

**ATTILAN DIVERSIFIED INTO EDUCATION SPACE: GRAND OPENING OF HI-5 HOUSE OF LEARNING PRE-SCHOOL CENTRE**

---

The Company is pleased to announce that the first Hi-5 House of Learning preschool centre has officially opened today at 10 Hoe Chiang Road, #01-03 Keppel Towers, Singapore 089315.

More about Hi-5 House of Learning: We all know and love the children's program Hi-5, but how does that translate into successful Preschool Education? The answer is as simple and effective as the show's songs: Hi-5 House of Learning enables children to learn and sustain their joy of learning, through music and movement. What sets Hi-5 House of Learning apart from other preschools is the unique education model.

Hi-5 House of Learning has developed an inquiry, play-based curriculum that develops higher order thinking skills (executive function) through self-regulation; this encompasses Gardner's and Piaget's theories of child development. Using the strengths of the TV series, HOL will focus on specific Hi-5 movement songs, dances, finger plays, games and rhymes to teach developmentally appropriate topics and subjects for each age group; Pre Nursery, Nursery and the latter age groups (K1 and K2) will be on a more structured program to enable a smooth transition to MOE/ International primary schools.

Datuk Jared Lim, the Managing Director of Attilian, states

*"Hi-5 HOL is a fun-filled platform for young children to enjoy and discover all aspects of learning. On screen, Hi-5 projects a buoyant environment that we believe children will learn best. Now, we want to replicate that environment and present it live in the classroom. In Hi-5 HOL, children get to live the Hi-5 House experience in their everyday journey discovering the world and themselves."*
