NEWS RELEASE

HYFLUX WINS CONTRACT TO SUPPLY CONTAINERISED DESALINATION SOLUTION TO KINGDOM OF SAUDI ARABIA

Singapore, 2 June 2015 - Hyflux Ltd, through its wholly-owned subsidiary Hydrochem Saudi Limited, has been awarded a contract worth about US$48 million from the state-owned Saline Water Conversion Corporation to design, build and supply a containerised desalination system with a total designed capacity of 30,000 cubic metres per day to the Kingdom of Saudi Arabia.

The containerised desalination system will be located on the site of the existing Yanbu Desalination Plant on the Red Sea coast, 350 km north of Jeddah. It will be one of the largest of its kind and augment the desalination plant's capacity to ensure a continuous and reliable water supply to the industrial city of Yanbu and the nearby Medina region.

Under the contract, Hyflux will build 10 modular containerised units, which will incorporate its proprietary Kristal® ultrafiltration membrane technology for the pre-treatment phase of the seawater reverse osmosis desalination process. Each unit will have the capacity to desalinate 3,000 cubic metres of water per day. The project is expected to be completed in approximately eight months.

Hyflux's modular containerised desalination solution provides high quality water while minimising the impact on the environment. The system is compact and flexible, which makes it easy to deploy, install and commission.

"We are honoured to be given this opportunity to work with SWCC. This project is a great example of Hyflux's ability to provide quick, cost-effective solutions for our customers," said Ms Olivia Lum, Executive Chairman and Group CEO of Hyflux.

This contract for the containerised desalination system is expected to contribute to the financials of Hyflux for the financial year ending 31 December 2015.

About Hyflux

Hyflux is a leading fully-integrated provider of water and power management and innovative environmental solutions. Headquartered and listed in Singapore, Hyflux has operations and projects in Southeast Asia, China, India, the Middle East and North Africa. Hyflux is committed to providing cost-effective and sustainable solutions in seawater desalination, water recycling, wastewater treatment, including membrane bioreactor (MBR) and potable water treatment. The Group's track record includes Singapore's first water recycling plant and two seawater reverse osmosis (SWRO) desalination plants, and some of the world's largest SWRO desalination plants in China and Algeria.
