Tokyo, July 29, 2026—Nomura Holdings, Inc. today announced its consolidated financial results for the first quarter of the fiscal year ending March 31, 2027.

Net revenue for the first quarter was 686.7 billion yen (US\$4.2 billion)¹, increasing 19 percent quarter on quarter and 31 percent year on year. Income before income taxes increased 96 percent from last quarter and 32 percent compared to the first quarter last year to 211.5 billion yen (US\$1.3 billion). Net income attributable to Nomura Holdings shareholders was 145.6 billion yen (US\$895 million), up 97 percent quarter on quarter and 39 percent year on year.

“Our fiscal year is off to a very strong start. In the first quarter, ROE was 15.4 percent and pretax income from our four business divisions was 213.0 billion yen. This represents solid progress toward our new 2030 targets of ROE of 10 to 12 percent or more and annual pretax income of at least 750 billion yen,” said Kentaro Okuda, Nomura President and Group CEO.

“In our Wealth Management Division, recurring revenue, recurring revenue assets, and net inflows into recurring revenue assets all hit record highs as our asset management business gained traction. Asset purchases were also strong, mainly in investment trusts and discretionary investment contracts, and the recurring revenue cost coverage ratio rose to 76 percent.

“In Investment Management, assets under management reached an all-time high of 156 trillion yen. The division had its best quarterly performance, underpinned by higher management fees in Japan and overseas, as well as inflows into a newly launched active emerging market equity fund managed by Nomura Asset Management International.

“In Wholesale, our continued focus on stability, growth, and diversification bore fruit. The operating leverage that came from revenue growth helped to improve our cost-to-income ratio, resulting in record Wholesale net revenue and pretax income. Global Markets net revenue reached a new high, mainly driven by Equities, and Investment Banking’s first-quarter net revenue exceeded 50 billion yen for the first time.

This translation should not be construed to imply that the yen amounts actually represent, or have been or could be converted into, equivalent amounts in US dollars.

“In our Banking Division, growth in loans outstanding and investment trust balances helped drive net revenue and pretax income higher quarter on quarter. The launch of our deposit sweep service also helped deepen collaboration with Wealth Management, and contracts and deposit balances grew steadily.

“These results reflect the transformation of our business model, the strengthening of our platform in Japan and overseas, and closer collaboration across the group.

“We will continue to grow revenues in each division, enhance cross-divisional synergies, drive company-wide structural reforms, and maintain disciplined capital allocation as we pursue our 2030 management vision of Reaching for Sustainable Growth.”
