COMMENTARY

Based on advance estimates released by the Singapore Ministry of Trade and Industry ("MTI") on 14 July 2022¹, Singapore's GDP remained unchanged on a quarter-on-quarter ("q-o-q") seasonally-adjusted basis in the second quarter of 2022, after posting growth of 0.9% in the first quarter of 2022. Be that as it may, the local construction sector grew 3.8% in the second quarter, faster than the 1.8% expansion in the preceding quarter. This was in part due to the relaxation of border restrictions on the inflow of migrant workers. Nevertheless, as MTI pointed out, "In absolute terms, the value-added of the sector remained 23.7% per cent below its pre-pandemic (i.e., first quarter of 2019) level due to continued labour shortages as the inflow of migrant workers would take time to recover."

Further, we observe that construction site activity levels were adversely affected during the quarter due to two transient issues. One, in the first six months of 2022, the Ministry of Manpower ("MOM") reported 28 workplace fatalities, many of which were in the construction industry; in comparison, there were a total of 17 incidents during the same period pre-Covid in 2019.² This had led to a call for companies to conduct a safety time-out from 9 May 2022 by MOM, the Workplace Safety and Health ("WSH") Council, the National Trades Union Congress ("NTUC") and industry partners.³ Two, up to 15 June 2022, there were more than 12,000 cases of dengue reported, which was already more than the 5,258 cases logged in the whole of 2021. This has resulted in a spate stop-work orders issued by the authorities to construction sites, which had impeded project progress.⁴

Be that as it may, with the ending of government Covid-19 support measures for the local construction industry and a rising interest rate environment, we are of the view that credit risk remains elevated in the local construction industry. At the same time, persistently high input costs should continue to pose significant challenges to businesses in this sector going forward. Finally, international steel prices have moderated recently, mainly due to the volatile conditions in China as a result of Covid-19 and a potential property crisis there.

On the other hand, construction order books island-wide have remained robust on the back of strong demand for public housing and infrastructure projects as Singapore continues to emerge from the Covid-19 pandemic. The Housing & Development Board, for example, remains on track to launch up to 23,000 new flats in 2022, with launches of 3,900 and 4,600 flats in February and May respectively, and upcoming launches of 4,900 and 9,500 flats in August and November respectively. This bodes well for the demand for reinforcing steel and BRC, which are an integral part of the local construction supply chain.

As of 30 June 2022, our sales order book stood at approximately \$\\$1.135 billion. The duration of projects in our sales order book range up to 5 years and may be subject to further changes.

On behalf of the Board of Directors

Seah Kiin Peng Chief Executive Officer
