## Navigating the COVID-19 Situation

### Developments on the ground

 Gradual return of tenants to offices after the two-month "Circuit Breaker"; site visits by prospective tenants can resume with adherence to social distancing requirements

 On 5 June 2020, the COVID-19 (Temporary Measures) (Amendment) Bill was passed in Parliament and provides for co-sharing of rental waiver to eligible small and medium enterprises (SMEs) by the government and the landlord:

- Eligible retail SMEs, gyms and clinics: two-month rental waiver by landlord, in addition to the pass-through of the 100% property tax rebate and cash grant from the government which amounts to approximately two months of rental
- Eligible office SMEs: one-month rental waiver by landlord, on top of the pass-through of the 30% property tax rebate and cash grant from the government which amounts to approximately one month of rental

#### Facilitating return of tenants to offices as restrictions are gradually eased in most states

 "Mandatory Code of Conduct" issued by the National Cabinet, focusing on SMEs with turnover below \$50m, which seeks to protect eligible tenants from termination of leases and entitles eligible tenants<sup>(1)</sup> to rent waivers and deferrals

#### South Korea

**Australia** 

**Singapore**

including estimated \$9.2m of government property tax rebates and cash grant

#### **Rental collection**

98%

in 2Q 2020

#### **Rental deferrals**

\$1.6m

as at 30 Jun 2020

<sup>(1)</sup> Only applicable to SMEs with turnover of \$50m or less, and who are eligible for the federal Jobkeeper program. One of the main criteria for a business to be eligible for the program is a projected reduction of revenue by more than 30% due to COVID-19. Rent reductions may consist of a combination of waivers and deferrals where rental waiver must be no less than 50% of the total rent reduction.

## Facilitating Return to Workplaces

#### **Examples of measures in place:**

- Temperature scanning and contact tracing measures
- Interlinked building card access and lift destination control systems facilitate contactless entry and social distancing
- Regular purging of air from building
- Maintaining good air quality with advanced air filtration systems

High indoor air quality

#### Safe access

#### Increased disinfection

- Increased cleaning frequency of high contact areas
- Hand sanitisers at common areas

#### **Technologically** -sound environment

Equipped with appropriate broadband network infrastructure to support internet bandwidth for tenants' video conferencing and meeting facilities

## Office Remains a Necessity

Physical offices will remain a necessity, although the form and functions of the office will evolve

Varying adoption of telecommuting

While firms will likely incorporate work-from-home, many functions will still require office space for social interaction, client engagement and collaboration.

Reversal of densification

 Space required for each employee may need to increase to incorporate social distancing, reversing the densification trend in the last two decades.

Shifts at measured pace

Impact on office demand will likely be at a measured pace as existing leases are typically three to five years in duration.

Potential deferral of supply

 Ongoing developments may be delayed by social distancing restrictions at construction sites. Future developments may also be deferred or changed to non-office use.

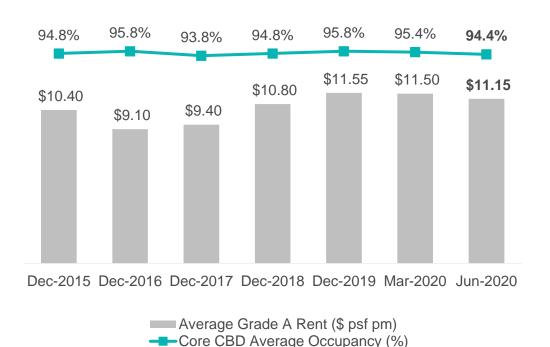

Keppel REIT will continue to optimise the portfolio and calibrate its leasing strategy to meet potential shifts in occupier demand Robust Best-in-class. portfolio in safe and quality welltechnologically networked -sound work locations environments Proactive tenant engagement to find solutions that best support occupier needs
