Resilience Amid Macroeconomic Uncertainties

CLAS' diversification and stable income sources cushion the impact from tariffs

Tariffs may lead to...

…higher costs	reduced lodging demand	interest rate and foreign currency volatility
	Mitigated by	
 CLAS' predominantly long-stay properties have leaner cost structures compared to full-service hospitality properties For properties under master leases, operating costs are largely covered by the lessees, and for longer-stay accommodation, utility costs are borne by the tenants CLAS' properties have the flexibility to adjust room rates to mitigate inflationary pressures Further steps will be taken to manage costs, including deferring non-essential capital expenditure 	 Stable income sources comprise 60% - 70% of CLAS' gross profit Average length of stay of CLAS' portfolio was c.2 months in FY 2024 Longer-stay accommodation are countercyclical and resilient through market cycles Master leases and MCMGI offer downside protection Diversified guest mix across corporate, leisure, international and domestic segments Properties are primarily in the mid-tier segment Well-positioned to cater to travellers who now seek more affordable options 	 High proportion of debt effectively on fixed rates, for a weighted average of c.3.6 years Average cost of debt is low at 2.9% p.a. and interest cover is healthy at 3.2 times Geographically diversified with 12 foreign currencies, and the strengthening of some currencies balances out the weakening of others CLAS adopts a natural hedge by borrowing in the currency of the underlying assets and hedging instruments are used where appropriate

Resilience Amid Macroeconomic Uncertainties

CLAS remains committed to delivering stable distributions to Stapled Securityholders

	Resilient operating performance	 Notwithstanding the current macroeconomic uncertainties, CLAS' performance is expected to remain resilient given its diversification and base of stable income, which comprises 60% - 70% of CLAS' gross profit
	Asset enhancement	 Completed and planned AEIs are expected to uplift CLAS' distribution income CLAS currently intends to distribute past undistributed divestment gains to mitigate short-term impact of AEIs which are planned to be carried out in 2025 and 2026 CLAS will monitor the macroeconomic situation, lodging demand and renovation costs, and may adjust the AEI schedules as appropriate
	Portfolio reconstitution	 CLAS continues to evaluate opportunities to divest and reinvest proceeds into more optimal uses to deliver higher returns to Stapled Securityholders
(S)	Capital management	 CLAS has a healthy financial and liquidity position, and will continue to adopt a proactive and disciplined approach in capital management
