PRESS RELEASE

H2G Green Limited Outlines Vision to Strengthen Singapore as LNG Hub and Advance Towards Net Zero

SINGAPORE, 16 June 2025 – [H2G Green Limited](#) (SGX:5AI) ("**H2G**" or the "**Company**", together with its subsidiaries, collectively the "**Group**"), a leader in sustainable energy solutions, is outlining its future priorities following a recent leadership transition. The newly appointed CEO of the Company, Mr. Pek Hak Bin ("**Mr. Pek**"), emphasizes the significant growth opportunities for homegrown green energy companies like H2G as they help meet the accelerating demand for clean energy in Singapore and the broader regional market. H2G specifically focuses on biomass-to-hydrogen development and expanding utilisation of liquefied natural gas ("**LNG**").

Domestic firms powering the energy transition

As Singapore's energy consumption grows, the nation is intensifying efforts to achieve net-zero carbon emissions by 2050 while also shoring up energy security. Starting in 2013, imported LNG has contributed significantly to both aims, as the country strives to become an LNG hub¹. Hydrogen is also poised to become a cornerstone of Singapore's clean energy mix once scalable solutions are achieved. Both energy sources are H2G's main focus under its two major subsidiaries, GasHubUnited Utility Private Limited ("**GasHub**") for LNG and Green Energy Investment Holding Private Limited ("**GEIH**") for hydrogen.

(Incorporated in the Republic of Singapore)

“International oil and gas majors have undertaken much of Singapore’s LNG business, but we also have enormous untapped potential right here with impactful homegrown companies like H2G,” commented Mr. Pek. “Looking ahead, this will be the priority for H2G — to expand possibilities for the impact domestic green energy firms can have, for Singapore and beyond.”

Future vision for H2G

Under Mr. Pek’s leadership, H2G will focus on three strategic priorities:

- **Championing clean energy innovation in Singapore:** Showcasing how domestic firms can make significant contributions to decarbonisation and progress towards net zero by 2050
- **Regional expansion:** Expanding in Singapore and entering Southeast Asia, including the Philippines, Vietnam, Indonesia, and Malaysia
- **Collaboration for progress:** Forging commercial and institutional partnerships with like-minded organisations regionally that share H2G’s values

What sets H2G apart

H2G stands out for its robust engineering expertise and unwavering commitment to safety. Due to the combustibility of LNG and hydrogen, they require exacting precision and rigorous compliance with stringent regulations. H2G’s track record includes zero safety incidents, a testament to its expertise level.

Its subsidiary, GasHub, plays a critical role in expanding access to LNG in Singapore. It specialises in last-mile distribution of LNG via cylinders and tanks to commercial and industrial sites that may lack the ability to utilise the energy source effectively.

For hydrogen, GEIH utilises advanced pyrolysis technology to convert non-food biomass waste into green hydrogen and other high-value, sustainable products, such as biochar and wood vinegar.

Background on Mr. Pek

Mr. Pek was appointed CEO of the Company effective 1 June 2025. With three decades of experience in the energy sector, he offers a unique blend of strategic vision, operational expertise, and governance acumen to unlock new opportunities for the Group's next stage of growth. Mr. Pek's extensive background includes leadership roles such as Partner and Regional Head of Oil & Gas at KPMG Singapore, Board Director at Energy Market Authority of Singapore, and Chairman and Director of BP Singapore, where he was instrumental in the early development of LNG in Asia.
