Key Qualifications

Anthony Budiawan earned his Master degree in Business Economics from Erasmus University Rotterdam, the Netherlands. In addition, he also earned a professional designation in management accounting from the Institute of Certified Management Accountants of the United States. He started his early career in academics at Institut Bisnis Indonesia (IBII) in 1989/1990, having last position as Assistant Director of Academic Affairs.

Thereafter, he established a management consulting company (1996 to 2008) focusing on business process improvement to increase client's productivity, while utilizing the latest information and communication technology as an enabler. During his consulting career he has been involved in various business improvement projects, development of management information and reporting systems for better management decisions, development of management accounting concepts such as product costing and responsibility accounting, in various industries: manufacturing, distribution and retail, among others.

Next to his consulting activities, Anthony has been actively involved in a non-profit organization. He was one of the board members of the Indonesia Financial Executive Association founded in 1975. He is one of the founders, and appointed as executive director, of the Indonesia Institute for Financial and Economic Advancement (IIFEA), established in late 2009. IIFEA is a non-profit think-tank organization that aims to contribute in the concept of economic development of Indonesia to improve the nation's wealth and prosperity, while eradicating poverty. As of September 1, 2011, he returned to the business school, renamed as Kwik Kian Gie School of Business, and assumes the responsibility as Rector until 31 August 2015

He was a member of an independent assessment team and co-writer of "Alternative Solutions for Bond Recapitalization Issues", that is a solution paper with regard to the government bonds issued in relation to the bailout of troubled banks during the Asian financial and monetary crises that broke out in 1997. He is also an author of unpublished book titled "Another Indonesia is Possible" that presents an economic development path of Indonesia to create wealth and prosperity of its people.

Economist and

In addition, Anthony also actively involved in the discussions of Indonesian

Public Speaker economy through writing and public speaker in various seminars.
