

FOR IMMEDIATE RELEASE

EGP Energy Corporation secures new T&D contracts worth S\$2.6 million

Singapore, 27 August 2026 – EGP Energy Corporation Limited (“EGP Energy” or the “Company”, and together with its subsidiaries, the “Group”), an established key electrical infrastructure solutions and service provider for transmission and distribution (“**T&D**”) projects in Singapore, has secured two T&D projects with an aggregate value of approximately S\$2.6 million. The contracts were awarded to the Group’s wholly-owned subsidiary, EGP Smart Energy Pte Ltd (“**EGPSE**”), by its key infrastructure customer. The new projects bring the Group’s order book to approximately S\$298.8¹ million as at the date of this announcement.

The Group believes that the expansion of its order book reflects the strength of its customer relationships and market confidence in its technical capabilities and track record. Demand for its products and services is expected to remain firm in the foreseeable future, supported by continued investment in Singapore’s electricity infrastructure and electrification. The Group remains focused on executing its existing projects to high standards while pursuing further opportunities to grow its order book.

About [EGP Energy Corporation Limited](#) (Stock code: EGX)

EGP Energy Corporation Limited (“**EGP Energy**” or the “**Company**”, and together with its subsidiaries, the “**Group**”) is an established key electrical infrastructure solutions and service provider for transmission and distribution (“**T&D**”) projects in Singapore, with extensive expertise in extra high voltage (“**EHV**”) and high voltage (“**HV**”) power transmission and medium voltage distribution network projects. Transmission and distribution are two key stages in the delivery of electricity from generation sources to end-users.

¹ The order book value is calculated after deducting revenue recognised up to 30 June 2026 and has not been adjusted for revenue recognised in July and August 2026.

For T&D projects, the Group provides engineering, procurement and construction management services which include project design, supplying, installing, positioning, testing and commissioning of electrical equipment, alongside consulting on various aspects of the T&D projects and project management services. Its maintenance and servicing projects cover inspections, testing and diagnostics, cleaning and servicing, condition monitoring, troubleshooting, equipment replacement and emergency repairs for T&D assets. The Group also offers autonomous quadruped robot solutions for the servicing and maintenance of electrical infrastructure, capable of operating in complex and inaccessible industrial settings such as underground tunnels. According to the independent market research report by Frost & Sullivan (Singapore) Pte Ltd in the Group's IPO Prospectus dated 21 July 2026, EGP Energy held approximately 24.9% of the EHV and HV switchgear and transformer market share in Singapore in 2025 and held a market-leading position in the EHV and HV switchgear segment, with an estimated market share of approximately 37.5% in 2025.
