- Total distribution was stable y-o-y; excluding non-periodic items, **adjusted total distribution was 8% higher**

Delivering Resilience as Portfolio Reconstitution Progresses

Demonstration of CLAS' proactive asset and capital management

DPS – 1H 2024 vs 1H 2023

Note:

1. Excluding non-periodic items in 1H 2023 and 1H 2024 relating to realised exchange gain arising from settlement of cross currency interest rate swaps

Same-store operating performance improved y-o-y

- Same-store operating performance was stronger y-o-y and accretive to distributions
- Resilience as portfolio reconstitution progresses
 - Acquisitions, completed asset enhancement initiatives (AEIs) and interest savings from the repayment of higher-interest debt with divestment proceeds mitigated the impact of income lost through divestments and ongoing AEs
 - Completion of AEs expected to provide further capacity for growth in subsequent quarters
 - CLAS is also evaluating opportunities to redeploy divestment proceeds into higher-yielding acquisitions
- Depreciation of most foreign currencies against the SGD impacted distributions
- Excluding the lower level of non-periodic items, adjusted DPS¹ was largely stable y-o-y

Marrying Stability with Growth

Poised for Sustained Growth

Portfolio reconstitution and AElS provide further capacity for growth as pent-up demand moderates

CLAS remains cautiously optimistic on the demand for lodging

- International visitor arrivals projected to grow 2% above pre-pandemic levels in 2024¹
- High borrowing costs, tightening fiscal policies and geopolitical tensions remain near-term pressures²
- Central banks in key global markets expected to ease interest rates, albeit at a gradual pace³

Resilient operating performance

- CLAS' **diversification** and balanced mix of **growth and stable income sources** provide resilience amidst global uncertainties
- **Regular travel patterns and seasonality expected to return** in more markets as pent-up demand for travel moderates

Asset enhancement

- When completed, **AEIs** from 2024 to 2026 are **expected to uplift CLAS' distribution income**
- Properties are in prime locations of key gateway cities, and are **well-positioned to capture demand** from tourism, business activities and events

Portfolio reconstitution

- Proceeds from divestments offers CLAS a **war chest** to strategically invest in **higher-yielding acquisitions**
- As CLAS evaluates opportunities, proceeds have been used to **pare down higher-interest debt** in the interim, **delivering accretion**

Capital management

- CLAS has a **healthy financial position** and will continue to adopt a proactive and disciplined approach in capital management
- **Average cost of debt expected to remain stable** at c.3% p.a. in 2024; gearing of 37.2% provides headroom for growth
