## Strong EBITDA performance was ahead of expectations, embedding business reset

- 10.8% Normalised EBITDA a strong improvement on prior year, with extended repair scope resulting in a higher average repair price, improved site efficiency and utilisation, in addition to offsetting transitional support
- New and transferred repair capacity has balanced AMA Group capacity with available repair volume
- The relationship with Suncorp is strong with Capital SMART delivering improved end customer outcomes

## Transformational change program continues to gain momentum with customers and team

- New EGM (Stuart Faid) appointed to lead business unit in July 2024
- Good portfolio progress, however impacts of lower industry claims volumes in November and December impacted financial performance in 2Q25. Claims volumes were lower anecdotally on the back of higher excess levels, deferral of claim due to cost of living prioritisation and lower vehicle use. Structural change to address residual network capacity issues was largely completed by end 1H25
- Cultural change continues to gather momentum and insurance relationships improved, which will drive significantly improved financial performance

| Priorities                         | H125 Update                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

## Newly formed Specialist Businesses unit brings focus on key opportunities

- Prestige sites revenue and EBITDA (pre-AASB 16) behind prior year. New contracts due to commence 3Q25<sup>2</sup> are expected to improve performance
- TechRight expansion continues now preliminary trial has been evaluated as a success
- TrackRight transition and expansion is progressing well with performance slightly behind due to the major Dandenong site relocation completed in Dec 24

| Priorities                                                                                                                                 | H125 Update                                                                                                                                                                                                                                                                                                                                                                                    |

## Business continues to improve performance on strong revenue growth

- Sale process update
  - The AMA Board has determined AMA should focus on a pure collision repair business and as such is evaluating divestment options
  - Sale process continues
  - Whilst discussions with interested parties are ongoing, the Company is also assessing alternative strategies to maximize shareholder value which may include a possible demerger / IPO
  - The Company will provide further updates as material developments occur

| Priorities                  | H125 Update                                                                                                                                                                                                                                                                                                                                                         |

# New \$110m Debt Facility

---

- AMA Group has obtained binding credit approved commitments (with agreed commercial terms) from two major Australian banks for debt facilities with a total sum of \$110m, for a 3-year term
- The new debt facilities will pay out the existing debt facilities and provide sufficient funding to support the operational and growth plans of the Group
- The key terms of these facilities are:
  - Total facility of \$110m, comprising \$80m in revolving working capital facilities and \$30m in bank guarantee lines;
  - Term of 3 years;
  - Improved overall cost of funds when compared with the current facilities (a reduction of 300bps – 350bps);
  - With a suitable covenant structure that AMA can operate within;
  - No requirement to dispose of ACM Parts; and
  - More flexible terms in respect of future growth opportunities including capital expenditure and strategic acquisitions
- This transaction is subject to finalisation of documentation and settlement of funds

# Cash Flows

| Statement of Cash Flows (\$M)                           | H1 FY25      | H1 FY24      | Change       |

| <b>Total Financing Cash Flows</b>                       | <b>47.7</b>  | <b>1.3</b>   | <b>46.4</b>  |
| Net (decrease) / increase in cash and cash equivalents  | 64.5         | 5.5          | 59.0         |
| Cash and cash equivalents - at the beginning of period  | 39.9         | 28.9         | 11.0         |
| <b>Cash and cash equivalents - at the end of period</b> | <b>104.4</b> | <b>34.3</b>  | <b>70.0</b>  |

Substantially improved total operating cash flow of \$26.3m in 1H25 up from \$10.8m in 1H24 (increase of \$15.6m). The majority of this increase relates to an improvement in Working Capital from Dec-23 to Dec-24 of \$10.5m. The improvement in Working Capital from Jun-24 to Dec-24 was \$3.3m<sup>2</sup>

- 1H25 Operating Cash inflow of \$10.5m (once all lease payments included) improved from \$4.9m outflow in 1H24
  - Improved management of cash collections and payments
  - Capex increased by \$3.1m reflecting catch up of historically deferred spend and growth opportunities
  - Decrease in interest paid of \$2m

| 1H25 Equity Raising Sources and Uses (\$M)                      | H1 FY25        |
|-----------------------------------------------------------------|----------------|
| <b>Total proceeds</b>                                           | <b>125.0</b>   |
| Repayment of existing senior bank debt (including PIK interest) | (53.8)         |
| Costs of the capital raising                                    | (5.4)          |
| Transaction costs on debt extension                             | (2.2)          |
| Repayment of convertible notes if put option exercised          | (50.0)         |

| Reallocation of Corporate costs |            |
|---------------------------------|------------|
| <b>Corporate</b>                | <b>7.9</b> |
| Capital SMART                   | (2.4)      |
| AMA Collision                   | (3.4)      |
| Wales                           | (1.1)      |
| Specialist Businesses           | (0.5)      |
| ACM Parts                       | (0.5)      |

- Reduction in Corporate's normalised EBITDA reflects a number of cost reduction initiatives implemented to help drive greater cost discipline whilst also ensuring business unit responsibility for financial results
- Normalisations in the 1H25 period relate to a legal settlement claim over the earn-out calculated on a historical acquisition (2018)
- 1H24 comparative information has been represented to reflect costs previously reported within Corporate, now included within the business unit results

Outlook

# FY25 Outlook

**AMA Group maintains guidance that FY25 normalised pre-AASB 16 EBITDA expected to be above FY24 and a five-year pre-AASB 16 EBITDA margin target of ~9%<sup>1</sup>**

- Capital SMART performance will exceed prior year
- AMA Collision Project Wallaby continues targeting > \$20m in annualised pre-AASB 16 EBITDA benefits over the next 3 years, although progress has been slower than planned
- Wales expansion targets to deliver \$1.5m EBITDA over next 2 years, tracking ahead of plan
- Specialist planned TechRight and TrackRight network growth ramping up
- Greenfield and acquisition growth plans progressing well across portfolio
- Summary of priorities:
  - Continue to repair AMA Collision performance
  - Continue to grow workforce – local, international and apprentices
  - Grow network – greenfield, capacity expansion and acquisition - 6 sites planned 2H25<sup>2</sup>
  - Improve our customer service, helping to solve customer's market challenges
  - Complete ACM separation

Refer to the Glossary on slide 25 for relevant definitions.

<sup>1</sup> Normalised pre-AASB 16 EBITDA margins of ~9% excludes further growth from deployment of surplus cash over this period.

<sup>2</sup> Subject to property availability and suitability upon assessment

Note: For segment reporting purposes, Vehicle Collision Repairs reflects the combination of the AMA Collision (incl Specialist) and Capital SMART in addition to elimination entries for transactions between these business units and allocation of supplier market incentive. Therefore, the segment result for Vehicle Collision Repairs do not match the aggregate of business unit EBITDA results on the previous slides.  
Refer to the Glossary on slide 25 for relevant definitions.

|---------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| EBITDA              | Earnings before interest, tax, depreciation, amortisation, impairment and fair value adjustments on contingent vendor consideration. From continuing operations (excludes ACM Parts). Pre-AASB 16 unless stated                                                                                                                                      |
| Normalised EBITDA   | EBITDA as defined above, excluding the impact of normalisations as identified on slide 12. From continuing operations (excludes ACM Parts), except on slide 10 and slide 22 which reflects and/or includes ACM Parts                                                                                                                                 |
| EBITDA %            | EBITDA margin, calculated based on revenue and normalised EBITDA as defined above. From continuing operations (excludes ACM Parts), except on slide 10 and slide 22 which reflects and/or includes ACM Parts                                                                                                                                         |
| EPS                 | Earnings per share from continuing operations (excludes ACM Parts)                                                                                                                                                                                                                                                                                   |
| NPAT                | Net Profit After Tax from continuing operations (excludes ACM Parts)                                                                                                                                                                                                                                                                                 |
| NPATA               | NPAT as defined above, excluding impairment and amortisation of acquired intangibles (Capital SMART customer contract)                                                                                                                                                                                                                               |
| Operating cash flow | Cash flow from operations reflects the inflows and outflows related to the Group's principal activities being the operation of vehicle collision repair facilities and the supply of automotive parts and consumables. Pre-AASB 16 includes the principal elements of lease payments (shown in financing cashflows for statutory reporting purposes) |
| Revenue             | Revenue from continuing operations, excluding ACM Parts, except on slide 10 and slide 22 which reflects and/or includes ACM Parts                                                                                                                                                                                                                    |

## Non-International Financial Reporting Standards (Non-IFRS) information

Non-IFRS measures, including Normalised EBITDA, are financial measures used by management and the Directors as the primary measures of assessing the financial performance of the Group and individual segments. The Directors also believe these non-IFRS measures assist in providing additional meaningful information for stakeholders and provide them with the ability to compare against prior periods in a consistent manner. Non-IFRS measures are not reviewed by the Group's auditor.

Q&A

The logo graphic consists of two large, overlapping triangles. The upper triangle is red with a white diamond pattern. The lower triangle is dark grey with a white diamond pattern. They meet at a point in the center, creating a vertical line.
