SINGAPORE, 29 October 2026 – Koh Brothers Eco Engineering Limited (許兄弟生态工程有限公司) ("**Koh Brothers Eco**" or the "**Company**" together with its subsidiaries, collectively the "**Group**"), a sustainable engineering solutions provider, marked a significant milestone today as it commenced trading on the Mainboard of the Singapore Exchange Securities Trading Limited (the "**SGX-ST**"), following the successful transfer of its listing from the Catalist Board of the SGX-ST (the "**Catalist**") to the Mainboard (the "**Transfer**").

The Company had received approval in-principle from the SGX-ST on 30 June 2026 and the subsequent approval of its shareholders for the Transfer at the extraordinary general meeting held on 18 August 2026.

Koh Brothers Eco's Chief Executive Officer, Mr. Paul Shin, commented, "Our transfer to the SGX Mainboard represents an important milestone in Koh Brothers Eco's development and reflects the progress we have made in building an established sustainable engineering group. We believe the Mainboard listing will raise our profile in the capital markets, broaden our reach to investors, and provide us with a stronger platform to support the Group's long-term development.

As we enter this next phase, our priorities remain firmly anchored on strengthening our core businesses and delivering sustainable performance. We will continue to build our order book while maintaining our focus on the safe, timely and high-quality execution of our ongoing projects. At the same time, we will remain disciplined in strengthening our financial position and managing our cash flows prudently to support the Group's long-term sustainability and create value for our shareholders."

The Group's approximately S$1.0 billion order book as at 30 June 2026 provides earnings visibility underpinned by major infrastructure projects in Singapore and its bio-refinery and renewable energy businesses.

About Koh Brothers Eco Engineering Limited

Listed on the Singapore Exchange ("**SGX**") in 2006, Koh Brothers Eco Engineering Limited ("**Koh Brothers Eco**", and together with its subsidiaries, the "**Group**") is a sustainable engineering solutions group that provides engineering, procurement and construction ("**EPC**") services for water and wastewater treatment, hydro-engineering, bio-refinery and bio-energy projects as well as engineering and construction services, specialising in providing building and civil engineering construction and infrastructure works.

Incorporated in Singapore in 1975, Koh Brothers Eco started out by providing EPC services for water and wastewater treatment projects as well as hydro-engineering projects. Its principal market is in Asia with projects from both the public and private sectors.

The Group's Engineering and Construction division under Koh Brothers Building & Civil Engineering Contractor (Pte.) Ltd. ("**KBCE**"), which holds the A1 grade from the Building and Construction Authority ("**BCA**") for both building and civil engineering categories, possesses capabilities in building and civil engineering construction. The BCA A1 grade allows KBCE to tender for building and civil infrastructure projects of unlimited value. KBCE, which enjoys a long and rich corporate history, has a strong track record ranging from design and build to general construction for residential, commercial and institutional buildings and infrastructure works. KBCE is also a BCA L6 – (ME11) graded contractor which enables it to tender for public mechanical engineering projects of unlimited value.

Over the years, KBCE has participated in projects by various public sector agencies such as the BCA, Housing & Development Board ("**HDB**"), PUB, Singapore's National Water Agency, Urban Redevelopment Authority ("**URA**"), Land Transport Authority ("**LTA**") and Changi Airport Group ("**CAG**").

Some of KBCE's major infrastructure projects include the Punggol Waterway awarded by HDB, the iconic Marina Barrage, Geylang River Make Over, Changi Water Reclamation Plant (Phase 1), and Jurong Water Reclamation Plant by PUB, the Common Service Tunnel by URA, Downtown Line 1 Bugis Station by LTA and the

retention pond at Changi Airport by CAG. In addition, through a joint venture, KBCE secured a landmark $1.12 billion project from CAG for development works to effect three-runway operations at Changi Airport.

Other landmark building projects by KBCE include Building and Electrical works at Jurong West Neighbourhood 6 Contract; Building works at Chua Chu Kang Neighbourhood 4 Contract awarded by HDB; New Halls of Residence at Nanyang Avenue for Nanyang Technological University and the development of River Valley High School and a hostel at Boon Lay Avenue, both commissioned by the Ministry of Education; Design and Build projects for the Provost & Armour Cluster in Kranji Camp and Keat Hong Camp, both awarded by the Ministry of Defence; and the construction of the Singapore Civil Defence Force Headquarters Complex at Ubi Avenue 4 commissioned by the Ministry of Home Affairs.

The Group's Bio-Refinery and Renewal Energy division under Oiltek International Limited specialises in a full range of conventional edible oil process plants as well as biodiesel, pre-treatment and winter fuel plants. Through its subsidiary, Oiltek Global Energy Sdn. Bhd., it also designs, builds and supplies biogas recovery systems to palm oil mill effluent plants in Malaysia and Indonesia. Oiltek International Limited is listed on the Mainboard of the SGX.
