Overview of UOB Group

UOB Overview

Founding

Founded in August 1935 by a group of Chinese businessmen and Datuk Wee Kheng Chiang, grandfather of the present UOB Group CEO, Mr. Wee Ee Cheong

Expansion

UOB has grown over the decades through organic means and a series of acquisitions. It is today a leading bank in Asia with an established presence in the ASEAN region. The Group has an international network of around 500 offices in 19 countries and territories.

Note: Financial statistics as at 31 March 2016.
1. FX rate used: USD 1 = SGD 1.34935 as at 31 March 2016.
2. Based on final rules effective 1 January 2018.
3. Leverage ratio is calculated based on the revised MAS Notice 637 which took effect from 1 January 2015.
4. Calculated based on profit attributable to equity holders of the Bank net of preference share dividend and capital securities distributions.
5. Computed on an annualised basis.
6. Average for 1Q16.

Key Statistics for 1Q16

- Total assets : SGD329.7b (USD244.3b[1])
- Shareholder's equity : SGD30.6b (USD22.8b[1])

Macroeconomic Outlook

Southeast Asia: Resilient Key Markets

Long-term fundamentals and prospects of key Southeast Asia have greatly improved since the 1997 Asian Financial Crisis. Compared with 1997, they have:

- Significantly higher levels of foreign reserves
- Healthier current account and balance of payment positions
- Lower levels of corporate leverage
- Lower levels of foreign currency debts

Asian Foreign Reserves

We Still Expect Singapore GDP Growth Slightly Stronger at 2.7% in 2016

- Singapore's GDP grew at a weak 1.8% y/y in 1Q16, as the manufacturing sector contracted for the 6th quarter and the services sector expanded at a slow 1.9% y/y pace. In response, the MAS adopted a neutral appreciation stance on the SGD NEER, to provide monetary support for the economy.
- We forecast 2016 GDP to grow 2.7% on the back of the low base in 2015, as well as the continued improvement in the US economy.
- We expect core inflation to edge higher to 1.0% this year, from 0.5% in 2015 as the base effects of lower commodity prices and medical subsidies wear off.

ASEAN Banking Sector: Strong Fundamentals Remain Intact

Key Banking Trends

- There has been a resurgence in loan demand after the deleveraging of ASEAN banks during the Global Financial Crisis
- ASEAN banks have healthy capital and funding levels
  - Singapore banks have among the highest capital ratios in the region
  - As solvency is not generally an issue in ASEAN, focus would be on putting the excess capital to productive uses
- Policy changes in regulation, liquidity, rates and sector consolidation are shaping the ASEAN banking business models going forward

1. Includes 2% for D-SIB buffer.
2. Each local regulator determines its own level of countercyclical capital buffer to accumulate capital in periods of economic expansion.
3. HKMA has set a CCyB of 2.5% to be phased in over a period of 3 years. As of 1 January 2016, the CCyB requirement is 0.625% of RWA.
4. Ratios shown here are on a fully-loaded based on end-state when the maximum capital requirements are implemented
5. In China, G-SIBs are only subject to the higher of G-SIB and D-SIB buffer

Resolution Regime Overview

Resolution Regime in Asia

Country	Public discussion	Existing resolution powers	Factors influencing views on bail-in [1]	How past resolution been handled
Singapore	Yes	Statutory bail-in proposed to apply to only subordinated debt	**Role as an global financial hub**; *strength of system; good coordination between regulator and local banks*	Crisis prevention tools; no record of bank failures in the past
Indonesia	No	Transfer powers; no statutory bail-in	*History of public sector bailouts*	Liquidation; public funds
Hong Kong	Yes, ended	Transfer powers; statutory bail-in proposed	**Role as an international financial centre and presence of G-SIBs**	Liquidation; public funds; M&A
China	No	Transfer powers; no statutory bail-in	*Risk of contagion in debt market; role of government in banking sector*	Capital injections; NPL disposals; forbearance

1. **Bold text** indicates factors in favor of implementing a bail-in regime; *italic text* indicates factors against

Resolution Regime: Priorities for 2015 [2]

As per Financial Stability Board (FSB), any systemically significant financial institution that fails should be subject to a resolution regime as set out in *The Key Attributes of Effective Resolution Regimes for Financial Institutions*. In Nov 2015, the FSB released two finalised guidance papers on the Principles for Cross-border Effectiveness of Resolution Actions, and Guidance on Cooperation and Information Sharing with Host Authorities of Jurisdictions.

- Jurisdictions should have in place a transparent and efficient process for resolution measures by a foreign resolution authority to have cross-border effect, provided that domestic creditors are treated equitably.
- Authorities must have the confidence that resolution powers are legally enforceable, especially where instruments are governed by a foreign law.
- Jurisdictions should continue to develop statutory frameworks but in the interim use contractual approaches to aid the enforceability of resolution actions. Even after implementation of statutory frameworks, contractual approach can continue to complement such regimes.

2. Source: Financial Stability Board's *The Key Attributes of Effective Resolution Regimes for Financial Institutions*

Note: Malaysia and Thailand have yet to implement a framework for resolution regime.

Strong UOB Fundamentals

Strong UOB Fundamentals

Strong Management with Proven Track Record	▪ Proven track record in steering the bank through various global events and crises ▪ Stability of management team ensures consistent execution of strategies
Consistent and Focused Financial Management	▪ Steady flow of net interest income, representing 65% of total income; lower non-interest income amid softer investors' appetite ▪ Continue to invest in building long-term capabilities in a discipline manner ▪ Stable credit costs at 32bp
Prudent Management of Capital, Liquidity and Balance Sheet	▪ Strong capital base; Common Equity Tier 1 capital adequacy ratio of 12.8% as at 31 March 2016, well above Basel III capital requirements ▪ Liquid and well diversified funding mix with loan/deposits ratio at 80.7% ▪ Stable asset quality, with well-diversified loan portfolio
Delivering on Regional Strategy	▪ Holistic regional bank with effective full control of subsidiaries in key markets with lower credit penetration ▪ Key regional franchise continues to deliver as we leverage regional flows ▪ Entrenched local presence: ground resources and integrated regional network to better address the needs of our targeted segments

UOB is focused on the basics of banking;
Stable management team with proven execution capabilities

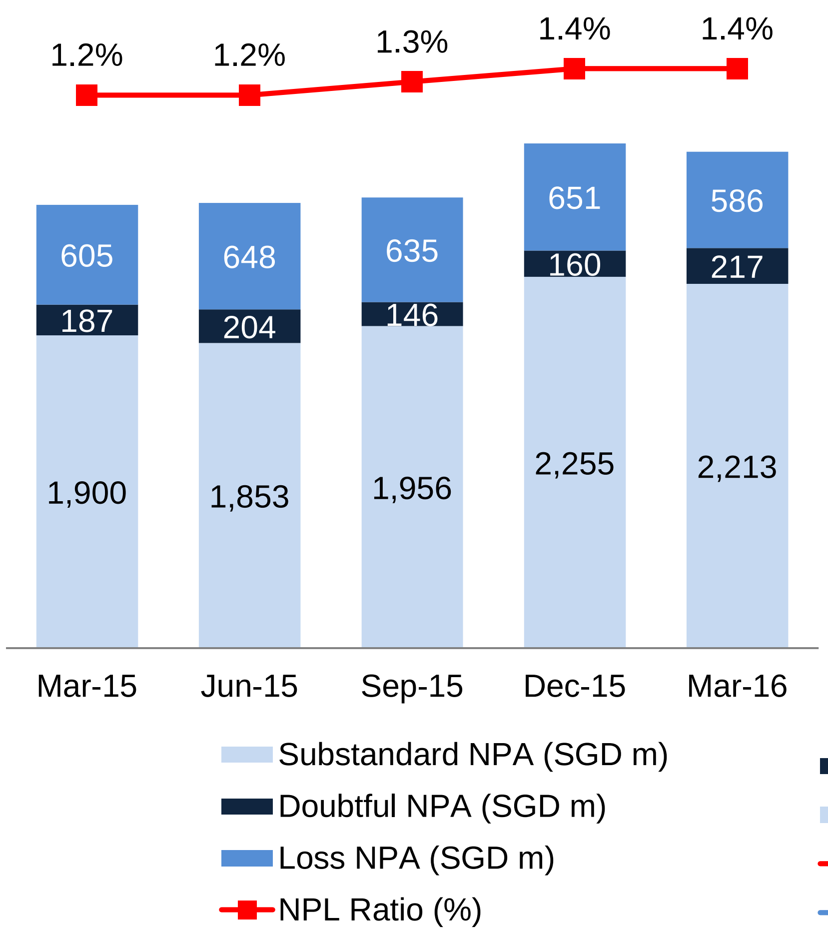
Robust Risk Management Framework

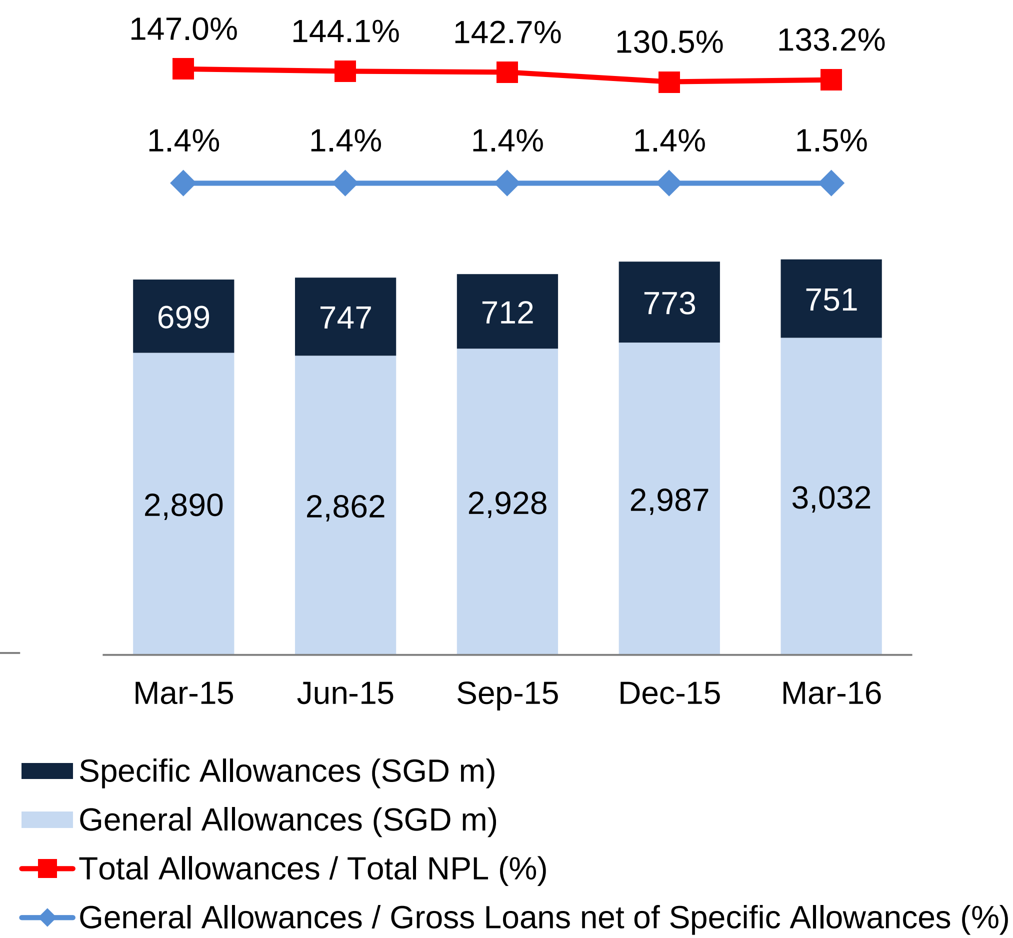
Robust Risk Management Framework	▪ Operate under strict regulatory regime; prudential rules in line with global best practices ▪ Strong risk culture; focus beyond long-term sustainability, beyond gains in short-term ▪ Focused on businesses which we understand and are well-equipped to manage ▪ Active board and senior management oversight ▪ Comprehensive risk management policies, procedures and limits governing credit risks, funding risks, interest rate risks, market risks and operational risks ▪ Regular stress tests ▪ Strong internal controls and internal audit process
Common Operating Framework across Region	▪ Standardised and centralised core banking systems completed at end-2013 ▪ Common operating framework integrates regional technology, operations and risk infrastructure, ensuring consistent risk management practices across core markets ▪ Framework anchored to Singapore head office's high corporate governance standards
Key Risks to Monitor	▪ Property-related risks: — Healthy portfolio: low NPL ratio and provisions — Majority of housing loans are for owner-occupied properties; comfortable average LTV ratio; delinquency and NPL trends regularly analysed — c.50% of property-related corporate loans are short-term development loans with diversified risks; progress, sales and cashflow forecasts of projects closely monitored ▪ Modest oil and gas exposure, with c.60% to less vulnerable downstream and traders; some weakness at upstream loans, but potential losses partly mitigated by collateral ▪ Exposure to weakening regional currencies: Extend such loans only to borrowers with foreign currency revenues; otherwise, borrowers required to hedge open positions

Resilient Asset Quality; High Allowances Coverage

Stable NPL Ratio



Consistently High Allowances Coverage



Disciplined Balance Sheet Management

- **Slight uptick in NPLs buffered by diversified portfolio with significant allowances**
  - NPL ratio largely stable at 1.4%
  - High general allowances-to-loans ratio of 1.5%
  - Strong NPL coverage: 133.2%

- **Strong funding and capital base**
  - High-quality 'sticky' deposits remains a key focus
  - Maiden EUR500m covered bond in Mar'16 helps broaden funding sources and investor base
  - Liquidity Coverage Ratios[1]: SGD (169%) and all-currency (139%); well above regulatory minimum
  - Fully-loaded CET1 ratio[2] of 12.1%

Assets:

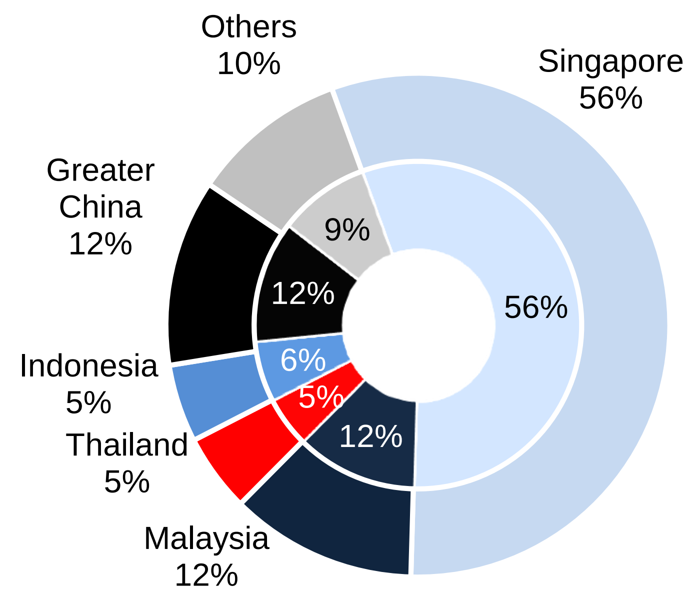
Gross loans breakdown:
Inner circle: Dec-15
Outer circle: Mar-16

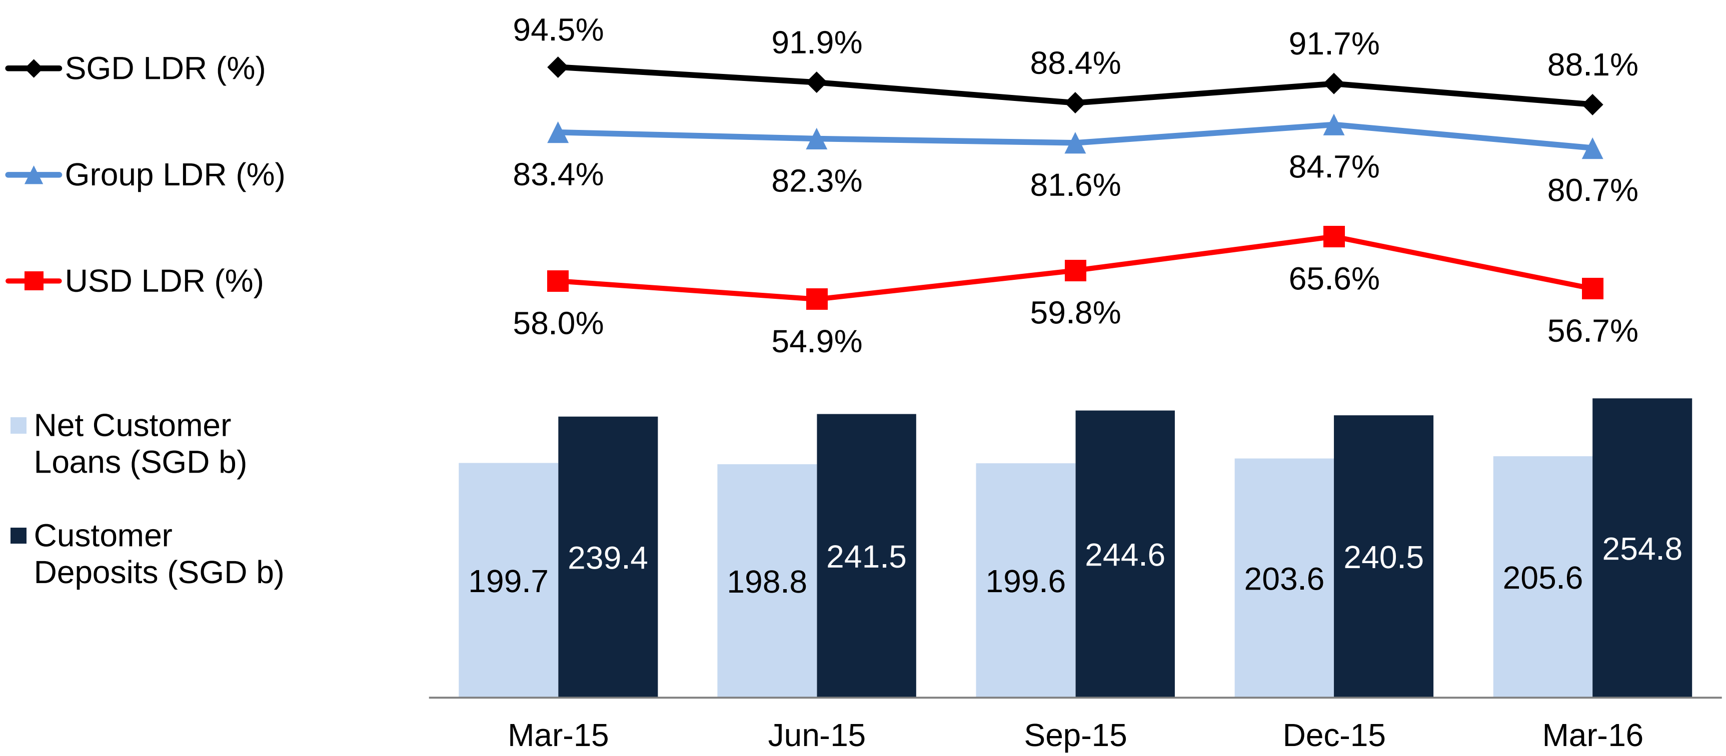


1. Loans by geography are classified according to where credit risks reside, largely represented by the borrower's country of incorporation / operation (for non-individuals) and residence (for individuals).

Stable Liquidity Position

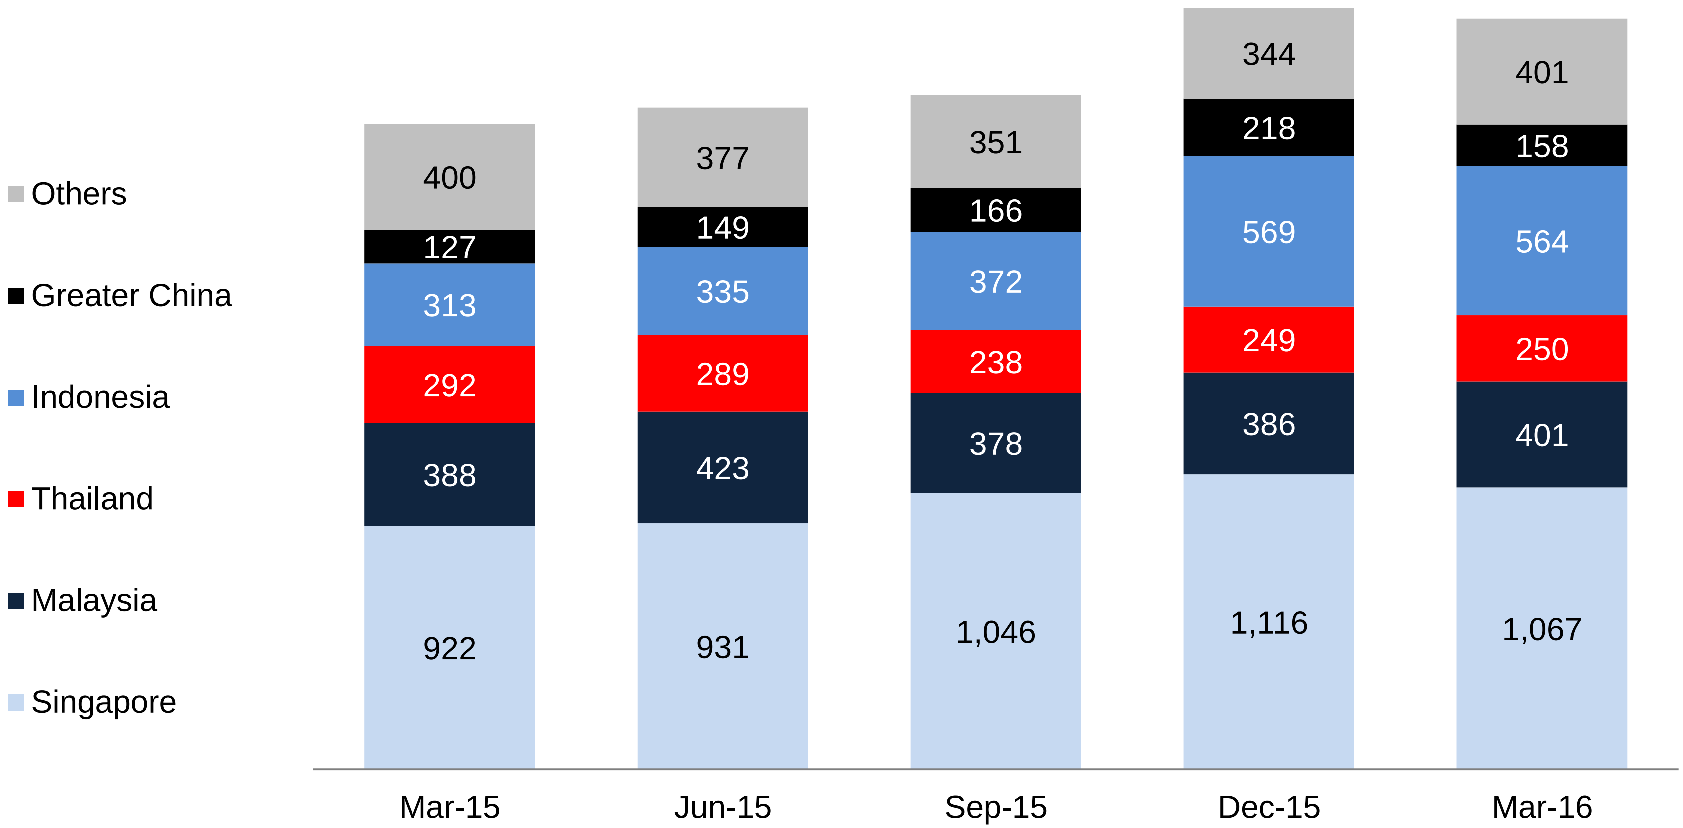
Customer Loans and Deposits; Loan/Deposit Ratios (LDR); and Liquidity Coverage Ratios (LCR)

All-currency LCR (%)	140%	152%	138%	142%	139%
SGD LCR (%)	150%	165%	179%	217%	169%



Robust Credit Quality;
NPL Ratio Stable at 1.4%

	Mar-15	Jun-15	Sep-15	Dec-15	Mar-16
NPL ratio	1.2%	1.2%	1.3%	1.4%	1.4%
NPLs[1] (SGD m)	2,442	2,504	2,551	2,882	2,841

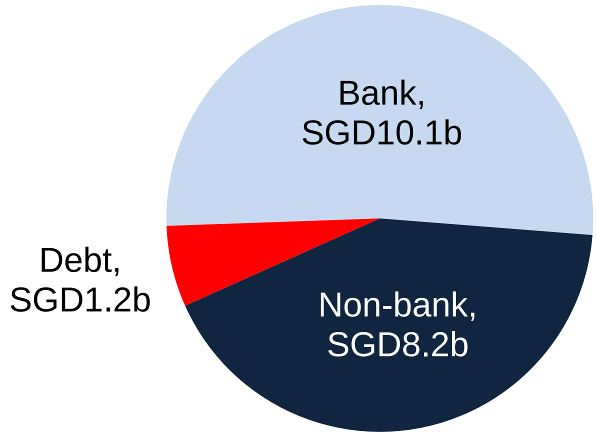


1. NPLs by geography are classified according to where credit risks reside, largely represented by the borrower's country of incorporation / operation (for non-individuals) and residence (for individuals).

Exposure to China

Total = SGD19.5b

or 5.9% of total assets



Bank exposure in China

- 99% with <1 year tenor
- Around 75% accounted for by top 5 domestic banks and policy banks
- Trade exposures mostly with bank counterparties, representing around half of bank exposure

Non-bank exposure in China

- Target customers include top-tier state-owned enterprises, large local corporates and foreign investment enterprises
- NPL ratio around 0.9%
- Around half of loans denominated in RMB
- Around half has tenor within a year
- Minimal exposure to stockbroking companies linked to China's stock market
- No exposure to Qingdao fraud and local government financing vehicles

Note: Classification is according to where credit risks reside, largely represented by the borrower's country of incorporation/operation (for non-individuals) and residence (for individuals).

Exposure to Commodities

As of 31 Mar 16	Oil and gas		Other commodity segments	Total
	Upstream industries	Traders/ downstream industries		
Total exposure[1]	SGD4.6b	SGD8.4b	SGD8.8b	SGD21.8b
Outstanding loans	SGD3.8b	SGD5.1b	SGD6.5b	SGD15.5b

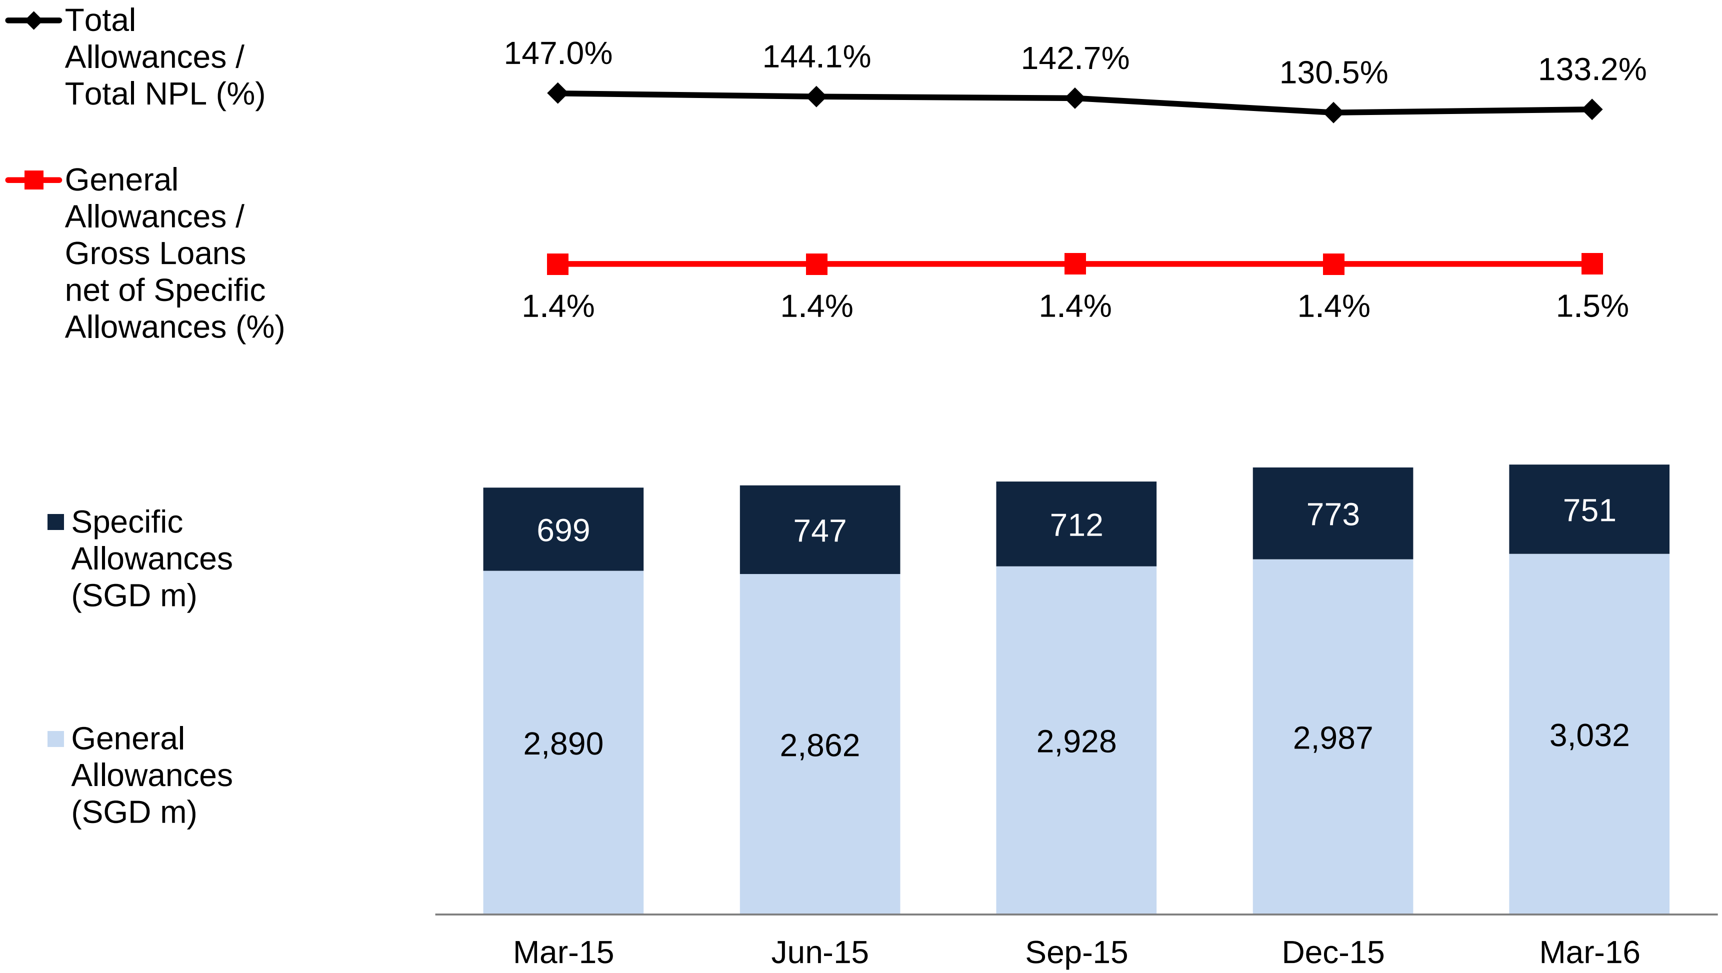
4% of total loans

7% of total loans

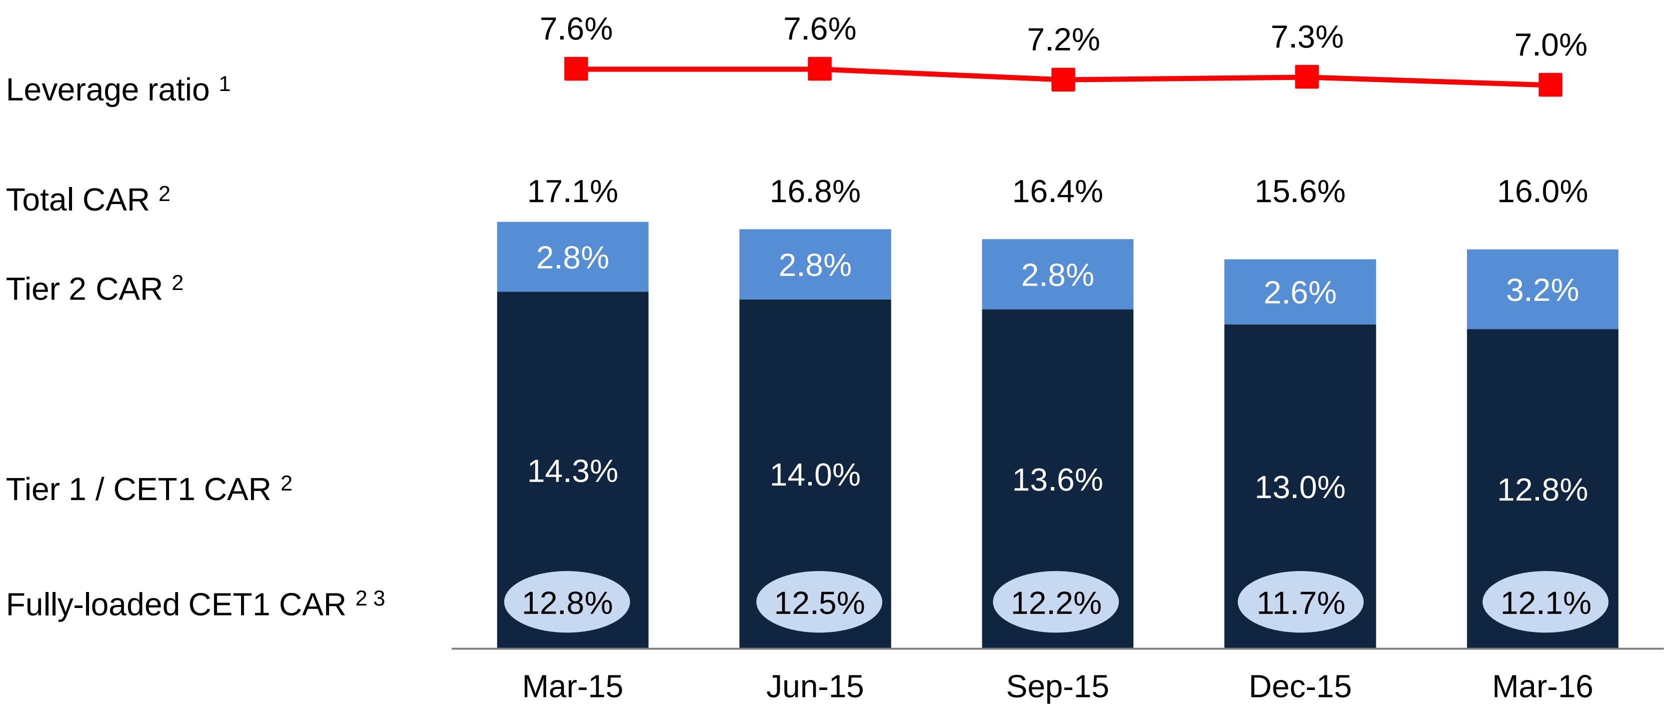
- Total exposure, including off-balance sheet items, stood at SGD21.8b as of 31 Mar 2016
- Mainly to traders and downstream segments
- Proactive monitoring, limit management and collateral enhancement

1. Total exposure comprises outstanding loans and contingent liabilities

High Allowances Coverage



Strong Capital and Leverage Ratios



SGD b					
Common Equity Tier 1 Capital	26	25	25	26	26
Tier 1 Capital	26	25	25	26	26
Total Capital	31	30	30	31	32
Risk-Weighted Assets	182	182	186	201	202

1. Leverage ratio is calculated based on the revised MAS Notice 637 which took effect from 1 January 2015.
2. CAR: Capital adequacy ratio
3. Based on final rules effective 1 January 2018.

Stable Dividend Payout

	2012	2013	2014	2015
Payout amount (SGD m)	1,102	1,182	1,201	1,442
Payout ratio (%)	39	39	37	45
