## The operating results for June 2023 are given in the table below.

## Glossary:

Available seat-km = Number of available seats x distance flown (in km)

Revenue passenger-km = Number of passengers carried x distance flown (in km)

Passenger load factor = Revenue passenger-km expressed as a percentage of available seat-km

Gross capacity = Cargo capacity production (in tonnes) x distance flown (in km)

Cargo load = Cargo and mail load carried (in tonnes) x distance flown (in km)

Cargo load factor = Cargo and mail load (in tonne-km) expressed as a percentage of gross capacity (in tonne-km)

## JUNE 2023 OPERATING RESULTS

In June 2023, the Singapore Airlines (SIA) Group saw strong passenger traffic and load factors across all route regions. This was due to the robust demand for air travel during the mid-year school holidays and the start of the summer travel season.

The SIA Group passenger traffic grew 34.8% year-on-year, outpacing the capacity expansion of 27.2% compared to a year ago. Consequently, the Group's passenger load factor (PLF) increased 5.1 percentage points year-on-year to reach a monthly record of 90.6%. SIA and Scoot posted record monthly PLFs of 89.7% and 93.6% respectively. Both airlines carried a combined 2.9 million passengers (+50.4% year-on-year) during the month.

Cargo operations posted a load factor of 51.6%, or 13.0 percentage points lower year-onyear. Cargo loads declined by 14.9% year-on-year due to weaker demand, while capacity expanded by 6.6% as increased passenger services resulted in higher bellyhold capacity.

During the month, Scoot resumed services to Changsha and Wuhan. At the end of June 2023, the Group's passenger network<sup>1</sup> covered 116 destinations in 36 countries and territories. SIA served 74 destinations, while Scoot served 65 destinations. The cargo network<sup>1</sup> comprised 121 destinations in 38 countries and territories.
