February 2025

Important Notice

This presentation shall be read in conjunction with Mapletree Industrial Trust's ("MIT") financial results for Third Quarter Financial Year 2024/2025 in the SGXNET announcement dated 22 January 2025.

This presentation is for information only and does not constitute an offer or solicitation of an offer to sell or invitation to subscribe for or acquire any units in Mapletree Industrial Trust ("Units").

The past performance of the Units and MIT is not indicative of the future performance of MIT or Mapletree Industrial Trust Management Ltd. (the "Manager").

The value of Units and the income from them may rise or fall. Units are not obligations of, deposits in or guaranteed by the Manager or any of its affiliates. An investment in Units is subject to investment risks, including the possible loss of the principal amount invested. Investors have no right to request the Manager to redeem their Units while the Units are listed. It is intended that unitholders may only deal in their Units through trading on the Singapore Exchange Securities Trading Limited ("SGX-ST"). Listing of the Units on the SGX-ST does not guarantee a liquid market for the Units.

This presentation may also contain forward-looking statements that involve risks and uncertainties. Actual future performance, outcomes and results may differ materially from those expressed in forward-looking statements as a result of risks, uncertainties and assumptions. Representative examples of these factors include general industry and economic conditions, interest rate trends, cost of capital, occupancy rate, construction and development risks, changes in operating expenses (including employees wages, benefits and training costs), governmental and public policy changes and the continued availability of financing. You are cautioned not to place undue reliance on these forward-looking statements, which are based on current view of management on future events.

Nothing in this presentation should be construed as financial, investment, business, legal or tax advice and you should consult your own independent professional advisors.

¹ Unless otherwise stated, an illustrative exchange rate of JPY111.74 to S\$1.00 is used in this presentation.

² The balance of the Purchase Consideration will be funded by the Sponsor, Mapletree Investments Pte Ltd.

³ Based on the independent valuation of JLL Morii Valuation & Advisory K.K. as at 31 Jul 2024 using cost approach and income capitalisation approach.

⁴ Comprises the Effective Consideration, the acquisition fee to the Manager for the Proposed Acquisition, the estimated professional and other fees and expenses incurred or to be incurred by MIT in connection with the Proposed Acquisition.

⁵ The current lease is a traditional regular lease (*futsu-tatemono-chintaishaku*) with an option to renew exercisable by the tenant.

In line with MIT's portfolio rejuvenation and rebalancing efforts

Future redevelopment opportunity with value creation potential

- ✦ The Property is within a network-dense location in Tama district, West Tokyo
- ✦ Data centres are concentrated in Greater Tokyo (72%)¹, with demand projected to grow at a CAGR of 9.3% from 2023 to 2033F²
- ✦ Absorption of significant capacity by cloud service providers through wholesale colocation and build-to-suit projects
- ✦ Expansion of end-users and data centre operators into new data centre clusters such as West Tokyo in view of constraints of land and power and need for greater latency
- ✦ Benefit from robust demand for data centres, tight supply and limited development opportunities in West Tokyo

Proactive Asset Management

Three-pronged approach to managing the impact of vacancies in North American data centres

- ✦ Properties are located predominantly in primary data centre markets in North America
- ✦ Leased to diverse tenant types with a WALE of 6.2 years
- ✦ To manage impending lease expirations, the Manager will engage the tenants ahead of their renewals, prospect tenants from various sectors, reposition or even divest properties
- ✦ Stability of Singapore and Japan Portfolio cushions headwinds from North American Portfolio

RELETTING

- **Engaging tenants ahead of renewals**

Extended lease at 8011 Villa Park Drive, Richmond

- **Backfilling vacant spaces with high-quality tenants on long-term leases**

Secured replacement tenant at 402 Franklin Road, Brentwood for a 30-year lease

76% of expiring North American leases in FY23/24 & FY24/25 had been renewed / leased

REPOSITIONING

- **Pursuing DPU-accretive redevelopment or repositioning of properties**

Factors to consider

- Impact to distributions and long-term returns
- Impact to portfolio quality

REBALANCING

- **Divesting non-core properties**

Divestment of data centre in Michigan (19675 West Ten Mile Road, Southfield)

- **Diversifying geographically**

² Includes the distribution of compensation received for compulsory acquisition of part of the land at 2 and 4 Loyang Lane of S\$2.1 million withheld in 3QFY21/22 over two quarters from 2QFY23/24 to 3QFY23/24.

³ Includes the distribution of net divestment gain of S\$4.2 million from 65 Tech Park Crescent over two quarters from 2QFY23/24 to 3QFY23/24. 65 Tech Park Crescent was divested on 20 Jul 2017.

✦ Net property income increased due to

- higher contributions from Osaka Data Centre and the newly acquired mixed-use facility in Tokyo; and
- new leases and renewals from the Singapore and North American Portfolios;
- partially offset by loss of income from the divestment of Tanglin Halt Cluster and non-renewal of leases

✦ Borrowing costs decreased due to

- repayment of loans with proceeds from divestment of Tanglin Halt Cluster; and
- lower interest on unhedged floating rate loans;
- partially offset by higher borrowing costs in relation to the Japan Portfolio

✦ Distribution declared by joint venture decreased due to

- higher borrowing costs from repricing of matured interest rate swaps

OUTLOOK AND STRATEGY

DEMAND AND SUPPLY FOR MULTI-USER FACTORIES

DEMAND AND SUPPLY FOR BUSINESS PARKS

- ✦ Total stock for factory and business park space: 41.6 million sq m
- ✦ Potential net new supply of 0.7 million sq m in 2025¹, of which
 - Multi-user factory space accounts for 0.2 million sq m
 - Business park space accounts for 0.2 million sq m
- ✦ Median rents for industrial real estate for 4Q2024¹
 - Multi-user Factory Space: S\$2.40 psf/mth (1.3% q-o-q)
 - Business Park Space: S\$4.24 psf/mth (1.0% q-o-q)

NORTH AMERICAN COLOCATION DATA CENTRE LIVE SUPPLY, TAKE-UP AND CONTRACTED CAPACITY

World's largest data centre region with robust growth

- ✦ Comprised about 44.7% of the global live IT capacity⁴, with the United States taking up the largest share at 42.5%
- ✦ Steady growth in supply and take-up of colocation data centre space at an average of 12.4% and 14.6% y-o-y between 2018 and 2023 respectively
- ✦ Poised for expansion due to increasing demand for cloud services and adoption of generative artificial intelligence and machine learning applications
- ✦ Power supply constraints pose a key challenge in established data centre markets such as Northern Virginia. Regions with available power, especially from renewable sources, are prioritised by operators and cloud service providers. This has led to the spillover demand in secondary data centre markets, underpinned by the cloud service providers' decentralised strategy to set up cloud zones close to end users in edge deployments

Challenging operating environment in view of global uncertainties

- ✦ Global growth is expected to hold steady at 2.7% in 2025 and 2026¹. Numerous risks such as policy uncertainty, persistent inflation and escalation of geopolitical tensions remain
- ✦ Increasing property operating expenses and elevated borrowing costs could continue to exert pressure on distributions. The Manager will adopt cost-mitigating measures and focus on tenant retention to maintain a stable portfolio occupancy level as well as prudent capital management to balance the risks and costs in the uncertain macroeconomic environment

Singapore

- Singapore economy grew by 4.4% in 2024, faster than the 1.8% growth in 2023. MTI maintained the GDP growth forecast for 2025 at “1.0% to 3.0%”²
- Business sentiment rose moderately for the sixth consecutive quarter in the first quarter of 2025. This was largely due to the optimism within the construction, transportation and financial sectors. Local businesses remained cautiously optimistic despite the rising geopolitical tensions³

North America

- According to CBRE⁴, the demand for data centre capacity in North America is expected to continue growing in 2025, driven by digital services, cloud computing, artificial intelligence and 5G deployment. Average vacancy rates for primary markets fell to a record-low 2.8% in 2024. With preleasing rates rising to 90% or more, demand is expected to outpace supply despite record construction activity. 4,750 megawatts of data centre capacity is estimated to be under development in primary markets in 2025.
- While the demand for modern data centre facilities continues to surge, construction periods remain extended due to significant power shortages and a lack of skilled technical labour. To address power shortage issues, CBRE expects the data centre industry to adopt solutions such as on-site power generation, power-sharing agreements with local utilities, conversion of legacy coal plants to renewable energy production and a renewed focus on nuclear power generation. Secondary markets⁵ will witness more data centre expansions as the lack of power and land limits new developments in primary markets.

Japan

- Japan is Asia's second largest data centre market. It is expected to grow from approximately 2.0 gigawatt ("GW") in 2024 to 4.0GW by 2030 at a CAGR of 12%⁶. Over the next two to three years, occupancy rates of data centres in both Greater Tokyo and Greater Osaka are expected to decline due to additional supply. However, demand is expected to remain strong in the medium term. JLL projects occupancy rates to hover between 90% to 95% from 2026 to 2028 in Greater Tokyo and more than 90% in Greater Osaka between 2027 and 2028⁷.
