

Distributorship Announcement

Sen Spirit Technology Strengthens the Market Presence of Cato Networks in Asia with Hong Kong and Macau Distributorship

Sen Spirit Technology Limited (SST), one of the wholly owned subsidiary of SGX Mainboard-listed Karin Technology Holdings Limited (KTHL), has announced the widening of its enterprise network and security portfolio with the rights to distribute Cato Networks (Cato) in Hong Kong and Macau. Being a major IT value-added distributor, Sen Spirit Technology now provides its reseller channels with Cato's next-generation network services with cloud-based integration of network and security.

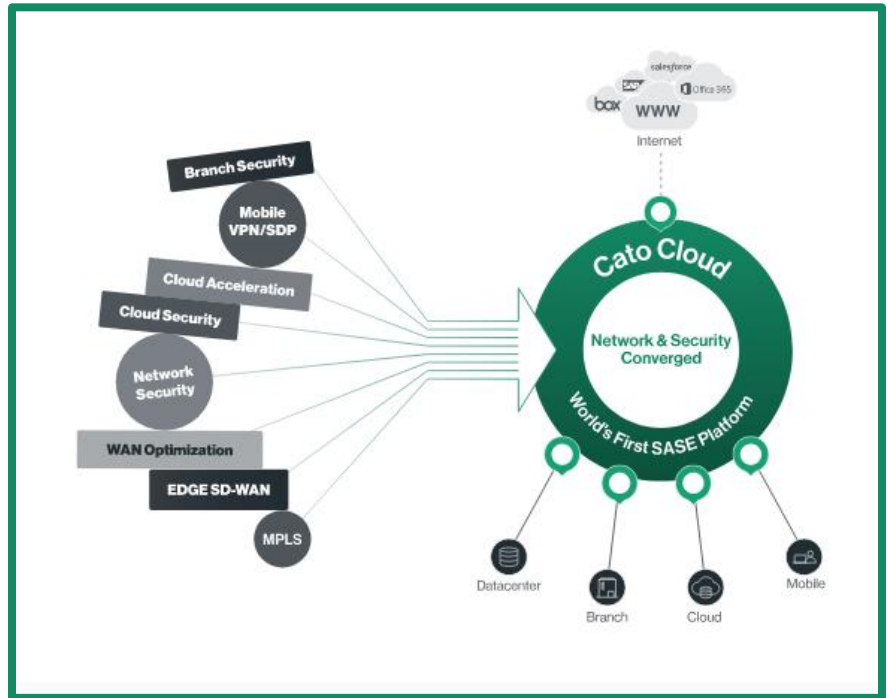

Cato is the first true implementation of Gartner's Secure Access Service Edge ([SASE](#)) framework that describes an architecture that converges SD-WAN and network security for all enterprise "edges" into the cloud. Cato was [recognized](#) as a "Sample Vendor" in the SASE category of Gartner's Hype Cycle for Enterprise Networking, 2019.

With Cato, enterprises in Hong Kong, Macau, and worldwide can use one network to connect and secure all of their locations as well as their remote and mobile users. Tens of thousands of workers rely daily on Cato's remote access and mobility solutions to securely access the company network and the Internet. Now more than ever, it's essential that employees can easily and securely work from home while having high-performance access to their normal business applications. Cato's mobility solutions are keeping people productive while they are working safely from home.

Daniel Lee, Vice President of APJ in Cato Networks commented on the new Distributorship in Hong Kong and Macau:

“Cato Networks is pleased that Sen Spirit Technology is joining as our new Hong Kong and Macau distributor. Sen Spirit Technology’s mission to improve productivity and quality of life on a secure platform is the basis for a well-established future. This is in line with Cato's goal of providing enterprises with a single, global SASE platform to address all of their networking and security challenges from [MPLS migration to SD-WAN](#) and [Optimized Global Connectivity](#) to [Secure Branch Internet Access](#), [Cloud Acceleration and Control](#), and particularly relevant today, [Work from Home](#) and [Mobile Security and Optimization](#). ”

Michael Ng, Executive Director of Karin Group commented: “Sen Spirit Technology has been distributing enterprise solutions in network, security, and cloud in Hong Kong and Macau, delivering and supporting a wide channel of resellers and global partners. By having Cato Networks on board, Sen Spirit Technology can offer solutions based on Cato, the world's first SASE platform to companies that are considering network security enhancement for telework and companies that have multiple bases.”

About Cato Networks

Cato is the world’s first SASE platform, converging SD-WAN and network security into a global, cloud-native service. Cato optimizes and secures application access for all users and locations. Using Cato, customers easily migrate from MPLS to SD-WAN, optimize connectivity to on-premises and cloud applications, enable secure branch Internet access everywhere, and seamlessly integrate cloud datacenters and mobile users into the network with a zero-trust architecture. With Cato, the network, and your business, are ready for whatever’s next. www.CatoNetworks.com
