3. Use of estimates and judgements

In preparing the condensed interim financial statements, management has made judgements, estimates and assumptions that affect the application of accounting policies and the reported amount of assets and liabilities, income and expenses. Actual results may differ from these estimates.

The key judgements made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that were applied in the consolidated financial statements for the year ended 31 December 2023. The following are the critical judgements (apart from those involving estimates covered below) that management has made in the process of applying the Group's accounting policies and which have a significant impact on the amount recognised in the consolidated financial statements:

Going concern

As at 31 December 2024, the Group is in a net current liabilities and net liabilities position of S\$2,358,000 and S\$409,000 respectively and the Group had incurred a loss before tax of S\$1,639,000 and a cash outflow in operating activities of S\$1,186,000, which may cast significant doubt on the Group's ability to continue as a going concern.

In assessing the appropriateness of the going concern assumptions of the Group, the management is of the view that the use of the going concern assumption to prepare the financial statements is appropriate based on the following factors:

- (a) management of the Group have carried out a detailed review of the cash flow forecast of the Group for the next 15 months after the end of the financial year;
- (b) the Group has, as announced on 4 April 2025 and disclosed in Note 23 below, disposed of three (3) loss-making subsidiaries;
- (c) the Group's ability to generate sufficient cash flows from its continuing operations in its Insurtech business;
- (d) the loan agreement from the lender as announced by the Group on 13 February 2025, strengthening the financial position of the Group;
- (e) the Group's implementation of cost reduction measures and streamlining of its business to manage cost; and
- (f) management is actively pursuing new business opportunities and corporate actions as well as fund raising options, including that funds have been raised from the placement as announced by the Group on 22 April 2025 and as disclosed in Note 23 below.

Notwithstanding the above, the Directors acknowledge that a material uncertainty exists that may cast a significant doubt on the Group's ability to continue as a going concern, which is highly dependent on the realization of the factors above to meet its debt obligations and working capital requirements.

Should the Group be unable to discharge their liabilities in the normal course of business which may lead to the Group being unable to continue in operational existence for the foreseeable future, adjustments may have to be made to reflect the situation that assets may need to be realised other than in the normal course of business and at amounts which could differ significantly from the amounts at which they are currently recorded in the statements of financial position. In addition, the Group may need to reclassify non-current assets and non-current liabilities to current assets and current liabilities respectively. No such adjustments have been reflected in these consolidated financial statements.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revision to accounting estimates are recognised in the period in which the estimates were revised and in any future period affected.

Allowance for impairment loss of trade receivables

The Group determines expected credit losses on trade receivables from third parties by making individual assessment

of expected credit loss (“**ECL**”) for long overdue balances and using a provision matrix based on the Group’s historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date, including time value of money where appropriate.

Notwithstanding the above, the Group evaluates the ECL on customers in financial difficulties separately. As at 31 December 2024, no allowance for expected credit losses was made as at 31 December 2024 and 31 December 2023.

Prospect statement

The Group has not issued any prospect statement or forecast.

Commentary at the date of announcement of the significant trends and competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months

On 8 October 2024, the Company obtained approval from shareholders to diversify its business into the area of F & B retail business, involving the operation of restaurants and food stalls serving F & B, food catering business for corporate and private events, and the business of trading and distribution of F & B products. However, as the financial performance of the F & B retail business had not been as initially anticipated, the Group has on 4 April 2025 disposed of its indirect subsidiaries in F & B retail and decided to re-focus its resources and efforts on its existing Insurtech business, which continues to be revenue-generating.

Following the Disposal of Subsidiaries and the 2025 Placement, the Group has strengthened its financial position and raised funds to be utilised by the Group as general working capital, thus alleviating its tight cashflow position. Barring unforeseen circumstances, the Company is of the view that its financial position will continue to be strengthened over the next few months with the Disposal of Subsidiaries and a re-focus of efforts on its existing Insurtech business.
