#### **Headline Commentary**

- Despite a challenging price environment, the Group has recorded an improved gross profit per MT mainly due to the improvements in our Ivory Coast operations, as well as the positive impact from changes in selling strategy in HRC Group.
- However, it was offset by the compression in latex margins in CMC Group and lower cost absorption as a result of wintering season in our plantations.

# Segmental Performance

## Halcyon Rubber Company (HRC)

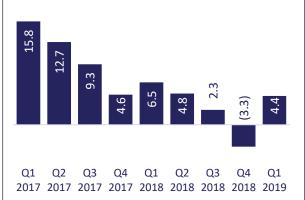

### Sales Volume (mT)<sup>1</sup>

#### Gross Profit/(Loss) (US\$m)

#### Op. Profit/(Loss)<sup>2</sup> (US\$m)

- As the price declined steadily, the imposition of Agreed Export Tonnage Scheme (AETS) in Q1 2018 has resulted in drastic drop in sales volume and revenue.
- Subsequent to expiry of AETS, while the revenue and GP climbed back up temporarily, the effect of margin compression from long term contracts has resulted a gross loss in Q4 2018.
- Recovery in gross profit due to changes in sales strategy as well as deliberate cutback of volumes as the Group prepares for transition into HeveaConnect.

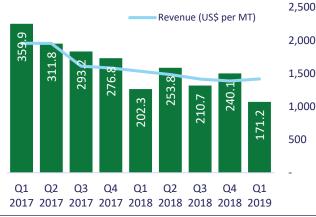

<sup>1</sup>Includes intersegment figures

<sup>2</sup> Adjusted for management fees

\* The Group's Ivory Coast operations has been recessed to SINRIO Group effective 1 Jan 2019, and the relevant financials have been readjusted to that effect..

### SINRIO

### **Op.** Profit/(Loss)<sup>2</sup> (US\$m)

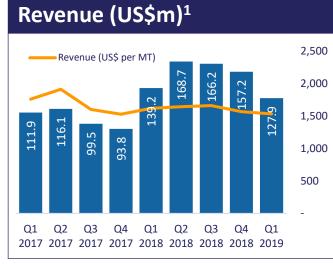

- Shipment delays from Thai suppliers have created a negative knock on effect on sales as well as causing incurrence of additional costs. This had resulted in operating loss for Q2 2017.
- The impact of AETS has limited the output in Q1 2018, thus reducing the gross profits for the segment.
- The temporary cessation of operations in our lvory Coast factories has effectively negated the profits generated by our Thailand, China and Malaysia businesses.
- Following the improvements in Ivory Coast operations, the segment has returned to profitability in Q1 2019.

- It resulted in the segment recording 3 consecutive profitable quarters in FY2018 despite erratic movements in the Euro vs USD, before closing Q4 2019 near breakeven due to additional accruals for retirement benefits in Cameroonian operations.
- The effects of margin compression for latex products as well as wintering in our plantations has resulted in decrease of gross profit and increase of operating losses in Q4 2018 & Q1 2019.
