

A-SONIC AEROSPACE LIMITED
Regn. No. 200301838G

A-SONIC GROUP COMPLETES JOINT VENTURE AGREEMENT WITH AN INFORMATION TECHNOLOGY (“IT”) GROUP

A-Sonic Aerospace Limited (the “**Company**”) announced that its wholly-owned subsidiary, **A-Sonic SCM Private Limited**, has completed the joint venture agreement with RES Malaysia Sdn Bhd (“**RES**”), an information technology company.

The aforesaid transaction was completed after satisfactory due diligence. Accordingly with effect from 1 July 2026, the Company has an equity interest of 55% in, RES, its two wholly-owned subsidiaries, and its 30% associate company (collectively the “**RES Group**”) are related companies of the Company (the “**A-Sonic Group**”).

The joint venture is aligned with the A-Sonic Group’s strategy to **enhance its digital and technology capabilities** and to progressively **evolve into a technology-enabled supply chain solutions group**.

We aim to further advance digitalisation and automation across our operations, and where appropriate, infuse artificial intelligence (“AI”) to increase **productivity and potential cost efficiencies**.

We plan to further strengthen our ability to deliver more integrated and technology-enabled logistics solutions. This will **provide our customers with improved visibility, process integration, system-driven workflow** to enhance overall solution experience and operational productivity.

Rather than developing a full technology platform internally, which would require significant time and resources, we aim to **reduce execution risk and shortening implementation timelines**.

The RES Group

The RES Group, established in 1985, is one of the leading one-stop providers of specialised enterprise IT, data capture, and mobility solutions for the supply chain industry, with dedicated divisions in hardware, software, and aftermarket technical support.

Its solutions are organised across four core areas:

(i) Tracking, Capture and Visibility

Comprising asset tracking, barcode and RFID capture, and inventory management solutions that provide real-time visibility across warehouses, logistics operations, and multi-location asset portfolios. Demand for these solutions remains strong, particularly among customers managing large volumes or high-value assets requiring end-to-end traceability.

(ii) Mobility, Applications and Workflow Automation

Comprising mobile application development, sales force automation, and inventory management systems that digitalise field operations, streamline order management, and improve frontline productivity across manufacturing, transportation, distribution and retail environments.

(iii) Infrastructure, Hardware and Networks

Comprising enterprise computing hardware, storage, and the design and deployment of wired and wireless network infrastructure, serving customers that require reliable, scalable IT environments to support their operations.

(iv) IT Support and Network Security

Providing outsourced IT support and network security services to businesses without in-house technical expertise, ensuring operational continuity and cyber resilience.

The RES Group operates across Kuala Lumpur, Penang, and Johor Bahru, with a 30% associate company in Bangkok, Thailand.

Looking ahead, the A-Sonic Group intends to work with the RES Group to progressively enhance and modernise these offerings. Selected solutions - such as inventory management and workflow automation - present clear opportunities for AI-assisted development and deployment, which can shorten implementation timelines, reduce costs, and deliver greater value to customers. This evolution is consistent with the A-Sonic Group's aim to become a technology-enabled supply chain solutions group.

About A-Sonic Group

After the completion of the acquisition of the RES Group, the A-Sonic Group is now engaged in three (3) areas of businesses, aviation, logistics, and IT. We currently operate in 28 cities in 14 countries, spanning four (4) continents in Asia, North America, Europe, and Sub-Continent India. Our staff strength was approximately 630 personnel as at 1 July 2026.

In addition to IT business, we are engaged in the purchase and sale of aircraft engines and components. We are also engaged in providing supply chain management services. We specialise in various aspects of logistic solutions, including international and domestic multi-modal transportation, warehousing, distribution, customs clearance, and airport ground services.
