Steady growth of fibre connections

⁽¹⁾ Segment connections comprise, *inter alia*, Point-to-Point, Central Office to Central Office and Central Office to MDF room fibre connections provided to Requesting Licensees

⁽²⁾ This growth was in part due to new connections from end-users switching to higher speed broadband plans but yet to terminate their existing connections for lower speed plans

Key focus for FY25

1. Grow NBAP & Segment connections by supporting deployments related to Smart Nation and cloud-based services
2. Continue to support digitalisation of SMEs by lowering the cost of connections
3. Enhance our Colocation facilities to support the upgrade of the Nationwide Broadband Network to offer up to 10 Gbps per connection
4. Complete the construction of our new Central Office to achieve operational readiness in 2025 to serve the northern part of Singapore
5. Execute our sustainability initiatives and strive for continued and sustained emissions reduction

REVENUE

RAB revenue remained stable, with higher connection numbers¹ despite the revised prices for key services from 1 April 2024.

Overall revenue for Q1 FY25 was lower by \$3.0 million primarily due to lower revenue from ancillary projects (non-RAB revenue).

EBITDA was \$1.8 million lower mainly due to lower non-operating income and higher operating expenses. In Q1 FY24, there was a \$1.1 million one-off gain on disposal of assets included in the non-operating income.

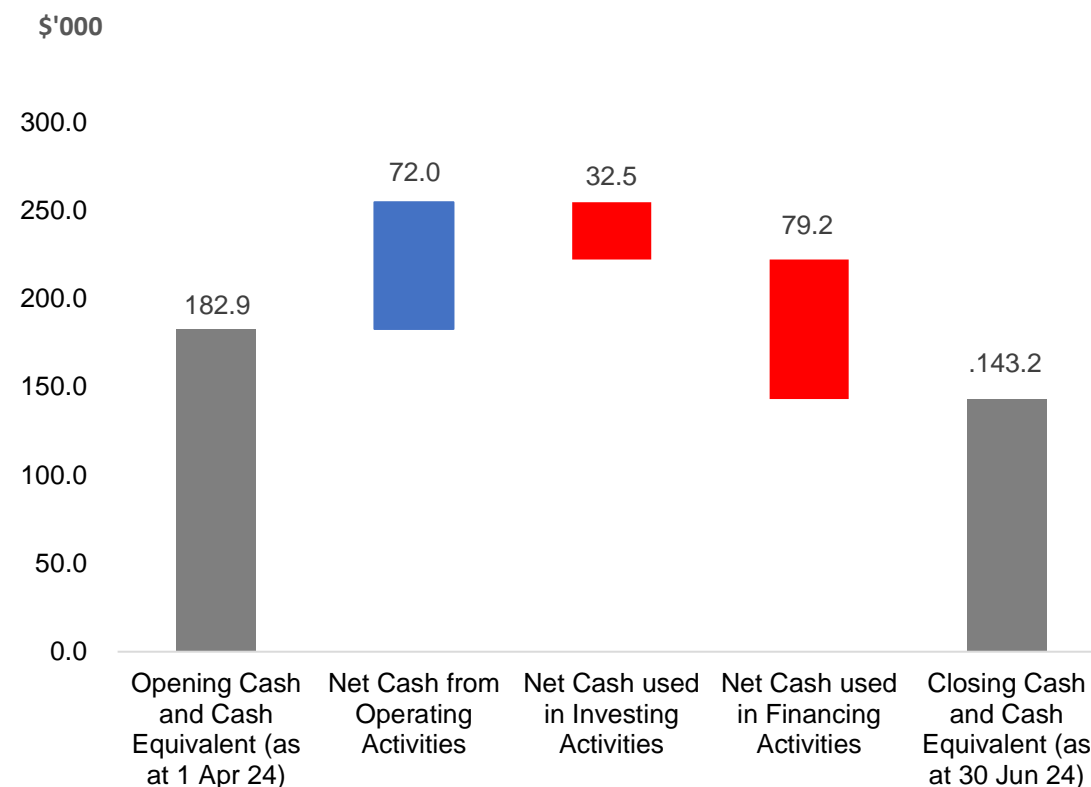

PAT was lower by \$2.6 million mainly due to lower EBITDA, and higher depreciation from a higher asset base.

¹ This growth was in part due to new connections from residential end-users switching to higher speed broadband plans but yet to terminate their existing connections for lower speed plans
