,671	16,341
Rentals	8,341	9,051
Transportation and storage	6,179	8,413
Value added services	5,392	5,672
Roaming expenses	3,984	
Others	34,419	33,820
	<u>810,931</u>	<u>821,509</u>

29 STAFF EXPENSES

(a) The breakdown of the item is presented below:

	As of March 31, 2021 S/000	As of March 31, 2020 S/000
Compensation	140,982	156,931
Restructuring expenses. Note 20(b)	538	1,061
Social security and welfare	15,184	16,688
Compensation for time of service	9,864	10,403
Employee profit sharing	(3,514)	5,042
Other personnel expenses	5,983	6,975
Payroll capitalization for plant construction	(14,002)	(13,750)
	<u>155,035</u>	<u>183,350</u>

(b) The Group has 4,122 employees as of March 31, 2021 (4,165 as of December 31, 2020).

30 OTHER OPERATING INCOME AND EXPENSES

(a) The breakdown of the item is presented below:

	As of March 31, 2021 S/000	As of March 31, 2020 S/000
Other operating income		
Gain on disposal of assets (c) and (e)	19,140	3,508
Government grants, notes 8 (d) and 22 (b)	5,800	6,415
Others	<u>2,319</u>	<u>6,305</u>
	<u>27,259</u>	<u>16,228</u>
Other operating expenses		
Other provisions (b)	(3,283)	(11,405)
Others	(2,079)	(2,151)
	<u>(5,362)</u>	<u>(13,556)</u>

(b) The other provisions correspond to those made by the Group in accordance with the practice described in Note 2.20, based on its best estimate of the disbursement that will be required to settle the obligations at the date of the consolidated statement of financial position.

(c) As of March 31, 2021 and 2020, asset sales occurred, thereby creating a net profit, the composition of which is detailed below:

	As of March 31, 2021 S/000	As of March 31, 2020 S/000
Net profit from disposal of assets (e)		
Income from sale of assets	56,455	11,754
Net cost of assets sold	(37,315)	(8,246)
	<u>19,140</u>	<u>3,508</u>

- (d) In 2020, a cost is recognized from the sale of towers in 2019, which amounted to S/ 767,000.
- (e) In January 2021, the sale of Telefónica Cloud Tech Peru S.A.C. (TCTP) was completed in Peru for S/ 41,941,000, which includes the assets related to this business line. The net profit from this operation was S/ 11,953,000.

31 INCOME AND FINANCIAL EXPENSES

(a) The breakdown of the item is presented below:

	As of March 31, 2021 S/000	As of March 31, 2020 S/000
Financial income		
Interest on accounts receivable	2,527	7,618
Interest on time deposits	56	2,429
Others	24	26
	<u>2,607</u>	<u>10,073</u>
Financial expenses		
Interest on bonds and commercial papers	(51,557)	(52,448)
Lease interest	(9,491)	(10,923)
Interest on other debts	-	(2,932)
Loss from financial instruments for interest rate coverage	(4,053)	(5,111)
Others	(9,804)	(14,675)
	<u>(74,905)</u>	<u>(86,089)</u>
Net exchange differences		
Net loss from net exchange differences	(21,602)	(27,059)
Net income from exchange differences related to derivative financial instruments	<u>31,102</u>	<u>23,090</u>
	<u>9,500</u>	<u>(3,969)</u>

32 COMMITMENTS AND CONTINGENCIES

(a) Commitments -

Surety letters

The Group maintains surety letters obtained for its normal commercial activity and guarantees for the different processes of awarding tenders in concessions and spectra with third parties. As of March 31, 2021, these surety letters amounted to approximately S/ 1,865,116,000 and US \$ 86,736,000 (S/ 1,866,211,000 and US \$ 90,558,000 as of December 31, 2020)

Commitments for operating leases - Group as lessee -

The Group, as a lessee, signed contracts with third parties. The contracts related mainly to leases of infrastructure, circuits and spaces. There are lease commitments, including for a duration of up to 10 years. See Notes 2.25, 15 and 18.

The future minimum payments, as per non-cancelable operating leases, as at March 31, 2021 and December 31, 2020, are as follows (these correspond to leases of less than one year and low-value amounts that are not recognized as part of the implementation of IFRS 16):

	As of March 31, 2021 S/000	As of December 31, 2020 S/000
Less than one year	7,261	9,336
Between one year and less than 3 years	-	-
	<u>7,261</u>	<u>9,336</u>

(b) Contingencies -

In the normal course of its operations, the Group has been subject to various tax, civil, labor, administrative, regulatory and customs claims, which are recorded and disclosed in accordance with International Financial Reporting Standards. See Note 2.20.

With regard to tax claims, the National Superintendency of Customs and Tax Administration (SUNAT), in the course of its audit activities for the years 1998 to 2010, has notified the Company of various resolutions concerning: (I) Income Tax, (II) General Sales Tax, and (III) Income Tax withholdings of non-residents.

In certain cases, the Company has decided to appeal particular decisions made by SUNAT and the Tax Court (TF). In other cases, the Company has proceeded to pay the amounts for those defined.

Insofar as:

i. Income tax:

(a) Fiscal year 1998 -

On July 21, 2011, the TC, by means of Resolution No.11450-5-2011, issued a pronouncement for the 1998 financial year.

SUNAT, for its part, in compliance with the aforementioned Resolution of the TC, dated October 3, 2011, notified the Company of Intendancy Resolution No. 0150150001023, which considered the amount of S/ 69,386,327 in favor of the Company.

Against this, the Company filed an appeal before the Tax Court because it did not agree with the balance in favor determined by SUNAT. The Tax Court hearing the aforementioned appeal and by means of Resolution No. 974-5-2012: (1) revoked the modification for S/ 252,989,493 for exchange differences, considering that this is an accounting result to which the principle of causality is not applicable; (2) ordered SUNAT, regarding the confirmed amounts, to evaluate the effect of the exchange profits in order to obtain a net result; (3) ordered SUNAT to carry out a new determination of the doubtful collection provision (DCP), insofar as there are cases that have not been validated by SUNAT but do correspond to valid collection procedures; and (4) it endorsed that "under the door" notifications can be considered as collection efforts.

As per the above-mentioned resolution, SUNAT, on June 20, 2012, notified the Company via Resolution No. 0150150001100. When said Resolution was not found to comply with the law, on July 11, 2012, the Company filed an appeal, which was resolved by Tax Court Resolution No. 18121-5-2012 (notified on November 2, 2012). The Tax Court ruled that SUNAT could not ignore the credit for donations in the determination of the Tax.

On November 5, 2012, the Company was notified with Intendancy Resolution No. 0150150001152 through which SUNAT, in compliance with the Tax Court Resolution mentioned in the previous paragraph, determined a balance for the 1998 fiscal year of S/ 137,706,421. As such, the administrative proceedings for this file was terminated.

Notwithstanding the foregoing, on October 10, 2011, the Company filed a contentious-administrative claim against Tax Court Resolution No. 11450-5-2011, by means of which it requests the partial nullity of said Resolution in those cases in which it confirms the modifications for: (i) DCP; and (ii) billing for leases (TPI). On March 22, 2013, the Company was notified with the first instance ruling that in part upheld the Company's claim based on the challenges to: (i) DCP and (ii) TPI, which was subsequently partially upheld in the Superior Chamber. Said judgment was declared null by the Supreme Court at the end of the DCP and ordered that the Superior Court issue a new sentence and definitively and favorably confirmed for the Company the TPI objection.

On July 31, 2019, the Company was notified with the new judgment of the Superior Court that declared the DCP's objection founded, only with respect to the telephone billing. Both parties filed a cassation appeal. The cassation appeals were originally declared to be admissible. The oral report was scheduled for December 1, 2020, however, the same day it was suspended and its rescheduling is pending.

During the course of the aforementioned judicial process, the Company obtained a partial precautionary measure regarding the challenge by the TPI. The Superior Court, through Resolution No. 16 of October 29, 2015, granted the extension of the precautionary measure regarding this challenge.

On March 29, 2021, the Surety Letter was renewed for the sum of S/ 359,065,459 corresponding to the 2021-2022 period.

In relation to the DCP, after the corresponding evaluation ratified by the external legal advisors, there are legal arguments to consider that it will be definitively resolved in terms favorable to the Company. Consequently, the contingency must be classified as remote.

On August 7, 2012, the Company was notified of a contentious administrative complaint filed by SUNAT requesting partial nullity of TF No. 11450-5-2011, as ruling in favor of the company, the Court permitted the revocation of deductions for the account for exceptional expenses. On April 24, 2019, the Supreme Court resolution was notified, which confirmed that the lawsuit had been upheld. As such, on November 11, 2019, Intendancy Resolution No. 0150160000145 communicated that SUNAT is rectifying the balance in favor of the 1998 Income Tax.

Furthermore, on May 14, 2013, the Company was notified with a contentious administrative claim filed by SUNAT requesting the partial nullity of RTF No. 974-5-2012, as ruling in favor of the Company, the Resolution permitted the revocation of compensation for the exchange difference of different accounts. The main argument is that the RTF has determined that all exchange differences are computed for the determination of net income, in contravention of Article 61 of the Income Tax Law that establishes that it will only be computed in the manner indicated above when dealing with taxable activities. The judgment of first instance declared the claim unfounded, which was confirmed favorably for the Company by the Superior Chamber. For this reason, SUNAT appealed against the judgment of the Superior Court. As such, on January 14, 2020, the decisions of the supreme members were notified. There was discord to the extent that three supreme members voted that the claim of SUNAT be declared unfounded; one declared the decision of the Superior Court null and void, and thus requiring a new ruling; and one member who upheld the claim from SUNAT. On

October 23, 2020, the hearing was held before the deciding member. On March 31, 2021, the deciding vote was notified, which adheres to the majority vote that declares SUNAT's cassation appeal as unfounded.

In view of this, we consider that the qualification of the contingency of this process is remote.

(b) Fiscal Year 1999 -

The TC, by means of TCR No. 16603-4-2010, notified on December 23, 2010, finalized the administrative procedure corresponding to the aforementioned fiscal year by declaring the nullity of all the proceedings by SUNAT in relation to the same, and furthermore, allowed the Company to invoke its statute of limitations. As such, on April 4, 2012, the Company requested the statute of limitations for the aforementioned fiscal year. SUNAT, by means of Resolution No. 011-020-0000323/SUNAT, notified on May 4, 2012, declared a statute of limitations for the fiscal year in question.

In the opinion of the Management, and its legal advisors, there are legal arguments to understand that statute of limitations for the aforementioned fiscal year impede SUNAT undertaking a new determination. As such, the balance determined by the Company in 1999 should be that which SUNAT assign to the year 2000 fiscal year.

(c) Fiscal years 2000 and 2001 -

The TC, by means of TCR No. 17044-8-2010, notified on December 29, 2010 (and later clarified by TCR No. 1853-8-2011, notified on February 11, 2011) finalized the administrative procedure corresponding to the aforementioned fiscal years.

As these resolutions were not in accordance with the law, the Company filed (on March 21, 2011) a contentious-administrative action against SUNAT and the Tax Court, requesting partial nullity of TCR No. 17044-8-2010, TCR No. 17133-8-2010, and TCR No. 01853-8-2011, insofar as the challenges to: (1) financial charges - FC, (2) DCP, (3) TPI, (4) disposal of assets by means of the transfer of equity to Telefónica Móviles S.A.C. -Reorganization-, and (5) the costs of fixed assets deducted off the books as an expense (overhead) made against the Company. In addition, the Company requested the partial nullity of TCR No. 17133-8-2010, insofar as the compensation of interests corresponding to the payments on account for the year 2000 fiscal year.

On March 20, 2013, the Company was notified of the judgment of the first instance that partially upheld the Company's claim regarding the modifications to: (i) TC; (ii) DCP; and (iii) TPI. In the same manner, the objections to (i) Reorganization and (ii) Overhead, were declared unfounded. Said resolution was partially confirmed by the Superior Chamber regarding the objections on deduction by TC and PCD, and partially confirmed the objection of TPI. Regarding the challenge referred to the DCP, the Superior Court validated the management only insofar as the telephone invoicing and ordered that all the invoices sent be reviewed again. Furthermore, it upheld the aspects that did not protect our challenges for the disposal of assets by transferring assets to Telefónica Móviles S.A.C. -Reorganization- and fixed asset costs deducted extra-contably as expenses - Overhead. Both parties involved in the process presented appeals, which were admitted and declared admissible.

Consequently, on July 11, 2019, the decisions of the supreme members were notified. In this regard, the objections of Overhead, Simple Reorganization, and Financial Charges were declared unfounded, and the objection of TPI was deemed founded, causing disagreement regarding the objection of the DCP. As such, after having made the two oral reports before the ruling members, and with a majority result, the Superior Court ruling was declared null and void, and a new ruling was issued regarding said challenge. On July 29, 2020, the judgment of the second instance was notified that declared the DCP's objection unfounded. On September 21, 2020, the file entered the Supreme Court, and is currently pending the qualification for the cassation appeal filed by the Company against the resolution of the Superior Court.

During the aforementioned proceedings, the Company obtained a partial precautionary measure pursuant to which the suspension of the effects of the disputed resolutions was ordered with respect to the following objections: (1) TC, (2) DCP and, (3) TPI.

On October 30, 2020, the Court renewed our Surety Letter for the amount of S/ 709,076,288 corresponding to the 2020-2021 period. This amount includes the interest update made by SUNAT. On April 13, 2021, we presented the Letter of Guarantee for the period 2021-2022.

Regarding the challenges to the TC, Simple Reorganization and Overhead, the Company has reassessed its contingencies, based on the ruling issued by the Supreme Court, so the qualification of the process has been adjusted to probable. Regarding the TPI challenge, the qualification of the challenge has been maintained kept as remote, to the extent that it was resolved in favorable terms for the Company. Regarding the DCP challenge, the qualification of the process remains reasonably remote.

Notwithstanding this, and as a consequence of the favorable result of the amparo referred to in subsection (d), the company has recalculated the interests related to this ruling proceeding to meet the probable provisions in March 2021. See note 24(f).

As per TCR No. 17044-8-2010 and TCR No. 1853-8-2011, SUNAT, dated October 4, 2011, communicated Resolution of Intendancy No. 0150150001030 according to which it determined an alleged tax debt amounting to S/ 2,379,451,375.

On October 24, 2011, the Company filed an appeal before Tax Court against the aforementioned Intendancy Resolution. SUNAT conditioned the admissibility of the same appeal on the previous payment by the Company for the amount of S/ 1,627,950,109. Subsequently, SUNAT, due to the precautionary measure obtained by the Company in the contentious administrative proceeding initiated against TCR No. 17044-8-2010, reduced the amount of the alleged debt to a total of S/ 619,814,185.

The Company, on November 30, 2011, filed a complaint before the Tax Court against the admissibility requirement that SUNAT had required to admit the appeal mentioned in the preceding paragraph. While the aforementioned appeal was pending, SUNAT notified the Company of a Coercive Execution Resolution amounting to S/ 134,353.008.

The Company (without prejudicing the payment of S/ 134,353,008 under protest) appealed to the Tax Court (in complaint) regarding the aforementioned Coercive Execution Resolution because it understood that the request made by SUNAT lacked legal basis. On January 27, 2012, the Complaint Appeal filed by the Company was resolved (in favor of the Company) with the Tax Court stating that there was no coercively enforceable debt.

On February 22, 2012, adjudicating the appeal filed against the Resolution of Intendancy No. 0150150001030, the Tax court communicated Resolution No. 01973-8-2012 by which it ordered SUNAT to issue a new Intendancy Resolution.

On April 1, 2013, the Company was notified with Intendancy Resolution No. 0150150001203 (replaced by a Resolution of the same number notified on April 3, 2013, which in turn was modified by Resolution of Intendancy No. 0150190000041 notified on April 4, 2013) by means of which SUNAT complies with the provisions of the Tax Court. Considering that the aforementioned Resolution does not comply with the provisions of the Tax Court, on April 19, 2013, the Company filed an appeal, which was adjudicated by means of TCR No. 13365-3-2013 and notified on September 23, 2013. In this adjudication, the Tax Court confirmed the declaration on the Intendancy issued. On October 7, 2013, the Company submitted a request for clarification, considering that it is not possible to determine the Income Tax for the year 2000; while Chamber 11 of the Tax Court still has a case determination pending related to payments on account of the year 2000.

On November 6, 2013, the Company was notified with Tax Court Resolution No. 15989-3-2013, which confirms that it is not possible to determine Income Tax for the year 2000 until the process related to the payments on account finalizes. On July 1, 2015, the Company was notified with Intendancy Resolution No. 0150150001364 according to which SUNAT complied with the provisions of the Tax Court. Demonstrating discord with that stated in the aforementioned resolution, on July 22, 2015, SUNAT filed an appeal, which was adjudicated by Resolution No. 1323-3-2017, which provides that, in order to effect the settlement of this fiscal year, such payment can proceed after resolving the case regarding payments on account and in the cases of the return of payments made by coercive collection.

Notwithstanding the aforementioned, it is important to specify that after the issuance of Intendancy Resolution No. 0150150001203, SUNAT communicated Coercive Execution Resolution No. 011-006-0044540, by means of which it demands the payment of S/ 150,842,142 related to the fine of the Income Tax for the year 2000. The Company (without prejudicing the payment of S/ 150,842,142 under protest) appealed to the Tax Court (in complaint) regarding the aforementioned Coercive Execution Resolution as the SUNAT request lacked legal basis.

On January 6, 2014, the Company was notified of Tax Court Resolution No. 18209-Q-2013, which upheld the submitted Complaint Appeal. On May 12, 2014, SUNAT filed a contentious administrative action against the aforementioned RTF, which was declared inadmissible, and subsequently upheld in the Superior Chamber. However, the Supreme Court declared the appeal filed by SUNAT founded, and consequently ordered the first instance judge to adjudicate on the claim again. As such, the court admitted the claim for processing. On December 14, 2020, the oral report was carried out in the first instance, and is currently pending an adjudication. From the analysis carried out, ratified by the legal opinion of the external consultants overseeing the case, we consider that the contingency rating of this case is remote.

On February 24, 2014, SUNAT communicated Coactive Resolution No. 0110070101757 by which the coercive collection procedure was revoked, although without ruling on the payment made by the Company. On April 23, 2014, two briefs were submitted to the coercive executor requesting the return of S/ 134,353,008 (paid in January 2012) and S/ 150,842,142 (paid in November and December 2013). On May 8, 2014, the coercive executor notified Coercive Resolutions No. 0110070109273 and No. 0110070109274 whereby the same forwarded the files to the Supervision Department of SUNAT in order to evaluate and adjudicate on the request made by the Company. On June 17, 2014, the Company submitted two Complaint Appeals before the Tax Court in order that the Court ordered the coercive executor to return the amounts paid. On July 3, 2014, the Tax Court communicated Tax Court Resolution No. 03249-Q-2014, in which it declared the complaints filed to be baseless, stating that according to the law, SUNAT, by means of Coercive Resolutions No. 0110070109273 and No. 0110070109274, had granted them the processing of reimbursement requests and had sent them to the competent area to issue the corresponding ruling.

On July 31, 2014, the Company was notified with Intendancy Resolutions No. 012-180-0007031, No. 012-180-0007032 and No. 012-180-0007038 (related to the request for the return of the S/ 134,353,008, paid in January 2012) and the Intendancy Resolution No. 012-180-007033 (linked to the request for refund of the S/ 150,842,142, paid in November and December 2013), by means of which SUNAT declared the Company's requests as inadmissible.

On August 27, 2014, the Company filed the corresponding claim appeals. On January 30, 2015, the Tax Administration adjudicated on the aforementioned appeals, stating that the reimbursement of the amounts requested is inadmissible. As we did not agree with the adjudication, on February 19, 2015, appeals were filed. On May 9 and June 25, 2019, we were notified of Tax Court Resolutions that provide for the revocation of the appealed intendancy resolutions (as indicated in the previous paragraph) and order SUNAT to validate, at the time of final settlement, if the return of the amounts paid is applicable.

As Tax Court Resolution No. 13365-3-2013 was not in accordance with the law, on November 19, 2013 the Company filed a contentious-administrative claim against SUNAT and the Tax Court,

requesting the partial nullity of Tax Court Resolution No. 13365-3-2013 to confirm the modifications for: (1) the balance in favor of previous fiscal years and, (2) the sale of the Nortel analog network. On March 23, 2015, a first instance judgment was issued that declared the claim unfounded. This ruling was confirmed by the Superior Chamber (3 votes against, and 1 in favor). On July 24, 2018, the case was heard in the Supreme Court, and is currently pending notification of the final decision.

Despite the result obtained in the first and second instance, as well as the result of the analysis carried out, ratified by the legal opinion of the external advisors overseeing the process, we consider that the contingency should be classified as reasonably remote.

(d) Amparo action derived from IR 2000-2001 -

On July 3, 2013, the Company filed a request for an Amparo action requesting, as a consequence of the violation of its constitutional rights, to: (i) have procedures without delay; (ii) proscription of the abuse of right; and (iii) non-confiscation of taxes, a finding of inapplicability to the specific case of Article 33 of the Tax Code, which regulates the arrears interest of unpaid taxes.

Indeed, SUNAT by Intendancy Resolution No. 0150190000041 decided to continue the collection of Determination Resolutions No. 0120030008377, 0120030008382, 0120030008383, 0120030008378, 0120030008388, 0120030008380, 0120030008385, 0120030008312, 0120030008386, 0120030008379, 0120030008387, 0120030008384 and 0120030008381, and Fine Resolutions No. 0120020008152, 0120020008160, 0120020008157, 0120020008161, 0120020008150, 0120020008154, 0120020008158, 0120020008162, 0120020008151, 0120020008155 and 0120020008159, for the sum of S/ 2,163,333,920 (updated as of April 1, 2013). This amount includes 73 percent interest and capitalized interest (under the application of Article 33 of the Tax Code) of which a percentage corresponds to interest accrued within the legal term and other interest accrued in the time lapse in excess of the adjudication's legal term. By means of the Amparo the Company is questioning the interest accrued during the time in which the Tax Court has exceeded the deadline for resolving the abovementioned IR appeal, which continues to increase.

On December 26, 2013, the Court declared the submissions baseless, so consequently both the Tax Court and SUNAT appealed the decision. On April 7, 2014, the claim was declared inadmissible because it considers that there is an equally satisfactory way to address the question, referring to the processes in which the Company questions the IR 2000-2001 challenges. On May 22, 2015, the Chamber declared the ruling null and ordered the Court to issue a new ruling on the submission of the failure to exhaust the administrative remedy. This was subsequently declared as unsubstantiated. On December 14, 2015, the court declared the claim inadmissible. Said judgment was revoked by the Superior Chamber who declared the exception founded and everything undertaken as null. In view of this, a constitutional complaint was filed on August 29, 2016. On January 23, 2017, the case was referred to the First Chamber of the Constitutional Court. On January 6, 2021, the hearing was held before the plenary session and on February 22, 2021, we were notified with the ruling of the Constitutional Court that upheld company's claim and, consequently, ordered SUNAT to recalculate the interests excluding the interest recorded outside the legal term. On March 31, 2021, the annulments presented by SUNAT and the TC against the ruling issued by the Constitutional Court were declared inadmissible. The judgment is now final with no other recourses available.

As the Tax Administration has exceeded the legal deadlines for resolving our reconsideration and appeal remedies, thereby producing an excessive amount of interest, the qualification of the contingency is reasonably remote.

(e) Payments on Account of 2000:

The Tax Court by means of Tax Court Resolution No. 17133-8-2010, notified on December 30, 2010 (and later clarified by Tax Court Resolution No. 16430-8-2011, notified on October 13, 2011) finalized the administrative procedure corresponding to Payments on account of the aforementioned fiscal year.

As per the aforementioned resolution, SUNAT, on November 17, 2011, communicated Intendancy Resolution No. 0150150001039 in which a presumed tax debt amounting to S/ 678,541,069 was quantified.

The Company, on November 28, 2011, filed an appeal before the TF against the aforementioned Intendancy Resolution. SUNAT however conditioned the admissibility of the aforementioned appeal to the prior payment (by the Company) of the amount of S/ 189,297,341.

The Company, on November 12, 2012, filed a complaint before the Tax Court against the admissibility requirement that SUNAT had required to admit the appeal mentioned in the preceding paragraph.

On June 15, 2012, the Tax Court communicated Resolution No. 06671-11-2012, expanded by Resolution No. 08037-11-2012, by means of which it adjudicated on the appeal filed by the Company, stating: (1) that it is appropriate that SUNAT re-settles the adjudications on the fines as long as they had not been revoked; (2) that SUNAT must make the determination of the debit balance in accordance with the powers and parameters established in the Tax Code, authorizing it, however, to modify the balance in favor as declared by the Company in 1999, ignoring the effects of the statutes of limitations.

On June 21, 2012, the Company requested a clarification of Resolution No. 06671-11-2012, which was resolved by the Tax Court by means of Resolution No. 10322-11-2012 which establishes: (1) that the Tax Court did not annul the fines imposed by SUNAT; and (2) that the Company is entitled to invoke the statute of limitations for the 1999 fiscal year in case SUNAT modifies the determination of the tax debt corresponding to that year.

On April 1, 2013, the Company received notice of Intendancy Resolution No. 0150150001202 by means of which SUNAT complied with the Tax Court provisions.

When considering that the aforementioned Adjudication does not comply with the provisions of the Tax Court, on April 19, 2013, the Company filed an appeal. On March 16, 2015, the Company was notified with Tax Court Resolution No. 02569-11-2015, by means of which it was adjudicated that SUNAT may modify the balance for the year 1999 despite being subject to the statute of limitations.

On June 26, 2015, the Company was notified with Intendancy Resolution No. 0150150001362, by means of which SUNAT complied with the Tax Court provisions.

Disagreeing with that stated in the aforementioned resolution, on July 20, 2015, an appeal was filed, which was adjudicated by means of Tax Court Resolution No. 3329-2-2017. This decision ordered the suspension of the administrative proceedings in response to the precautionary measure obtained, and to which we refer in the following paragraphs.

In view of the fact that Tax Court Resolution No. 02569-11-2015 was not in accordance with the law, on June 8, 2015, the Company filed a contentious-administrative action against SUNAT and the Tax Court, requesting the annulment of the aforementioned Tax Court Resolution with respect to the alleged compliance to the provisions of Tax Court Resolution No. 06671-11-2012 of May 3, 2012, regarding the income tax balance for 1999, which must be applied for payments on account of the income tax of year 2000. On October 20, 2015, the Court declared the claim unfounded.

On January 17, 2017, the judgment revoked the finding of first instance and declared it partially founded. On July 24, 2018, the hearing took place in the Supreme Court. Thus, on March 6, 2020, we were notified that the supreme members could not provide a decision that could be applied. Three members deemed the Company's claim was unfounded, one member voted for the nullity of the sentence issued by the Superior Court, and one member voted for the nullity of the first instance sentence. To date, the appointment of a deciding member and the corresponding oral report scheduling are still pending.

In addition, on July 16, 2015, the Company filed a precautionary measure, which was declared inadmissible by the first and second instances. As the judgment is favorable to the interests of the Company, on January 31, 2017, a new innovative precautionary measure was requested, which was granted temporarily suspending the effects of Tax Court Resolution No. 2569-11-2015. On March 09, 2021, the Surety Letter was renewed for the sum of S/ 41,545,928, corresponding to the 2021-2022 period.

In the opinion of Management and its legal advisors there are reasonable legal arguments that the contentious-administrative process could be adjudged in favor of the Company. As a result, any contingency should be classified as remote.

(f) Amparo action derived from the IR 2000-2001 Payments on Account.

On July 3, 2013, the Company filed a request for protection, by means of which the Company sought, as a consequence of the violation of its constitutional rights: (i) to undertake procedures without delay; (ii) the proscription of the abuse of right; and (iii) the non-confiscation of taxes, a finding of inapplicability to the specific case of Article 33 of the Tax Code, which regulates the arrears interest of unpaid taxes.

In effect, SUNAT, by means of Intendancy Resolution No. 015150001202, decided to continue with the collection of Resolutions of Determination No. 012-003-0006189, 012-003-0006190, 012-0030006191, 012-003-0006193, 012-003- 0006194, 012-003-0006195, 012-003-0006196, 012-003-0006197 and Fine Resolutions No. 012-002-0006014 and 012-002-0006022 for an amount of S/ 657,405,312 that includes 91 percent interest and capitalized interest (by virtue of the application of Article 33 of the Tax Code). This increase in debt is due to the undue delay in administrative procedures, as to date the Tax Court has not adjudicated on the appeals against the Determination and Penalty Resolutions mentioned above. The administration has exceeded the legal deadlines for resolving this controversy.

The non-exhaustion of the administrative proceeding was protected and thus the proceedings were concluded. Said decision was appealed by means of TDP, and on June 27, 2014, Resolution No. 13 was declared as null. Thus, the decision was revoked, and the exception of non-exhaustion of the administrative proceedings declared as having no basis. Therefore the proceedings were ordered to continue. On November 12, 2014, the judgment of first instance was issued and declared the claim partially founded. The claim was thus revoked by the Superior Chamber and who furthermore declared the Amparo Process inadmissible. An appeal for Constitutional Remedy was filed, and granted on November 9, 2015. On January 11, 2016, the file entered the Second Chamber of the Constitutional Court. On November 11, 2019, the full hearing was held, with the vote pending.

On February 19, 2015, we requested a precautionary measure ordering the suspension of the collection of late payment interest, recognized in the ruling of first instance. The same precautionary measure was rejected in the first and second instance, as it was considered that there is no danger in the delay. It should be noted that on October 15, 2018, the Constitutional Court declared the appeal filed by the Company against the second instance judgment as inadmissible.

As the Tax Administration has exceeded the legal deadlines for resolving our reconsideration and appeal remedies, thereby producing an excessive amount of interest, the qualification of the contingency is reasonably remote.

(g) Fiscal year 2002 -

The Tax Court, by means of Tax Court Resolution No. 04831-9-2012, notified on May 7, 2012, that it had finalized the administrative procedure corresponding to the aforementioned fiscal year.

By means of the aforementioned Resolution, the Tax Court: (1) revoked the modification related to the exchange difference considering that this is an accounting result to which the principle of

causality is not applied; (2) revoked the modification related to financial interests, and orders SUNAT to perform a new review of the documentation supporting the Cash Flow Statement, as well as third party reports submitted by the Company. In this regard, SUNAT, dated June 18, 2014, issued a request seeking information which the Company filed on September 17, 2014; (3) with respect to the DCP, confirmed a part of the modification, as it considers that the Company was obliged to present the information that supports the entire DCP even though SUNAT only required a sample; and (4) recognized as valid collection management only the termination notifications, ordering SUNAT to carry out a new review. It should be noted that, unlike what was resolved in the file for the years 2000 and 2001, the Tax Court does not recognize that the DCP that was modified in 2001; however, in 2002 it can be deducted for being greater than 12 months. Likewise, the Tax Court confirmed the modifications related to non-business TPI expenses, unsecured credit notes, among others. SUNAT must proceed with the issuance of the corresponding Intendancy Resolution.

Notwithstanding the foregoing, on August 3, 2012 the Company filed a contentious-administrative claim against Tax Court Resolution No. 04831-9-2012 insofar as it confirms the objections for: (1) DCP; (2) undocumented expenses - submarine cable; (3) expenses unrelated to the business - judicial deposits; (4) deductions requested by the Company, and (5) TPI. On July 7, 2015, the court declared the claim baseless, which was declared null by the Superior Chamber. On November 12, 2018, the ruling that the claim was justified on various grounds was communicated. On July 5, 2019, the Company was notified of the hearing verdict that upheld the judgment of first instance against the Company regarding the deductions from the TPI, Submarine Cable, and Deductions not accepted, and revoked the ruling declaring the deductions for the DCP (regarding telephone bills) and expenses outside the business to be baseless. Finally, it confirmed the ruling of first instance regarding the non-validation of the procedure for calculating the interest used by SUNAT between December 25, 2016 and March 15, 2017. On May 11, 2020, the appeals filed by the parties were declared admissible. Originally, the oral report was scheduled for December 1, 2020, however, the same day the oral report was suspended, and is pending rescheduling.

In the opinion of Management and its legal advisors, there are legal arguments that indicate that the contingency must be classified as reasonably remote insofar as the deductions for: (i) non-business expenses - judicial deposits, (ii) provision for doubtful collection and (iii) indoor public telephones is remote. Furthermore, we consider that the qualification of the contingency of the challenges referring to i) the requested deductions and ii) the expenses without supporting documentation (Pan American underwater cable), is possible.

II. General sales tax -

The Company has been notified by means of the Intendancy Resolutions issued by SUNAT regarding the General Sales Tax for the years 1998, 1999, 2000, and 2001. In response to the foregoing, the Company made the payment corresponding to the determination made by SUNAT, except for the case related to the General Sales Tax of 2001 (in which the Tax Court ruled in favor of the Company). Regarding the General Sales Tax for 2002, by means of Tax Court Resolution No. 04831-9-2012, the Tax Court confirmed the objections submitted for this matter.

From the analysis carried out, ratified by the legal opinion of the external consultants overseeing the case, we consider that the contingency rating of this case is probable.

III. Income Tax withholdings of non-residents -

SUNAT issued determinations and fines against the Company for withholding Income Tax, supposedly corresponding to revenues of non-resident companies operating a satellite. For the purposes of SUNAT, said income is revenue from Peruvian sources.

The Tax Court revoked the SUNAT resolutions that declared the claims presented by the Company as unfounded and, therefore, it has annulled the determination and fine resolutions for these matters. SUNAT challenged these decisions in the courts by means of five proceedings for the years 1999-2000 (merged into in a single process), 2001, 2002, 2003, and 2004. To date, the five proceedings have concluded unfavorably for the Company. In response to the fact that the rulings issued by the Supreme Court have violated constitutional rights, the Company initiated five Amparo processes to question said rulings.

Regarding fiscal year 2002, on October 6, 2020, the judgment of first instance declared the claim for protection filed by the Company unfounded, as it considered that constitutional rights have not been violated. On October 9, 2020, an appeal was filed, which was admitted on December 10, 2020.

It should be noted that we have a precautionary measure in place to suspend the effects of the judgment on the contentious-administrative process. On January 22, 2019, the appeal presented by SUNAT was granted. The precautionary measure is still to be submitted to the Superior Chamber. On September 25, 2020, the Surety Letter was presented for the amount of S/ 9,500,000 corresponding to the period 2020-2021, which is currently pending the renewal of the contra precautionary measure. However, erroneously, in January 2021, the court, contravening the express norm of the Constitutional Procedural Code, declared the extinction of the precautionary measure. We filed an appeal against the aforementioned resolution.

In the opinion of management and its legal advisors, we believe that the probability of success of the Amparo process is possible.

Insofar as the 2004 financial year, the Supreme Court has adhered to the same criteria for the 2002 financial year, and consequently qualified the provision of satellite capacity as a service provided in Peruvian territory, and therefore, it is on the onus of the provider to pay the tax and that Company withholds the same. On August 16, 2019, the compliance to the Tax Court Resolution was notified (as ordered by the Supreme Court).

Disputing the Tax Court compliance resolution, on November 14, 2019, the Company initiated a new administrative contentious process. The claim is based on the fact that the Tax Court failed to rule

on two arguments presented by the Company at the administrative headquarters and that these were not questioned by SUNAT when it adjudged on the controversy. On December 31, 2019, the Court admitted our claim and on April 22, 2020, the responses of SUNAT and the TC were notified, as well as the exception of failure to exhaust the administrative procedure filed by SUNAT. To date, the oral report scheduling is still pending.

In view of the fact that the supreme resolution contained vices that affect the constitutional rights of the Company, an Amparo process was initiated. On October 12, 2018, the claim was admitted for processing. On February 8, 2019 and February 14, 2019, the Tax Court and SUNAT respectively responded to the claim; these have been answered by the Company. On September 10, 2019, the oral report was heard in the first instance. The ruling is still pending.

On August 16, 2019, Tax Court Resolution No. 07066-2-2019 corresponding to IRND - 2004 was received. By means of this resolution, the Tax Court complies with the provisions of the judicial headquarters, by means of which fifteen (15) values between Determination Resolutions and Fine Resolutions are confirmed. Furthermore, the Tax Court revoked six (6) Fine Resolutions under the argument of reformatio in peius.

Subsequently, payment of the amount of S/ 24,864,916.00 was made. Additionally, on October 29, 2019, we filed an appeal against Intendancy Resolution No. 015060000143, notified on October 7, 2019, by means of which the provisions of the Tax Court are complied with.

Then, on April 7, 2021, we were notified with RTF No. 01975-2-2021 by means of which the Tax Court revokes the Intendancy Resolution that complied with the provisions of RTF No. 07066-2-2019

In the opinion of management and its legal advisors, we believe that the probability of success of both processes is possible.

On February 4, 2019, notification of the ruling was received, via which the cassation appeal filed by the tax administration was declared justified. On June 3, 2019, the Company received notification via a Tax Court Resolution (as ordered by the Supreme Court).

On July 9, 2019, the Company paid the amount of S/ 11,212,971, considering the default interest as of that date as a fine.

The Company initiated a new administrative contentious process against the Tax Court compliance resolution on June 24, 2019. The claim is based on the fact that the Tax Court failed to rule on the terms of the Supreme Court, and therefore failed to rule on two arguments put forward by the Company in the administrative headquarters, thereby contravening the right to due administrative procedure. On August 1, 2019, the claim was declared inadmissible, and the Company appealed the resolution on August 15, 2019. On October 16, 2019, the hearing of the case was carried out in the second instance and the inadmissibility of the claim was declared void. The claim was admitted for processing. Likewise, the Court declared the defense of res judicata formulated by SUNAT unfounded. A preliminary hearing in the first instance has been scheduled for November 11, 2021. It should be noted that, on June 26, 2019, we submitted a precautionary measure in the aforementioned process aimed at suspending the effects of the resolution of the administrative contentious process. On September 10, 2019, it was rejected because the claim was declared inadmissible.

In view of the fact that the supreme resolution contained vices that affect the constitutional rights of the Company, an amparo proceeding was initiated. Unlike the other two processes initiated by the Company in the periods 2002 and 2004, said proceeding incorporates and furthered the arguments on the application of Legislative Decree No. 1120 and Supreme Decree No. 22-2017-MTC. On May 29, 2019, the claim was admitted for processing. On August 19, 2020, the oral report was carried out. On November 9, 2020, we appealed the lower court ruling that declared our claim unfounded. On February 9, 2021, our appeal was granted, and is pending the scheduling of the oral report in

the second instance.

In the opinion of management and its legal advisors, we believe that the probability of success of both processes is possible.

In regards to the 1999-2000 financial period, on August 28, 2019, the Company was notified with the supreme resolution that ruled against the interests of the Company. On November 14, 2019, the Tax Court issued the Tax Court compliance resolution, pursuant to which on November 26 the Company paid the sum of S/ 187,614,698 corresponding to the 1999 financial year, while for the 2000 financial year, the sum of S/ 30,913,192 was paid.

On February 5, 2020, the Company judicially questioned the aforementioned TCR on compliance via a new administrative contentious process because the TCR is null for having violated due administrative procedure. On April 28, 2020, we were notified with the exception of res judicata filed by SUNAT and the response to the claim from SUNAT and the TC. The objection presented was declared inadmissible. The oral report in the first instance has been scheduled for November 9, 2021.

In parallel, as the supreme resolution ordering the issuance of the TCR on compliance contains flaws that affect the Company's constitutional rights, an amparo process has been initiated. On October 28, 2019, the application was admitted for processing, and is pending the scheduling of the oral report in the first instance.

In the opinion of management and its legal advisors, we believe that the probability of success of the amparo process is possible.

Regarding the 2001 financial year, on November 22, 2019, the resolution that declared the SUNAT claim as founded was communicated. On February 24, 2020, the Tax Court issued the compliance TCR, the same one that we questioned in court. On June 17, 2020, the contentious-administrative lawsuit filed against the compliance TCR was admitted for processing. On July 29, 2020, SUNAT's res judicata exception and the TC's reply were notified. On October 26, 2020, the Court declared the objection filed by SUNAT unfounded. The oral report in the first instance has been scheduled for October 25, 2021.

On March 6, 2020, the amount of S/ 12,982,365 was paid, considering the default interest as of that date.

In response to the fact that the supreme resolution contained vices that affect the constitutional rights of the Company, an amparo process was initiated. The same was admitted for processing on March 11, 2020. On October 9, 2020, SUNAT responded to the action, and the scheduling of the oral report is still pending.

In the opinion of management and its legal advisors, we believe that the probability of success of the amparo process is possible.

IV. General Sales Tax from 2003 to 2010 and Income Tax from 2003 to 2010 -

The Intendancy Resolutions ruling on the claims submitted for the years 2003 to 2010 by the Company were notified by SUNAT between 2008 and 2017. In disagreement with that adjudicated by SUNAT, appeals were filed that must be ruled on by the Tax Court. On January 9, 2018, the Tax Court adjudicated on the file relating to the General Sales Tax for 2005, ordering SUNAT to make a new settlement. The same occurred with the General Sales Tax for the 2004 financial year (the Court ruling was notified on November 14, 2018), so we are thus waiting for a new settlement.

Regarding Income Tax and General Sales Tax for the 2003 financial year, on January 25, 2019, Tax Court Resolution No. 10820-4-2018 was communicated, ordering SUNAT to carry out a new settlement after revoking the following challenges: i) excess depreciation for difference in computable cost, ii) amortization of training and maintenance, iii) expenses without reliable supporting documentation, iv) IR and IGV of unsecured credit notes, v) documents that do not support expenses, vi) DCP, vii) collection of interest and fines. Regarding the foregoing, on July 2, 2019, the contentious administrative claim submitted by the Company was admitted for processing. On August 19, 2019, the Court considered the claim filed by the Company and the Tax Court. The scheduling of the oral submission in the first instance is still pending.

In the opinion of Management and its legal advisors, we consider that the qualification of the contingency of this process is reasonably remote.

Furthermore, on April 14, 2019, we were notified of a contentious administrative claim filed by SUNAT against Tax Court Resolution No. 10820-4-2018, whereby the objections adjudicated in favor of the company at the administrative headquarters were challenged: i) expenses for compensation without supporting evidence, ii) DCP, iii) amortization of intangibles without supporting evidence, iv) modification of the coefficient. On November 12, 2019, the oral report was carried out in the first instance and on June 11, 2020, we were notified of the ruling that partially upheld the claim insofar as the reparations of compensation expenses without substantiation and amortization of intangibles. Furthermore, the ruling declared the claim to be unfounded in relation to the DCP objections and modification of the coefficient. On June 30, 2020, the appeals filed by the parties were admitted. On November 19, 2020, the hearing of the case in second instance was held. On December 31, 2020, the hearing judgment declared SUNAT's claim founded only insofar as the objection to compensation without reliable substantiation was notified, declaring the DCP (sampling) and amortization of intangibles unfounded and favorable for the Company. On January 18, 2021, we filed a cassation appeal against the unfavorable objection, the same one that entered the Supreme Court on January 26, 2021. The scheduling of the qualification hearing is still pending.

In the opinion of Management and its legal advisors, we consider that the qualification of the contingency of this process is reasonably remote.

TDP disputes the nullity of the Tax Court Resolution No. 1858-1-2019 by which the IR No. 0150140013079 is confirmed declaring the claim made against RD Nos. 012-003-0072541 to 012-003-0072552 and RM Nos. 012-002-0028443 to 012-002-0028454 unfounded. The foregoing were issued for the IGV from January to December 2010, and for the commission of the infraction typified by section 1 of art. 178 of the Tax Code. The nullity is based on the following arguments: i) violation of the principle of legality, ii) violation of the principle of non-retroactivity of the rules, iii) violation of the principle of legal certainty, iv) contravention of the provisions of article three of the Preliminary Title of the Tax Code and fifth article of the Preliminary Title of the Law of the General Administrative Procedure, v) violation of the principle of predictability and legitimate trust, vi) is inconsistent and contains a faulty motivation. On June 27, 2019, the claim was filed. The oral report is scheduled for April 21, 2021.

It should be noted that, on October 2, 2020, issued ruling No. 556/2020 of the Constitutional Court, and declared the claim of unconstitutionality of the First Transitory Complementary Provision of DL No. 1421 that modified the Tax Code as unfounded. The provision extended the scope of a rule that had come into force in 2012, regulating new statutes of limitations to collect the debt. In view of this, this criterion will be applied to the processes and procedures initiated by the taxpayers.

In the opinion of Management and its legal advisors, we consider that the qualification of the contingency of this process is reasonably remote.

Furthermore, the TDP disputes the nullity of the Tax Court Resolution No. 7453-4-2019, questioning the IGV of the year 2009, and challenging the following objections: (i) statute of limitations of the period of commencement of the faculty of collection, and (ii) excess of recreational expenses. On

January 16, 2020, the claim was filed, and the same was admitted on March 9, 2020. On May 23, we were notified with the response from SUNAT. The oral report is scheduled for June 10, 2021.

In the opinion of Management and its legal advisors, we consider that the qualification of the contingency of this process is reasonably remote.

It should be noted that we were notified with the Coercive Execution Resolution No. 011-006-0059149, by means of which we are requested to pay an amount of S/ 144,962, which was paid on November 6, 2019.

Finally, on December 27, 2019, we were notified with the Intendancy Resolution No. 0150150002269 by means of which SUNAT complies with the that indicated by the Tax Court. As we disagreed with that indicated by SUNAT, on January 20, 2020, we submitted the corresponding appeal.

Subsequently, on February 27, 2020, the file entered the Tax Court, assigned to Chamber 4. Furthermore, the oral report occurred on March 13, 2020.

On September 7, 2020, we were notified with the TCR No. 04088-4-2020, which confirms Intendancy Resolution No. 0150150002269.

Furthermore, on August 6, 2020, we were notified with Determination Resolutions and Fine Resolution for the months of March, July, August, September, November, and December. It should be noted that the values for said periods were declared null by TCR No. 07453-4-2019.

In view of this, on September 3, 2020, we filed a claim against the values mentioned in the preceding paragraph, regarding the objection to the tax credit for imports from tax havens.

Then, on November 17, 2020, we were notified with Intendancy Resolution No. 0150150002575 by means of which the provisions of the TCR No. 04088-4-2020 are complied with.

In view of this, on December 4, 2020, we made the payment of the amount of S/ 1,932,798 corresponding to the Determination Resolutions and Fine Resolutions for the periods of the months of March, July to September, November, and December.

As a result of the audits of the years 2000 to 2009 on Móviles, this has been notified by SUNAT with various resolutions for alleged omissions regarding income tax, income tax withholdings of non-residents, withholding of income tax from fifth category, and general sales tax, in the latter case, up to 2012.

In some cases, Móviles has filed claim appeals for failing to deliver the corresponding resolutions in accordance with the legal regulations in force in Peru and, in others, it has proceeded to pay the assessments received.

With regard to:

a) Tax on Revenue for the fiscal year 2000 -

On March 30, 2007, SUNAT issued an Intendancy Resolution adjudicating on the claim presented by Móviles for the Income Tax for the year 2000. As we disagreed with the decision, an appeal was submitted before the Tax Court.

The Tax Court notified Móviles on February 7, 2013, via Tax Court Resolution No. 20274-9-2012, that the appeal file related to the Income Tax for the year 2000 had been adjudicated. This Tax Court Resolution confirmed the following modifications: (i) Financial charges; (ii) Provisions for doubtful collection; (iii) Overhead; (iv) Expenses re-invoiced by TDP; (v) Cellular Sales Commission; and, (vi) Voluntary Retirement Program. In addition, the Tax Court declared the nullity of the modifications related to: (i) Interconnection expenses; (ii) Management fee; and, (iii) Doubtful collection provision

for the months of February to June, August and October to December, and also revoked the modifications related to depreciation not accepted for fixed assets transferred in the equity block, and loss due to exchange differences. On July 13, 2020, the Tax Court notified us of the TCR 2275-5-2020 by means of which it declares null the objection made by the Tax Administration regarding the Nortel Analogue Network. Despite this declaration of nullity, on August 3, 2020, SUNAT notified us of the Intendancy Resolution without complying with that ordered by the Tax Court. Therefore, on August 24, 2020 an appeal was filed, which is pending in the Tax Court.

Notwithstanding the foregoing, on May 6, 2013, a claim was filed against the aforementioned resolution. On February 17, 2015, the claim was declared unfounded, which was confirmed by the Superior Chamber. On July 4, 2019, the supreme court ruling was notified by means of which the ruling of the second instance was declared null and void regarding the challenges denominated Nortel Analog Network, Simple Reorganization and DCP. Consequently, the Superior Chamber is required to issue the ruling again. Regarding the challenges denominated Financial Charges and Overhead, the Supreme Court has adjudicated in favor of SUNAT. On September 30, 2019, the new hearing proceedings judgment was issued and declared that the objections to unaccepted depreciations and DCP are unfounded, and that the challenge for the withdrawal of majority shareholder assets (Red Nortel) is inadmissible. Against that resolution, on October 21, 2019, a cassation appeal was filed. The same entered the Supreme Court on December 6, 2019 and was declared admissible. Originally, the oral report was scheduled for December 4, 2020; however, the same day the oral report was suspended, and is pending rescheduling.

As the financial charges and Overhead objections were ruled on unfavorably for the Company, the contingency was changed to probable. However, regarding the objections to Red Nortel, Depreciations not accepted, and DCP, these have been declared null and void. As such, according to the analysis carried out and per the evaluation of the external advisers, the contingency is remote.

b) Income Tax and General Sales Tax for 2001 tax year -

On October 22, 2007, SUNAT issued the Intendancy Resolution adjudicating the claim submitted by Móviles for the Income Tax and General Sales Tax for the 2001 fiscal year. As we disagreed with the decision, an appeal was submitted before the Tax Court.

The Tax Court notified Moviles on January 20, 2017, with Tax Court Resolution No. 11549-2-2016, by means of which the appeal file was adjudicated. This Tax Court Resolution confirmed the challenged modifications, with the exception of (i) Management fee; and, (ii) amortization of intangibles, which were set aside. Likewise, the Tax Court Resolution ordered a new review of a part of the doubtful collection provision, and of the loss due to the exchange difference, pending a new pronouncement by SUNAT. On August 18, 2020, we were notified of the Intendancy Resolution that complies with that ordered by the Tax Court. As we are not satisfied with that is stated in said resolution, on September 8, 2020 we filed an appeal, which is pending in the Tax Court.

On April 19, 2017, the Company filed a contentious administrative claim against the aforementioned resolution. On May 7, 2019, we were notified with the judgment of first instance that declared that the claim filed by the Company was unfounded in all aspects. On October 14, 2019, the Chamber declared the resolution of first instance void. As such, it is still pending that the Court re-issues a ruling. On November 20, 2020, the oral report was held in the first instance. It is currently pending a ruling.

In the opinion of the Management, and its legal advisors, there are legal arguments that demonstrate that the contingency should be modified to probable, to the extent of the adjudication by the Supreme Court in the contentious administrative proceedings of the 2000-2001 fiscal year of TDP and the 2000 fiscal year of MT regarding the challenges to Overhead and Carveout.

On the other hand, SUNAT has also questioned the Tax Court Resolution in court. On May 3, the ruling that declared the claim founded and was declared null by the Superior Chamber on December 7, 2018. On April 9, 2019, the ruling of first instance was communicated, stating that the Tax Court

Resolution was partially justified and partially invalid. The Tax Court was thus ordered to issue a new resolution, confirming Intendancy Resolution No. 0150140006682 insofar as to the objections to various expenses transferred by its related party for those that do not prove causality (a deduction referring to the payments undertaken) and for third-party taxes assumed by the taxpayer. On January 24, 2020, the discord hearing was held, to the extent that two superior judges voted for the ruling to be upheld, and one voting that the ruling be revoked. On March 3, 2020, the second instance judgment was notified, which declared SUNAT's claim founded in all its aspects. On May 19, 2020, we filed a cassation appeal against said judgment. On September 8, 2020, the file entered the Supreme Court, and the scheduling of the admissibility qualification hearing is pending.

In the opinion of Management and its legal advisors, there are legal arguments to consider that indicate the contingency should be classified as reasonably remote.

c) Income Tax and General Sales Tax for 2002 tax year -

On October 23, 2008, SUNAT issued a Intendancy Resolution adjudicating the claim presented by Móviles for the Income Tax and General Sales Tax for the 2002 fiscal year. As we disagreed with the decision, an appeal was submitted before the Tax Court.

The Tax Court notified Moviles on September 15, 2017, with Tax Court Resolution No. 12003-8-2016, by means of which the appeal file was determined. This Tax Court resolution mainly raised the following objections: (i) management fee; and, (ii) amortization of intangibles; likewise, it declared the nullity of a part of the modification for the DCP and ordered a new review of the modification related to the financial interest (carveout).

On December 15, 2017, the Company filed a contentious administrative claim for the confirmed challenges. On October 24, 2019, the Oral submission was carried out in the first instance. The judgment is still pending.

In the opinion of management and its legal advisors, the qualification of this process must be classified as reasonably remote.

Subsequently, on December 2, 2020, we were notified with the Intendancy Resolution No. 0150150002588, through which the Tax Administration, in alleged compliance with Tax Court Resolution No. 12003-8-2016, has re-settled the Income Tax, payments on account from January to December 2002; the General Sales Tax for the periods of February, May, September to December 2002, as well as fine resolutions.

However, since we do not agree with that indicated by SUNAT, we presented the corresponding appeal, the same one that is still pending attention from the Tax Court.

Furthermore, we have initiated an amparo action by means of which we seek to stop computing the interest that exceeds the legal deadlines that the administration has to determine the objections and fines of the 2002 fiscal year income tax. On January 20, 2020, we were notified with the judgment of first instance that declared the claim filed by the Company partially founded, stating that there is a violation of the reasonable period. The same judgment has been the subject of clarification at the request of SUNAT. On December 29, 2020, the appeals filed by the parties were admitted.

Since the Tax Administration has exceeded the legal deadlines for resolving our reconsideration and appeal remedies, thereby generating an excessive amount of interest, the likelihood of success of this process is probable, and consequently, the qualification of the contingency is remote.

On January 30, 2018, the Company was notified of a contentious administrative claim filed by SUNAT regarding the objections overruled by the Tax Court. On September 3, 2020, the new first instance judgment was notified, once again declaring SUNAT's claim founded in all its aspects. On January 11, 2021, the oral report was held in the second instance. On January 31, 2021, the 7th

Contentious Chamber issued the judgment of second instance, in which it declared the nullity of the judgment of first instance that decided to declare the SUNAT claim founded in all its aspects. The oral report is scheduled for July 8, 2021.

In the opinion of Management and its legal advisors, there are legal arguments to consider that indicate the contingency should be classified as reasonably remote.

On October 24, 2018, SUNAT challenged Tax Court Resolution No. 05108-1-2018 by means of which the request for a refund filed by TDP was declared inadmissible. The aforementioned claim was admitted on October 31, 2018. On December 24, 2019, we were notified with the first instance judgment that declared SUNAT's complaint as founded. On August 24, 2020, the second instance judgment declared SUNAT's claim inadmissible, revoking that decided in the first instance. On September 18, 2020, the file entered the Supreme Court. The scheduling of the admissibility qualification hearing is still pending.

From the analysis carried out, ratified by the legal opinion of the external consultants overseeing the case, we consider that the contingency rating of this case is reasonably remote.

d) Income Tax and General Sales Tax for 2004 tax year

On August 29, 2009, SUNAT issued an Intendancy Resolution ruling on the claim submitted by Móviles for the Income Tax and General Sales Tax for the 2004 fiscal year. As we disagreed with the decision, an appeal was submitted before the Tax Court.

The Tax Court notified Moviles on January 29, 2018, with Tax Court Resolution No. 10997-1-2017, stating that the appeal file had been ruled on. The aforementioned ruling invalidated the objection to the provision of doubtful collection by the party that was not subject to SUNAT's review; revoked the objection to debt interest with Telefónica del Perú in order to undertake a new review of the evidence; revoked the objection to the amortization of intangibles; and indicated that SUNAT would recognize the deductions requested, if applicable and confirmed the other aspects. We are currently awaiting the Intendancy Resolution that complies with that indicated by the Tax Court.

Regarding the objections that were sustained by the Tax Court: i) DCP, ii) expenses recorded for contracts for the granting of line-of-credit account 671110, iii) depreciation of asset cost, and iv) modification of the coefficient of payments on account. On April 27, 2018, Tax Court Resolution No. 10997-1-2017 was challenged in court. On March 11, 2019, the ruling of first instance was deemed invalid regarding the claim on the objections to the DCP; the expenses registered for the granting of a line-of-credit contract, Account 671110; depreciation of the cost of assets and calculation of late interest between December 25, 2006 and March 15, 2007; and inadmissible regarding the objection to the coefficient of payments on account. Additionally, the questioning of the capitalization of interest for the period between December 25, 2006 and March 15, 2007 was declared invalid.

On April 6, 2021, we were notified with the Intendancy Resolution No. 0150150002743 through which compliance with the TCR No. 10997-1-2017 is assumed.

On August 27, 2019, the hearing decision upheld the claim for the objection to the DCP only insofar as the telephone billing. As such, on September 17 and 18, 2019, the parties filed cassation appeals, which were submitted to the Supreme Court on September 23, 2019. Both submissions were declared admissible. Originally, the background hearing was scheduled for March 18, 2021; However, it was suspended and its reprogramming is still pending.

From the analysis carried out, ratified by the legal opinion of the external consultants overseeing the case, we consider that the contingency rating of this case is reasonably remote.

Furthermore, on February 14, 2020, we were notified with Tax Court Resolution No. 10982-9-2019, by means of which it was ruled that the objection to financial expenses by contract of granting a line of credit be maintained, while the objection to financial expenses by mutual agreement must be ruled upon by virtue of that indicated in Tax Court Resolution No. 10997-1-2017, as cited above.

Consequently, on February 27, 2020, we were notified with Coercive Execution Resolution No. 01100-0059983, in which we are requested to pay the amount of S/ 3,052,111. The amount was paid on March 04, 2020.

Subsequently, on October 1, 2020, we were notified with Intendancy Resolution No. 0150140015607 by means of which the Tax Administration, in alleged compliance with Tax Court Resolution No. 10982-9-2019, has DISMISSED the appeal filed by MÓVILES against Fine Resolution No. 012-002-0015547, issued for the alleged offense typified in number 1 of article 178 of the Tax Code regarding the General Sales Tax for the June period 2004.

As we did not agree with the aforementioned, on October 21, 2020 we filed the corresponding appeal. The very same is pending attention in the Tax Court.

On March 12, 2020, we were notified with a new claim from SUNAT which focusses on the partial nullity of the Tax Court Resolution indicated in the previous paragraph insofar that said Resolution ordered to the revocation of IR No. 0150140009010 in relation to the objection to the tax credit for "Financial expenses by mutual contract" (Carveout) in the Determination Resolutions and related Fine Resolutions. The TC and the Company responded to SUNAT's claim and we filed an exception for failure to exhaust administrative proceedings. The oral report in the first instance is scheduled for August 17, 2021.

On April 23, 2018, SUNAT made a legal challenge to Tax Court Resolution No. 10997-1-2017, questioning the following modifications: i) DCP (as they were not sampled), ii) Expenses recorded by mutual account contract 671110 - TDP debt interest (S/ 717,765) (interest on debt transferred by TDP using the Carveout method), and iii) Modification of the coefficient of payments on account of Income Tax for January and February 2004. On March 8, 2019, notification was made of the ruling of first instance that deemed the claim filed by SUNAT as invalid in all aspects. On July 27, 2019, the hearing judgment upheld the SUNAT claim in terms of the objection to the Carveout, and overruled the objections to the DCP and coefficient modification. Consequently, we filed an appeal against the unfavorable objection on August 5, 2019. On September 3, 2020, the hearing of the case was held in the Supreme Court. Notification of the supreme resolution is still pending.

From the analysis carried out, ratified by the legal opinion of the external consultants overseeing the case, we consider that the contingency rating of this case is reasonably remote.

Furthermore, we have initiated an amparo action by means of which we seek to stop computing the interest that exceeds the legal deadlines that the administration has to determine the objections and fines of the Income Tax of the 2004 fiscal year. By means of Resolution No. 01 of June 13, 2018, the claim was admitted for processing. On January 10, 2020, we were notified with the judgment of first instance that declared the claim filed by the Company partially founded, stating that there is a violation of the reasonable period. On January 15, 2020, we filed an appeal against said judgment. The very same was admitted on October 1, 2020. The oral report in second instance has been scheduled for April 8, 2021.

The Tax Administration has exceeded the legal deadlines for ruling on our reconsideration and appeal remedies, thereby generating an excessive amount of interest. Therefore, the likelihood of success of this process is probable and, consequently, the qualification of the contingency is reasonably remote.

e) General Sales Tax from 2003 to 2010 and Income Tax from 2003 to 2010 tax periods -

As a result of the audits of the tax years 2000 to 2009 on Móviles, this has been notified by SUNAT with various resolutions for alleged omissions regarding income tax, income tax withholdings of non-residents, withholding of income tax from fifth category and general sales tax, in the latter case, up to 2007.

In some cases, Moviles has filed claim appeals for failing to deliver the corresponding resolutions in accordance with the legal regulations in force in Peru and, in others, it has proceeded to pay the assessments received.

TM challenges Tax Court Resolution No. 5018-1-2019 through which the IR of 2003 is discussed, challenging the following objections: (i) objection to account 634003 "Maintenance and repair of equipment and cabins", (ii) objection to account 635001 "Office real estate rental", (iii) objection to depreciation and / or amortization of assets, (iv) Dismissal of questioning of the carry-over loss, (v) Dismissal of recognition of payments made against IRs on IGV February and March 2003, (vi) Improper calculation of default interest, (vii) Objections to expense accounts 621002 and (viii) Inapplicability of interest for justified delay. The claim was filed on October 30, 2019 and admitted on November 11, 2019. The oral report was scheduled for February 15, 2021. However, the oral report was not carried out and its rescheduling was ordered.

TM challenges Tax Court Resolution No 7639-9-2010 through which the IGV of the year 2010 is questioned regarding the following challenges: (i) Prescription regarding the commencement period for the power of collection of RD No. 012-003-0076597 to 012-003-0076608, and RM No. 012-002-0029133, (ii) Excess recreational expenses that are not deductible according to Income Tax rules. On December 23, 2019, a lawsuit was filed, which was admitted on May 7, 2020. On June 19, 2020, we appeared before the TC process, and SUNAT presented its response. The issuance of the judgment of first instance is still pending.

From the analysis carried out, ratified by the legal opinion of the external consultants overseeing the case, we consider that the contingency rating of this case is remote.

Furthermore, on January 10, 2010, we were notified of a SUNAT claim questioning the objections to: (i) Management fee, (ii) Expenses for management services and business management advice, (iii) Intangibles deducted and not paid for the 2003 period, (iv) DCP, (v) Financial expenses recorded in accounts 637110 and 671110; (vi) Loss of exchange difference from forward contract and mutual contract, (vi) Recovery of DCP, (vii) Modification of the coefficient applicable to payments on account, (ix) Objection to the tax credit for management expenses and business management advice, (x) Objection to the tax credit for reimbursement of interest expenses, ruled on by the Tax Court in Tax Court Resolution No. 6575-10-2019. On January 24, 2020, we submitted our response to the claim. To date, the oral report has been rescheduled in the first instance for August 25, 2021.

From the analysis carried out, ratified by the legal opinion of the external consultants overseeing the case, we consider that the contingency rating of this case is remote.

Additionally, TM disputes the invalidity of Tax Court Resolution No. 6575-10-2019 by means of which the RI and IGV 2003 are discussed in terms of the following objections: (i) Depreciation of the cost of assets and assets without documentary support, (ii) DCP, (iii) Loss of exchange difference, (iv) Fines related to these objections, and (v) Default interest.

Subsequently, on March 2, 2021, we were notified with Intendancy Resolution No. 0150150002700 by means of which the Tax Administration is supposedly in compliance with the Resolution of the Tax Court.

However, as we do not agree with the provisions of SUNAT, on March 23, 2021 we presented an appeal, which is pending its due attention.

On February 7, 2020, the claim was filed, and which was admitted on February 13, 2020. On June 17, 2020, the Court considered the claim by SUNAT and the TC to be have been answered. The oral report in the first instance has been set for June 10, 2021.

For the financial year 2009, on February 27, 2020, we were notified with Tax Court Resolution No. 12147-4-2019. On this occasion, the Tax Court decided to raise the following objections: (i) Expenses accrued in the year invoiced and/or received extemporaneously, (ii) Roaming services

substantiated by payment vouchers received extemporaneously, and (iii) Deduction not accepted for untimely operations. accrued in accordance with IAS, while maintaining the following objections: (i) Unsubstantiated credit notes linked to El Pacífico Peruano - Suiza Cia - others, (ii) ITF expenses that do not comply with the principle of causality, and, also, (iii) Incidence of challenges made in TM SAC due to depreciation of fixed assets. Against the aforementioned resolution, on May 27, 2020, we filed a contentious administrative claim, which was admitted for processing. To date, the exception of lack of exhaustion of the administrative remedies presented by SUNAT is pending resolution, and the oral report in the first instance was scheduled for September 9, 2021.

From the analysis carried out, ratified by the legal opinion of the external consultants overseeing the case, we consider that the contingency rating of this case is remote.

Additionally, regarding fiscal year 2004, Telefónica Móviles disputes the partial nullity of TCR No. 10982-9-2019 to the extent that it decided to revoke IR No. 0150140009010 in relation to the following: (i) Inadmissibility of appeals reconsideration No. 012-003-0019178 and 012-003-0019180; (ii) Tax credit linked to the Expenses Recorded by the Granting Agreement of the credit line (S/ 51,072); and (iii) Default interest. On May 24, 2020, we filed a contentious administrative claim, which was admitted for processing. The oral report in the first instance has been set for August 26, 2021.

From the analysis carried out, ratified by the legal opinion of the external consultants overseeing the case, we consider that the contingency rating of this case is remote.

Likewise, we were notified with TCR No. 02663-1-2020 that declares the appeal unfounded insofar as the prescription request, and, furthermore confirms the Intendancy Resolution in terms of the challenge to the tax credit for excess recreational expenses. From the analysis carried out, ratified by the legal opinion of the external consultants overseeing the case, we consider that the contingency rating of this case is remote.

Finally, for the 2005 fiscal year, we were notified with TCR No. 01849-1-2020 that resolves to: (i) maintain the objection and confirm the appeal regarding the unaccepted depreciation expenses related to the cost of works in progress and other assets fixed assets transferred by TDP, (ii) declare the nullity of the value and that appealed only insofar as the objection that was not constituent to the sample, (iii) nullify the value insofar as the interconnection expenses stemming from calls with prepaid cards 147, and (iv) revoke that appealed insofar as payments on account. As such, on October 16, 2020, we filed a contentious administrative claim, which is pending to be admitted for processing.

From the analysis carried out, ratified by the legal opinion of the external consultants overseeing the case, we consider that the contingency rating of this case is remote.

Moreover, in relation to fiscal year 2009, on October 23, 2020, we filed a contentious administrative claim against TCR No. 2663-1-2020, which unfavorably ruled against the Company in terms of the following objections: (i) prescription; (ii) excess recreational expenses that are not deductible according to Income Tax regulations; (iii) pro rata tax credit; (iv) compensation; (v) fine resolutions. The claim is still to be admitted for processing.

From the analysis carried out, ratified by the legal opinion of the external consultants overseeing the case, we consider that the contingency rating of this case is remote.

Finally, regarding fiscal year 2012, on December 11, 2020 we filed a contentious-administrative lawsuit against TCR No. 3752-3-2020 that unfavorably ruled against the Company in terms of the following objections: (i) income considered unduly deferred and that accrued in 2012; (ii) provision for expenses not accepted as they have not been substantiated; (iii) late interest for payment on account from March to December 2013; and (iv) fine resolutions regarding IR 2012 and its payments on account. On December 11, 2020, the court accepted the claim for processing. The oral report in the first instance has been scheduled for January 18, 2022.

From the analysis carried out, ratified by the legal opinion of the external consultants overseeing the case, we consider that the contingency rating of this case is remote.

f) Mobile royalties -

On February 27, 2012, the MTC notified the Company of the settlement of the annual payment of the mobile royalties for the use of the radio-electric spectrum corresponding to that year as per the General Scheme, arguing that the Special Regime, which Telefónica Móviles acquired at the time, was no longer applicable given its temporary nature.

As a consequence of the MTC's claim to apply the General Regime, the Company proceeded to: (i) file a complaint before the MTC arguing that the Special Regime was the one that legally applied; and (ii) submit a complaint to INDECOPI arguing that the calculation methodology contained in the General Regime constituted a Bureaucratic Barrier.

The appeals lodged by the Company for the years 2012, 2013 and 2014 before the MTC were dismissed. Consequently, the Company filed appeals before the Tax Court, which are pending determination. The MTC is reluctant to make the files available. Likewise, for the years 2015 and 2016, the Company filed claims before the MTC, which are awaiting a ruling by the Tax Court.

The claim of Bureaucratic Barriers was decided in the last administrative instance on February 19, 2016, declaring that the calculation methodology contained in the General Scheme constituted a Bureaucratic Barrier and therefore was inapplicable for Telefónica. This determination applies not only for the year 2012, but for subsequent fiscal years.

In the case of the mobile royalties corresponding to the years 2012, 2013 and 2014, the Company made the payments under protest according to the settlements formulated by the MTC. While the payments corresponding to the years 2015 and 2016, were not made as a precautionary measure was obtained in the procedure of Bureaucratic Barriers and, as a consequence of the definitive determination from INDECOPI, respectively.

However, on January 18, 2017, the Company was notified with the requirement formulated by the MTC for the payment of the corresponding royalties for the years 2015 and 2016, based on the existence of a precautionary measure issued by the 25th Contentious-Administrative Court of the Superior Court of Justice of Lima, which ordered INDECOPI to suspend the effects of the ruling that declared that the calculation of the royalties as per the General Scheme constituted a Bureaucratic Barrier, specifying in the requirement that if the payment is not made within the term granted the respective coercive collection actions would proceed.

On January 27, 2017, the Company responded to the aforementioned requirement stating that (i) as at that date, it had not been notified of any precautionary measure; (ii) it had not been notified with any INDECOPI resolution that ordered the suspension of the effects of its determination; and (iii) pursuant to the provisions of Articles 136 and 115 of the Tax Code, Article 16, subparagraph e) of the Coercive Enforcement Procedure Act, and paragraph 28, Article III.4 of the Directive approved by Supreme Decree No. 036-2010-MTC, it was not possible to initiate any coercive collection action as the Company had submitted claims with the MTC for the years 2015 and 2016 within the established legal deadlines.

On March 7, the Coactive Executor suspended the Enforcement procedure. However, in order to avoid a possible allegation by the Ministry that Telefónica would not be paying the royalties and starting a procedure to lose the concession, Telefónica proceeded to pay the 2015 and 2016 periods for amounts amounting to S/ 50,787,968 and S/ 52,107,136.

On September 24, 2020, the Supreme Court upheld the MTC's appeal for annulment, and consequently the judgment of the Superior Court was null and void. Consequently, the Superior Court will have to issue a new ruling. On December 9, 2020, the hearing of the case was held. On

February 3, 2021, the judgment of the Superior Court declared the claim as unfounded. On February 18, 2021, we learned that the MTC filed a cassation appeal (the brief has not yet been downloaded and we have not been notified).

The Management of the Company and its internal and external legal advisors estimate that there are legal arguments to sustain that the final determination that is issued in the contentious administrative process promoted by the MTC against the decision of INDECOPi will be favorable. If so, any favorable result derived from the aforementioned contentious administrative proceeding will not have a significant impact on the Company's consolidated financial statements.

g) Income tax Telefónica Multimedia 2007, 2010, 2012, 2013, and 2014

As a result of the audits of the financial years 2007, 2010, 2012, 2013, and 2014, this has been notified by SUNAT with various resolutions for alleged omissions regarding income tax.

In some cases, Multimedia has filed claim appeals for failing to find the corresponding resolutions in accordance with the legal regulations in force in Peru and, in others, it has proceeded to pay the assessments received.

Regarding the Income Tax for the year 2012 for Multimedia, on June 17, 2015, SUNAT issued Determination Resolutions No. 012-003-0059229 to 0059241, and Fine Resolutions No. 012-002-0025995 to the 0025997. The main objection made by SUNAT corresponds to the expenses that are supported with documentation that were received after the submission of the sworn statement. Disagreeing with the stipulations of the Determination and Fine Resolutions, the Subsidiary filed a Claim Appeal. Meanwhile, on January 22, 2016, SUNAT communicated Intendancy Resolution No. 0150140012250, by means of which the aforementioned Claim Appeal was declared invalid. Thus, an appeal was filed with the TC, which was resolved through TCR No. 3752-3-2020, and notified on September 7, 2020. In this resolution, the Court annuls the main objection related to the expenses substantiated with receipts received after the sworn statement. Insofar as the remaining objections, these were confirmed and we are awaiting compliance from SUNAT.

Subsequently, on December 1, 2020, the Company was notified with Intendancy Resolution No. 0150150002586 issued in compliance with what was resolved by the Tax Court in Resolution No. 03752-3-2020. However, as we did not agree with the indications of SUNAT, we filed an appeal.

In the opinion of Management, and its legal advisors, there are legal arguments that indicate that the tax process could be resolved on favorable terms for Multimedia. If so, any favorable result derived from the aforementioned tax proceedings will not have a significant impact on the Company's consolidated financial statements.

Furthermore, Tax Court Resolution No. 149-4-2019 is disputed as it confirms IR No. 0150140014378, thereby declaring the claim made against payment orders No. 011-001-0123981 to 011-0123989 drawn for IR account payments from January to July, October and December 2014, as unfounded. On April 24, 2019, the claim was filed. On August 20, 2020, the oral report was carried out. On November 2, 2020, the judgment of first instance upheld our claim, and consequently the TCR became null and void. As such, the payment of default interest due to the modification of the coefficient is no longer required. However, the Superior Court reversed the judgment of first instance and declared our claim unfounded. On January 12, 2021, we filed a cassation appeal against this judgment. The appeal has not yet been admitted.

In the opinion of Management and its legal advisors, for the aforementioned administrative contentious processes there are sufficient arguments to consider the contingency as reasonably remote.

In relation to the proceedings detailed above, as of March 31, 2021, as explained in Notes 2.20 and 2.21, the Company recorded the required provisions with an estimated amount of S/ 1,200,233,000 (S/ 721,219,000 as of December 31, 2020) held as possible contingents. See Note 21. Management

and its legal advisors estimate that the individual outcome of the claims should not have a significant impact on the Group's consolidated financial statements.

In the same way, the Company has various legal (labor and administrative) regulatory and customs claims that are carried out by its external and internal legal advisors. As of March 31, 2020, as stated in Note 2.20, the Company had registered the required provisions, leaving as a possible contingency an amount of S/ 574,946,000 (S/ 567,148,000 as at December 31, 2020). See Note 21. Management and its legal advisors estimate that the individual outcome of the claims should not have a significant impact on the Group's consolidated financial statements.

33 SUBSEQUENT EVENTS

On April 6, 2021, the Group informed the Workers' Unions that it will initiate a Collective Dismissal procedure before the Ministry of Labor in order to make structural changes in the Mobile Operations Center, as well as in the operational management of territorial operations (provinces). These areas are undergoing a change in their operating model to simplify and automate processes. After having identified a group of 844 positions, we reported the situation as an important fact to the Superintendency of the Securities Market on the same date. Furthermore, on April 7, 2021, the Group launched a voluntary retirement plan offering above-market conditions as a favorable alternative to its employees throughout the period of the plan.

The Group presented this Collective Dismissal procedure on April 23, 2021. As this action did not comply with the requirements established by accounting standards, no effect has been included in the financial statements as of March 31, 2021.

Between March 31, 2021 and the date of approval of the consolidated financial statements, there were no significant subsequent events that in the opinion of Company management require any additional disclosure or any adjustment to the balances presented in the consolidated financial statements.
