Income Statement

Profit after tax for the half year ended 31 December 2017 was US$29.0 million, an increase of 18% compared to US$24.5 million in the previous corresponding period. The following review sets out the factors that affected profit after tax for the period:

Revenue
Revenue was 1% higher than previous corresponding period due mainly to the strengthening of GBP and AUD against USD.

Hotel revenue was lower in GBP terms as a result of fewer rooms available for sale due to the refurbishment of the Cumberland Hotel during the period. However, this was offset by the strengthening of GBP against USD by 4.5% compared to last year.

Gaming and oil & gas segments continue to generate lower revenue compared to previous corresponding period. This was mainly due to lower gaming drop and lower oil & gas production during the period. However, the impact was offset by the strengthening of GBP and AUD against USD.

Cost of sales
The increase in cost of sales was associated with the strengthening of GBP against USD during the period.

Other operating income
The increase in other operation income was due to the a recovery of legacy loan which has been written off previously.

Administrative expenses
The increase in administrative expenses for the half year was principally attributable to higher business operating cost in the hotel segment as well as the strengthening of GBP against USD.

Other operating expenses
The decrease in other operating expenses was mainly due to the assets written off and the settlement of a legal claim against a subsidiary in the United Kingdom which provided a guarantee to a third party in relation to a hotel property previously leased and operated by another subsidiary in the previous corresponding period.

Net financing costs
Higher financing costs for the period were due to higher interest cost from an interest rate hedging contract.

Income tax expense
Higher income tax expense was associated with higher earnings from the hotel segment.

Statement of Comprehensive Income

Total comprehensive income for the half year was US$62.6 million. This included a net foreign exchange gain of US$32.2 million as a result of translating the financial statements of the Group's UK subsidiaries which are denominated in GBP into the Group's presentation currency, which is USD. As at the end of 31 December 2017, GBP appreciated by 4% against USD as compared to 30 June 2017.

Statement of Financial Position

The Group's net assets before non-controlling interests increased by 4% from US$1,049.8 million as at 30 June 2017 to US$1,091.9 million as at 31 December 2017. This was mainly attributable to the net foreign exchange translation gain referred to above.

Excluding the effects of currency translation, other significant factors that affected the Group's net assets as at 31 December 2017 were as follows:

a) Trade and other receivables – decrease was primarily due to lower prepayment for the hotel segment during the period.
b) Development properties – increase was due to land improvement during the period.
c) Cash and cash equivalents – increase was due to the receipt of net operational income and oil and gas royalty income after netting off capital expenditure and dividend payment during the period.
d) Trade and other payables – decrease was due to scheduled settlement of creditor balances and timing differences on suppliers' billing.
e) Corporate tax payable – increase was mainly due to tax provision from the hotel earnings and oil & gas royalty during the period.
f) Derivative financial liability – decrease was mainly due to fair value adjustment for interest rate swap contract.

Statement of Cash Flows

Higher net cash inflow of US$8.9 million at the end of the period compared with net cash outflow of US$0.8 million in the previous corresponding period. This was primarily due to higher receipt from the hotel operational income compared to last year.

9. Where a forecast, or a prospect statement, has been previously disclosed to shareholders, any variance between it and the actual results.

The Group had not previously released any forecast or prospect statements.

10. A commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months

The London hotel market remains soft, and city-wide RevPARs were flat or have fallen on a year-on-year basis. Factors such as uncertainties over Brexit and an increase in London room supply continue to affect the UK hotel industry. Our London hotels continue to operate in a challenging environment due to increasing operating costs and stagnant demand. The market is not expected to grow significantly and the Group maintains a cautious outlook.

The refurbishment of The Cumberland Hotel is progressing in stages and is on track to be launched as Hard Rock Hotel London in the next financial year. The Group's total rooms available for sale will be affected during this refurbishment period.
