Overview of UOB Group

UOB Overview

Founding

Founded in August 1935 by a group of Chinese businessmen and Datuk Wee Kheng Chiang, grandfather of the present UOB Group CEO, Mr. Wee Ee Cheong.

Expansion

UOB has grown over the decades organically and through a series of strategic acquisitions. It is today a leading bank in Asia with an established presence in the Southeast Asia region. The Group has a global network of around 500 branches and offices in 19 countries and territories.

Key Statistics for 1Q24

- Gross loans : SGD323b (USD239b[1])
- Customer deposits : SGD388b (USD288b[1])
- Loan / Deposit ratio : 82.0%
- Net stable funding ratio : 121%
- All-currency liquidity coverage ratio : 160%[2]
- Common Equity Tier 1 ratio : 13.9%
- Leverage ratio : 7.0%
- Return on equity [3 4] : 14.0%
- Return on assets [4] : 1.22%
- Net interest margin : 2.02%
- Non-interest income / Total income : 32.9%
- Cost / Income [4] : 41.9%
- Non-performing loan ratio : 1.5%
- Credit Ratings

Why UOB?

Stable management

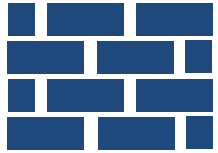

- Proven track record in steering the bank through various global events and crises
- Stability of management team ensures consistent execution of strategies

Integrated regional platform

- Truly regional bank with full ownership and control of regional subsidiaries
- Entrenched domestic presence and deep local knowledge to address the needs of our targeted segments
- Continued investment in talent and technology to build capabilities in a disciplined manner

Strong fundamentals

- Strong Common Equity Tier 1 capital adequacy ratio of 13.9% as at 31 March 2024
- Diversified funding and sound liquidity, with 82.0% loan/deposit ratio
- Strengthened coverage, with general allowance on loans (including RLAR) covering 0.9% of performing loans

Balance growth with stability

- Over 50% of Group's earnings from home market of Singapore (AAA sovereign rating)
- Continue to diversify portfolio, strengthen balance sheet, manage risks and build core franchise for the future
- Maintain long-term perspective to growth for sustainable shareholder returns

Developed market central banks are maintaining a data-dependent approach in their monetary policies. In Asia, although inflation has tapered, factors such as FX stability and geopolitical uncertainty amid resilient growth may keep most central banks on hold for a while. Bank Indonesia resumed its rate hike in Apr-24 to anchor the rupiah's stability as expectation of Fed rate cuts are pushed back. On the other hand, PBOC is likely to ease further after frontloading a 25bps cut to the 5Y LPR and 50bps cut to banks' RRR in Feb.

Our view now is that the Fed will maintain its terminal FFTR level of 5.25-5.50% for longer beyond Jun-24, where we now price in 50 bps of rate cuts for 2024 (i.e. two 25-bps cuts, in Sep-24 and Dec-24), down from our previous projection for 75 bps of cuts. Admittedly, the risk is still tilted for the Fed to delay cuts even further, nudged by a difficult inflation descent. A US soft landing remains our central scenario and thus we do not expect an aggressive series of Fed cuts ahead.

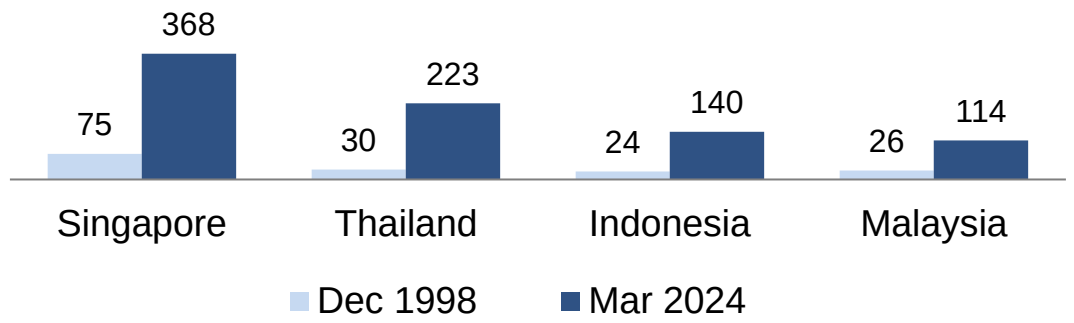

In the Apr-24 MPS, the MAS maintained the prevailing rate of appreciation of the S$NEER policy band with no change to its width and the level at which it is centered. While the 2024 core and headline inflation forecast range was kept unchanged at 2.5-3.5% (ex-GST: 1.5-2.5%), MAS seemed more confident over the disinflation process. MAS expects underlying inflation to moderate further as imported and domestic cost pressures continue to abate. We assess that normalisation of monetary policy via a slight slope reduction could occur as early as the Jul-24 MPS.

Singapore to implement Basel IV[5] by mid-2024

> "Retained earnings are one of the major sources of … highest quality capital that banks hold. They have to earn a decent return for intermediating credit, otherwise they will do less of it."
>
> *– Mr Ravi Menon, Managing Director, Monetary Authority of Singapore, 20 April 2017*

> "While the reforms are necessary to strengthen the banking system over the long term, they will require banks to make considerable operational adjustments which they would be hard pressed to make under current challenging conditions."
>
> *– Media Release, Monetary Authority of Singapore, 7 April 2020*

Source: BCBS

1. Liquidity Coverage Ratio
2. Net Stable Funding Ratio
3. Standardised Approach for measuring Counterparty Credit Risk exposure (MAS has not announced implementation date)
4. Total Loss Absorbing Capacity (not applicable to Singapore banks)
5. Basel IV (Final Basel III reforms): Revised standards for credit risk, market risk, operational risk, leverage ratio, output floor and related disclosure requirements
6. Minimum Capital Requirements for Market Risk replaced Fundamental Review of the Trading Book
7. Revised definition on exposure measure

Impact of Basel IV[1] likely to be manageable

	Lower RWA	Higher RWA
Retail credit	LGD[2] floor of Retail Mortgage cut to 5% from 10%	LGD[2] and PD[3] floors introduced for QRRE[4] and Other Retail
Wholesale credit	Unsecured corporate FIRB[5] LGD[2] cut to 40% from 45%	CCF[6] for unconditional cancellable commitments raised to 10% from 0%
Wholesale credit	CCF[6] for general commitments cut to 40% from 75%	PD[3] floor of bank asset class raised to 5bp from 3bp
Wholesale credit	Higher haircuts and lower FIRB[5] secured LGD	RWA[7] output floor set at 72.5% of that of standardised approach
Others	Removal of 1.06 multiplier for IRB[8] RWA[7]	Fundamental review of the trading book

Source: BCBS

1. Basel IV: Reducing variation in risk-weighted assets
2. Loss given default
3. Probability of default
4. Qualifying revolving retail exposures
5. Foundation internal rating-based approach
6. Credit conversion factor
7. Risk weighted assets
8. Internal rating-based approach

2. Compound annual growth rate over 3 years (FY20 to FY23)

UOB's responsible financing journey: pragmatic and progressive

Overview of UOB Group's Responsible Financing Journey

	Establishing	Improving	Strengthening and Evolving	
	2015 - 2016	2017 - 2018	2019 - 2022	2023
Key Milestone	• Launched the Group Responsible Financing Policy. • Began to incorporate ESG clauses into Letters of Offer.	• Enhanced ESG monitoring and reporting to improve oversight on potential controversies. • Implemented ESG risk classification to better manage ESG risk in portfolio. • Adopted the ABS Haze Diagnostics Checklist as transboundary haze pollution shrouded the region.	• Announced our net zero commitment. Strengthened due diligence process with enhanced climate-related questions. • Established Environmental Risk Management (EnRM) Framework and disclosed our responsible financing sector policies. • Discontinued new financing of coal-fired power plants, greenfield thermal coal mines/expansion. Aim to exit financing for thermal coal sector by 2039. • Discontinued new financing of greenfield palm oil plantations; all mature plantations to be certified by recognised sustainability bodies. • Discontinued new project financing for upstream oil and gas projects after 2022. • Completed a bank-wide ESG risk assessment capacity-building workshops.	• Developed a net zero operationalisation programme. • Bolstered our environmental risk appetite statement with a quantitative climate risk-related metric to better manage environmental risk in our corporate lending portfolio. • Launched an ESG Adverse News Surveillance System to enhance ongoing ESG risk client monitoring. • Further strengthened deforestation prohibition requirement within palm oil sector. • Launched an in-house responsible financing e-learning module to enhance employees' understanding of our responsible financing policy.

* Green Finance Industry Taskforce

TCFD Implementation - Climate Scenario Analysis

	Qualitative Transition Risk Assessment	Transition Risk Scenario Analysis Pilot	Physical Risk Pilot Analysis	Improved Methodology
	2019	2020	2021	2022-2023

Key Milestone	• Completed qualitative assessment in 2019, referencing SASB's Materiality Map® and Moody's Environmental Risks Global Heatmap.
	• Identified carbon-intensive segments most likely to be impacted by climate change:
	Metals and mining
	Transportation
	Building Materials
	Forestry
	Energy
	Chemicals
	Agriculture
		• Partnered an internationally recognised environmental consultancy in climate scenario analysis in 2020
		• Three pathways of climate scenarios based on research by IEA and OECD:
		  • An orderly transition where early actions are taken to reduce emissions to meet climate targets (high carbon price scenario)
		  • A disorderly transition where delayed and drastic actions are taken to meet climate targets (moderate carbon price scenario)
		  • Business-as-usual where no actions are taken (low carbon price scenario)
			• Conducted a pilot physical risk analysis involving approximately 2,000 wholesale banking customers (~80% of the total wholesale banking exposure) and retail banking property mortgages focusing on our major markets that are most vulnerable to physical risks, i.e. Malaysia, Thailand and Indonesia.
			• The analysis utilised a bottom-up approach with customers' operating and asset locations overlaid on various climate hazard maps to determine their vulnerability to seven physical hazards in short-, mid-, and long-term horizons up to 2050 over three IPCC climate scenarios.
			• In addition, we also refreshed our transition risk analysis.
				• Developed an improved climate risk assessment methodology and uplift the Bank's internal capacity.
				• The improved methodology integrates multiple climate risk drivers, considers both transition risk and physical risk, and includes sector specific approach for high-risk sectors, as well as a general approach for other sectors.
				• Further strengthened our physical risk assessment approach with increased sample coverage and enhanced methodology for our Income Producing Real Estate (IPRE) and Retail Mortgage portfolios.
				• Overall, the average change in projected credit risk profile of our assessed portfolio over time was not significant across all scenarios.

Future Plan **Metrics and Targets** To align our disclosure with ISSB requirements in view of the transition from TCFD to ISSB standards

In October 2022, we announced our commitment to achieving net zero by 2050, with a focus on 6 priority sectors

Energy Built environment

Net zero targets and commitments for six sectors

Energy	**Power** Reduce emissions intensity by **64%** by 2030 and **98%** by 2050	**Automotive** Reduce emissions intensity by **58%** by 2030 and **net zero** by 2050	**Oil and gas** No new project financing for upstream oil and gas projects approved for development after 2022
Built environment	**Real estate** Reduce emissions intensity by **36%** by 2030 and **97%** by 2050	**Construction** Reduce emissions intensity by **31%** by 2030 and **85%** by 2050	**Steel** Reduce emissions intensity by **20%** by 2030 and **92%** by 2050

Covers **~60%** of our corporate lending portfolio

We focused on two significant, high-emitting ecosystems, **energy** and **built environment,** spanning 6 sectors based on:

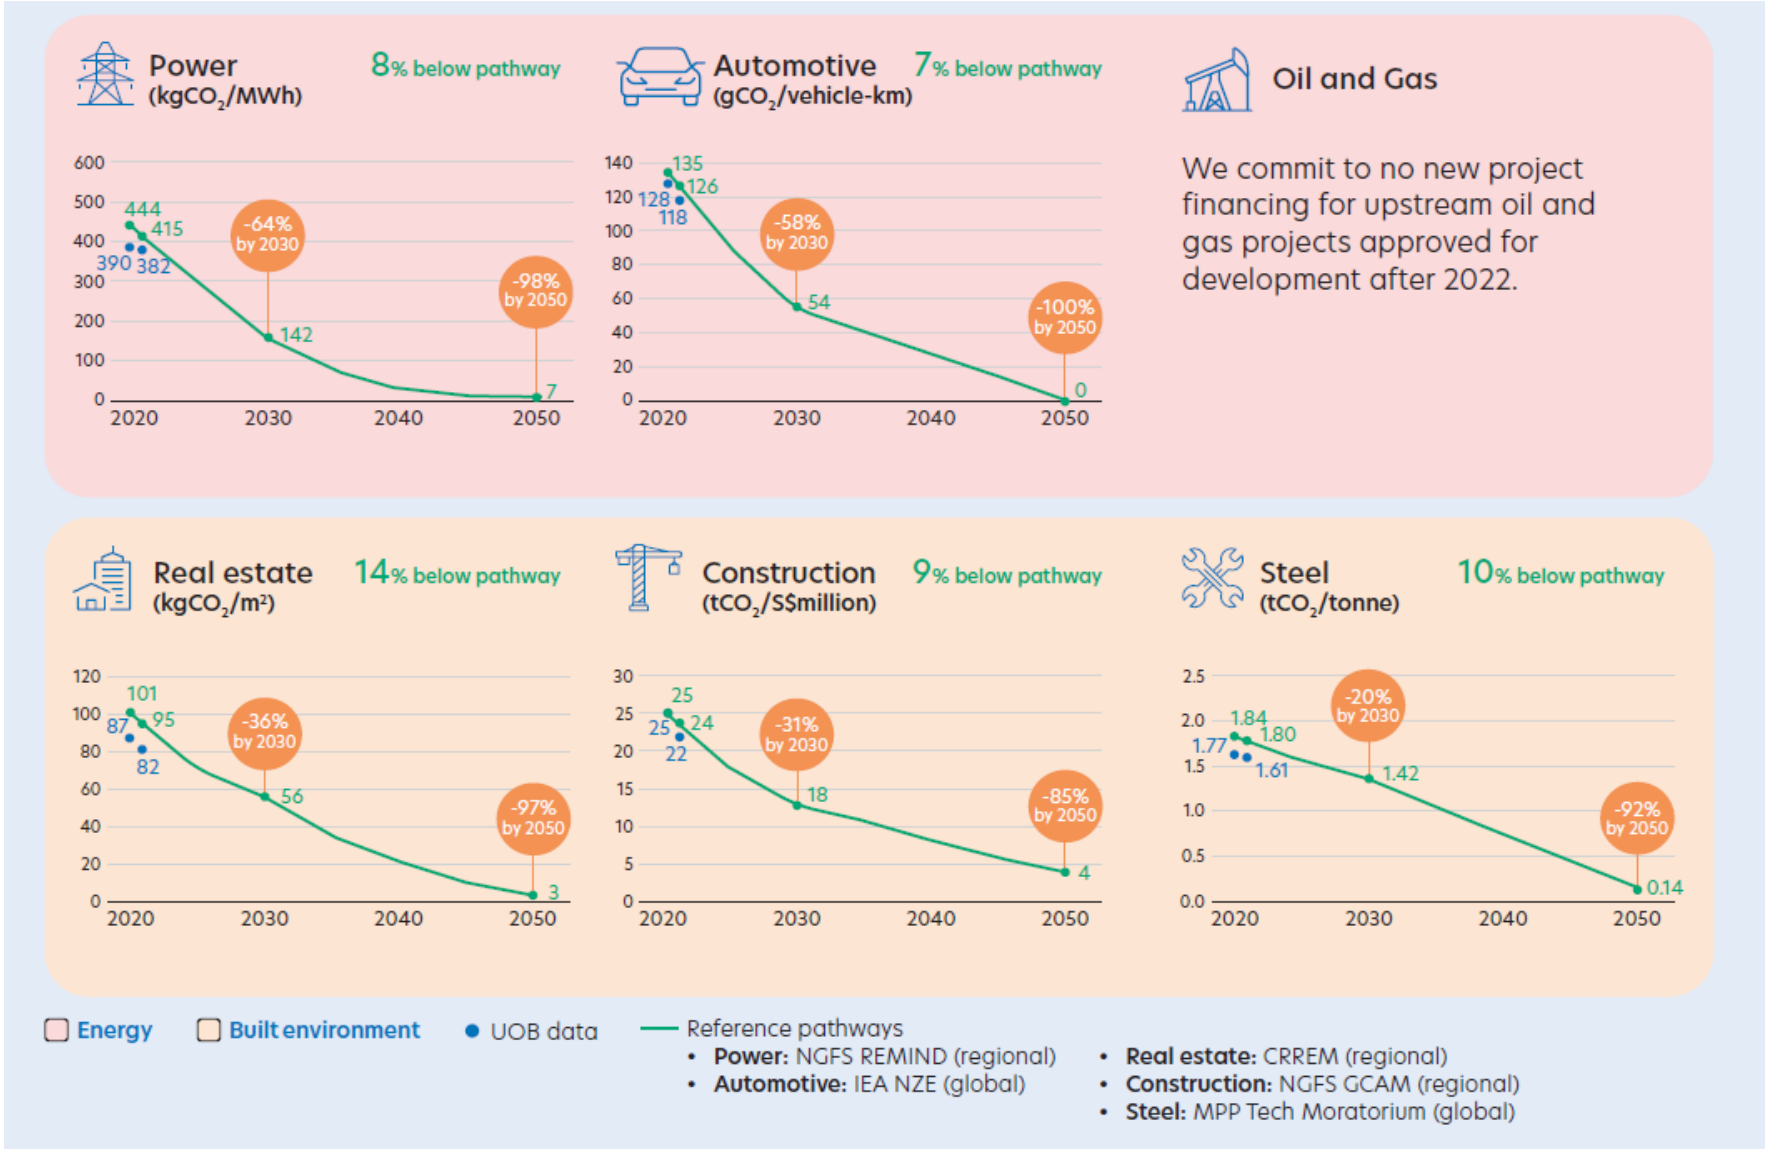

- Significant contributors to GHG emissions regionally: ~73% of global emissions[1]
- Material to UOB's corporate lending portfolio: ~60% of total corporate lending portfolio

Our commitments were defined in line with guidance by the Net Zero Banking Alliance (NZBA) and the Glasgow Financial Alliance for Net Zero (GFANZ)

Source: 1) Our World in Data
