Consolidated Financial Statements

March 31, 2023 and 2022

(With Independent Auditors' Report Thereon)

KPMG LLP
345 Park Avenue
New York, NY 10154-0102

Independent Auditors' Report

The Board of Directors
Sumitomo Corporation of Americas:

Opinion

We have audited the consolidated financial statements of Sumitomo Corporation of Americas and its subsidiaries (the Company), which comprise the consolidated statements of financial position as of March 31, 2023 and 2022, and the related consolidated statements of comprehensive income, changes in equity, and cash flows for the years then ended, and the related notes to the consolidated financial statements.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Company as of March 31, 2023 and 2022, and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are required to be independent of the Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS as issued by the IASB, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise significant doubt about the Company's ability to continue as a going concern for one year after the date that the consolidated financial statements are authorized for issuance.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the consolidated financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the consolidated financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise significant doubt about the Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

(1) Reporting Entity

Sumitomo Corporation of Americas (the Company) is a corporate entity in the United States and a wholly owned subsidiary of Sumitomo Corporation, Japan (SC). The consolidated financial statements of the Company include the accounts of the Company and its subsidiaries and their interests in its associated companies.

The Company, which is headquartered at 300 Madison Avenue, New York City, NY, is an integrated global trading company with diversified investments in businesses involved in marketing, sales and distribution of consumer products, sales and distribution of steel and other products, providing financing for customers and suppliers, coordination and operation of urban and industrial infrastructure projects, providing distribution and logistics services, developing natural resources and developing and managing real estate. The Company's target markets include North America and Asia. A significant portion of the Company's transactions are with SC.

(2) Basis of Presentation

(a) Statement of Compliance

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board.

The Board of Directors of the Company authorized the consolidated financial statements for publication on May 12, 2023.

(b) Reporting Currency

The consolidated financial statements of the Company are presented in United States Dollars (\$), which is the Company's functional currency. All amounts presented in United States Dollars are rounded to the nearest million.

(c) Measurement

The consolidated financial statements have been prepared on the historical cost basis with the exception of the following items in the consolidated statements of financial position:

- Financial instruments at fair value through profit and loss are measured at fair value;
- Financial instruments at fair value through other comprehensive income are measured at fair value; and
- Derivatives are measured at fair value.

(d) Use of Estimates and Judgments

The preparation of the consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

Judgments and estimates made by management in the application of accounting policies that have a significant effect on the amounts recognized in the consolidated financial statements are as follows:

- Note 3 (b) – Revenue recognition
- Note 3 (g) – Investment property

The following notes include information related to uncertainties in judgments and estimates, which have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next fiscal year.

- Note 3 (i) – Impairment
- Note 3 (o) – Provisions
- Note 18 – Fair value of financial instruments

(3) Significant Accounting Policies

The accounting policies described below have been applied consistently to all periods presented in these consolidated financial statements.

(a) Basis of Consolidation

(i) Subsidiaries

Subsidiaries are those entities controlled by the Company. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. All intercompany profits, transactions and balances between the Company and its subsidiaries have been eliminated.

The accounting policies of subsidiaries have been adjusted when necessary to ensure consistency with the accounting policies adopted by the Company.

The acquisition of additional ownership interests in a subsidiary or the disposal of ownership interests in a subsidiary that does not result in the Company's relinquishment of control over the subsidiary is accounted for as an equity transaction. Any difference between the carrying amount of the ownership interests and the fair value of the consideration paid or received is recognized directly in equity as an adjustment to additional paid-in capital of equity attributable to owners of the parent company.

(ii) Equity-Accounted Investments (Associates)

Associates are entities in which the Company has significant influence, but not control, over the financial and operating policies of the investee. Significant influence is presumed to exist when the Company holds between 20 and 50% of the voting power of another entity. This presumption can

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

be overcome based on specific facts and circumstances that demonstrate that the ability to exercise significant influence is restricted. In addition, for equity investments in which the Company has less than a 20% ownership interest, the Company considers other facts and circumstances in assessing the ability to exercise significant influence over the investee.

Investments in associates are accounted for using the equity method of accounting and recognized initially at cost. The Company's investments in associates may include goodwill, representing the surplus of the cost of investment over the Company's share of the net fair value of the identifiable assets and liabilities of the investee. Such goodwill is recorded within equity-accounted investments and any impairment is included within equity in earnings of affiliates.

The Company's share of the income and expenses of the equity-accounted investments and changes in the Company's share in equity are included in the consolidated financial statements from the date significant influence commences until the date that it ceases. The Company generally recognizes its share of an investee's income and expenses and other changes in equity based on the percentage of equity interests owned. If the Company's share of losses exceeds its interest in an associate the carrying amount of that interest, including any other long-term investments in the associate, is reduced to zero, and the recognition of further losses is discontinued except to the extent that the Company has an obligation or has made payments on behalf of the investee. For certain investees with complex and variable capital structures that provide for differing allocations of income and expense, cash flows from operations and cash flows from liquidation, it can be difficult to accurately determine the Company's equity income by simply applying a specific percentage to the net income of the investee. In those situations, the Company employs a Hypothetical Liquidation at Book Value (HLBV) method to calculate its equity method share of income and expenses of the investee. HLBV is a balance sheet approach that estimates the Company's share of ownership interests in the investee at any point in time. The increase or decrease in the book value of the underlying ownership interests are used to determine the Company's equity income from the investee.

Annual financial statements of certain associates included in the consolidated financial statements are prepared as of December 31 as it is impracticable for those associates to unify their closing date with that of the Company. Adjustments are made for the effects of significant transactions or events that occur between December 31 and the date of the Company's consolidated financial statements.

(iii) Business Combinations

Business combinations are transactions or events, whereby the Company obtains control of one or more businesses, which are accounted for using the acquisition method. Control is defined as the power to govern the financial and operating policies of an entity to obtain benefits from its activities. In assessing the existence of control, existing and potential voting rights that are currently exercisable are considered. The acquisition date is the date on which control is transferred to the Company.

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

Goodwill is measured at the fair value of the consideration transferred, including the recognized amount of any noncontrolling interests at the date of acquisition, less the net recognized amount of the identifiable assets acquired and liabilities assumed at the acquisition date measured at fair value. The consideration transferred includes the fair value of the assets, liabilities and equity interest transferred from the Company to the former owners, including the fair value of contingent consideration. Contingent liabilities of the businesses acquired are recognized in the business combinations if they are present obligations that arose from past events and their fair value can be measured with sufficient reliability. The Company measures noncontrolling interests in the businesses acquired at the noncontrolling interests' proportionate share of the identifiable net assets for each business combination.

If the initial accounting for business combinations is incomplete by the end of the reporting period in which the combinations occur, the Company reports provisional amounts of the items for which the accounting is incomplete. Those provisional amounts are retrospectively adjusted during the measurement period, during which additional assets or liabilities may be recognized to reflect new information obtained about facts and circumstances that existed at the acquisition date that, if known, would have affected the amounts recognized at that date. The measurement period does not exceed one year.

Acquisition costs incurred by the Company in connection with business combinations such as finder's fees, legal, due diligence and other professional or consulting fees are expensed when incurred.

(iv) Transactions under Common Control

Business combinations of a subsidiary arising from a transfer of interests in entities that are under the control of SC are accounted for as business combinations as of the date of the transaction without retrospective restatement. The assets and liabilities are recognized at the carrying amounts previously reported in the controlling shareholder's consolidated financial statements.

Loss of control of a subsidiary and loss of significant influence in an associate arising from a transfer of interests to entities that are under the control of SC are accounted for as transactions as of the date of the transaction without retrospective restatement. The assets and liabilities are derecognized at the carrying amounts previously reported with recognition of the fair value of consideration received and the resulting gain or loss recognized in net income.

Non-reciprocal distributions of non-cash assets to owners of the parent company that result in a distribution in which the asset being distributed is ultimately controlled by the same party both before and after the distribution are accounted for at the carrying value of the asset distributed.

(b) Revenue Recognition

Revenue is measured based on the consideration specified in a contract with a customer and excludes amounts collected on behalf of third parties. The Company recognizes revenue when it transfers control over a product or service to its customer.

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

The following is a description of the principal activities from which the Company generates its revenue:

(i) *Primary Geographical Markets*

A significant portion of the Company's revenues occur with customers in North America and Japan. For the years ended March 31, 2023 and 2022, revenues with customers in North America represented 98% and 96% of sales, respectively, and sales with customers in Japan represented 2% and 3% of sales, respectively.

(ii) *Major Products and Service Lines*

Sales of goods represented approximately 92% and 91% of revenues and provision of services represented approximately 8% and 9% of revenues of the Company for the years ended March 31, 2023 and 2022, respectively. The following table presents the percentage of revenues provided by major products and service lines:

	Year ending March 31	
	2023	2022
Tubular and steel products	65 %	57 %
Electricity and natural gas	16	19
Construction equipment rentals	7	9
Construction equipment sales	5	7
Chemicals	3	3
Other	4	5
Total	100 %	100 %

Revenue from the sale of goods and rendering of services is measured at the fair value of the consideration received or receivable, net of returns, trade discounts and volume rebates.

The Company recognizes revenue from sales of goods in connection with the Company's wholesale, retail and manufacturing operations when control over the goods has been transferred to the customer. Depending upon the terms of the contract, this may occur at the time of delivery or shipment or upon the attainment of customer acceptance. The conditions of acceptance are governed by the terms of the contract or customer arrangement and those not meeting the predetermined specifications are not recognized as revenue until the attainment of customer acceptance. The Company's policy is not to accept product returns unless the products are defective. The amounts of trade discounts and volume rebates are not material and are recognized as a reduction of revenue as the sales are recognized.

Pacific Summit Energy LLC (PSE), a wholly owned subsidiary of the Company, is an energy marketing company engaged primarily in the purchase and sale of natural gas (NG) and electricity in the North American energy markets. The subsidiary's trading gains and losses from physical and financial transactions, which are primarily wholesale transactions, are recognized in the consolidated statements of comprehensive income when they are realized or realizable and earned.

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

PSE has a natural gas purchase contract, see note 22(e), that will be used exclusively to supply NG to the operator of a liquefied natural gas (LNG) plant for liquefaction to meet sales commitments to customers. The Company forecasts that a small or minor amount of NG over the own use purchase contract (unavoidable excess gas) will be required to be sold to the day ahead spot market during periods of planned plant maintenance, which is an unavoidable event outside of PSE's control.

The Company also generates revenue from rendering of services in connection with operating leases of commercial real estate and construction equipment that is recognized on a straight line basis over the lease or rental term.

(iii) *Timing of Revenue Recognition*

Of the Company's revenues, 92% and 91% were recognized at a point in time for the year ended March 31, 2023 and 2022, respectively, with the remainder recognized over time.

(iv) *Principal versus Agent Considerations*

In the ordinary course of business, the Company frequently acts as an intermediary or agent in executing transactions with third parties. In these arrangements, the Company determines whether to report revenue based on the "gross" sales amount of the transaction for goods or services provided or on the "net" amount of fees and commissions earned from the customer. However, the amounts of gross profit and income for the year attributable to the Company are not affected by whether revenue is reported on a gross or net basis.

Determining whether revenue should be reported gross or net is based on an assessment of whether the Company is acting as a "principal" or an "agent" in a transaction. Accordingly, the Company is acting as a principal in a transaction when it controls a promised good or service before it is transferred to a customer and therefore, the Company reports revenue on a gross basis when the performance obligation is satisfied. The Company is acting as an agent in a transaction when its performance obligation is to arrange for the provision of goods or services by another party and therefore, the Company reports revenue on a net basis. The determination of whether the Company is acting as a principal or an agent in a transaction involves judgment and is based on an evaluation of the terms of an arrangement, the nature of the Company's performance obligation and the significant risks and rewards related to sale of goods and rendering of services assumed by the Company.

Factors that indicate that the Company acts as a principal include:

- (a) the Company is primarily responsible for fulfilling the promise to provide the specified good or service;
- (b) the Company has inventory risk before the specified good or service has been transferred to a customer or after transfer of control to the customer; and
- (c) the Company has discretion in establishing the price for the specified good or service.

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

(c) Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Financial instruments are recognized when the Company becomes a party to the contractual provisions of the financial instrument and are recognized initially at fair value, normally consisting of the transaction price and any directly attributable transaction costs. The classification of financial assets and financial liabilities is determined at initial recognition.

Financial instruments in the form of financial assets and financial liabilities are offset and net amounts presented in the consolidated statements of financial position only when the Company has legally enforceable rights to set off and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

The Company derecognizes a financial asset when the contractual rights to the cash flows from the asset expire, or when the Company transfers the contractual rights to such cash flows to another entity in transactions that transfer substantially all the risks and rewards of ownership of the asset. The Company recognizes any interests in transferred assets that are either created or continue to be held as separate assets or liabilities.

The Company derecognizes a financial liability when its contractual obligations are discharged, canceled or expire.

The subsequent measurement of financial instruments depends on their classification, as follows:

(i) Nonderivative Financial Assets

Cash and Cash Equivalents

Cash and cash equivalents include cash and highly liquid investments with an original maturity of three months or less that are readily convertible to known amounts of cash. Cash balances are held with financial institutions that have high credit ratings. The Company has not experienced any losses with respect to bank balances in excess of government provided insurance.

Accounts Receivable

The carrying amount of accounts receivables is reduced through the use of an allowance account. An allowance account is maintained at the level which, in the judgment of management, is adequate to provide for expected credit losses. Management considers individual customers' risk factors such as historical performance, recent developments, changes in original terms, internal risk ratings, industry trends and other specific factors applicable to the customer, as well as general risk factors. Accounts receivable determined to be uncollectible are charged against the allowance.

Financial Assets Measured at Amortized Cost

Financial assets that are held within a business model with the objective to hold assets in order to collect contractual cash flows and the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding are accounted for at amortized cost.

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

Financial Assets Measured at Fair Value

Financial assets that do not meet the amortized cost criteria are measured at fair value. Such assets that are held for trading are measured at fair value through profit or loss (FVTPL) with gains or losses on re-measurement recognized in net income.

At initial recognition, the Company may make an irrevocable election to measure investments in equity instruments, not held for trading, at fair value through other comprehensive income (FVTOCI) with gains or losses on re-measurement recognized in other comprehensive income. The election is made on an instrument-by-instrument basis. The amount of other components of equity is transferred directly to retained earnings, not to net income, when the equity investment is derecognized. Dividends from FVTOCI investments are recognized in net income unless the dividend clearly represents a recovery of part of the cost of the investment.

The Company generally makes the election to apply FVTOCI for financial assets that are equity instruments not held for trading.

(ii) Nonderivative Financial Liabilities

The Company has long-term debt, commercial paper, notes payable, accounts and other payables as nonderivative financial liabilities, with debt instruments measured at amortized cost using the effective interest method after the initial recognition.

(iii) Derivatives and Hedge Accounting

The Company reports all derivative instruments in the accompanying consolidated statements of financial position at their fair value. The Company utilizes derivative instruments to manage interest rate risk and foreign currency risk. The primary derivative instruments used by the Company are foreign exchange forward contracts. The Company does not hold or issue any significant amount of derivative instruments for speculative purposes other than those held by PSE related to its trading activities, see note 19.

At the inception of the hedge relationship, the Company documents the relationship between the hedging instrument and the hedged item, along with its risk management objectives and strategy for undertaking various hedge transactions, the hedging instrument, the hedged item, the nature of the risk being hedged, how the hedging instrument's effectiveness in offsetting the hedged risk will be assessed and a description of the method of measuring effectiveness and ineffectiveness.

At the inception of the hedge and on an ongoing basis, the Company assesses whether the hedging instrument is highly effective in offsetting changes in fair values or cash flows of the hedged item attributable to the hedged risk. To qualify as a cash flow hedge of a forecasted transaction, the transaction must be highly probable.

Derivatives are initially recognized at fair value with transaction costs being recognized in net income when they occur. If the requirements for hedge accounting are met, the Company designates and documents the relationship between the hedging instrument and the hedged item from the date a derivative contract is entered into as either a fair value or a cash flow hedge. In a

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

fair value hedge, the fair value of a recognized asset or liability or an unrecognized firm commitment is hedged. In a cash flow hedge, the variability of cash flows to be received or paid related to a recognized asset or liability or a highly probable forecasted transaction is hedged. Subsequently, derivatives are measured at fair value, and gains and losses arising from changes in the fair values are accounted for as follows:

Fair Value Hedges

The changes in the fair value of the hedging instrument are recognized in net income. The carrying amounts of the hedged item are measured at fair value and gains and losses on the hedged items attributable to the hedged risks are recognized in net income.

Cash Flow Hedges

When derivatives are designated as an instrument to hedge the exposure to variability in cash flows that are attributable to a particular risk associated with recognized assets or liabilities, or a highly probable forecasted transaction that could affect net income, the effective portion of changes in the fair value of derivatives is recognized in other comprehensive income and included in hedging reserve, as an other component of equity. When the cash flows of the hedged transaction affect net income, the balance of the related hedging instrument is reclassified to net income from other comprehensive income in the same line item of the consolidated statements of comprehensive income as the hedged transaction. Any gain or loss relating to the ineffective portion is recognized immediately in net income.

Hedge accounting is discontinued prospectively when the hedge no longer qualifies for hedge accounting or when the hedging instrument expires, or is sold, terminated, or exercised, or the designation is revoked. When hedge accounting is discontinued, the balances of cash flow hedges remain in equity until the forecasted transaction affects net income. When a forecasted transaction is no longer expected to occur, the gain or loss accumulated in equity is recognized immediately in net income.

(d) Inventories

Inventories are measured at the lower of cost and net realizable value. Net realizable value represents the estimated selling price for inventories in the ordinary course of business less any estimated cost of completion and the estimated costs necessary to make the sale. The Company does not acquire inventories for the purpose of generating profit from short-term fluctuations in price.

Inventories of the Company's Tubular Products and Steel and Nonferrous Metal groups and construction equipment sales business are generally valued using the specific-identification method as such inventories are not ordinarily interchangeable and are primarily segregated for specific customers and customer projects based on customer specifications. Although the Company's inventory levels vary from period to period, approximately 87% and 84% of its inventories were valued under the specific identification method as of March 31, 2023 and 2022, respectively. The inventories for the remainder of the Company are valued using a moving average cost basis.

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

Inventories for which the Company continues to hold the title, but control is transferred to the customer as the inventories are physically located at a customer-controlled facility under a consignment agreement, are included in prepaid expenses and other current assets in the consolidated statements of financial position.

(e) Property and Equipment

Property and equipment, including those under lease, consist of retail, manufacturing, distribution and administrative facilities, are measured at cost less accumulated depreciation or amortization and accumulated impairment losses. At each reporting date, the Company assesses whether there is any indication that an asset, or asset group, may be impaired and if such an indication exists, estimates the asset, or asset group's, recoverable amount (higher of fair value less costs to sell and value in use). If the recoverable amount is less than the carrying amount, the carrying amount is reduced to the recoverable amount and an impairment loss is recognized.

Depreciation and amortization are determined by applying the straight-line method over the estimated useful lives of the related assets. The asset lives vary and are dependent on the type of facility or equipment, its location and the estimated remaining life at the time of purchase. When the useful life of each part of an item of property and equipment varies, it is treated as a separate item of property and equipment. The straight-line method is used because it is considered to most closely approximate the pattern in which the asset's future economic benefits are expected to be consumed by the Company. Leasehold improvements are depreciated over the shorter of the lease term or their useful lives. The range of estimated useful lives is as follows:

Buildings	30-50 years
Leasehold improvements	Lesser of useful life of asset or lease term
Machinery and equipment	2-45 years
Fixtures	3-10 years
Vehicles	2-20 years

The depreciation methods, depreciable lives and residual values are reviewed at the end of each reporting period and updated, if necessary. Costs of repairs and maintenance of property and equipment are recognized in net income as incurred.

(f) Leases

At inception of a contract, an assessment is made whether a contract is, or contains, a lease that conveys the right to control the use of an identified asset for a period of time in exchange for consideration. The assessment determines whether:

- the contract involves the use of an identified asset;
- the Company has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and
- the Company has the right to direct the use of the asset.

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

At the inception or on reassessment of a contract that contains a lease component, the consideration in the contract is allocated to each lease component on the basis of their relative stand-alone prices.

(i) *As a Lessee*

A right-of-use asset and a lease liability are recognized at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus an initial indirect costs incurred and an estimate of costs to dismantle and remove the underlying assets or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of the right-of-use assets are determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced for impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease, or if that rate cannot be readily determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed payments;
- variable lease payments that depend on an index or a rate, initially measured using the index as of the commencement date;
- amounts expected to be payable under a residual value guarantee; and
- the exercise price under a purchase option that is reasonably certain to be exercised, lease payments in an optional renewal period that is reasonably certain to be exercised, and penalties for early termination of a lease unless it is reasonably certain not to terminate early.

The lease liability is measured at amortized cost using the effective interest method. It is remeasured when there is a change in the future lease payments arising from a change in an index or rate, if there is a change in the estimate of the amount expected to be payable under a residual value guarantee, or if the Company changes its assessment of whether it will exercise a purchase, extension or termination option.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in net income if the carrying amount of the right-of-use asset has been reduced to zero.

Right-of use assets that do not meet the definition of investment property are presented in property and equipment and lease liabilities in accrued expenses and other current liabilities (current

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

portion) and other long-term liabilities (noncurrent portion) in the consolidated statements of financial position.

The Company does not recognize right-of-use assets and lease liabilities for short-term leases of property and equipment that have a lease term of 12 months or less and leases of low-value assets. The Company recognizes the lease payments associated with these leases as an expense on a straight-line basis over the term of the lease.

(ii) As a Lessor

When the Company acts as a lessor, it determines at lease inception whether each lease is a finance or operating lease by making an overall assessment of whether the lease transfers substantially all of the risks and rewards incidental to ownership of the underlying asset. If this is the case, then the lease is a finance lease; if not, then it is an operating lease.

When the Company is an intermediate lessor, it accounts for its interests in the head lease and the sub-lease separately and assesses the lease classification of the sub-lease with reference to the right-of-use asset arising from the head lease, not with reference to the underlying asset.

Lease payments received under operating leases are recognized as income on a straight-line basis over the lease term as part of revenues.

(g) Investment Property

Investment property consists of commercial office buildings, or portions thereof, held to earn rental income or for capital appreciation or both. Property held for sale in the ordinary course of business, or use in the production or supply of goods or services or for administrative purposes is not included as investment property. Investment property is measured at cost less any accumulated depreciation and accumulated impairment losses, see note 3 (e) regarding useful lives, depreciation methods and impairment assessments.

(h) Goodwill and Other Intangible Assets

(i) Goodwill

Goodwill is carried at cost less accumulated impairment losses. For equity-accounted investments, the carrying amount of goodwill is included in the carrying amount of the investment and any impairment loss on such an investment is not allocated to any asset, including goodwill, which forms part of the carrying amount of the equity-accounted investments.

(ii) Other Intangibles

Capitalized Software Costs

The Company incurs certain costs to purchase or develop software for internal use. Capitalized software costs are measured at cost less any accumulated amortization and accumulated impairment losses.

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

Intangible Assets Acquired in a Business Combination

Intangible assets that are acquired in a business combination including trade names, customer relationships and vendor relationships, are recognized separately from goodwill and are initially recognized at fair value at acquisition date.

Subsequently, intangible assets acquired in a business combination that have finite useful lives are stated at cost less any accumulated amortization and accumulated impairment losses.

Intangible assets with finite lives are amortized on a straight-line basis over their estimated useful lives. The straight-line method is used because it is considered to most closely approximate the pattern in which the intangible assets' future economic benefits are expected to be consumed by the Company. The estimated useful lives, from the date of initial recognition, for such intangible assets are as follows:

Trade names	20–25 years
Customer relationships	15–25 years
Software and other	3–7 years

The amortization period for intangible assets with finite useful lives is reviewed at least annually and updated, if necessary. Changes in expected useful lives are treated as changes in accounting estimates.

(i) Impairment

(i) Nonderivative Financial Assets

The carrying amount of accounts receivables is reduced through the use of an allowance account. An allowance account is maintained at the level which, in the judgment of management, is adequate to provide for expected credit losses. Management considers individual customers' risk factors such as historical performance, recent developments, changes in original terms, internal risk ratings, industry trends and other specific factors applicable to the customer, as well as general risk factors.

(ii) Nonfinancial Assets

At each reporting date, the Company assesses whether there is an indication that an asset may be impaired, except for goodwill which is evaluated annually as of September 30th to permit adequate time to complete the impairment test and related analyses prior to the fiscal year end. If a potential triggering event occurs at any time during the reporting period, an impairment test would be required. If an indication of impairment exists, the Company estimates the recoverable amount of the asset. The recoverable amount is determined for each individual asset unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets (cash-generating units). The recoverable amount is the greater of its value in use and fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For the purpose of impairment testing, assets

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

that cannot be tested individually are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash flows of other assets or group of assets.

A cash generating unit is the smallest group of assets, which generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets. For the purposes of impairment testing for goodwill, each of the Company's cash-generating units or groups of cash-generating units, to which the goodwill is allocated, is aggregated in a manner that impairment is tested reflecting the lowest level in the Company at which the goodwill is monitored for internal management purposes. Such lowest level may not be larger than an operating segment. Goodwill acquired in a business combination is allocated to each unit or group of units that is expected to benefit from the synergies of the combination.

The Company's corporate assets do not generate cash inflows independently. If there is an indication that corporate assets may be impaired, the recoverable amount is determined for the cash-generating unit or group of cash-generating units to which the corporate assets belong.

An impairment loss is recognized if the carrying amount of an asset or its cash-generating unit exceeds its estimated recoverable amount. Impairment losses are recognized in net income. Impairment losses recognized in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to the units, and then to reduce the carrying amounts of the other assets within the group on a pro rata basis.

An impairment loss in respect of goodwill is not reversed in subsequent periods. For assets other than goodwill, impairment losses recognized in prior periods are assessed as of each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been recorded (net of accumulated depreciation or amortization) if no impairment loss had been recognized in prior years.

Goodwill that forms part of the carrying value of an equity-accounted investment is not recognized separately, and therefore is not tested for impairment separately. Instead, the entire amount of the equity-accounted investment is tested for impairment as a single asset when there is an objective indication that the investment may be impaired.

(j) Income Taxes

The Company and eligible subsidiaries file a consolidated federal income tax return in the United States. In addition, the Company and subsidiaries also file income tax returns in state, local and foreign jurisdictions as required. Provisions for current income tax liabilities are calculated on income and expense amounts expected to be included in the income tax returns for the current year.

Income taxes in the consolidated statements of comprehensive income include currently payable and deferred taxes that are recognized in net income for the year.

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

Current taxes are the expected taxes payable (or recoverable) related to taxable income for the year, using tax rates enacted or substantively enacted at the end of the reporting period, and any adjustment to taxes payable in respect to prior years.

Deferred tax assets and liabilities are recognized on temporary differences between the accounting carrying amounts of assets and liabilities and the corresponding tax bases. Such deferred tax liabilities are not recognized if the temporary difference arises from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither taxable income nor accounting income. Deferred tax liabilities are not recognized if the taxable temporary difference arises from goodwill.

Deferred tax liabilities are recognized for taxable temporary differences associated with investments in subsidiaries and associates. However, if the Company is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future, deferred taxes are not recognized. Deferred tax assets arising from deductible temporary differences associated with such investments are only recognized to the extent that it is probable that there will be sufficient taxable profits against which to utilize the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liabilities are settled or the assets realized, based on tax rates and tax laws that have been enacted or substantively enacted by the end of reporting period. Deferred tax assets and deferred tax liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and income taxes are levied by the same taxation authority on either the same taxable entity or different taxable entities which intend either to settle current tax assets and liabilities on a net basis, or to realize the assets and settle the liabilities simultaneously.

Deferred tax assets are recognized for unused tax losses, tax credits and deductible temporary differences, to the extent that it is probable that future taxable income will be available against which they can be utilized. Deferred tax assets are reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that the related tax benefits will be realized.

(k) Foreign Currency Transactions and Translation

Transactions in foreign currencies are translated at the relevant foreign exchange rates prevailing at the transaction date. Subsequent gains and losses from the retranslation of financial assets and liabilities denominated in foreign currencies are recognized in net income.

The assets and liabilities of foreign subsidiaries for which the functional currency is not the United States Dollar are translated into United States Dollars using exchange rates prevailing at the end of the reporting period. Foreign currency exchange differences arising from translation of financial statements of foreign operations are recognized in other comprehensive income as a translation reserve. Income and expenses are translated into United States Dollars using average exchange rates during each reporting period.

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

On the disposal of the entire interest in a foreign operation, and on the partial disposal of an interest involving loss of control, significant influence or joint control, the cumulative amount of the exchange differences is reclassified to net income for the year as a part of gains or losses on disposal.

(l) Supplemental Cash Flow Information

In August 2022, the Company made an equity investment in Werner Aero, LLC, a supplier to the aviation industry, totaling \$10 comprised of a cash investment of \$3 plus \$7 in accrued earnout and put liabilities. The investment resulted in a 51% equity interest that is accounted for as an equity-method investment as the investee is jointly controlled by the Company and the other investor.

In March 2023, the Company distributed its interest in Sumitomo Corporation do Brasil S.A. to SC, resulting in a reduction in equity-accounted investments of \$6 and the currency translation adjustment of \$7 being recycled to additional paid-in capital.

In June 2021, the Company sold its 51% ownership interest in Sumitomo Canada Limited to SC resulting in a decrease in the Company's consolidated statements of financial position of \$339 in noncash assets and a net decrease of \$50 in accounts payable and other long-term liabilities with the accumulated currency translation adjustment of \$9 being recycled as an expense to pretax income.

During the year ended March 31, 2022, the Company sold its interests in two Associates resulting in a reduction in equity-accounted investments of \$114 and recorded a net pretax gain of \$2 in the statements of comprehensive income. Also in the year ended March 31, 2022, the Company sold its interest in SMS Construction and Mining Systems, Inc. to SC for \$129 resulting in an equivalent reduction in equity-accounted investments and the accumulated currency translation adjustment of \$11 being recycled as an expense to pretax income.

(m) Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. All other borrowing costs are recognized in net income for the year in which they are incurred.

(n) Other Long-Term Liabilities

Other long-term liabilities include liabilities related to natural gas, electric power, interest rate and currency physical contracts, futures contracts, swaps and options and lease liabilities.

(o) Provisions

Provisions are recognized when the Company has present obligations legally or constructively as the result of past events, it is probable that outflows of resources embodying economic benefits will be required to settle the obligations and reliable estimates can be made of the amount of the obligations. Provisions are discounted using future cash flow estimates that reflect current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

recognized as a finance expense. Provisions are recorded in other long-term liabilities on the accompanying consolidated statements of financial position.

(p) Employee Benefits – Defined Contribution Plan

A defined contribution plan is a post-retirement benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to defined contribution pension plans are recognized as an employee benefit expense in net income in the period during which services are rendered by employees.

(q) New Standards and Interpretations

(i) Deferred Tax related to Assets and Liabilities arising from a Single Transaction (Amendments to IAS 12)

The amendments narrow the scope of the initial recognition exemption to exclude transactions that give rise to equal and offsetting temporary differences - e.g. leases and decommissioning liabilities. The amendments apply for annual reporting periods beginning on or after January 1, 2023. For leases and decommissioning liabilities, the associated deferred tax asset and liabilities will need to be recognised from the beginning of the earliest comparative period presented, with any cumulative effect recognised as an adjustment to retained earnings or other components of equity at that elate. For all other transactions, the amendments apply to transactions that occur after the beginning of the earliest period presented.

The Company accounts for deferred tax on leases applying the 'integrally linked' approach, resulting in a similar outcome to the amendments, except that the deferred tax asset or liability is recognised on a net basis. Under the amendments, the Company will recognize a separate deferred tax asset and a deferred tax liability for its footnote disclosures with no impact on the Company's consolidated statements of financial position and no impact on retained earnings on adoption of the amendments.

(ii) Classification of Liabilities as Current or Non-Current (Amendments to IAS 1)

The amendments, as issued in 2020, aim to clarify the requirements on determining whether a liability is current or non-current and apply for annual reporting periods beginning on or after January 1, 2024. The Company does not expect any significant impact of these amendments on the consolidated financial statements in the period of initial application.

(4) Changes in Subsidiaries and Equity-Accounted Investments

(a) Business Combinations

(i) Sale/Relinquishment of Controlling Interest in Subsidiary

In June 2021, the Company sold its 51% ownership interest in Sumitomo Canada Limited to SC with the accumulated currency translation adjustment of \$9 being recycled to pretax income.

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

The Company accounts affected by the sales/relinquishment of control and cash proceeds were as follows:

	<u>2022</u>
Working capital, including cash	\$ (247)
Long-term receivables	(6)
Property and equipment	(4)
Investments accounted for using the equity method	(54)
Goodwill	(1)
Deferred income taxes	(14)
Other comprehensive income	(16)
Noncontrolling interests	162
Pretax loss	<u>9</u>
Net assets disposed	(171)
Cash and cash equivalents disposed	<u>32</u>
Net cash inflow	<u>\$ (139)</u>

(b) Equity-Accounted Investments

(i) Sales

In January 2022, the Company sold its 25.14% equity interest in SMS Construction and Mining Systems, Inc. to SC for \$129 resulting in an equivalent reduction in equity-accounted investments and the accumulated currency translation adjustment of \$11 being recycled as an expense to pretax income.

In September 2021, the Company sold its 19.47% equity interest in a manufacturer of oil country tubular goods, line and standard pipes, coupling stocks, pipe rolling mills and hot-rolled seamless tubular products for oil and gas applications for a pretax gain of \$13.

In July 2021, the Company sold its 15% equity interest in a supplier of premium threaded connections for the oil and gas industry for a pretax loss of \$15.

(ii) Distribution to the Owners of the Parent Company

In March 2023, the Company distributed its interest in Sumitomo Corporation do Brasil S.A. to SC, resulting in a reduction in equity-accounted investments of \$6 and the currency translation adjustment of \$7 being recycled to additional paid-in capital.

	Sumisho Global Logistics (USA) Corporation	New Hyde Park, NY, USA	80.000	80.000

(5) Equity-Accounted Investments

The Company has investments in companies that are accounted for using the equity method of accounting. The Company's share of income (losses) from equity-accounted investments amounted to \$36 and (\$54), for the years ended March 31, 2023 and 2022, respectively. For the years ended March 31, 2023 and 2022, the Company received dividends from these companies of \$72 and \$115, respectively. As of March 31, 2022, long-term receivables – related parties included amounts loaned to these companies aggregating \$100. No long-term receivables for loans to these companies were outstanding as of March 31, 2023. Accounts payable to related parties, net included amounts payable to these companies of \$22 and \$26 as of March 31, 2023 and 2022, respectively, see note 8.

In the year ended March 31, 2023, the Company recognized impairments related to its equity-accounted investments totaling \$45 as investor in DS Cornerstone, LLC.

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

In the year ended March 31, 2022, the Company recognized impairments related to its equity-accounted investments totaling \$19 as investor and recognized its share of impairments totaling approximately \$152 included in its equity method earnings, primarily for Sawai America LLC, USPO Atlanta, LLC and USPO Miami, LLC.

The summarized combined financial information of associated companies accounted for by the equity method is presented below:

	2023	2022
Current assets	\$ 3,903	3,351
Noncurrent assets	3,812	4,873
Total assets	<u>\$ 7,715</u>	<u>8,224</u>
Current liabilities	\$ 2,200	1,867

Mineral resources	SC Minerals America, Inc.	Denver, CO, USA	15.250	15.250
Treasury and corporate	Sumitomo Corporation do Brasil S.A.	Sao Paulo, Brazil	—	8.630

In the year ended March 31, 2023, the Company distributed its interest in Sumitomo Corporation do Brasil S.A. to SC, resulting in a reduction in equity-accounted investments of \$6 and the currency translation adjustment of \$7 being recycled to additional paid-in capital. The Company made an equity investment in Werner Aero, LLC, a supplier to the aviation industry, totaling \$10.

In the year ended March 31, 2022, the Company sold its ownership interests in Vallourec Star, LP and VAM USA, LLC to a third party resulting in a net pretax loss of \$2 and a reduction in investments accounted for using the equity method of \$114. The Company also sold its ownership interests in SMS Construction and Mining Systems, Inc. and Sumitomo Corporation de Mexico, S.A. de C.V. to SC, see note 6.

(6) Other Income (Expense)

Other income (expense) in the consolidated statement of comprehensive income for the year ended March 31, 2023 includes:

- Reversals of impairments of identifiable intangible assets of B&L Pipeco Services, Inc. totaling \$86 and P2 Energy Services, LLC totaling \$6, see note 11,
- a \$46 reversal of an impairment related to an electric generating station owned by Perennial Power Holdings, Inc., see note 9,
- a \$28 impairment of investment property held by TKOS II, LLC, see note 10, and
- impairments totaling \$7 of security investments to real estate funds.

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

Other income (expense) in the consolidated statement of comprehensive income for the year ended March 31, 2022 includes:

- losses totaling \$20 due to the recycling of the accumulated currency translation adjustments related to the sales of Sumitomo Canada Limited and SMS Construction and Mining Systems, Inc., see notes 4 and 5,
- a \$19 impairment of investment property held by TKOS II, LLC,
- impairments totaling \$19 of two investments in Associates,
- an \$8 loss on sale of Sumitomo Corporation de Mexico, S.A. de C.V., see note 5,
- a net loss of \$2 on the sales of two equity investments in Associates, see note 4, and
- net gains of \$39 on valuations of investment securities.

(7) Inventories

As of March 31, 2023 and 2022, inventories consisted of the following:

	<u>2023</u>	<u>2022</u>
Finished goods	\$ 1,884	1,156
Raw materials	185	412
Work in process	<u>9</u>	<u>15</u>
Total	<u>\$ 2,078</u>	<u>1,583</u>

The Company reports inventories net of allowances of \$10 and \$27 as of March 31, 2023 and 2022, respectively, to adjust inventories to their net realizable values.

Inventories under a consignment agreement or otherwise not in the control of the Company that are included in prepaid expenses and other current assets were \$183 and \$105 as of March 31, 2023 and 2022.

(8) Related Parties

The Company is involved in a significant number of sales and purchase transactions with SC and its affiliates. Included in total revenues are sales to SC and its affiliates for the years ended March 31, 2023 and 2022 of \$449 and \$455, respectively. The Company made approximately \$598 and \$450 in purchases from SC and its affiliates during the years ended March 31, 2023 and 2022, respectively. The Company pays a guarantee fee to SC based on the Company's outstanding third party debt. Such fee was approximately \$7 for the each of the years ended March 31, 2023 and 2022.

The Company has trade accounts receivable from and trade accounts payable to related parties resulting from its related party transactions. In addition, the Company makes short-term loans to certain related parties and acts as a depository for excess cash of other related parties (intracompany cash management receivables and payables).

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

As of March 31, 2023 and 2022, accounts payable to related parties, net consisted of the following:

	<u>2023</u>	<u>2022</u>
Accounts receivable from:		
SC subsidiaries	\$ 14	13
Associated companies of SC and the Company	9	3
Accounts payable to:		
SC	(165)	(131)
SC subsidiaries	(106)	(92)
Associated companies of SC and the Company	<u>(37)</u>	<u>(38)</u>
	<u>\$ (285)</u>	<u>(245)</u>

As of March 31, 2023 and 2022, intracompany cash management receivable (payable), net consisted of the following:

	<u>2023</u>	<u>2022</u>
Cash due from:		
SC	\$ —	400
SC subsidiaries	84	76
Associated companies of SC and the Company	103	—
Cash due to:		
SC subsidiaries	<u>(133)</u>	<u>(115)</u>
	<u>\$ 54</u>	<u>361</u>

Compensation of the executive officers of the Company, which was substantially all in the form of short-term employee benefits, totaled \$11 and \$10 for the years ended March 31, 2023 and 2022, respectively.

Disposals	—	(2)	1	(3)	(13)	—	(17)
Impairment reversals	—	—	7	—	—	—	7
Other changes	—	(1)	(119)	2	(2)	—	(120)
Balance at March 31, 2023 \$	—	221	827	63	103	—	1,214
Carrying amount at:							
March 31, 2021	32	274	847	32	85	18	1,288
March 31, 2022	30	262	885	35	85	36	1,333
March 31, 2023	31	278	1,073	37	101	46	1,566

The year ended March 31, 2023 includes the reversal of an impairment related to an electric generating station owned by Perennial Power Holdings, Inc. Based on its estimated fair value, the impairment amount reversed resulted in the electric generating station being restored to its pre-impairment carrying amount less subsequent depreciation that would have been recognised resulting in a net increase of \$46 in the net carrying amount. Other changes in Machinery and Equipment for the years ended March 31, 2023 and 2022 primarily consist of Sunstate Equipment Co., LLC and Linder Industrial Machinery Company transfers of equipment previously leased to inventory in anticipation of sale of such equipment.

March 31, 2023	119	108	175	—	15	—	298

During the year ended March 31, 2023, the Company had reversed impairments totaling \$92 of tradename and customer relationship intangible assets for two of the Company's subsidiaries in the Tubular products segment primarily due to economic recovery in the oil & gas markets. The values were determined using the relief of royalty method for tradename and excess earnings approach for customer relationships applying a discount rate of 15.5%.

The significant carrying amounts of trade names as of March 31, 2023 and 2022 were those related to:

	2023	2022
Sunstate Equipment Co., LLC	\$ 67	71
B&L Pipeco Services Inc.	38	30
P2 Energy Services, LLC	—	7

The weighted average remaining useful lives as of March 31, 2023 was 13 years.

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

The significant carrying amounts of customer relationships as of March 31, 2023 and 2022 were those related to:

	<u>2023</u>	<u>2022</u>
Sunstate Equipment Co., LLC	\$ 44	47
B&L Pipeco Services Inc.	97	33
P2 Energy Services, LLC	18	6

The weighted average remaining useful lives as of March 31, 2023 was 10 years.

(12) Notes Payable and Commercial Paper

Interest rates on notes payable of \$150 and \$205 as of March 31, 2023 and 2022, respectively, averaged approximately 3.44% and 0.37% during the years ended March 31, 2023 and 2022, respectively.

Commercial paper borrowings of \$142 and \$0 was outstanding as of March 31, 2023 and 2022, respectively. Borrowings during those years had weighted average maturities of 14 days and 16 days, respectively, with interest rates averaging 3.53% and 0.15%, respectively. Under a support agreement between SC and the Company, so long as any of the commercial paper is outstanding and unpaid, SC has agreed to advance the sums in the form of capital contributions such that the Company's stockholder's equity shall not fall below \$110.

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

The reconciliations between the U.S. federal statutory tax rate and the Company's effective tax rate for the years ended March 31, 2023 and 2022 are as follows:

	<u>2023</u>	<u>2022</u>
Statutory U.S. federal income tax rate	21.0 %	21.0 %
State and local income taxes, net of federal income tax benefit	3.0	3.1
Nondeductible and capital loss items	(2.6)	(3.2)
Credits	(1.6)	(4.8)
Foreign source items	(0.1)	—
Undistributed earnings	0.2	(3.7)
Derecognition of prior tax attributes	0.1	4.7
Other, net	(0.2)	(1.7)
Effective income tax rate	<u>19.8 %</u>	<u>15.4 %</u>

Credits are primarily renewable energy production tax credits generated by the Company's equity investments in qualifying projects.

(15) Deferred Tax Assets and Liabilities

Deferred tax assets (liabilities) as of March 31, 2023 and 2022 are attributable to the following:

	<u>2023</u>	<u>2022</u>
Property and equipment	\$ (264)	(213)
Investments	(32)	(39)
Derivatives	(8)	(20)
Other comprehensive income (loss)	(7)	(12)
Unremitted earnings	(6)	(5)
Acquired intangibles	(6)	19
Post-retirement obligations	1	1
Other	6	13
Inventory adjustments	6	15
Deferred rent	12	13
Tax loss and credit carryforwards	51	82
Accruals and reserves	57	45
Net deferred tax liabilities	<u>\$ (190)</u>	<u>(101)</u>

Deferred tax assets and deferred tax liabilities are offset as the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority or if there is the right to set off current tax assets against current tax liabilities. In the consolidated statements of financial position, the deferred tax assets and liabilities are not classified into current and noncurrent segments.

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

At March 31, 2023, the Company and certain of its subsidiaries have deferred tax assets related to state and foreign net operating loss (NOL) carryforwards of approximately \$15. These NOL carryforwards are available to offset future state and foreign taxable income.

(16) Equity

(a) Other Components of Equity

(i) Translation Reserve

The translation reserve includes all foreign currency differences arising from the translation of the financial statements of foreign operations, including the Company's investments in associated companies.

(ii) Hedging Reserve

The hedging reserve includes the effective portion of the cumulative net change in the fair value of cash flow hedging instruments related to hedge transactions that have not yet occurred.

(iii) Fair Value Reserve

The fair value reserve includes the cumulative net change in the fair value of financial assets designated as FVTOCI until the investments are derecognized or impaired.

(b) Dividends

SC implemented a dividend guideline for overseas subsidiaries that required the Company to pay a dividend beginning in the year ended March 31, 2011. The ultimate dividend amount is subject to adjustment depending on the effects of taxation as well as equity and asset levels.

In the year ended March 31, 2023, the Company paid a dividend from retained earnings in the amount of \$400 to SC. In addition, the Company distributed its interest in Sumitomo Corporation do Brasil S.A. to SC, resulting in reductions in equity-accounted investments and retained earnings of \$6 with the currency translation adjustment of \$7 being recycled to additional paid-in capital.

In the year ended March 31, 2022, the Company distributed its 40% ownership interest in Eryngium Limited to SC in the form of a dividend from retained earnings in the amount of \$97.

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

(c) Reserves Recognized Directly in Equity

The following table shows the changes in reserves directly recognized in equity:

Balance – March 31, 2021, net of taxes of \$3	\$	(64)
Unrealized changes in fair value of securities, net of taxes of (\$10)		27
Unrealized gains on derivatives, net of taxes of (\$2)		10
Foreign currency translation adjustment, net of taxes of (\$2)		31
Balance – March 31, 2022, net of taxes of (\$11)		4
Unrealized changes in fair value of securities, net of taxes of \$7		(28)
Unrealized losses on derivatives, net of taxes of (\$6)		(5)
Foreign currency translation adjustment, net of taxes of \$0		19
Balance – March 31, 2023, net of taxes of (\$10)	\$	<u>(10)</u>

(17) Defined Contribution Savings Plans

The Company and certain of its subsidiaries sponsor defined contribution 401(k) savings plans (the Savings Plans) for eligible employees. The Company at its discretion matches employees' contributions up to specific limitations and made contributions to the Savings Plans of \$11 and \$10 in the years ended March 31, 2023 and 2022, respectively.

(18) Fair Value of Financial Instruments

For the Company's financial instruments classified as current in the consolidated statements of financial position (cash and cash equivalents, accounts receivable, commercial paper, notes payable, current portion of long-term debt and accounts payable), the carrying values approximate fair value based on the relatively short period of time between the origination of the instruments, their expected realization or the frequent repricing of the instrument to market price.

The Company's long-term receivables and long-term debt primarily bear floating rates of interest and their carrying values approximate their fair values.

The fair value hierarchy described below reflects the significance of inputs used to determine the valuation of derivative assets and liabilities measured at fair value:

Level 1 - quoted market prices in active markets for identical assets or liabilities that the Company has the ability to access

Level 2 - quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or other inputs that are observable or can be corroborated by observable data for substantially the full term of the assets or liabilities

Level 3 - inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

The tables below include financial instruments carried at fair value as of March 31, 2023 and 2022.

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>
2023:			
Derivative assets:			
Physical commodity contracts	\$ —	221	90
Futures, swaps and options	1,098	29	—
Loan deals	—	1	—
Total assets	<u>\$ 1,098</u>	<u>251</u>	<u>90</u>
Derivative liabilities:			
Physical commodity contracts	\$ —	(210)	(88)
Futures, swaps and options	(1,097)	(12)	—
Loan deals	—	(3)	—
	<u>\$ (1,097)</u>	<u>(225)</u>	<u>(88)</u>
	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>
2022:			
Derivative assets:			
Physical commodity contracts	\$ —	272	40
Futures, swaps and options	4,673	30	—
Loan deals	—	—	—
Total assets	<u>\$ 4,673</u>	<u>302</u>	<u>40</u>
Derivative liabilities:			
Physical commodity contracts	\$ —	(229)	(44)
Futures, swaps and options	—	(4)	—
Loan deals	(4,640)	(15)	—
	<u>\$ (4,640)</u>	<u>(248)</u>	<u>(44)</u>

The derivative financial instruments in the above table include those of PSE, which are carried at fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. In the tables above, when the fair value of derivatives listed on an organized exchange market (futures, options on futures, and swaps) is offset with the margin call received or paid on the balance sheet, this fair value is presented on a net basis. Fair value is based on assumptions that market participants would use, including consideration of nonperformance risk. However, in situations where there is little, if any, market activity for the asset or liability at the measurement date, the fair value measurement reflects the Company's own judgments about the assumptions that market participants would use in pricing the asset or liability. Those judgments are developed by the Company based on the best information available in the circumstances, including expected cash flows and risk-adjusted discount rates, and available observable and unobservable inputs.

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

Fair value of the Company's Level 2 assets and liabilities is determined using the income approach through various models and techniques that require significant unobservable inputs. Level 3 assets and liabilities include the Company's physical commodity contracts where the valuations utilize significant unobservable inputs related to tenor and volatility. Inputs used and the fair value of Level 3 instruments are reviewed period over period and compared with market conditions to determine reasonableness.

The following table sets forth the Company valuation techniques and significant unobservable inputs used to determine fair value for Level 3 assets and liabilities:

	<u>Assets</u>	<u>Liabilities</u>	<u>Valuation technique</u>	<u>Significant unobservable input</u>	<u>Range (weighted average)</u>
March 31, 2023:					
Physical commodity contract	\$ 1.0	—	Proxy spread model	Forecasted pricing	\$0.8–\$1.1
	1.5	—	Linear regression model	Historical and forecasted load	\$(1.6)–\$4.5
March 31, 2022:					
Physical commodity contract	\$ 0.7	—	Proxy spread model	Forecasted pricing	\$0.5–\$0.9
	—	(5.2)	Linear regression model	Historical and forecasted load	\$(4.9)–(\$5.4)

The following table sets forth a summary of changes in the Company's fair value of Level 3 net derivative assets and liabilities:

	<u>2023</u>	<u>2022</u>
Fair value of net assets at beginning of year	\$ (5)	1
Net change in fair value	7	(5)
Transfer out of Level 3	—	(1)
Fair value of net assets at end of year	<u>\$ 2</u>	<u>(5)</u>
Changes during the period in unrealized gains (losses) related to assets and liabilities, net held at the end of year recognized in the net trading gains profit	\$ 2	(6)

The fair values of the Company's physical commodity contract contain intrinsic value and time value. Intrinsic value is the difference between the market price and strike price of the underlying commodity. Time value is made up of several extrinsic components, including volatility, time to expiration and interest rates.

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

For physical commodity contracts where the Company is supplier of energy, increases in volatility of the underlying commodity prices would result in increases to fair value as it represents greater price movement risk. As power and gas prices decrease where the Company is the supplier of energy, the fair value of the arrangement tends to decrease. As power and gas prices increase where the Company is the purchaser of energy, the fair value of the arrangement tends to increase. The value of the arrangement is also impacted by the correlation between gas and power prices.

The Company and certain of its subsidiaries make financial investments in operating entities and early-stage to initial public offering entities to facilitate strategic business partnerships and to realize long-term capital appreciation and are included in noncurrent other assets. The table below includes the balances of such investments accounted at FVTOCI and FVTPL and the related pretax gains recognized.

	<u>2023</u>	<u>2022</u>
Carrying values:		
FVTOCI	\$ 160	211
FVTPL	<u>157</u>	<u>131</u>
Total included in noncurrent other assets	<u>\$ 317</u>	<u>342</u>
Net gains (losses) recognized:		
FVTOCI	\$ (34)	37
FVTPL	7	31

(19) Derivatives and Hedge Accounting

Derivative Financial Instruments Not Designated as Hedges

In the normal course of business, the Company is exposed to foreign exchange rate fluctuation risks due to transactions originally denominated in foreign currencies. To manage these risks, the Company routinely enters into foreign currency forward contracts. The change in fair value of these foreign currency forward contracts is recorded in the Company's consolidated statements of comprehensive income.

As of March 31, 2023 and 2022, the Company held certain cross-currency swaps that did not qualify as hedges for accounting purposes to manage foreign currency exposures. Gains and losses for changes in the fair value of these derivatives, which were recorded in the Company's consolidated statements of comprehensive income, were not significant.

The derivative instruments of PSE include a variety of commodity instruments to purchase or supply natural gas (NG) and electric power at specified delivery points and at specified future dates. The derivative commodity instruments are offered to customers and suppliers in the marketplace as a marketing and risk management service. PSE also trades crude oil derivative commodity instruments. Under some circumstances, the open positions expose the Company to risk that fluctuating market prices may adversely impact its financial condition or results of operations. However, the net open positions are actively managed with policies designed to limit the exposure to market risk.

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

Occasionally, PSE enters into loan agreements, whereby NG is effectively loaned or borrowed to and from utility companies, involving a receipt of physical gas and an obligation to return the same quantity of physical gas at a specified later date. Commodity derivative positions are used to economically hedge loan activity. Loan transactions are treated as financing arrangements with an embedded derivative.

PSE loaned 560 MMBtu with a fair value of \$(3) as of March 31, 2023 and 2,764 MMBtu with a fair value of \$(15) as of March 31, 2022.

Derivatives not designated as hedges as of March 31, 2023 were as follows:

	Physical NG commodity contracts	Physical power commodity contracts	Futures, swaps and options	Loan deals	Offsetting	Cash collateral	Total derivatives not designated as hedges
Current derivative assets	\$ 124	39	1,122	—	(1,085)	(86)	114
Noncurrent derivative assets	72	76	4	—	(59)	—	93
Total derivative assets	<u>\$ 196</u>	<u>115</u>	<u>1,126</u>	<u>—</u>	<u>(1,144)</u>	<u>(86)</u>	<u>207</u>
Current derivative liabilities	\$ (130)	(29)	(1,106)	(3)	1,085	86	(97)
Noncurrent derivative liabilities	(44)	(95)	(4)	—	59	—	(84)
Total derivative liabilities	<u>\$ (174)</u>	<u>(124)</u>	<u>(1,110)</u>	<u>(3)</u>	<u>1,144</u>	<u>86</u>	<u>(181)</u>

Derivatives not designated as hedges as of March 31, 2022 were as follows:

	Physical NG commodity contracts	Physical power commodity contracts	Futures, swaps and options	Loan deals	Offsetting	Cash collateral	Total derivatives not designated as hedges
Current derivative assets	\$ 115	85	4,699	—	(4,558)	(231)	110
Noncurrent derivative assets	104	8	1	—	(30)	—	83
Total derivative assets	<u>\$ 219</u>	<u>93</u>	<u>4,700</u>	<u>—</u>	<u>(4,588)</u>	<u>(231)</u>	<u>193</u>
Current derivative liabilities	\$ (126)	(89)	(4,643)	(15)	4,558	198	(117)
Noncurrent derivative liabilities	(50)	(8)	(1)	—	30	—	(29)
Total derivative liabilities	<u>\$ (176)</u>	<u>(97)</u>	<u>(4,644)</u>	<u>(15)</u>	<u>4,588</u>	<u>198</u>	<u>(146)</u>

Derivative Financial Instruments Designated as Hedges

The Company enters into cross-currency swaps related to debt denominated in Japanese Yen, Euro, Canadian Dollar and British Pound. The Company designates these derivatives as fair value hedges. Gains and losses resulting from changes in the fair value of these derivatives were recorded in the Company's consolidated statements of comprehensive income.

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

The following table presents the Company's outstanding derivative contracts designated as hedges as of March 31, 2023 and 2022:

	2023		2022	
	Notional amount	Carrying amount at fair value	Notional amount	Carrying amount at fair value
Derivative assets:				
Cross-currency and interest rate swaps	\$ 200	18	200	12
Foreign currency forward contracts and other	46	1	108	4
Derivative liabilities:				
Foreign currency forward contracts	1	—	5	—

The current and long-term portions of derivative assets are recorded in accounts receivable and long-term receivables, respectively, and the current and long-term portions of derivative liabilities are recorded in accrued expenses and other current liabilities and other long-term liabilities, respectively, in the accompanying consolidated statements of financial position. Gains and losses are included in revenue, cost of sales and interest expense in the accompanying consolidated statements of comprehensive income and other components of equity.

(20) Capital and Financial Risk Management

(a) Capital Management

The Company's capital management philosophy is guided by SC policies. The fundamental principles of SC's capital management are to maintain appropriate capital levels by optimizing debt and equity balances to manage business risks in order to maintain management soundness and efficiency and to promote continuous growth. The key metrics used for capital management are risk-adjusted assets and equity balances along with a net debt-to-equity ratio.

Management reviews the strategies for earnings and investments and the metrics on a semi-annual planning and assessment basis.

(b) Financial Risk Management

The Company's operations expose it to the risk of changes in foreign exchange rates and interest rates. Derivative financial instruments are used by the Company to reduce these risks. The Company assesses foreign currency exchange rate risk and interest rate risk by continuously monitoring changes in these exposures and by evaluating hedging opportunities. The Company is also exposed to credit related losses in the event of nonperformance by counterparties to financial assets, but it is not expected that any counterparties will fail to meet their obligations because most of the counterparties

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

are internationally recognized financial institutions. The Company's basic policy for fund raising activities is to secure stable, short to long-term funds and liquidity for operations.

(i) *Foreign Currency Exchange Rate Risk*

The Company operates internationally and is exposed to foreign currency risks related to purchasing, selling, financing and investing in currencies other than the U.S. dollar. The Company's strategy to manage foreign currency risks is mainly to preserve the economic value of cash flows in its functional currency by using foreign currency forward contracts, cross-currency swaps, considering the netting effect of foreign currency exposures on recognized assets, liabilities and unrecognized firm commitments. The net of foreign currency risk exposure as of March 31, 2023 and 2022 were insignificant.

An analysis of a hypothetical impact on income (loss) before income taxes as reported in the consolidated statements of comprehensive income that would result from a 1% appreciation of the U.S. Dollar against all foreign currencies as of the end of the fiscal year indicated that the effects would be insignificant. The analysis is based on the assumption that other factors such as outstanding balance and interest rates are constant.

(ii) *Interest Rate Risk Management*

The Company is exposed to risks arising from changes in interest rates while financing its business activities. In particular, interest rate fluctuations affect borrowing costs because a major part of the outstanding debt instruments are floating rate instruments and short-term borrowings are refinanced from time to time.

However, the impact on borrowing costs are partially offset by returns on certain assets which may also be impacted by interest rate fluctuations. In addition, the Company is engaged in financing activities, which could be affected by interest rate fluctuations. The Company monitors interest rate risk arising from its assets and liabilities and the Company's risk management structure utilizes derivative contracts, such as interest rate swaps, to manage fluctuations of earnings or losses due to the fluctuations of interest rates.

The following table represents the hypothetical impact on the Company's income (loss) before income taxes that is attributable to financial instruments exposed to the fluctuation risk of interest rates in the case where interest rates would increase by 1%. The analysis is calculated by multiplying 1% by the net amounts of floating rate interest bearing financial assets and liabilities as of March 31, 2023 and 2022, without considering changes in balances, currency fluctuations and the dispersing effect for floating rate borrowings derived from the timing differences to refund and revise the rate in the future and is based on the assumption that other variable factors are held constant.

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

A sensitivity analysis to fluctuations of market interest rates is performed for the potential cash flow exposures from interest rate bearing debt and loans with a floating rate. The floating rate loans include those with fixed rates, which are converted to floating rate with interest rate swap contracts.

	<u>2023</u>	<u>2022</u>
Income before income taxes	\$ (17)	(19)

(iii) Interest Rate Benchmark Reform and Associated Risk

A fundamental reform of major interest rate benchmarks is being undertaken globally, including the replacement of some Interbank Offered Rates (IBOR) with alternative nearly risk-free rates referred to as "IBOR reform". The Company has exposures to IBORs on its financial instruments that will be replaced or reformed as part of these market-wide initiatives. The Company's main IBOR exposure at March 31, 2023 and 2022 was indexed to US dollar London Inter-Bank Offered Rate (LIBOR). The alternative reference rate for US dollar LIBOR is the Secured Overnight Financing Rate (SOFR). Although the US dollar LIBOR was planned to be discontinued by the end of 2021, the ICE Benchmark Administration, the authorized administrator of LIBOR, announced that it intends to determine and publish certain US dollar LIBORs until the end of June 2023. The Company has begun the process of implementing appropriate fallback provisions for all US dollar LIBOR indexed exposure targeting June 30, 2023.

The Company monitors and manages the transition to alternative rates and evaluates the extent to which contracts reference IBOR cash flows, whether such contracts will need to be amended as a result of IBOR reform and how to manage communication about IBOR reform with counterparties.

The Company monitors the progress of transition from LIBOR to new benchmark rates by reviewing the total amount of contracts that have yet to transition to an alternative benchmark rate and the amounts of such contracts that include an appropriate fallback clause. The Company considers that a contract is not yet transitioned to an alternative rate when the interest under the contract is indexed to a benchmark rate that is still subject to reform, even if it includes a fallback clause that deals with the cessation of the existing LIBOR.

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

The following table shows the total amounts of unreformed contracts and those with appropriate fallback language at March 31, 2023 and 2022. The amounts of financial assets and financial liabilities are shown at their carrying amounts.

	<u>2023</u>	<u>2022</u>
Financial assets – corporate debt securities		
Total amount of unreformed contracts	\$ 105	110
Amount with appropriate fallback clause	—	—
Financial liabilities – secured loans		
Total amount of unreformed contracts	\$ 1,124	1,848
Amount with appropriate fallback clause	432	552

(iv) Market Risk Management

The Company is exposed to the risk fluctuations in the market price of the commodities being traded (NG and electric power) and the associated commodity derivative instruments, which is influenced by supply and demand. Market risk is also influenced to the extent that the performance or nonperformance by market participants of their contractual obligations and commitments affect the supply and demand of the commodity. The Company manages the market risks inherent in its commodity trading business according to risk policies established by the Company.

(v) Credit Risk Management

The Company's receivables are from a large number of customers and counterparties, spread across diverse industries and geographical areas. Ongoing credit evaluations are performed on the financial condition of accounts receivable. The Company may also seek contractual or other forms of protection or mitigation, including cash collateral, letters of credit or parent company guarantees.

(vi) Liquidity Risk Management

The Company's basic policy for financing operations is to secure stable short to long-term funds and sufficient liquidity for its operations. The Company secures liquidity from the cash flows from operations, borrowing from financial institutions and issuance of commercial paper. The Company deposits these funds at highly creditable financial institutions to which generally high credit ratings are given by the credit rating agencies.

(21) Segment and Related Information

The Company's reportable business segments are organized in a manner that reflects how management views those business activities. The Company reports for each segment a measure of revenues, profit or loss and segment assets. The Company's principal business activities have been classified into the following reportable segments:

The Tubular products segment supplies a wide variety of high grade oil country tubular goods, line pipe, specialty tubing and oil field equipment to companies in the oil, gas, petrochemical, automobile, and boiler fabrication industries.

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

The Steel and nonferrous metal segment supplies flat-rolled products, railway products, forging and casting products, specialty steel and nonferrous metal.

The Automotive segment includes supplying parts to the automotive industry.

The Construction and transportation systems segment includes operating dealerships and distributorships for the sale and rental of construction equipment.

The Infrastructure segment activities include investing in and operating electric generating assets, using renewable and nonrenewable energy sources and delivering commuter rail cars and other products for transportation systems.

The Chemicals and electronics segment activities include trade dealings in petrochemicals, plastics, fine and specialty chemicals and inorganic chemicals.

The Media and digital business segment includes investment activities of technology and media activities.

The Materials, supplies and real estate segment includes investment in and development of commercial and residential real estate.

The Food and lifestyle segment supports the production of organic foods and eco-friendly farming practices and provides import and export trade services.

The Mineral resources segment includes investment, development and production of nonferrous metals, precious metals and base metals.

The Energy segment includes investment, trading and marketing activities of natural gas, electricity and crude oil.

Energy Innovation Initiative Americas pursues next-generation energy-related businesses contributing to realization of a carbon-neutral society.

The Treasury and corporate segment includes finance-related activities such as derivatives transactions and consumer and business financing and logistics services. Also included, are the Company's interests in Sumitomo Canada Limited (through June 30, 2021), Sumitomo Corporation de Mexico (through February 28, 2022) and Sumitomo Corporation do Brazil (through March 31, 2023).

SUMITOMO CORPORATION OF AMERICAS AND SUBSIDIARIES

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

The Company evaluates segment performance based on net income (loss) attributable to the owners of the parent company. Information on the Company's reportable segments as of and for the years ended March 31, 2023 and 2022, respectively, is as follows:

Segment	2023				2022			
	Revenues	Gross profit	Income (loss)	Segment assets	Revenues	Gross profit	Income (loss)	Segment assets
Tubular products	\$ 6,402	813	519	2,818	3,437	397	205	1,810

(22) Commitments and Contingencies

(a) Leases as Lessee

The Company leases assets including building and improvements, machinery and equipment and vehicles. Future minimum annual rental payments and the related liabilities included in the consolidated statements of financial position as of March 31, 2023 and 2022 were as follows:

	<u>2023</u>	<u>2022</u>
Undiscounted cash flows:		
Less than one year	\$ 70	65
Between one and five years	195	170
More than five years	<u>104</u>	<u>111</u>
Total undiscounted cash flows	\$ <u>369</u>	<u>346</u>
Lease liabilities:		
Current	\$ 57	54
Long-term	<u>257</u>	<u>243</u>
Total	\$ <u>314</u>	<u>297</u>

The Company has elected not to recognize right-of-use assets and lease liabilities for short-term leases of property and equipment that have a lease term of 12 months or less and leases of low-value assets. The Company recognizes the lease payments associated with these leases as an expense on a straight-line basis over the term of the lease. The future minimum annual rental payments of leases under which the Company as a lessee is immaterial with rent expense of \$4 for each of the years ended March 31, 2023 and 2022.

Interest expense related to lease liabilities totaled \$13 and \$14 for the years ended March 31, 2023 and 2022. Current and long-term lease liabilities are included in accrued expenses and other current liabilities and other long-term liabilities, respectively, in the consolidated statements of financial position.

(In millions of U.S. dollars)

(b) Leases as Lessor

The Company leases out its investment property and railcars under long-term operating leases. The railcars leased under these agreements are included in machinery and equipment with cost and accumulated depreciation of \$11 and \$6, respectively, at March 31, 2023. The minimum annual rentals as of March 31, 2023 for the next five years and thereafter were as follows:

Less than one year	\$	29
Between one and five years		93
More than five years		61
	\$	<u>183</u>

(c) Indemnification and Guarantee Agreements

In the normal course of business, the Company secures certain obligations with Performance and Labor, and Material Bonds (performance bonds). In certain situations, the ability to obtain performance bonds is directly related to the Company's credit rating. As such, the Company may arrange for issuance of performance bonds through third parties. As of March 31, 2023 and 2022, the Company had \$278 and \$185, respectively, of such performance bonds outstanding, of which \$50 and \$54, respectively, were at risk in ongoing projects. These amounts are expected to decrease over time as the Company completes the work in process or transfers ownership to other companies.

The Company believes that it is not reasonably likely that it will be required to perform under the performance bonds or that any performance requirement would have a material impact on its consolidated financial statements. As a result, the estimated fair value of these agreements is considered to be immaterial to the consolidated financial statements.

As of March 31, 2023, the Company has commitments to make additional equity investments totaling approximately \$3.

(d) Performance Obligations under Long-term Sales Contracts

The aggregate amount of the revenue expected to be recognized in the future related to the Company's performance obligations (unsatisfied or partially unsatisfied) resulting from long-term sales contracts was \$13,470 as of March 31, 2023. The amount of revenue expected from the PSE LNG long-term sales agreement represented approximately 99% of the aggregate amount and is based on Henry Hub prices multiplied by an estimated fuel factor plus amounts for fixed costs, annual unit charges and a risk premium.

(e) Natural Gas Purchase and Liquefied Natural Gas Sale Commitments

The Company has a definitive gas purchase agreement, which commenced in 2018, with an unrelated party to purchase 350,000 MMBtu of NG per day for approximately 20 years, which will be utilized for LNG production to fulfill its sales commitments. In order to convert the NG into LNG, the Company entered into a 20-year terminal service agreement with another unrelated party. To facilitate LNG sales, a LNG sales agreement was entered into, which is also for approximately 20 years.

Notes to Consolidated Financial Statements

March 31, 2023 and 2022

(In millions of U.S. dollars)

Although it is foreseeable that the PSE will be required to sell unavoidable excess gas acquired under the contract rather than use it for the intended purpose of converting it into LNG, management believes that it is appropriate to account for the contract as an executory contract rather than report it at its fair value.

(f) Litigation

The Company is involved in several lawsuits and regulatory inquiries and investigations incidental to its business. In the opinion of management, the outcome of such matters facing the Company will not have a material adverse effect on the financial position, cash flows or operating results of the Company.

(23) Selling, General and Administrative Expenses

The components of selling, general and administrative expenses were as follows for the years ended March 31, 2023 and 2022:

	<u>2023</u>	<u>2022</u>
Employee benefits expenses	\$ 462	434
Depreciation and amortization	92	86
Service fees	66	52
Travel and communication expenses	40	29
Office expenses and supplies	34	30
Taxes, other than income taxes	15	14
Rent expense	4	4
Other	<u>69</u>	<u>50</u>
Selling, general and administrative expenses	<u>\$ 782</u>	<u>699</u>

(24) Subsequent Event

The Company has evaluated subsequent events from the consolidated statement of financial position date through May 12, 2023, the date at which the consolidated financial statements were available to be issued, and determined that there are no items to disclose.
