

FOR IMMEDIATE RELEASE

iFAST Corp Launches its First ETFs on SGX in Partnership with Xtrackers by DWS

iFAST Corp enters ETF issuance with four SGX-listed ETFs, bringing selected global investment exposures in AI, Japan, Korea and Taiwan closer to Singapore investors through local market access.

SINGAPORE (1 October 2026) – iFAST Corporation Ltd. (“iFAST Corp” and together with its subsidiaries, the “Group”) today announced the launch of its first suite of four exchange-traded funds (ETFs), marking the Group’s entry into ETF issuance.

The four ETFs are listed on the Mainboard of the Singapore Exchange Securities Trading Limited (“SGX-ST”):

- **iFAST Xtrackers Artificial Intelligence & Big Data UCITS Index ETF (SGX: XBG)**
- **iFAST Xtrackers Nikkei 225 UCITS Index ETF (SGX: JPY)**
- **iFAST Xtrackers MSCI Korea UCITS Index ETF (SGX: KOR)**
- **iFAST Xtrackers MSCI Taiwan UCITS Index ETF (SGX: TWD)**

The initial offer period opens on 1 October 2026 at S\$1.00 per share and closes on 14 October 2026. The ETFs are expected to begin trading on SGX-ST on 22 October 2026.

Bringing Global Investment Opportunities Closer to Singapore Investors

For more than a decade, iFAST has provided access to ETFs listed on major exchanges including SGX, US exchanges and Hong Kong Exchanges and Clearing Limited (“HKEX”), and has seen strong growth in ETF adoption as investors seek simple and transparent ways to gain global market exposure.

Through its FSM Global platforms and B2B network of financial advisory firms and financial institutions, iFAST has developed insights into how investors and intermediaries use investment products. This experience has helped the Group identify areas where ETF issuance can address gaps in product choice and accessibility, while complementing its existing distribution and platform capabilities.

Listing the ETFs on SGX-ST brings selected global investment exposures closer to Singapore investors through local market access. Investors can trade in Singapore dollars and during local market hours, while eligible investors may also use Supplementary Retirement Scheme (“SRS”) funds. For Singapore-based investors, locally traded UCITS ETFs may also offer different tax and estate-planning advantages compared with holding certain overseas-listed securities directly, depending on the fund structure and individual circumstances.

Mr Lim Chung Chun, Group CEO of iFAST Corp, said: “Our move into ETF issuance is a natural extension of iFAST’s role in global investing and is aligned with our mission to help investors around the world invest globally and profitably. A key part of this is bringing relevant global investment opportunities closer to

investors through SGX, with the convenience of Singapore dollar trading, local market hours and other features that are relevant to Singapore-based investors. We also see this as an opportunity to work with established global fund houses over time. By combining their investment and product capabilities with iFAST's understanding of investors, advisers and distribution, we believe we can develop solutions that address selected gaps in the market and add value to our clients."

Access to global and Asian investment opportunities

The inaugural suite of ETFs provides exposure to artificial intelligence ("AI") alongside three major Asian equity markets: Japan, Korea and Taiwan. The Artificial Intelligence & Big Data ETF invests in companies involved in the development and adoption of AI and related technologies. The Japan, Korea and Taiwan ETFs provide broader market exposure, with Korea and Taiwan playing important roles in the global semiconductor and technology supply chain.

iFAST has partnered with DWS Group ("DWS"), the asset management arm of Deutsche Bank, which operates its ETF business under the Xtrackers brand. Xtrackers offers more than 300 ETFs across asset classes and markets. The partnership combines iFAST's local market knowledge, investor reach and wealth management ecosystem with Xtrackers' global ETF expertise.

The ETFs are structured under the Undertakings for Collective Investment in Transferable Securities ("UCITS") framework, a widely used European regulatory framework that sets standards in areas including diversification, liquidity and investor protection.

Mr Kenny Tjan, Director, iFAST Global ETFs, said: "In developing our first ETF suite, we focused on areas aligned with iFAST's research views on long-term structural themes and where we see meaningful investment opportunities. The selected exposures reflect our conviction in AI and big data, alongside the distinct opportunities offered by Japan, Korea and Taiwan. We are pleased to work with DWS and draw on Xtrackers' global ETF expertise in developing this inaugural ETF suite."

Sophia Kim, Head of Xtrackers Sales APAC at DWS, said: "We are delighted to partner with iFAST on the launch of its first ETFs on SGX, combining global investment exposures across AI, Japan, Korea and Taiwan with the accessibility of Singapore's local market. As DWS's global platform for ETF solutions, Xtrackers combines a broad product range with more than two decades of index investing experience. Together with iFAST's local market knowledge and established wealth management ecosystem, we see strong potential to build on this collaboration and continue exploring solutions that meet the evolving needs of investors in Singapore."

Table 1: ETF Information

ETF	Fund Objective
iFAST Xtrackers AI & Big Data UCITS Index ETF	To track as closely as possible, before fees and expenses, the returns of the Nasdaq Global Artificial Intelligence and Big Data Index, by investing in shares of the Xtrackers Artificial Intelligence and Big Data UCITS ETF.
