D. PRODUCT SUITABILITY

WHO IS THIS PRODUCT SUITABLE FOR?

- This product is only suitable for investors who believe that the Underlying Shares will increase and are seeking a short term leveraged exposure to the Underlying Shares. You should consider carefully whether the Warrants are suitable for you in light of your experience, objectives, financial position and other relevant circumstances. Warrants are not suitable for inexperienced investors.

Key Product Features

WHAT ARE YOU INVESTING IN?

- You are investing in cash-settled call warrants that allow you to take advantage of any increase in the price level of the underlying reference asset, which is DBS Group Holdings Ltd..

Further Information

Please refer to the "Information relating to Company" section in the Supplemental Listing Document

Calculation of Cash Settlement Amount

The Cash Settlement Amount, if positive, in respect of each Warrant will be paid in the Settlement Currency (subject as provided otherwise in the Conditions) calculated as follows:

- (A) (i) the arithmetic mean of the closing prices of one Underlying Share (as derived from the daily publications of the Relevant Stock Exchange, subject to any adjustments to such closing prices determined by the Issuer to be necessary to reflect any capitalisation, rights issue, distribution or the like) for each Valuation Date LESS (ii) the Exercise Price MULTIPLIED by
- (B) the Conversion Ratio.

WHAT WOULD YOU GAIN OR LOSE IN DIFFERENT SITUATIONS?

- Best case scenario:
The value of the Underlying Shares increases substantially resulting in a significant increase in the price of the Warrants. You would then sell the Warrants and realise a profit. The DMM is required to provide liquidity in the Warrants to ensure that there will generally be a market price available for the purchase and sale of the Warrants.
- Worst case scenario:
If you buy the Warrants and the value of the Underlying Shares decreases sharply. If you have not sold the Warrants, you will lose your entire investment.

E. KEY RISKS

WHAT ARE THE KEY RISKS OF THIS INVESTMENT?

- Investment in the Warrants involves substantial risks, including market risk, liquidity risk, currency risk and risk that the Issuer will be unable to satisfy its obligations under the Warrants. Investors should ensure that they understand the nature of all these risks before making a decision to invest in the Warrants.

PLEASE REFER TO THE LISTING DOCUMENTS FOR A COMPLETE LIST OF RISKS

- The Risk Factors below are a summary of the Risk Factors set out in the Listing Documents.

Further Information

Please refer to the "Risk Factors" section set out in the Listing Documents for a complete list of risks and details of the risks.

Market risks

Market price of the Warrants may be affected by many factors

- The market price of the Warrants may be affected by different factors including but not limited to the level and volatility of the Underlying Shares and the exercise price of the Warrants.

You may lose your entire investment

- Changes in the price of the Underlying Shares can be unpredictable, sudden and large, resulting in the Underlying Shares moving in a direction which will negatively impact upon the return on investment. If the price of the Underlying Shares reaches a level such that the Cash Settlement Amount at expiry is less than or equal to zero, you will lose your entire investment.

You are exposed to the credit risk of the Issuer

- The value of structured products may depend not only on the performance of the underlying(s), but also on the creditworthiness of the Issuer, which may change during the term of the structured product. The investor is exposed to the risk of default of the Issuer.
- The Warrants constitute direct, general and unsecured contractual obligations of the Issuer and of no other person, and rank on a parity with the Issuer's other unsecured contractual obligations and unsecured and unsubordinated debt other than indebtedness preferred by mandatory provisions of law. If the Issuer is unable to meet its obligations under the Warrants, you may lose your entire investment.
- As the Issuer is not incorporated in Singapore, any insolvency proceedings in respect of Issuer will be subject to foreign insolvency laws and procedures.

Further Information

For further information on the rating of Bank Vontobel AG, please see the Listing Documents.

Liquidity risks

- The Issuer acting through its DMM may be the only market participant buying and selling the Warrants. Therefore, the secondary market for the Warrants may be limited and you may not be able to realise the value of the Warrants. Do note that the bid-ask spread increases with illiquidity.

Exchange Rate risks

- If the Underlying Share is denominated in a currency other than the product's reference currency, investors should bear in mind that this may involve risks due to fluctuating exchange rates and that the risk of loss does not only depend on the performance of the underlying(s) but also on any unfavourable performance of the other currency or currencies. This does not apply for currency-hedged products (quanto structure).

Product Specific risks**Trading in the Warrants may be suspended**

- If trading in the Underlying Shares is suspended, trading in the Warrants will be suspended for a similar period.

Issuer may make adjustments to the terms and conditions of the Warrants

- You should note that an investment in the Warrants involves valuation risks in relation to the Underlying Shares. The value of the Underlying Shares may vary over time by reference to various factors, including corporate actions of the underlying company. Certain events relating to the Underlying Shares may require or permit the Issuer to make certain adjustments or amendments to the Conditions. However, the Issuer is not required to make an adjustment for every event that affects the Underlying Shares and if an event occurs which does not require the Issuer to adjust the Conditions, the market price of the Warrants and the return upon exercise of the Warrants may be affected.

F. FEES AND CHARGES**WHAT ARE THE FEES AND CHARGES OF THIS INVESTMENT?**

- Normal transaction and brokerage fees apply, similar to fees that you would pay for other transactions on SGX-ST.

LEGAL NOTICE

Statutory notices

Bookings for the issue of the product are made or taken in Switzerland. None of the Issuer, the relevant branches or offices of the Issuer through which bookings for the issue of the product are made or taken, are regulated, authorised or supervised by the Monetary Authority of Singapore or any other regulatory authority in Singapore.
