Fraser's Property's retail assets in Singapore

FCT's Investment in PGIM Real Estate AsiaRetail Fund

Announcements

- ♦ 28 Feb 2019: The proposed acquisition of 17.312% stake in PGIM RE ARF for S\$342.5 million.
- ♦ 21 Mar 2019: The proposed acquisition of a further 1.67% stake in PGIM RE ARF for S\$33.5 million.

Rationale and Key Benefits of the acquisitions

1. The acquisitions are expected to be yield accretive

Unitholders can expect to enjoy higher DPU as a result of the Acquisition being made at a price which is reflective of the cash flows which the investments are expected to generate, combined with a debt and equity financing plan to be determined by the Manager.

2. Consistent with the Manager's Investment Strategy

The Acquisition is in line with the Manager's principal investment strategy to acquire interests in quality income-producing properties used primarily for retail purposes, and to enhance FCT's presence in the Singapore suburban retail sector, so as to deliver regular and stable distributions to Unitholders.

3. Greater Income Diversification

The Acquisition is expected to benefit FCT and its Unitholders through further income diversification and mitigation of concentration risk from any single asset or major tenants.

Summary

Quality assets and management skillsets

- ◆ Well-located suburban retail properties that enjoy good connectivity to public transport, high footfall and high occupancy
- ◆ Diversified tenant base that focuses on necessity and convenience shopping; staple F&B; and services to sustain footfall and tenants' sale

Growing DPU and strong financial position

- ◆ Strong financial position with low gearing and cost of borrowings
- ◆ Strong support from sponsor Frasers Property Limited

Poised for further growth

- ◆ Opportunities to acquire retail assets from Sponsor and/or 3rd parties, both in Singapore and overseas
- ◆ Positive macro-environment factors that support consumption growth in suburban retail sector (low unemployment rate, growing median household income, growing population in the suburban residential areas, better public transport connectivity)

To better reflect the underlying trends of the monthly sales, the RSI index is seasonally adjusted to remove the seasonal effects.
