Equity	2,882.1	2,993.2	-111.1	-3.7

Key Points of Financial Results

【Revenue】

- Revenue increased by **64.8 billion yen (up 8.5%)** from the same period of last year to **830.8 billion yen** mainly due to an increase in electrical energy sold.

【Profit】

- Profit **decreased by 0.8 billion yen** from the same period last year **93.4 billion yen** to **92.5 billion yen**.
 - The effect of time lag increased.
(+23.8 billion yen [20.3 billion yen to 44.2 billion yen])
 - Profit excluding time lag decreased.
(-24.7 billion yen [73.0 billion yen to 48.3 billion yen])
- Profit excluding time lag decreased mainly due to a decrease in profit from overseas and renewable energy power generation businesses and the impact of fuel inventory unit prices, despite an improvement in profit from the fuel business.

Factors for Fluctuations in Consolidated Profit

- Profit excluding time lag decreased mainly due to a decrease in profit from overseas and renewable energy power generation businesses and the impact of fuel inventory unit prices, despite an improvement in profit from the fuel business.

(Reference) : JERA's Value Chain and Segment

- JERA owns the entire supply chains for fuel and thermal power generation, from fuel upstream business (development of gas fields) to transportation and storage (fuel terminal operation) to power generation and wholesaling.
- We have three business segments; "Fuel business" for investment in fuel upstream, transportation and trading business, "Overseas power generation and renewable energy business" for investment in overseas power generation and domestic and overseas renewable energy business, and "Domestic thermal power generation and gas business" for sales of electricity and gas in Japan.

FY2025 Forecast

- Profit excluding time lag is expected to be around 200 billion yen, while time lag profit is projected to be 30 billion yen, with a total profit of around 230 billion yen. (No change from the previous forecast)
- Results may fluctuate due to changing trends in fuel markets and other factors.

Image of Time Lag (FY2024/1Q – FY2025/1Q)

12

- Time lag is profits and losses due to the time difference between changes in fuel prices and their reflection in sales prices.
- The impact on profits and losses will be neutral in the medium to long term.

JERA Announces Milestone Agreements with U.S. Partners to Secure Up to 5.5 Million Tonnes of New Long-Term LNG Supply

- The U.S.-sourced LNG under this destination-free FOB contract allows flexible response to power supply and demand fluctuations and is expected to enhance Japan's energy security.
- Procurement through long-term contracts not only ensures a stable physical supply of LNG but also contributes to stabilizing procurement prices.
- We will continue to build a well-balanced LNG portfolio by diversifying procurement from the Middle East, Asia, Australia, the United States, and other regions, thereby spreading regional risks.

Overview of each segment

Fuel Business: Fuel Upstream / Transportation Business

- LNG Demand has increased in Europe and Asia. JERA participates in LNG upstream projects and JERA's transaction volume is the world's largest class (FY2024: Approximately 35 million tons in JERA Group). JERA diversifies procurement risk secures by building portfolio which makes JERA acquire the procurement market information and the trend.
- Additionally, JERA owns fuel carriers for highly consistent, flexible, and competitive fuel supply.

Fuel Business: Fuel Trading Business

18

- JERAGM has offices in Singapore (HQ), UK, US, and Japan. Approximately 300 employees engage in asset-backed trading.
- With the global trading network, JERAGM supplies LNG and coal to power plants in Japan. Leveraging this commercial flow, JERAGM has succeeded in achieving both fuel supply stability and the expansion of profits by capturing business opportunities through markets and third parties.
- JERAGM's operation is under the governance of the Board of Directors elected by shareholders.

Domestic Thermal Power and Gas Business: Progress of Replacement of Thermal Power Plants in Japan

19

Domestic Thermal Power and Gas Business: Composition of Power Sources

- 79% of our power source is LNG, as low CO₂ emissions.
- Almost of JERA's coal thermal power plants consist of ultra super critical power generation system (USC) with high efficiency. JERA is going to shut down all inefficient coal thermal power plants, Non-USC Plants by 2030*¹.

Composition of Power Sources*²

Fuel	Capacity (Generator output)
Coal (USC)	10.32 GW (8.92 GW)
LNG* ³	46.29 GW
Oil	2.00 GW

Progress of JERA Zero CO₂ Emissions 2050

JERA Zero CO₂ Emissions 2050: Roadmap for its Business in Japan

25

- JERA established “JERA Zero CO₂ Emissions 2050 Roadmap for its Business in Japan”, including four initiatives.

*Reduce carbon emission intensity of thermal power plants by 20% based on the long-term energy supply-demand outlook for FY2030 as set by the government

Efforts to Achieve Zero CO2 Emissions in JERA's Value Chain

- JERA participates in business throughout the value chains, from fuel upstream development, transportation, and storage and to the power generation and electricity sales. JERA is working with many countries and companies around the world to achieve zero emissions at each stage.

Initiatives for Ammonia Substitution

- Under the Green Innovation Fund Project, titled 'Fuel Ammonia Supply Chain Establishment Project / Development and demonstration of ammonia high-ratio co-firing and single-fuel firing technology for coal-fired power plant,' we aim to conduct a full-scale demonstration with an ammonia substitution rate of over 50% by fiscal year 2030.

Initiatives for Hydrogen Substitution

- Started joint development of high-efficiency hydrogen generation technology utilizing waste heat using SOEC* developed by DENSO CORPORATION. Joint demonstration tests are scheduled to start in FY 2025 at a thermal power plant in our company.

* SOEC(Solid Oxide Electrolysis Cell):SOECs operate at high temperatures using a ceramic membrane as an electrolyte to electrolyze water vapor and produce hydrogen.

- Received notice of acceptance of “Technology development project aimed at building a competitive hydrogen supply chain”, JERA is developing a catalyst to extract hydrogen from ammonia and evaluating the catalyst and process from the perspective of a power generation company.

Initiatives for CCUS

- A memorandum of understanding was signed for a joint study on building a CCUS value chain at the Yokosuka Thermal Power Station, utilizing CO₂ separation and capture technology based on solid sorbents developed by Kawasaki Heavy Industries, Ltd. Toward the start of demonstration by fiscal year 2030, a comprehensive evaluation of CO₂ separation, capture facilities, and effective utilization will be conducted.

Efforts towards Zero CO2 Emissions(Renewable Energy Development)

- JERA has set a target of 20GW renewable energy development by FY2035, and is widely promoting wind power, solar power, battery storage, etc.

Renewable Energy Development

*¹ Parkwind's equity generation capacity is 0.54GW.

*² JERA's equity generation capacity is approximately 0.11GW.

JERA Zero CO2 Emissions 2050: Actions for Domestic Offshore Wind Power Generation

- JERA was selected as the business operator for an offshore wind power project off in the Sea of Japan Offshore Aomori Prefecture (Southern Side of the Prefecture) on December 24, 2024.

Tsugaru Offshore Wind	
Interconnection Capacity	615MW
Number of Units	41 units
Turbine Model	Siemens Gamesa 15MW
Planned Start of Commercial Operation	June 2030

JERA Zero CO2 Emissions 2050: Agreement to create JERA Nex bp

33

- bp and JERA Nex * have agreed to combine their offshore wind businesses to form a new standalone, equally-owned joint venture that will become one of the largest global offshore wind developers, owners and operators. Preparing to establish JERA Nex bp.

Content of Agreement

- Creating strategic platform for growth, combining high-quality operating and development offshore wind assets, with total 13GW potential net generating capacity.
- Building on history of partnership and combining complementary expertise, standalone 50:50 venture initially to progress existing advanced developments from extensive portfolio.
- Agreed funding model to support highly disciplined, capital efficient growth, including accessing competitive financing, portfolio optimisation, and defined capital investment plans from partners.

* JERA's renewable energy business subsidiary

JERA Cross provides decarbonization solutions for corporate green transformation.

- JERA has established JERA Cross with the aim of combining its energy, digital, and business transformation capabilities to accelerate corporate “green transformation” (GX) .
- Integrated support for companies from designing their future vision and strategy for the GX, to the development and supply of renewable energy and other energy sources.
- JERA Cross will also provide a stable supply of “24/7 carbon free electric power”^{*1} contribute to solving client issues.

(As of June 30,2025)

JERA provides decarbonization solutions

Company	Solution	Start Date	Power Generation	remark
Toho Co., Ltd.	Offsite corporate PPA	November, 2024 ^{*2}	Hydrogen and solar	First commercial use of electricity generated by zero-emission thermal power that burns hydrogen exclusively in Japan ^{*3} Aiming to achieve 24/7 carbon-free power in the future
AIN Holdings Inc.	Offsite corporate PPA	December, 2024	Solar	Utilizing JERA's solar power generation facilities. The first off-site corporate PPA for AIN Group
Tokyo Metro Co., Ltd.	Solar virtual PPA ^{*4}	December, 2024	Solar	Non-fossil certificates (environmental value) generated by JERA's solar power generation facilities are provided through JERA Cross.
East Japan Railway Company	Offsite corporate PPA	February,2025	Solar	JERA Cross acts as an aggregator to supply the electricity generated by JERA's solar power generation facilities to Atré Oimachi and Lumine Yokohama via JR East Trading, a retail electricity provider.
PRESTIGE International Inc.	Offsite corporate PPA	March,2025	Solar	An off-site corporate PPA was introduced using JERA's solar power facilities to supply electricity to six BPO office locations operated by Prestige.
KOSHIDAKA Co., LTD	Offsite corporate PPA	April,2025	Solar	An off-site corporate PPA was introduced using JERA's solar power facilities to supply electricity to karaoke stores operated by Koshidaka.

^{*1} A name for electricity that emits no CO2 twenty-four hours a day, seven days a week, 365 days a year. In accordance with the Ministry of Economy, Trade and Industry's “Guidelines for Retail Sales of Electricity,” this means providing 100% of the electricity supply from CO2 zero-emission sources, including the environmental value derived from the use of non-fossil certificates. This does not mean that CO2 is not emitted during the life cycle of fuel production and transportation, etc.

^{*2} We have started commercial use of electricity generated by zero-emission thermal power that uses hydrogen as its sole fuel. (In addition to hydrogen power generation, Toho Studios has also introduced electricity supply from JERA's solar power generation facilities.

^{*3} Research by JERA

^{*4} Customers can virtually procure the environmental value of renewable energy by non-fossil certificates.
