**MYANMAR DRILLING UPDATE:
DRILLING COMMENCEMENT OF
CHAUK DEVELOPMENT WELL CHK 1228**

Interra Resources Limited (the “**Company**” or “**Interra**”) wishes to inform shareholders that its joint venture entity, Goldpetrol Joint Operating Company Inc. (“**Goldpetrol**”), has commenced drilling development well CHK 1228 in the Chauk oil field in Myanmar.

Interra has a 60% interest in the Improved Petroleum Recovery Contract of the Chauk field and also owns 60% of Goldpetrol which is the operator of the field. CHK 1228 is being drilled using Goldpetrol's ZJ 450 rig, thus drilling costs are expected to be relatively low. Interra's share of the cost of drilling is funded from existing funds on hand.

CHK 1228 is drilled in the Chauk South Central fault block as an east flank infill development well in the undrained production gap between two current oil producers. It will be drilled as a vertical well to a total measured depth of 3,200 feet with the primary objective of accelerating production from the numerous oil reservoirs that produce in this fault block.

CHK 1228 is the sixth 2021 budgeted development well drilled in Myanmar. It is estimated the drilling and completion results should be available within approximately six weeks. The Company will announce the results of the drilling operation as soon as they may be ascertained as well as updates reflecting critical or unexpected events during drilling.

By Order of the Board of Directors of
INTERRA RESOURCES LIMITED

Marcel Tjia
Chief Executive Officer

About Interra

Interra Resources Limited, a Singapore-incorporated company listed on SGX Mainboard, is engaged in the business of petroleum exploration and production (E&P). Our E&P activities include petroleum production, field development and exploration. We are positioning ourselves to become a leading regional independent producer of petroleum.
